LETTUCE GRAND RAPIDS, BIG BOSTON, \$1.00 per 1000.

J. C. SCHMIDT, BRISTOL, PA.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Rooted Cuttings Ready January 15, 1910

December and first part of January cuttings all sold.

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following:

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Rooted Cuttings Ready February 1, 1910

January cuttings all sold.

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

DAHLIAS Every Day In the Year

A New Seedling Carnation of Wonderful Merit.

Will be offered to the Florists' Trade in February, 1910. Orders Booked Now. New Creation.

THE CONSTANT

was grown by Wm. Bester, of Hagerstown, Md. Color between Rose Pink and Winsor. Produces long Stems and large Blooms from October to June. Free of any disease and no cropper. Calyx perfect. Blooms keep in good condition 10 days.

This Carnation has been grown and tested by Mr. Bester for three years and all points guaranteed. Produced under the most scientific cultural conditions and will supercede the Lawson.

Price for Strong Cuttings, \$10.00 per 100.

C. S. FORD, Florists' Supplies, Novelties, Etc.
Box 4515. WEST PARK, PHILA., PA.
Established 1881

Also Representing A. Herrmann, 404-412 East 34th St., New York, and others. Tioga Branch conducted by A. M. Ford, Tioga, Phila., Pa. Plants can also be secured of Wm. Bester, Florist Hagerstown, Md.

SHASTA

Come and see Shasta growing, and be convinced that it is the greatest money making carnation in sight today. In point of freedom it excels any variety ever introduced. Carries more buds right now than most varieties produce in a whole season. The quality is there, too. High score everywhere. 89 points at the A. C. S. meet last January. Can be seen at either Indianapolis or Tewksbury.

Booking orders now for Jan. delivery \$12.00 per 100; \$100.00 per 1000.

HARDY ROSES For Forcing Ready for Immediate Delivery

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the fall or late winter become better established and force better, and are far more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

Something New in Roses for Florists

Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60 cents each, \$6.00 per dozen, \$45.00 per 100.
BABY RAMBLER (Half standard). Crimson. 45 cents each, \$4.50 per dozen, \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45 cents each, \$4.50 per dozen, \$35.00 per 100.
BABY "STARS and STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50 cents each, \$5.00 per dozen, \$40.00 per 100.

Hardy Perpetual Roses

We offer extra strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name.

Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1000.

Alfred Colomb. Carmine.
Anne de Diesbach. Bright carmine.
Ball of Snow. Pure white.
Baron de Bonstetten. Dark crimson shaded.
Baroness Rothschild. Satiny pink; extra.
Captain Christy. Delicate flesh color.
Duke of Edinburgh. Bright vermillion; very fine.
Fisher Holmes. Dark rich scarlet.
FRAU KARL DRUSCHKI. The finest white in existence.
General Jacqueminot. Rich velvety crimson.
General Washington. Beautiful red, shaded carmine.
John Hopper. Beautiful rose-pink.
La France. The finest light pink.
Margaret Dickson. White, pale flesh center.
Magna Charta. Clear rosy pink.
Mme. Gabriel Luizet. Light satiny pink.
Mme. Planter. White.
Mrs. John Laing. Soft pink. Most desirable variety.
Paul Neyron. Beautiful dark pink.
Princess Camille de Rohan. Velvety crimson.
Ulrich Brunner. Cherry-red.

Forcing Rambler Roses

American Grown. The Only Stock for Forcing
CRIMSON RAMBLER

Large heavy plants, two years old, mossed and packed in bundles of 10.

	10	100
3 to 4 feet.....	\$1.25	\$12.00
3 to 5 feet.....	1.75	15.00
4 to 6 feet, extra strong and heavy.....	2.25	20.00

DOROTHY PERKINS

Shell Pink. \$1.25 for 10, \$12.00 per 100. Extra strong, \$1.75 for 10, \$15.00 per 100.

Tausendschon

The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Tausendschon (standard grown). Each 50c., doz. \$5.00, 100 \$40.00.
HIAWATHA. The flowers are single and are of a deep, intense crimson shade with the petals shading to a pure white base. Flowers very freely and is undoubtedly one of the best of the single Roses for forcing. Extra strong, two-year, field-grown, \$3.25 for 10, \$30.00 per 100.

WEDDING BELLS. A seedling of the Crimson Rambler. The most floriferous Rose yet produced. The color is white with the upper part of the petals soft-pink. Fine for forcing. Perfectly hardy. Extra strong two-year-old field-grown flowering plants, 3 to 4 feet. \$2.25 for 10, \$15.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, \$2.25 for 10, \$15.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The Pink Baby Rambler, and bound to find favor where the Baby Ramblers are popular. \$1.75 for 10, \$16.00 per 100.

BABY RAMBLER

(Mme. Norbert Levavasseur)

Strong field-grown plants, \$1.75 for 10, \$15.00 per 100.

In writing to Advertisers kindly mention Horticulture

Plant Novelties from China

In the early part of the nineteenth century European horticulture received an immense impetus by the introduction from Canton (South China) of varieties of Chinese azaleas, camelias, Moutans, chrysanthemums, roses and numerous other treasures including the Chinese primrose, *Dendrobium nobile* and *Wistaria sinensis*. This was followed by the great work of Robt. Fortune, during the middle of the century, in and around Shanghai, Ningpo and Japan. In those early days the gardens and nurseries of the Chinese contained a wealth of new and interesting plants and it was from these sources that most of the new introductions were obtained.

From the middle to the end of the last century Japan offered a more attractive field as a source of new plant treasures and China remained neglected. True, in 1879, the late Chas. Maries, then in the employ of the house of Veitcs, ascended the Yangtze river as far as Ichang, staying off at Kiukiang en route. From the latter place he introduced *Loropetalum chinense* and *Hamamelis mollis*—both grand plants. Ichang did not appeal to him as a likely field and after a week's stay he abandoned it, having secured, however, seeds of *Primula obconica* which has since become such a deservedly popular plant. Perhaps the fact of China being such a densely populated country and its geography so little known was responsible for the general impression that its supply of good horticultural plants had been exhausted. In any case the fact remains, China was ignored until the extraordinary collections of dried plants made by Fathers Delavay and David in the far west, and by Augustine Henry in the heart of the country began to be examined. It was then seen that the real flora of China was infinitely richer in horticultural plants than the world had dreamed and that it remained still the one country, *par excellence*, deserving of investigation. One of the earliest to advocate this was Prof. C. S. Sargent of the Arnold Arboretum and this gentleman, more perhaps than anyone else, was responsible for the investigations which began early in 1899 and are still in progress. Recommended by the then Director of Kew Gardens (Sir William T. Thiselton-Dyer) to Messrs. Veitch the writer was fortunate enough to secure the appointment and sailed from England in early April, 1899. Since then he has been engaged in the exploration of the plant-life of central and western China—latterly in the interest of Arnold Arboretum.

A decade has passed since the writer's first packet of seed was despatched from China. The first new plant was exhibited in the spring of 1902 and received a first-class certificate, the highest award of the Royal Horticultural Society of London. Since then over fifty new plants have received either certificate or award and there are still many other to follow. For the purpose of convenience the subjects will be grouped under the headings Herbs, Climbers, Shrubs and Trees.

HERBS

Herbaceous plants do not appear to enjoy the same favor in this country as in England and whilst there may be good reasons for this it cannot be gainsaid that they include a great variety of beautiful plants of perfect hardiness and easy culture which properly arranged are capable of embellishing and beautifying almost any and every situation, be it woodland, waterside, or immediate precincts of the house. In a state of nature the majority of these showy and strong-growing herbs are found growing in the margins of woods and thickets, or sides of streamlets, situations where the roots are kept cool and abundantly supplied with moisture, and in the autumn the crowns are covered with quantities of fallen

ACONITUM WILSONI

leaves, items of much moment in their successful culture. Besides good soil and plenty of water, frequent division and transplanting—if border cultivation is attempted—is necessary to ensure the best results. New introductions from China have supplied many novelties of merit. One of these is *Aconitum Wilsoni*. This new Monkshood is allied to the old *A. napellus* and is a strong growing plant, 6 to 7 feet high, flowering in September. The leaves are leathery, dark green and much divided; the flowers large and very deep blue. After the main spike is past axillary branches continue to bear flowers until the advent of sharp frost. The rootstock is tuberous and the plants require strong soil and to get established ere the best results are obtained. Another equally good but very distinct aconite is *A. Hemsleyanum*. This species is a climber, 8 to 12 feet high, and in a wild state frequents thickets, climbing over shrubs and festooning them with a wealth of large flowers in August and September. These flowers vary considerably in color and though most fancy the deep blue forms best others declare the pale forms equally beautiful. The best is not yet known of this plant; selection and good cultivation will yield something far better than the wildling. The rootstock is tuberous and the twining stems, if made into cuttings in late July, root readily. *Aconitum Wilsoni* is easily raised from seeds but the opposite is true of *A. Hemsleyanum*. Both these aconites would be perfectly hardy around Boston and are well worthy of cultivation.

S. W. Wilson.

Poisonous rose thorns More than usual complaint has been made this fall of hands poisoned by rose thorns in handling by the clerks in the flower stores of Boston. The trouble is very general, many having fingers almost covered with festering wounds after the Christmas rush. The impression is prevalent that the poison comes from some substance used as a fertilizer or insecticide on the plants and no other plausible explanation of the trouble has thus far been advanced by growers or others. It is

a matter that should be investigated. The assistance of the Agricultural College experts might be enlisted and they, no doubt, would be glad to make an effort to determine the cause. Something should be done promptly as it is not likely that the little local blisters and sores mark the limit of the possible mischief.

A treat in store As a New Year's gift to the gardening and nursery interests of America we present in this issue the first of a series of weekly contributions from the pen of the most noted

plant collector of our times, Mr. E. H. Wilson, a gentleman who has enriched our variety of tree, shrub and hardy herbaceous garden material to an extent unapproached by any other explorer. Mr. Wilson has spent the past ten years in the hitherto unexplored mountains of China, first in the interests of Veitch of London, Eng., and afterwards for the Arnold Arboretum of Boston, Massachusetts. He has written nothing heretofore for any American publication and his contributions will now appear in HORTICULTURE exclusively. Anything from the pen of this intrepid traveler must be of engrossing interest to the horticulturist and the value of these papers to our horticultural industries can hardly be computed. The influence of this multitude of hitherto unknown species and varieties upon the garden flora and sylvan scenery of the future will unquestionably be very marked and HORTICULTURE feels highly honored in having been selected as the medium through which the first direct information concerning them is to reach the gardening fraternity of America. Mr. Wilson's contributions will fill in the period of the temporary discontinuance of Alfred Rehder's notes from the Arnold Arboretum which have awakened much interest among our readers.

Why don't you try? In extending to our readers cordial wishes for a Happy and Prosperous New Year we take opportunity to remind them that the paramount object for which HORTICULTURE exists and labors is the dissemination of useful horticultural information and that they can all assist towards the attainment of this purpose by contributing freely from their own store of practical knowledge in their several departments, telling how to do the best things in the best way, as their experience has taught them. Next to reliability in such contributions, we might suggest to the intending author that the best quality is conciseness and simplicity of expression. There are in the ranks of professional gardeners and skilled florists many who are well qualified to enlighten and entertain their fellows and who ought to do so, but they hesitate to make the attempt because they underestimate their own ability. There is plenty of room at the present time for bright, newsy writers on horticultural topics and corresponding for a trade paper is excellent practice especially if it be done with a desire to excel in the use of those forms of expression which tell the story truthfully, comprehensively, briefly. The habit of using a plethora of words and lengthy dissertations on trifling things may be safe for the writer who combines with it a flow of spontaneous wit or some other rare natural gift. That one cannot successfully imitate such should not, however, deter him from telling his story in his own way without forced embellishment. There are plenty of appreciative readers waiting for the plain, practical experience of the plain, practical man and HORTICULTURE's columns are always wide open for such material.

A Good Dollar's Worth

Volume IX of HORTICULTURE, January-June, 1909, comprised 920 pages; volume X, July-December, 952 pages—1872 pages, made up of original, practical information, most of it as useful today or a year from today as when written, timely news of the profession from all parts of the world, and advertisements giving publicity to the latest and most valuable advances made in plant and seed improvement and inventions and appliances for use in every department of horticulture! Is not this a big dollar's worth which HORTICULTURE has provided for its subscribers for the year 1909? The list of contributors includes the names of many men who stand in the front rank of their profession not only as writers but as practical men in their special department of work; the editorials are recognized at home and abroad as without a rival in American horticultural literature. Effort and expense to the full limit of our ability have been invested that HORTICULTURE might grow to be the foremost exponent of the art from which it takes its name. Our policy for the year to come will be the same, and the production which we shall put out from week to week will excel that of the past in proportion to the support we shall receive from the profession in whose interests HORTICULTURE is published. If you who read these lines are not already a subscriber we trust we have said enough to convince you that you cannot spend a dollar for a better purpose than a subscription to HORTICULTURE for 1910. If you are a subscriber, we hope you will pass the word along to your friends who are not. Whether you or they are holding positions of high or low degree it will pay you well to read HORTICULTURE regularly. And if you do not find in its columns what you are most desirous of knowing send in your request and we shall endeavor to meet the requirements.

Happy New Year

Trans-Atlantic Notes

EDINBURGH SEEDSMEN'S ASSISTANTS' ANNUAL DINNER

This event took place at the Carlton Hotel on Friday, December 2. Mr. W. Newton in the chair. After the loyal toasts the chairman gave the toast of the evening, "The Edinburgh Seed Trade Assistants." In the course of his speech he pointed out that more was required than merely manual work and mental work was needed to make themselves thoroughly efficient, and was of the greatest importance. Other toasts followed, and with a host of musical talent a most enjoyable evening was spent.

TESTIMONIAL TO MR. JAMES GRIEVE OF REDBRAES NURSERY, EDINBURGH

The numerous friends of Mr. J. Grieve on the occasion of the jubilee year of his connection with the Edinburgh nursery trade presented him with a fitting testimonial—a gold watch and a purse of fifty sovereigns in the Royal British Hotel, Mr. Wytock in the chair, Mr. D. W. Thomson being called on to make the presentation speech. Mr. Grieve under much emotion made a

most suitable reply expressing his gratitude to, and his appreciation of his many friends as capping his life long labors.

NANCY

At Tallandier's Nursery, Nancy, the specialty of the proprietor is begonias, which are raised in enormous numbers. Of the variety Lafayette, the well known, best begonia in France for bedding purposes, Tallandier has 1,000,000 plants. His chief customer is the firm of Vilmorin & Cie, in Paris.

The gladiolus, as is well known, forms one of the special branches of M. Lemoine's establishment at Nancy; and preference is given to the Lemoinei and Nanceanus sections, which in the heavy loamy soil of the nursery succeed in a capital manner. It was in 1880 that Lemoine put Gladiolus Lemoinei into commerce. This race was derived from crosses with species, natives of Asia Minor; and the more typical of these hybrids are those having dark colored markings in the throat of the flower; whilst G. Nanceanus, in addition to these markings in the throat, has stripes and blotches. Certain individuals of these two races possess a suggestion of G. Gandavensis and its varieties or mongrels; and are likely to have a brighter future, owing to the flowers being more open. A strikingly beautiful representative of this class is G. America, whose flowers are of an enormously large size, a strong spike, and numerous flowers, and has the property of the old Lemoinei race of producing two to three flower spikes from one corm. Of pleasing tints, mention may be made of flowers having deep velvety black-brown coloring; also of one of pure yellow—one of the earliest to flower of the G. Lemoinei varieties.

Other than the above there scarcely exists any other horticultural establishment of importance; but no one visiting Nancy should omit paying a visit to the town garden, the Par de la Pepiniere which was laid out by the director of Promenades, M. Thirion, and maintained in wonderfully good order. It exhibits numerous artistically planted groups and beds and furnishes an abundance of hints and much stimulation to the landscape gardener.

The market is interesting to the gardener; and as there are but few florists' shops, and these of modest pretensions, almost the whole of the trade in plants and flowers is done on the Place in front of the Market Hall. There is a great choice of products. Foremost are (in late summer) the hydrangeas, oleanders, ferns, selaginellas, palms, cycas, pelargoniums in astonishing variety, likewise fuchsias, carnations, petunias, celosias and Ficus elastica, and, Nancy being so to say the oldest and classical centre for begonia cultivation one may notice entire collections of these plants from those raised by Crouss, long ago, to the most modern novelties. Indeed the choice of plants in pots is extraordinarily large, but they do not all exhibit first-class cultivation. The cut flower market is abundantly supplied with herbaceous perennials.

POLYGONUM MULTIFLORUM

This is an ideal plant for covering arbors, dead trees, etc., the long rampant growths, often attaining the length of from 20-30 feet in one season, producing a highly ornamental effect when allowed to ramble at will over such subjects.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Program of lectures and discussions during the season of 1910, to be held at Horticultural Hall, 300 Massachusetts avenue, Boston, Saturdays, at 11 o'clock, a. m.:

January 1.—Inaugural Meeting. President's Address. Annual Reports.

January 8.—Plant Hunting in the Heart of China. Stereopticon Illustrations. By E. H. Wilson, Arnold Arboretum, Jamaica Plain.

January 15.—The Use of Water in Commercial Gardening. By H. M. Howard, West Newton.

January 22.—A Study of Continental Landscape Gardening. Stereopticon Illustrations. By Albert D. Taylor, M. S. R., Ithaca, N. Y.

January 29.—Apple Growing in New England as a Business. Stereopticon Illustrations. By E. Cyrus Miller, Haydenville.

February 5.—How New Races of Plants Arise Through Hybridization. By Ezra Brainerd, Middlebury, Vt.

February 12.—Some Practical Results of Investigations of Diseases of Trees on Structural Timber. Stereopticon Illustrations. By Dr. Hermann von Schrenk, St. Louis, Mo. (The John Lewis Russell Lecture).

February 19.—The New Agriculture and its Significance to New England. By G. C. Sevey, Editor New England Homestead, Springfield.

February 26.—Exhibition of Plants, Flowers, Fruits and Vegetables.

March 5.—Horticulture as a Profes-

sion for Women. By Miss Laura Blanchard Dawson, Jamaica Plain.

March 12.—Lilies in the Home Garden. Stereopticon Illustrations. By E. S. Miller, Wading River, N. Y.

March 19.—The Dietetic Value of Fruit. By Prof. Wm. R. Lazenby, State University, Columbus, O.

Wm. J. Stewart, Chairman; J. A. Pettigrew, Wm. P. Rich, Miss Mary L. Ware, Prof. F. A. Waugh, Committee on Lectures and Publications.

A NOTABLE EXHIBITION.

The Lecture Hall in Horticultural Building, Boston, is occupied this week and next by a superb collection of photographs of scenes in the heart of China, taken by E. H. Wilson during his explorations in that country for the Arnold Arboretum. There are 720 of these pictures which depict wonderful natural scenery, some being taken at an elevation of from 11,000 to 15,000 feet. Many new as well as old familiar trees and shrubs and herbaceous plants are shown in their natural character and environment, some of them attaining dimensions far beyond any specimens under cultivation. One can spend hours inspecting this remarkable exhibition which represents an expenditure of much time and labor. Mr. Wilson will lecture on his Chinese travels, before the Massachusetts Hor-

ticultural Society on Saturday, January 8, at 11 a. m., and will show a series of stereopticon views of great interest and beauty.

The Commercial Florists' Association of Rochester, N. Y., is rapidly growing, having now a membership of 125. The next meeting, January 10, will be held in the new and commodious club room where facilities are excellent for social as well as business proceedings. Enthusiasm regarding the S. A. F. Convention for next August grows steadily.

SELECT FERNS for FINE STORE TRADE

We offer a grand lot of exceptionally well-grown plants of the different varieties of NEPHROLEPIS which will be found one of the best selling and most profitable plants that florists can handle.

Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

IMPROVED ELEGANTISSIMA. The finest of all this type. It was introduced by us in 1905. This form of Elegantissima has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4 in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

SUPERBISSIMA. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

BOSTONIENSIS, PIERSONI, WHITMANI, SCOTTII. Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

Delivery Guaranteed

Direct from the German Mines
to Your Farm

Some fertiliz manufacturers may tell you that they will sell you potash cheaper than we will. We are offering carloads for cash direct from the German mines to the buyer at the lowest price ever quoted. If any one offers it to you for less than our price, before accepting his offer be sure that the manufacturer signs a contract with you absolutely *guaranteeing delivery of potash salts* and not some substitute in the shape of such mixed goods

as he may have on hand at the close of the season.

You know how it has been in the past. If you are contracting for other fertilizers, be sure that the contract requires delivery of the potash at the same time with or before the delivery of the other goods. Do not accept the other goods until the potash is delivered. Do not depend on the assurance of the salesman. Write it in the contract. It will pay you to do so.

CATALOGUES RECEIVED.

J. F. Noll & Co., Inc., Newark, N. J.—Catalogue of Seeds, Plants, Bulbs, Nursery Stock and Poultry Supplies for 1910. An attractive, well-illustrated catalogue.

New England Nurseries, Inc., Bedford, Mass.—“Standard Fruits for New England Planting.” A handsomely gotten-up and well-chosen list which will be welcomed by the reviving fruit interests of the eastern states as a guide in the selection and planting of the most reliable and desirable orchard and garden fruits.

W. Atlee Burpee & Co., Philadelphia, Pa.—Burpee's New Annual. The Plain Truth About the Best Seeds that Grow, for 1910. This expressive title tells the story as to the contents of the book. It is Mr. Burpee's 34th year and the catalogue bears evidence in plenty that things continue to prosper in his domain. Besides the covers, which are beautifully adorned with pansies and muskmelons respectively, there are several inserts in colors, two of which are vegetable subjects and the others show *Dimorphotheca aurantiaca*, a novelty in flowers which is sure to take high rank among garden annuals, and two new Spencer sweet peas, viz., Marie Corelli and Miriam Beaver. The novelty list is unusually long and varied.

Of Interest to Retail Florists

The heavy Christmas DETROIT trade, as presaged by the great business done at Thanksgiving, has been experienced and in fact many were caught short, either in supplies or in means of properly handling the trade. It is a little early yet to be definite in detail, but a general observation indicates that all branches, cut flowers, plants and baskets, were equally patronized. Very noticeable was the increased demand for high grade roses, which a year ago received a cold reception. The Michigan Cut Flower Exchange had a good supply of really very fine Rhea Reid, Richmond, La Detroit and Killarney roses which was greatly appreciated. Prices in general were good, roses bringing from 2.00 to \$8.00, with American Beauty \$6.00 to \$18.00 per dozen. Carnations \$1.50 to \$2.00, fancy and red \$2.00 to \$3.00 per doz. Poinsettia, majority \$6.00, a few \$9.00

per doz. Violets sold well at \$4.00, few at \$5.00 per 100. All other flowers from gardenias and orchids down sold well at good prices. Great difficulty was experienced with express companies; they were completely swamped and flowers which should have reached the stores at 9 a. m. did not get there until 5 p. m., causing all kinds of disappointment. The Michigan Cut Flower Exchange had men stationed at the depots to assist in picking out flower shipments from among carloads of other freight.

Individual reports from local prominent florists are very satisfactory.

Breitmeyers: The demand made on us taxed our strength and resources to the utmost. Orders were placed somewhat earlier than usual. Plants and baskets sold very well and high grade roses were a close second. All in all, it was the best Christmas we ever had.

Sullivan: It is safe to say that this was the best Christmas Detroit florists ever had. One may justly call it a plant trade Christmas, although cut flower trade started very briskly Friday afternoon. A good many pickled

carnations glutted the market which would have brought good prices had they been put on the market three to five days previous.

Schroeter: Plant trade was exceedingly good and started very early; in fact, we were practically sold out of plants by Friday noon. Roses were high in price but people received quality equal to the price.

Brown: Cut flowers sold better than ever and roses, which it was difficult to dispose of a year ago, sold easily this year.

Taepke: Trade started at least two days earlier than usual. Azaleas and cyclamens were the favorites. Everything else sold well except violets.

EASTER.1910, on March 27.
1911, on April 16.
1912, on April 7.**WASHINGTON**

Traffic has been delayed everywhere and even local deliveries have suffered great delay from the heavy snow. Reports from the retailers are to the effect that prices were slightly lower this "yule-tide," than formerly, but from present indications New Year's sales will more than even up the balance. Despite cloudy weather there was enough bloom and to spare for the Christmas season. All cut flowers sold readily, but azaleas led by a long distance in pot plants. Poinsettias moved more slowly than at any previous season, though they formed the chief decoration. With the exception of a few unique baskets there were no novelties displayed. There was an unusual demand for California violets—great bunches of them, set off by one cat-tleya. There is an innovation, which to the florist will be undesirable, viz: small corsage sprays of camellias, so closely resembling the "real thing" that even a practiced eye has to look twice before the imitation can be detected. These have a run in Washington at present, but let us hope that like all fakes they will be short-lived.

HENRY F. MICHELL CO., Philadelphia

Seed Trade

The Westerwold Ryegrass.

In reply to inquiry as to the qualities of this, it may be stated that it is the annual variety of the Italian Ryegrass. It is a quick grower, giving three or four cwt. (cwt. equals 112 lbs.) the same season it is sown, and must be cut at once when it has reached its full development, else it will turn yellow and hard at once. It is good for one purpose only: in case a clover or alfalfa field has gone off too much, this *Lolium* sown early in March will fill the gaps with plants quickly and fully, and when the remainder of clover or alfalfa is being cut the ryegrass will increase the bulk and make the yield a satisfactory one as to bulk of hay better than any other method. But the plants will die off the same year, no trace being left for a second season, which of course is a drawback. So far this variety has not found much favor with the European seed trade generally, although it is being used in fair quantity in its home locality in the Westerwold district, which is north of Arnhem a few hours by rail. The Arnhem exporters, Barenbrug, Burgers & Co., can doubtless supply the item and give full particulars to anyone interested in this country. The ordinary Italian ryegrass is now being largely used in America in combination with the summer sowing of *Trifolium incarnatum* (crimson clover).

Why Irish Cynosurus Is Cheaper.

The south of Ireland several years ago used to be one of the principal centers for the grass popularly known as crested dogtail (*Cynosurus cristatus*), but is not so now. The reason for this falling off in popularity for Irish seed is the gradual demand in the United States, as elsewhere, for high quality—irrespective of price—for the valuable natural grasses best suited for lawns and permanent pastures of various kinds. *Cynosurus* is still being collected in the south of Ireland, but discriminating buyers object to the large amount of shelled *Holcus lanatus* which the Irish seed contains. It is almost impossible to separate shelled *Holcus* from *Cynosurus*, and as only the more expert can detect its presence it is left in the sample on the chance of disposal to those not wide-awake. Of course ev-

erybody knows that *Holcus lanatus* is quite out of the question for lawns—too broad in the leaf and too pale in color—also rank and persistent in growth and almost certain to crowd out the valuable *Cynosurus* and other desirable varieties. It should never be allowed in lawn mixtures under any circumstances. Many a good order has been lost to the Holland growers on account of the lower price of the Irish *Cynosurus* seed. And a big mistake at that—even if the sample did look all right. Even now, the facts in the matter are not as widely known in the American seed trade as they ought to be, hence this note of warning and explanation. *Cynosurus* is wanted in every mixture for lawns, but it must be absolutely free from *Holcus*.

A Grass Question.

Why should any U. S. seedsman import *Triticum repens*? The writer is credibly informed that this seed is being imported. Any seedsman who is doing so will please reply to this query, giving reasons, and can use a nom-de-plume; his real name being held in strict confidence in this office. It may be that this heretofore execrated grass may have good qualities important to the world to know. If so, it is important and obligatory on the part of the seedsmen referred to, to square themselves with the public. They are of good standing all of them, and not confined to one city. This note is written by one who has stood up through thick and thin for the past 25 years for the honor of the seed trade of America. Trefoil in alfalfa, Canadian in Kentucky Blue, are venial offences in comparison. Dodder is bad enough and is rightfully tabooed by most progressive governments. But *Triticum repens*, unless

its advocates and importers can come up and show us that we are wrong, is equally pestiferous and in the same class with dodder. The plough, the grub, the hoe, the harrow, and many a sore back—have we officiated at in *Triticum repens*—and the bonfires that followed are the brightest beacons of memory that remain of the old life on the farm as far as *Triticum repens* is concerned.

American Seed Trade Association.

The annual meeting of the executive committee of the American Seed Trade Association was held at Young's Hotel, Boston, December 28th, with the following members of the committee in attendance: President J. C. Robinson, secretary C. E. Kendel, S. F. Willard, W. S. Woodruff, Alex. Forbes, C. N. Page and George S. Green; C. D. Boyles, Kirby White, M. H. Duryea and Albert McCullough, members of the committee on seed legislation; and, on invitation, C. H. Breck, W. H. Grenell, John Fottler, Jr., and Curtis Nye Smith, Esq., who were present to confer with the Association of Official Seed Analysts, which was holding sessions in connection with the meeting of the American Association for the Advancement of Science.

The St. Charles Hotel was selected as headquarters for the seed trade convention to be held at Atlantic City, June 21, 22 and 23, 1910.

BURPEE BUILDING

(OUR PRINCIPAL CITY WAREHOUSE AND OFFICES)

s. 475 and 477 North Fifth St., and Nos. 476 and 478 York Ave.,

PHILADELPHIA, PA.

Friends, Our Customers:

customers are our friends and the introduction to The Farm Annual has been rightly so addressed for many. We have a personal interest in doing all that is possible to insure your success in gardening, and are sure you are pleased also to know of our continued growth. Hence, you may be interested in the articles on pages 4, 12, and 34, from all four American Trade Journals.

BURPEE BUSINESS has shown a steady — and almost uninterrupted — growth beginning, in 1876, in the little building pictured below. Compare this with the Burpee Building and also our latest purchase, illustrated on third page cover. The loss for an entire year "in the seventies" was less than what we do now in a week. OLD CUSTOMERS, — many of twenty to thirty years' standing, — need no proof of fidelity on our part. Our reputation for SEEDS OF QUALITY has been the constant aim to maintain the truth of our famous motto: —

Burpee's Seeds Grow and are the Best Seeds that can be Grown

Catalog for 1910 (of which the first edition is more than four hundred thousand) reach some readers, however, who never before have had an opportunity to try SEEDS. To such we would say that all we ask is a fair comparative trial, — no small your first order may be. All stocks are thoroughly tested and we sell only what is to be good — the best it is possible to produce.

Fifth Street Frontage of
THE BURPEE BUILDING
Erected in 1898
Our Philadelphia Headquarters

Burpee's Seeds are Grown by Burpee! As a rule, this is absolutely true! Those varieties of seeds that cannot be produced to the highest standard of excellence upon our own farms are raised under private contract, subject to our personal inspection during growth in such sections of America and Europe as long experience has shown to be best adapted to their proper development. We buy no seeds upon the open market — and yet this rule occasionally has a necessary exception. The exception this season is in the case of Garden Peas, for the reason explained at bottom of page 80.

With hearty thanks for your many courtesies during past years, and trusting that same friendly spirit may continue, we remain,

Sincerely and gratefully yours,

Seed Gardens and Trial Grounds at our famous FORDHOOK FARMS, Bucks County, Pa. SUNNYBROOK FARM in New Jersey, and The New BURPEE RANCH in California.

It is repeated verbatim, the introduction to our retail catalog — BURPEE'S FARM ANNUAL FOR 1910. If you do not receive a leading American Seed Catalog" by January 10, please write for it. At the same time, if you appreciate quality in seeds and are willing to pay for the best seeds it is possible to produce, we shall be pleased to send you also (provided you are a market gardener or florist) a copy of our BLUE LIST FOR 1910 — the most complete wholesale catalog for those who plant for profit.

Our prices may be higher than those of some other houses, yet the quality of the seeds in every case warrants the prices charged. We excel in quality rather than to compete in price. Shall we send you one or both catalogs?

HORTICULTURE.

The Christmas carols of the Boston florists, growers, wholesalers and retailers, were marred by no perplexities of supply, demand or weather. The blizzard which swooped down on our western friends in the midst of their activity, considerably kept its hands off the land of the sacred cod fish until after the Christmas Day sun had set. The day was beautiful with no intimation of the orgie of wind and snow that was on the way. So, also, the previous days had been exceptionally favorable for everybody—those who grew, those who sold and those who bought plants or flowers and we have every reason to believe the claim made by all interested that the business done in plants, flowers and green decorative material was far in excess of all previous records. Unlike the experience in some other markets, the market value of flowers generally was well maintained along the average of prices quoted in advance. The only exception of any consequence was in the case of carnations which could be bought at the markets on Friday and Saturday at figures much lower than those quoted earlier in the week, and this, in a considerable degree, was due to the course pursued by some of the carnation growers in holding back their product to an unreasonable extent—not in cellars, but on the plants, long after they should have been cut and marketed. In roses, the best sellers were Beauty, Richmond and Killarney, also Bridesmaid to some extent; in carnations, Enchantress and the scarlet varieties, which realized 25 to 50 per cent. better value than the rest; in violets, the single varieties which brought 50 per cent better prices than the doubles. There was an excellent call for lily of the valley, orchids, lilies and callas at normal prices, also sweet peas, English wall-flowers and yellow daisies; gardenias and bulbous stock moved slowly. Among the latter were a few yellow daffodils which sold readily. Poinsettias were hard to move at customary prices, owing undoubtedly to the aggressions of the cloth imitations so industriously pushed by some of the second-rate stores. All Christmas greens scored a big sale. As to plants—the story is told in the fact that all the plant growers were cleaned out well in advance of the holiday, and that the retail store shelves and windows were practically bare when all was over. Azaleas, especially of the Firefly type, pan poinsettias, cyclamens and begonias had the right of way, but everything presentable found a ready buyer.

Another holiday week **BUFFALO** has passed and the trade is resting up for a few days and then prepare for the final. Nothing but the best reports are heard from the dealers and the Christmas business exceeded last year's. There was a good supply of flowering plants and others, and as the prices on cut stock were held so high the plant trade was excellent. There was a shortage in cut stock two or three days previous to Christmas and orders were turned down on several lines which could have been easily filled on Friday as on this day there was an abundance of everything. Beauties were in good

Out of the Ordinary Ribbons

To do the usual the ordinary way is not the P/M way or aim. To improve the old, discover the new and make our ribbons a little better always, is the quest worth while.

Every florist using P/M ribbons feels that he has the latest and choicest to be had and that his work has that exclusiveness and individuality about it not obtainable in using inferior makes.

A Few of our Leaders:—

Pattern Killarney FOR THE KILLARNEY ROSE

Flower Market Reports.

(Continued from page 19)

Roman hyacinths, peas, daisies, narcissi and other material. Some excellent carnations were had and a good portion were red, which brought the best prices; white and light sold well and not as many were had as in previous years. All green material was in heavy demand and cleaned up better than in years previous. The shipping was good and the weather being mild, very little trouble was had with frozen stock, but as the express business was so heavy many shipments were either carried by their destination or lost, inconveniencing many out-of-town florists.

Flower prices for the three days preceding Christmas are reported by the trade as more satisfactory to the retailers who had not engaged stock than to the wholesalers. On Monday the idea prevailed that stock would be scarce on account of the snow and extreme cold of the past week. Prices were accordingly high and many placed orders for stock bought fifty per cent. cheaper when they were ready to use it. Some of the largest growers were calling up their customers and trying to get rid of their stock that they had held on to so tenaciously a few days before. This was particularly true as to carnations, though everything in roses was, more or less, suffering the same fate. It was a case of more stock than any one expected would be cut and prices had to give way accordingly. American Beauties held the steadiest and the orchids, gardenias, violets and other eastern stock showed no change in prices. The shippers had their troubles, much stock reaching here worthless. Owing to the unusual number of packages to handle, and hampered by the snow which fell steadily for twenty-four hours, the express companies could not handle the consignments of flowers fast enough

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending Dec. 25 1909	First Half of Week beginning Dec 27 1909
Cattleyas.....	50.00 to 75.00	40.00 to 60.00
Lilies.....	12.00 to 15.00	8.00 to 15.00
Lily of the Valley.....	1.00 to 4.00	1.00 to 3.00
Narcis. Paper White.....	1.00 to 2.00	1.00 to 2.00
Violets.....	.75 to 1.50	.75 to 1.25
Sweet Peas (per 100 bchs).....	8.00 to 12.00	6.00 to 12.00
Gardenias.....	10.00 to 60.00	10.00 to 30.00
Adiantum.....	.50 to 1.00	.50 to 1.25
Smilax.....	10.00 to 12.00	8.00 to 12.00
Asparagus Plumosus, strings.....	20.00 to 25.00	20.00 to 25.00
" " & Sprea. (100 bchs).....	20.00 to 25.00	15.00 to 30.00

and many shipments were frozen. Inspection showed the packages in many cases to be properly wrapped and the loss due entirely to long exposure. Those who shipped out flowers had more or less of the same difficulty and the express people will have many losses to adjust. Notwithstanding the immense trade of Friday, Saturday and Sunday, Monday, the 27th, found the florists busy. If the cold weather is the cause, let us all be thankful that winter is here.

The retail trade as a rule, report a satisfactory Christmas business. As a general thing sales of plants and flowers were but slightly in advance of last year and those who report otherwise (from 50 to 100 per cent increase) are probably suffering yet from the elation consequent upon their narrow escape from the blizzard and a deep sense of gratitude to the weather man for the great favor he conferred in holding off the furies until the florist had his Christmas work all nicely completed. "Things are coming our way," it would seem. From the viewpoint of the plant grower, everything was also very satisfactory, but from that of the flower grower and wholesale dealer, not so much so. With few exceptions the net returns from their fluctuating product were not up to expectations. A very large quantity of stock was handled and

sold, but there was only one item that did sell out clean and that was violets, the supply of which was not equal to that of last year. With some growers Beauty was in moderate supply and many were sold at top figures. A considerable number, however, were left over and were finally disposed of at nominal prices—very nominal. Only the choicest stock commanded a price and buyers did not need to overlook quality. A bountiful supply of Killarneys, Marylands and Richmonds pressed for sale—the Killarney and Maryland particularly. Thousands of high-grade, long-stemmed roses were shipped to this market from Pennsylvania and the East and they had a potent influence in depressing prices generally. The home supply was not too heavy to move at good prices, were it not for foreign importations. Richmond sold well, but at figures below a year ago. Brides and Bridesmaids were too numerous to clean up entirely, but did as well as could be expected, considering the competition with the long-stemmed white and pink Killarney and Maryland. Carnations brought a better proportionate price than roses, though in general values ruled lower than usual and much stock was unsold—the supply being heavier than estimates indicated. Scarlet sold best of all and there were plenty of them, Enchantress and Law-

Flower Market Reports.

(Continued from page 21)

son color next, and white the worst. Cattleyas held their own when good, but there were a good many inferior flowers which ranged low down in the scale. Gardenias were in good supply—a few too many for the demand. Lily of the valley was plentiful and a liberal number did not find a market. Roman hyacinths, narcissi, stevia, etc., were passed unnoticed. No comment is needed in regard to smilax; little is called for and always some carried over. Poinsettias, when fine, were sold at good figures. The exodus of New York society people to spend the holidays in the country—an old English custom which seems to be gaining favor here—is perhaps responsible for the fact that a good many of the larger boxes and baskets of plants were left unsold in some stores and would perhaps have some effect also on the sale of flowers. The present week opened quiet to a degree and so continues. Supplies are too ample for demand and quotations on all roses are very variable. Carnations are doing fairly well and up to Wednesday there are too many violets, but not many of these or anything else seems to be wanted and New Years is not counted on to make any sensational demand.

NEW ORLEANS

The Christmas trade of 1909 in this city far surpassed any previous year both in the volume of business done and the quality of the plants and cut flowers. Blooming plants were never so plentiful or so fine and anything from \$3.00 to \$10.00 was sold almost as soon as displayed. Poinsettias, Lorraine begonias, cyclamen, azaleas, ardisias and ericas were the most popular plants with the buyers. Made-up baskets and hampers are not popular here, but nearly every plant sold had to be in a basket, oval or other fancy cover, and generally also tied with the finest grade of ribbon. There were fine

flowered azaleas and pans of poinsettias and begonias from local growers. Foliage plants like Neph. Whitmanii and Adiantum Farleyense met a ready sale and a great quantity of table fern dishes were filled. The cut-flower trade was enormous and the quality of the material shipped here was A-1. But one complaint of pickled stock was heard. The number of bunches sent to the cemeteries was phenomenally large and the caterers in this line had all they could handle. Christmas trees sold out clean and holly, while not particularly good, met a ready sale. The weather the last three days of the week was clear, crisp and invigorating and added to the pleasure of shopping.

Advices from Minneapolis and St. Paul are to the effect that retailers and wholesalers alike had a very busy week and one of the best Christmas records in years. The demand for cut flowers equalled the output and everything was pretty well cleared out, with the exception of a few pot plants.

Our Detroit correspondent complains that much "pickling" of flowers, especially carnations, was done by the growers for that market with the usual result of trouble for everybody and financial loss to themselves.

CHICAGO NOTES.

Among the Retailers.

The retailers seem to have had the right kind of a Christmas according to their own statements backed up by stores that show evidences of much trade. That the sales aggregate far ahead of some years and considerably in excess of last year is the general verdict. The drop in prices in the wholesale market did not materially change the price in the retail stores for the reason that orders had been placed for a fixed price several days before the drop came. It was a surprise to the man who bought early at what he considered a cautious price to find later that he could have purchased the same grade of stock for less on Friday than he paid Monday. The number of orchids sold in Chicago seems a surprise even to those who sold them, so fast has this trade increased. Some very fine eastern lily of the valley was also sold here. Violets, both single and double, sold well. American Beauties were fine and people seemed to part willingly with eighteen, twenty or even more dollars in exchange for a dozen. The mails were so crowded that deliveries were delayed three days, making many mail orders a dead loss to the florist here as well as a disappointment to the senders. Baskets and hampers were even more in demand than last year, some stores selling over one hundred—none for less than five dollars and all the way up to thirty-five.

Some Experiences.

Harry Rowe expresses himself as believing that the snow was no detriment to the retailers' trade. A. Lange's employes worked so hard that Monday found three of them too ill to go to work. The Bohanan Floral Co. had their first Christmas in their new quarters and hardly knew what to expect, but results are satisfactory, they say. The Fleischman Floral Co.

employed ten busses and four taxicabs in addition to their own car to deliver.

Frank Oechslein's delivery wagons are models, equipped with stoves, and although they were out night and day and the snow was a great hindrance, scarcely a plant was nipped by frost. One of the wagons was struck by a street car and the driver had a very narrow escape with his life. The wagon was badly injured, but the plucky driver managed to deliver the plants.

O. J. Friedman's store was not closed during a period of 72 hours. Here, as at Smyth's, Hauswirth's and other retailers' generally, the business done was entirely satisfactory, despite the terrific storm.

The Bowlers.

This week begins the tournament and it will last two weeks or more. John and Alice Zeck, Geo. Asmus, Frank Ayers and E. F. Winterson comprise the team, Mr. Winterson and Allie Zeck playing in both the singles and doubles.

Personal.

W. J. Smyth is slowly gaining ground physically, but it will be a year he thinks, before he will be as well as before the accident.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

The long-heralded meeting of this important organization in Boston opened on Monday, December 27, bringing to the city a most distinguished gathering of men of learning. Owing to the great storm the attendance was much reduced in numbers, but the various meetings were not lacking in either industry or enthusiasm. Particularly interesting to horticulturists were the proceedings of the Association of Horticultural Inspectors and the Association of Official Seed Analysts. The latter body held a joint session with the executive committee of the American Seed Trade Association at Young's Hotel, among the attendants being Prof. L. H. Pammel of Ames, Iowa, who honored the office of HORTICULTURE with a friendly call. The Association of Horticultural Inspectors held its sessions at the Harvard Medical School and much time was given to the discussion of the various destructive insect pests on plants and trees and the methods of combating them. Dr. L. O. Howard gave a very interesting talk on this topic.

MINNESOTA STATE HORTICULTURAL SOCIETY.

On account of the holidays the December meeting of this society was held on December 14, in place of December 21.

There was a very good exhibit of cut flowers and pot plants.

Dr. Freeman, pathologist at the Agricultural School, gave an interesting talk on rust, violet disease, mildew, blight, etc., which brought forth a very lively discussion.

The president appointed the entertainment committee to make arrangements for the annual dance, as follows: C. N. Ruedlinger, chairman; Karl Rice, Ralph Latham, J. T. Loudon and Max Kasser. The dance will be held February 16th, 1910, at the Ark Auditorium in Minneapolis.

SITUATIONS WANTED

SITUATION WANTED—As foreman or manager, on a commercial establishment, where roses, carnations, chrysanthemums are grown. I have had years of experience and always produced good salable stock; am used to all kinds of floral work and accustomed to manage help; will be pleased to know of any party requiring the services of a good all around man, married. Address, Box 276, Bar Harbor, Maine.

SITUATION WANTED—By gardener on vegetables, flowers. Can take charge both under glass and outside. Absolutely sober and reliable. Pl. Howe, 40 Wash., Morris-town, N. J.

THE "CHRISTMAS FOLLY" IN PHILADELPHIA

An esteemed member of the retail trade in Philadelphia gave a lecture recently at the Florists' Club on the "Follies of 1908-9." He was quite severe on the growers and commission men, blaming them not only for boosting prices, but for holding back stock.

If boosting prices is folly there was as much of it as ever. If holding back stock is folly there was plenty of evidence to show that the same old foolishness still prevails. At least this is true of cut flowers. For instance, violets quoted in the regular schedule at \$1.25 to \$2.50—these were going at the wind-up at \$5.00 a thousand. Similarly with American Beauties, which, while they enjoyed a good run, could be had at half and less before the market closed. Many other items were in the same boat. In short, there was no trouble for any retailer to get all the flowers he wanted at moderate rates at the end, although the commission men and growers kept up a bold front to the last. Plants, on the other hand, cleaned up splendidly at regular prices and more could have been sold, notwithstanding the cold weather from the 18th to 22nd, which handicapped out-of-town plant shipments.

Nevertheless and notwithstanding these slight drawbacks, it was a great Christmas. Bigger than 1908 without any doubt whatever—follies or no follies! Anyone who went into the wholesale market two days before Christmas expecting to see the usual polite salesman rushing up to him with salaams and greetings, bowing and smiling and washing his hands in invisible water, got a rude shock and had to hunt around in his turn and do the salaaming. Perhaps a retailer would class that as another of the 1909 follies. But what could one do! One regular was glued to the long-distance 'phone at one side; another boss on the opposite, while all the local lines had their quota. A corrugated brow was busy sorting out gardenias; another expert had cattleyas on the brain. Orders for Baltimore, Washington, Pittsburg and Cleveland had to go out, and occupied a dozen of the crew with eyes and ears for nothing else. In another section the incoming goods were being hustled in, grabbed, opened, and sorted with busy fingers—while some on the floor were anxiously saving sweet peas and poinsettias from the greedy maws of the hungry outlying occasionals for their pet and regular customers in the central districts.

Extra boys for the delivery service were at a premium. Autos were everywhere, but anything on wheels came in very welcome. The only calm and collected person up and down the whole Rialto seemed to be Ed. Fancourt just in from a six weeks' trip. He stood around like a high priest supernumerary "first aid to the wounded" smoking a big black cigar. He wasn't really working. He only thought he was. At least he seemed to pay no attention to the wandering customers who ambled in looking for carloads of American Beauties and other little items like that at a dollar apiece. Leo was in an unusually genial mood; while all his forces from Clarence down were hustling with no eyes or ears for anything or anybody, but getting out the orders.

A MESSAGE FROM MARS.

Tell us Mr. Martian what those dark lines are that we see on your planet. These are the ditches we have dug to plant with the wonderberry. I have been sent for some seed.
Chorus—You can have it all.

When Richmonds and Killarneys are selling at fifty they have to be carefully packed. Arthur in his brown duck uniform showed himself a good man-at-arms when emergency calls as well as a good financier at regular times. Edward had no "kicks" coming, which spoke well for the fine business his house enjoyed. He took no stock in the five-dollar violet story. All he said was, "Did they buy the trash?"

Captain Crawford agrees with Chas. Henry, that high prices at Christmas are a mistake. Commodore's genial notion that people don't appreciate things unless they pay a good price finds no favor with Robert. George Craig was quite willing to admit that all this Christmas fuss was foolish, "but if people are willing to waste their money, what's the difference?" Let them go ahead. One retailer sold eighty-two dozen snapdragon and the "foolish" price at wholesale on this very minor item was two dollars a dozen. Frank Polites had not much to say on being asked if he had had a good Christmas. All he said was, "Yep." On being asked if it was better than last year—all he said was "Yep." On being asked "How much better?" he said: "Three hundred dollars better." That sounded good and genuine. We all love a plain unvarnished tale. Glittering generalities are so unsatisfactory in this foolish old world. A thrilling feature of the folly week was the rescue of a consignment of carnations lost in the wilderness of the West Philadelphia freight yards by Sherlock Holmes Stroud and his satellite Dr. Watson Cook. The express people hadn't even sense enough to be sorry. All they said was, "Gwan and don't bother us! Don't you see we're busy?" So Stroud held up his hands, said Mary Ann! and went home.

As for the Christmas blizzard and its two feet of snow, which has tied up everything the past three days, all that can be said is, it might have been

worse. Suppose it had come on Wednesday instead of Saturday night! The Christmas trade was practically over before it struck in all its fury and buried us out of sight. The weather for the week up to Saturday was fine, and the fakirs and Christmas tree people had a harvest.

PHILADELPHIA NOTES.

It is reported that Chas. Henry Fox, in company with a local confectioner, has purchased the Natatorium building, Broad and Locust, for \$110,000. The intention is said to be to erect a new building with double stores for the two businesses.

Two of the old Dietsch greenhouses of the H. A. Dreer Co. caved in from weight of the Christmas snow storm. There was no great damage as they were used for cold storage of roses, and were readily propped up for repairs.

The Florex Gardens at Lonsdale, had a gang of workmen at work removing the snow from their big tomato house, 175x1000 feet, and took no chances, although no undue strain was apparent.

A. M. Campbell, at Collingdale, suffered a loss in the collapse of two houses. His crops are mostly asparagus plumosus and Sprengeri, at this season.

Habermehl's at 22nd and Diamond, one side of a lean-to—damage limited.

Jno. Burton and J. W. Colflesh also had some trouble.

Jno. Westcott suffered a small loss from a cave in of a house 15x25 feet.

Official record at Philadelphia of the three great snowstorms of the past 20 years:

1888,	10 5-10 inches
1899,	18 "
1900,	23 8 10 "

BUSINESS CHANGES.

Muncy, Pa.—The greenhouses of Herbst & Son have been sold to Terry Bros. of Canton.

Woonsocket, R. I.—Thos. H. Greene has purchased the Summit Greenhouse from Jonas Brooks, and will conduct the same business. Mr. Greene was formerly proprietor of the Greene Flower Store.

Davenport, Ia.—A deed has been filed with the recorder in which F. H. Bills transfers to Harry Bills the florist business known as the Bills Floral Company. The transfer includes the greenhouses and property on Brown street and it also includes the downtown store at 104 West Second street.

It is announced that the sales office of the American Nursery Company, which comprises the Bloodgood Nurseries, Flushing, N. Y., and the F. & F. Nurseries, Springfield, N. J., has removed to commodious quarters in the Singer Building, New York City, and that the interests of Mr. F. W. Kelsey with the company have been eliminated.

HORTICULTURE, Boston, Mass.

Wishing you a Happy and Prosperous 1910 I enclose subscription for it and think the good things in the pages of HORTICULTURE, weekly, are worth much more than the cost.

Yours truly,

WM. SWAN.

Plymouth, Mass.

FIRE RECORD.

Cambridge, Mass.—Fire caused by an overheated boiler, did a damage of several hundred dollars to the greenhouse establishment of Wm. E. Doyle, on Christmas day.

Leavenworth, Kan.—Damage amounting to not over \$300, was caused by fire in the show windows of the Sunnyside Floral Co., December 20. The Christmas decorations in the window caught from a match carelessly handled.

Greenhouse Property To Lease

I seek to find the right man or concern to lease the greenhouses and adjoining necessary buildings, including a power house, on the estate of the late Frank Jones of Portsmouth, N. H.

The plant consists of one large brick boiler house containing two horizontal boilers of ample capacity, and coal storage. Connected with this building a brick and stone head house, about 20 feet wide. At right angles to and connected with this house, are fourteen greenhouses 60 feet long and two large double houses. Also a tropical plant house disconnected, and two grape houses filled with Black Hamburgs in excellent condition.

The benches in the sixteen houses are of slate, with iron supports. There are also a great number of cold frames close at hand.

The construction of everything is first-class in every respect, far better than is usually built for a high class commercial proposition. There is not a broken light of glass, a broken brick, tile or slate slab on the premises; nor is there any rust or decay or displacement of anything from the foundations to the ridge pole. The estate is situated about one mile from the Boston & Maine station, approached by a broad avenue. There are excellent markets at Boston, Portland and Portsmouth.

The mansion on this estate and small parks adjoining it are to be used for private purposes and the proprietor desires to be relieved from the responsibility of the greenhouses and surrounding grounds.

A satisfactory lease for everybody considered, whereby the lessee could from the start make money, so far as the rental is concerned, could be negotiated.

For terms and further information write

J. P. Eustis, 92 North Street,

The Straight Roofed Palm House

Some seem to feel that they are not quite as ornamental as the curved roof house. No doubt, they are right, but aside from the fact that you don't get as much head room for your palms, with a straight roof house having the same height sides—it's every bit as good a palm house and costs considerably less.

This one is at Storrs Agricultural College, Storrs, Conn. It is part of a large range, every house of which is our Sectional Iron Frame Construction—the construction that's best for any kind of greenhouse.

Send for our catalog which shows every style palm house and other houses as well.

These Greenhouses Look Like Business And Yet, How Attractive?

And why should n't a greenhouse be attractive? What is the use of building those heavy, illy proportioned affairs, when you can get effects like this, and have houses that will grow more and better plants and flowers?

Everyone, of course, claims their greenhouses to be the best, but there is one thing certain, none are as light as the U-Bar, and the lighter a house is the better it is—any gardener will tell you that.

You see this construction of ours is patented, and no one else can build these houses.

If you want a house freest from repairs, one that heats easily and will outstrip any other house in the quality and quantity of flowers, then you want the U Bar.

Shall we send you some advance sheets from our New Catalog?

THE CONSTANT

A New Seedling Carnation of Wonderful Merit. Will be offered to the trade in February, 1910. For description, price, etc., see "Horticulture," issue of November 6th.

C. S. FORD Florists Supplies, Etc. Novelties, Etc. P. O. Box 4515. West Park, Phila., Pa.

NEW

CARNATIONS

The Two Prize Winning Introductions of the Cottage Gardens

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Price, Rooted Cuttings

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashings of pink similar to the Cattleya Orchid, increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

AWARDS

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Price, Rooted Cuttings

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery Feb. 1st, January Cuttings All Sold

These varieties bring from \$2.00 to \$4.00 per 100 more than any other carnation sold in the New York market.

QUEENS, LONG ISLAND, N. Y.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern Originating with Us. To be introduced Fall, 1909.

Of all the valuable introductions in ferns that we have sent out, beginning with the Pierson (Nephrolepis Piersoni) we consider Elegantissima compacta the most valuable of all, particularly from a commercial standpoint.

While this resembles Elegantissima in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with Elegantissima except in a general way, because it occupies a place by itself, and is as distinct from Elegantissima as that variety is from Piersoni, — in fact, it bears the same relation to Elegantissima that Scottii does to Bostoniensis.

Elegantissima compacta has an ideal habit. The fronds are considerably shorter than those of Elegantissima, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2¼-in. pots, \$5.00 per dozen, \$35.00 per 100; 4-in. pots, \$7.50 per dozen, \$50.00 per 100; 6-in. pans, \$1.50 each; 8-in. pans, \$3.00 each.

We make a specialty of all kinds of Nephrolepis, carrying a large stock of all sizes at all times, — Piersoni, Elegantissima, Superbissima, Bostoniensis, Scottii, Whitmanii, Amerpohli, etc.

Plant Novelties from China

For the waterside and woodland the Senecio family is full of good things. This family is one of the largest in the vegetable kingdom and in China alone is represented by over a hundred distinct species. The majority of these are weeds pure and simple, and of no ornamental value whatsoever. On the contrary others such as *Senecio clivorum*, *S. Veitchianus* and *S. Wilsonianus* are of extreme beauty. These three plants have bold, reniform-cordate leaves, a foot or more across, but are dissimilar in other respects. *S. clivorum* has a much-branched, corymbose inflorescence, 1½ to 2 ft. across, with flowers, aster-like, 3 to 5 inches diameter, of a peculiarly rich golden-yellow color, in shade unlike any other plant in cultivation. *Senecio Veitchianus* and *S. Wilsonianus* have erect spikes of flowers 5 to 6 ft. or more tall. In the first-named the spike is simple and the flowers clear yellow. In *S. Wilsonianus* the spike is cylindrical, like an enormously elongated thyrse, branching at the base with golden-yellow flowers. In both species the actual length of the spike clothed with flowers is 2 to 3 ft. Strong clumps of these three Senecios will produce half-a-dozen or more flowering spikes bearing hundreds of flowers and in August and September are extremely attractive.

Quite different to the above but equally beautiful is *Senecio tanguticus*. This herb grows 4 to 5 ft. high, has finely cut foliage and pyramidal panicles of clear yellow flowers, 8 inches to a foot long. The individual flowers are small and the whole plant suggests a glorified golden-rod (*Solidago*). Another fine species but not yet in commerce is *S. nelumbifolius* with huge Lotus-like leaves, 2 ft. or more across, and a large flat-headed inflorescence composed of innumerable small, yellow flowers. These Senecios are readily raised from seeds which are freely produced, grow rapidly and soon make strong flowering plants. *S. tanguticus* is apt to make itself too much at home and the cultivator must watch out or it will usurp the whole waterside unto itself.

Rodgersia aesculifolia, *R. pinnata*, and *R. pinnata alba* are a trio of new plants fitted for planting alongside the above Senecios; their white and pink flowers forming a pleasing contrast. These new *Rodgersias* are strong-growing plants, with broad thyrseoid panicle of fragrant flowers, a foot to eighteen inches long, borne well above the foliage on spikes 3 to 5 ft. tall. The leaves in form resemble those of the Horse-chestnut (*Aesculus*.) In *R. pinnata* the flowers are a delicate rose-pink, in the other two the purest white. Two other *Rodgersias* not yet in commerce are *R. sambucifolia*, with truly pinnate leaves, and *R. tabularis* with rounded, peltate leaves. *Rodgersias* are easily raised from seeds but they grow slowly; the rootstock is a very stout rhizome and it is best to start off with strong established roots.

Few plants are more popular for pot-forcing for winter work than *Astilbe* (*Spiraea*) *japonica* and *A. astilboides*, both old but indispensable plants. Their newly discovered relatives, *A. Davidi* and *A. grandis*,

RHEUM ALEXANDRAE.

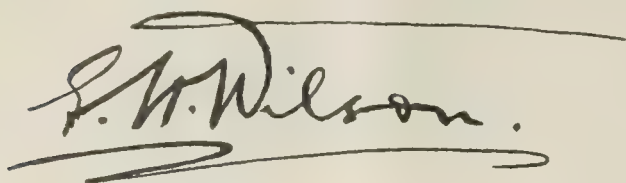

Chino-Thibetan borderland, Alt. 12,000 ft. Flowers, cowslip yellow.

are not useful for this purpose but for the waterside and moist border they possess much higher claims than our old friends. *A. Davidi* was the first of the two known and created a sensation when exhibited. The flowers are of a peculiar shade of red, found only in the Loosestrife (*Lythrum salicaria*) heretofore, with blue anthers. The flowering stems are 6 ft. tall with the flowers densely crowded on much-branched panicles 2 to 2½ ft. long, with the lateral branches ascending. Partial shade suits the plant best since in strong sun the flowers bleach. *A. grandis* is similar in habit and vigor of growth but with pure white flowers. The individual flowers are the largest in the genus and the axillary branches of the flower panicle are horizontally spreading. The leaves of both species resemble those of *A. japonica* but are much larger and of greater substance. If some hybridist would take up these two plants in the way that certain continental nurserymen have taken up the pink flowered *A. chinensis* some remarkable results might be obtained.

Similar to the *Astilbes* but belonging to a very different family is *Artemisia lactifolia*. This new wormwood has finely divided, chrysanthemum-like, aromatic leaves and large panicles of milk-white, fragrant flowers, borne on flower-spike 3 to 4 ft. tall. In the heart of China this is a weed of cultivation and the writer little thought when sending it home that it would so quickly develop into such a charming plant. This *Artemisia* and the *Astilbes* are readily raised from seeds and soon propagated by division of the root-stock.

The Rhubarb family is well-known but whilst this bold foliage and tall flower-spikes make them noble subjects in a way they can scarcely be classed as choice herbs. Very unlike an ordinary Rhubarb is the new *Rheum alexandrae*. This plant has neat, ovate-cordate, shining leaves, a foot or more long, and an erect, pyramidal, tower-like inflorescence, a yard or more high. The showy part of the inflorescence consists of large, rounded, cowslip-yellow bracts, arranged tile-like one above another. It is native of the alpine-meadows and moorlands of the Chino-Thibetan borderland where its peculiar and rich colored inflorescence makes it a conspicuous object in the distance and compels attention. It grows well in any good, rich, moist garden soil, is

fond of partial shade and of cow-dung. It is readily raised from seeds but requires several years to develop strong flowering crowns. The colloquial name for this plant is Ma-Huang—Horse rhubarb.

British Horticulture

AMERICAN APPLES

The varied array of imported fruit seen on the London markets has been augmented this season by a fine assortment of apples from the Wenatchee valley in the State of Washington. The fruit is first-class as regards flavor and appearance. The three principal varieties particularly admired on this side are the Spitzenburg, Winter Banana, and Rome Beauty. The first-named is notable for its excellent coloring—one of the chief essentials for an apple for commercial purposes. Winter Banana is likely to become very popular on this side. Rome Beauty is well known to British consumers, owing to its inclusion amongst the varieties which are extensively shipped here in the season from Australia. The recent consignments of these apples have been quickly bought up at prices ranging from 13s to 25s a case.

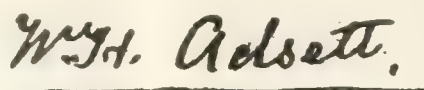

BRITISH AND COLONIAL FRUIT

At the annual show of British and Colonial fruit, organized early in Dec. by the Royal Horticultural Society, a special feature was the magnificent display of apples shown by the British Columbian Government. About 650 cases were exhibited, and the meritorious character of the exhibits richly deserved the gold medal awarded. New Zealand also made a creditable show of apples, whilst bananas were exhibited by the Permanent Exhibition Committee of Trinidad. British orchard fruit was represented by the capital displays of J. Veitch & Sons, and G. Bunyard & Co. Great interest was evinced in an exhibit of 400 bottles of home grown fruit, shown by Tr. Poupant, a well-known grower for market.

ITEMS OF INTEREST

The membership of the British Gardeners' Society now totals 1594.—A movement is on foot to provide a fitting memorial to the late Peter Barr, the "Daffodil King." It is suggested that this should take the form of a special pension to be provided from a fund raised in connection with the Royal Gardeners' Orphan Society, and a memorial medal to be awarded for narcissi.—The degree of Master of Arts has been conferred on Mr. F. W. Moore, the curator of the Glasnevin Botanic Gardens, Dublin.

London.

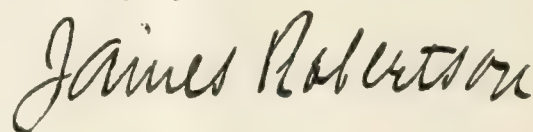

Mossed Walls

Walls in greenhouses and conservatories when tastefully mossed and planted are always much admired, and the wonder is that the practice is not more common. An ideal wall for this purpose is the brick, stone, or concrete wall often seen in a greenhouse joining a potting shed or some other building or on the back wall of a lean-to or house in which plants of the same class as those used in the wall are grown. Many conservatories also provide suitable places for this purpose. There is considerable work, however, in building the moss wall at first, but when properly done it will last for several years with very little repairs or care.

The system of preparing this has, of course, to be varied to suit the individual case, but the general rule is to begin by forming a net work of 4-inch squares with stout copper wire all over the part of wall which is to be mossed. This should be about an equal distance of about 3½ inches from the wall so that the moss when packed in between will be an equal thickness of about 5 inches all over, and as the tight packing of the moss puts a great strain on the wires it is necessary that they should be well supported from the ends by connecting to a strong but neat iron or wooden edging. It is also necessary to support them at different places on the wall so as to prevent bulging out. A good plan to do this is to drill holes into the wall about 2 feet apart each way and screw into them 6-inch galvanized iron screw eyes and pass the wires through them as put up. It is generally most convenient to put the cross wires on as the bank of moss is built up and the plants put in at the same time. Sometimes leaf-soil or charcoal is used through the moss, but good, clean, live sphagnum moss only will suit almost any kind of plant used for this purpose. A large mirror when set neatly into the moss in a position that it will reflect a quantity of plants, brings out a charming land and water-like effect.

In selecting the plants for the wall, the planter has, of course, to be guided by the needs or tastes of the owner, the temperature the house is expected to be kept at, and other circumstances; but, in any case, when a green effect is desired ferns are undoubtedly the most suitable, and *Adiantum cuneatum* is probably the best all-round variety. *A. Farleyense* is good where a temperature from 70 to 75 degrees can be maintained. Other suitable subjects are *A. Croweanum*, *A. caudatum* and *Nephrolepis cordata compacta*, also the following—mostly of variegated foliage—*Alocasia Sanderæ*, *Dracaena Godseffiana*, *D. Lord Wolseley*, *Begonia Rex* in variety, crotons, *Carex Japonica variegata*, *Pandanus Veitchii*, *Fittonia argyroneura*, *F. Verschaffeltii*, *Peperomia maculata*, *P. metallica*, *Ophiopogon Jaburan variegatus*, *Strobilanthes Dyerianus*, marantas, *Selaginella Kraussiana*, anthuriums and *Begonia Gloire de Lorraine*. These should all be planted from the smaller sized pots, and when in the condition that plants are generally in when a shift to larger pots is given, bearing in mind to allow space for the development of the plants and to accommodate each variety as far as possible with the light or shade it may require.

Charles Sprague Sargent

This famous dendrologist was born in 1841, and graduated from Harvard in 1862. Appointed Director of the new acquired Arnold Arboretum in 1873, he has guided the helm of this institution since its inception. The formation of this Arboretum has been his work and hobby and he has spared himself in no way in accomplishing his task. Ably assisted by his lieutenants he has made this Arboretum what it is, one of the foremost—perhaps the foremost—institution of its kind in the world. For the purpose of stocking this Arboretum he has traveled far and wide, and has been the direct or indirect agent in the introduction of an enormous quantity of hardy trees and shrubs. His correspondents are everywhere and probably no institution in the world has been (and still is) such a great distributing agency in the matter of this class of plants. His work is of world-wide reputation. In our own country he or his agents have re-discovered and introduced to gardens a large number of rare and imperfectly known or lost plants; for example, *Shortia galacifolia*.

In 1892 he traveled in Japan and collected there a quantity of ornamental trees and shrubs; one of the best known and most appreciated of these being *Azalea Kaempferi*. In 1900 he made a tour round the world, and in 1906 visited South America. These journeys added further increase to the Arboretum collections. Mr. Sargent was also one of the first to realize the enormous floral wealth of the interior of China and he, more than any one man, has been responsible for the recent exploration work in that country. The garden at his residence, Holmlea, Brookline, is among the finest in New England, and is known through the length and breadth of this land. It contains many magnificent trees and shrubs, amongst others the largest plants outside Japan of *Cercidophyllum japonicum* and *Magnolia kobus*. The collection of Indian *Azaleas* there was one of the earliest formed and most complete in this country. A voluminous writer, all his works are remarkable for their lucidity, close diction and accuracy. He was special editor of the tenth Census Report on the forests of North America. This work laid the foundation for his subsequent publications on forest trees. His monumental work, the "*Silva of North America*," occupied nearly twenty years in preparation, being published in 14 vols., quarto, in 1891-1892. Later he gave us his "*Manual of Trees*." He edited the "*Garden and Forest*," a publication superior to anything of its kind heretofore attempted and its short life was much to be regretted. The journey to Japan resulted in a series of charming articles in "*Garden and Forest*." These were subsequently collected into book form under the title, "*Forest Flora of Japan*."

As a worker and patron in the field of horticulture we have to look across the water, to men like Sir Joseph Banks in the eighteenth century, and Sir William Hooker in the early half of the nineteenth century, for

Photo. Copyrighted Thos. E. Marr, 1904

PROFESSOR CHARLES SPRAGUE SARGENT

Awarded first George Robert White gold medal by Massachusetts Horticultural Society for distinguished services to horticulture.

a comparison. Mr. Sargent combines in an extraordinary degree the attributes of these remarkable men. His influence on dendrological horticulture in this country has been immense and will be even more greatly felt as the years roll by.

His botanical works are too numerous for mention here; but, as we all know, for several years past he has devoted much time to the elucidation of the perplexing problems of the American *Crataegus*. The more striking of these together with other plants are figured and described from time to time in his publication, "*Trees and Shrubs*." A big man in every sense of the word, a strong man, a man of few words and great deeds, a man with an inordinate capacity for hard work, a man possessed with the happy knack of without seeming effort gaining from his friends and colleagues their hearty co-operation and assistance. Such a man is Charles Sprague Sargent—a genius of whom any country may well be proud. In making him the first recipient of the George Robert White Medal, for distinguished service to horticulture, the Massachusetts Horticultural Society has made no mistake and has honored itself in so doing.

New Rose Radiance

Our front cover page this week is devoted to an illustration of the most notable of the season's novelties in roses introduced by the veteran rose specialist, John Cook of Baltimore, who has already given to the florist trade of America several fine roses, including one of their most popular and profitable forcing varieties—My Maryland. Radiance, the new candidate for favor, is a seedling from Cardinal, color brilliant pink with a silvery lining to the petal. The buds are large, stems long and flowers very fragrant. The variety is a constant bloomer the whole season through.

help in the work of this important year—the beginning of the second quarter century of the national Society's career. Both appointees have served as president and Mr. Rudd has already served more years on the Executive Board than any other member, with the single exception of Ex-Secretary Stewart. These gentlemen are thoroughly familiar with the Society's work in the past and its needs for the present and future.

The time draws near for the annual carnation carnival—this year at Pittsburgh. A spot so central should, and doubtless will, draw a very large attendance from all directions. The schedule

of premiums is liberal and comprehensive, covering the ground very well except that no cognizance is taken of the importance of the retailer in the campaign for maintaining and increasing the popularity of the carnation with the general public. Assuming that the public are to be admitted to see and admire the exhibition, we think that the presentation of some convincing examples of the divine flower's decorative adaptability for various purposes would make an impression and advance the interests of the flower locally to an extent far greater than a display in vases only, and we know that Pittsburgh has among her florists some brilliant exponents of floral decorative art and the opportunity to show what the carnation is capable of in the hands of an artist seems too good to lose.

It is rather interesting to note how many organizations devoted to the interests of agriculture, orcharding, etc., are sailing along under the designation

of "Horticultural Society," state or local. We find on the same order the so-called horticultural departments of certain farming periodicals, treating on potato growing, feeding stuffs, care of milk and similar topics—all useful and "trooly rooral" but horticultural only by very remote association. We have before us an extract from the report of a "horticultural" society located between Boston and Chicago which presents as a subject for consideration at its annual meeting "The Hog of Today and Its Food." Among the topics listed by another is "The Deadly Cigarette." Many such instances might be cited and we often find an entire program devoid of a single item which is legitimately horticultural. Perhaps no particular harm is done but there is just one phase of the situation to which we should like to call attention. Many of these organizations are drawing public appropriations ostensibly for the purpose of horticultural advancement. Without wishing to appear as disparaging the value of education in any branch of husbandry we should like to see these things exploited under their proper names or, if State appropriations are to be made for horticultural advancement, why should not the horticulturists of the community insist upon their use in accordance? As an example of a really broad-gauge organization, let us commend the Minnesota State Horticultural Society. And there are a few others.

Our news columns announce the personnel of President Pierson's official appointees household for the coming year. An innovation is seen in the appointments on the Executive Board, two well-seasoned old leaders having been selected instead of new timber as has been the almost invariable rule in the past. The President is not a man who does things without due consideration and no doubt he sees where experienced war horses can

After Adjournment

An Errand Dog.

Policeman William A. Hamilton's cocker spaniel dog that was run over by an automobile Monday night has so far recovered from his injuries that he was able Wednesday to perform his usual errand of taking the daily paper home.—*Kennebec (Me.) Journal*.

Better let him carry the trade papers, too; that is, if his mouth is big enough.

Tool House Aeroplane.

When A. Hayashi, a Japanese nurseryman of Alameda, at Park and Buena Vista, awoke yesterday morning he was thunderstruck to see his tool house reposing calmly in the middle of Park street. A neighbor said he saw the tool house sailing through the air the night before on the wings of the high wind.—*San Francisco Examiner*.

What will California spring on us next?

Florists Cut Crop of Gold.

Sing hey for the merry, merry florist!

He ought to be a particularly merry chap Christmas day, for he has been making hay the last few days, as it were!

Flowers have been going up, almost though not, of course, quite to the height of the beef and pork markets.—*Omaha Bee*.

You people in Omaha had better lay low when the reporter comes around. The assessor may be your next caller, a la Framingham.

Hitched a Pulverizer On.

Nick Diède had a bad luck last Saturday while he went to hitch a pulverizer on and hitched two horses on and wanted to tie the others to them while he had tied one on and wanted to tie the other on that side turned over to the hind side and came under the pulverizer and cut his hind legs till in the bones so the animal had to be killed as soon as possible while the others cut themselves barely.—*Menlo Herald*.

Such are some of the dangers of agriculture. And the correspondent—well, there are all kinds, you know.

Another Wizard.

"Plant your seeds when the moon is growing full. If you plant them when it is on the wane ten chances to one they won't grow. That is one of the most important things to know about growing plants from the seed, according to Mrs. A. Fechtig, 341 West 37th street, New York. Mrs. Fechtig has been raising plants for her own amusement in a city flat and on the roof of that flat for thirty-eight years."

"There is something interesting about gladioli. If you lay the bulbs of flowers of different colors side by side or on top of each other for the winter, your flowers will be of quite a different shade from what they would have been if you had kept the bulbs of different shades separate. That is one way I get new tints."—*Extracts from a column article in the Chicago Daily News*.

The Daily News ought to be a good subject for the Council of Horticulture to practice on. Great chance for "the fine Italian hand."

Goshen, Ind.—A. E. Kunderd, the gladiolus specialist and hybridizer of Fort Wayne, Ind., has purchased 50 acres of land in Goshen, where he will locate early next spring and grow gladioli and other summer cut flowers for the Chicago market. He will be conveniently located on the Lake Shore and Michigan Central, the Big Four and Interurban Railways, 100 miles east of Chicago and 17 miles east of South Bend.

WHITE CATTLEYA LABIATA.

Mr. E. V. Low sends us the accompanying illustration of his collection of white labiatas—some twelve or fifteen varieties—in bloom last November. These are the outcome of many years assiduous collecting from many

sources. We know several ambitious American florists who "wouldn't do a thing" to that bunch of plants if given permission to use the knife on them and expense would be a minor consideration.

THE HEDGE AS A BLIZZARD BUFFER.

The magnificent work of the Reading R. R. in keeping its lines running on time during the record-breaking blizzard of Christmas, 1909, while every other steam road entering Philadelphia was tied up for from two to five days was ascribed by a high official of the road to its splendid track equipment and discipline in part; but a great share of the credit was also given to the privet hedges along every embankment where drifting was likely. The hedges proved at this time as always a splendid wind break and saved the company many thousands of dollars in the labor cost of digging out drifts. The hedge policy was inaugurated many years ago at the shrewd instigation of the Reading's landscape gardener, Paul Huebner, and time has amply demonstrated its wisdom. A local nurseryman was so impressed with the effectiveness of the idea in practical operation that he set his entire office force to work writing details to every railroad manager in the country—incidentally offering their stock of privet plants. A good and timely stroke of business. Make a note of this ye wide-a-awake nurserymen!

G. C. W.

better advantage the column devoted to the manufacture of paper flowers. "Cut them out."

The Report of the Country Life Commission and Special Message from President Roosevelt has been reprinted for free distribution by the Chamber of Commerce, Spokane, Wash. This is Document No. 705 of the Senate, 60th Congress, 2nd session, and its publication, to meet the widespread demand for the document, which is not available through government channels, is done with the approval of President Taft.

Evergreens: How to Grow Them. By C. S. Harrison.—This book of 100 pages by our esteemed friend and correspondent of York, Neb., deserves a word of sincere commendation. It is written for the people of the great prairie states—a section of the country yet new, where necessity and utility have the first say and esthetic sentiments are for a time necessarily forced into the background. But C. S. Harrison has been preaching the Gospel of Beauty to those hardy pioneers for these many years and Nebraska is justly proud of him. Every line he writes is pregnant with the true horticultural spirit which makes for humanity in its highest and best sense, makes gardens in the desert and turns the ranch into a home. The book shows throughout the touch of the expert and its cultural notes and observations may be safely accepted as thoroughly reliable. Price, cloth, 50 cents; paper, 25 cents.

PUBLICATIONS RECEIVED.

The Flower Garden, Vol. 1, No. 1.—We welcome this newcomer in the field of floral literature and extend to the publisher, J. C. Swanger, Salt Lake City, Utah, our hearty good wishes. In doing so, we venture to suggest in the kindest spirit that he might use to

PERSONAL.

Visitors in Boston.—J. Muller, representing Julius Roehrs Co., Rutherford, N. J., E. Andre, Trinidad, B. W. I.

Carl L. Olson, employed by the Iowa Seed Co., and Hazel L. Divilbiss were married December 22 at Des Moines, Ia.

NEWS OF THE CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

A good turnout of the members came to hear Edward A. Stroud on "Building up a retail trade in a growing community" at the regular monthly meeting of the above club held on the 4th inst. Mr. Stroud handled his subject in a very able manner, gave food for thought and brought out points enough to warrant discussion for a year to come. We hope to publish same in our next week's issue. A vase of single wall-flower, Early Paris, and an exhibit of Beauty of Nice, blush and Empress Elizabeth stock pink were put up for inspection. These came from Overbrook Gardens and were highly commended by the committee for earliness and fragrance. A ladies' night was ordered arranged for about the last week of January—exact date to be announced later. Adolph Farenwald will be the speaker at the next monthly meeting, the first Tuesday of February. His subject will be "The American Rose Society and its aims." Condolences from the Baltimore brethren in the shape of a series of resolutions on the death of our esteemed fellow member, William K. Harris, were read by the secretary, and were greatly appreciated.

AMERICAN CARNATION SOCIETY.

The Cottage Gardens Co., Queens, N. Y., register the following new carnations:

Alma Ward—Prosperity x White Seedling. White, sometimes showing delicate splashes of pink. Size, $3\frac{1}{2}$ to $4\frac{1}{2}$ inches. Stems, 36 to 42 inches. Remarkable for size of flower and length of stem. Strong and vigorous grower.

Mrs. C. W. Ward—Mrs. Lawson x Mrs. Roosevelt. Deep pink, lighter than Lawson but deeper than Winsor. Size, $3\frac{1}{2}$ to 4 inches. Stem, 24 to 36 inches. Early and free bloomer, producing fine flowers as early as September 1st.

A. F. J. BAUR, Secretary.

ELBERON HORTICULTURAL SOCIETY.

The Elberon Horticultural Society held its first meeting of the New Year on Jan. 3rd, president Peter Murray in the chair. The competition for points was as follows: C. Duncan for Freesia Purity, 85; A. Bauer, carnation White Perfection, 85; W. Seymour, Enchantress, 75. The next meeting will be carnation night, Jan 17th. As the carnations are very good in this section we look for a nice display.

ALEX. FLEMING, Cor. Sec.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The beautiful exhibition of photographs of Chinese scenery and plant life made by E. H. Wilson on his tour in Western China on behalf of the Arnold Arboretum, has attracted a great many visitors to Horticultural Hall, Boston, during the past two weeks. The society has awarded its highest honor, a gold medal, to Mr. Wilson in recognition of this valuable educational exhibit.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

President F. R. Pierson announces the following official appointments for 1910:

Executive Board, three years: Wil-

ROBERT CRAIG

lis N. Rudd, Morgan Park, Ill.; Robert Craig, Philadelphia, Pa.

Botanist: Prof. John F. Cowell, Botanic Gardens, Buffalo, N. Y.

Pathologist: Prof. H. H. Whetzel, Ithaca, N. Y.

Entomologist: Dr. S. A. Forbes, Urbana, Ill.

W. N. RUDD

Washington Representative of the Society: William F. Gude, Washington, D. C.

Tariff and Legislative Committee: Patrick O'Mara, Jersey City, N. J., Chairman; J. A. Valentine, Denver, Col.; J. C. Vaughan, Chicago, Ill.; Patrick Welch, Boston, Mass.; John G. Esler, Saddle River, N. J.; J. O. Thilow, Philadelphia, Pa.

Committee on School Gardens: Benjamin Hammond, Fishkill-on-Hudson, N. Y., Chairman; A. T. De La Mare, New York, N. Y.; Prof. John F. Cowell, Buffalo, N. Y.; Wm. B. Durie, Rahway, N. J.; H. B. Howard, Chicago, Ill.; Joseph Heacock, Wyncote, Pa.

Committee on National Flower Show: As the work of this committee has not been accomplished, the committee appointed by Pres. Valentine is continued, except that E. A. Stroud of Overbrook, Pa., has been appointed to fill the vacancy occasioned by the resignation of Edwin Lonsdale.

National Council of Horticulture: E. G. Hill, Richmond, Ind.

State Vice-presidents, 1910.

Rhododendrons For Forcing.

To close out quickly we offer special values for an exceptionally fine lot of bushy shapely plants splendidly set with buds of best selling varieties:

	Per dozen.	Per 100
18 to 24 inches high, 10 to 15 buds.....	\$10.00	\$75.00
15 inches high, 6 to 10 buds.....	6.00	50.00

Azalea Mollis.

A splendid lot of bushy, well budded plants, 15 inches high, in fine shape for early forcing, \$4.50 per dozen; \$35.00 per 100.

Pot Grown Lilacs.

Charles X and Marie Legraye, well budded, shapely stock, \$6.00 per dozen; \$50.00 per 100.

HENRY A. DREER

714 Chestnut St., Philadelphia, Pa.

Carnation Dorothy Gordon

¶ This wonderful new Carnation—a seedling of Lawson on Enchantress—is a money-maker for the commercial grower. It possesses all the strong points without the weaknesses, of the parent varieties. Its unusual size—

The Success of the Year

averaging three inches in diameter—clear, rose-pink color, strong constitution and excellent keeping qualities, commend it to all enterprising growers—together with the fact that it has regularly produced double the profits of Enchantress. ¶ Visitors at our establishment, and propagators who have given it a trial, speak of Dorothy Gordon Carnation in terms of the highest praise. ¶ We offer strong rooted cuttings of this splendid Carnation at the popular price of \$10.00 per 100; \$75.00 per 1000. Orders are being booked daily and will be filled in strict rotation. Don't delay, but get in your specifications NOW. Come to Wyncote and see it growing—it's a great sight. If you cannot do that, write us for full particulars.

Most Profitable of all the Carnations

JOSEPH HEACOCK CO., Disseminators; Wyncote, Pa.

JUDGING SEEDLING CARNATIONS.

Growers possessing seedling carnations which they would like to submit to the American Carnation Society for examination and judgment will find it to their interest to read carefully the following instructions to judges of seedling classes under which all awards at Pittsburgh will be made.

All judging in these classes shall be by comparison with existing varieties only.

Color (25 points.) The variety under judgment shall be compared with the best variety of its color extant, and be awarded points proportionate to its color value.

Size (20 points.) The variety shall be compared with the largest existing variety, regardless of color, and be awarded points proportionate to its size.

Stem (20 points.) The strength of the stem should be sufficient to carry the flower erect, and the length should be sufficient to display the flower to the best advantage. It is desirable that the stem be provided with numerous and broad leaflets, as giving better effect when the flowers are arranged in loose bunches. The variety should be compared with that existing variety which best combines these requirements.

Form (15 points.) Comparison shall be had with such existing varieties as shall show the best form. Defective form due to burst calyxes shall be considered under this head.

Substance (10 points.) Comparison shall be made with the existing varieties having the greatest substance.

Calyx (5 points.) The standard of comparison shall be that variety extant having a calyx which most securely and regularly supports the petals and from its general characteristics shows the least liability to burst.

Fragrance (5 points.) Comparison shall be had with the most fragrant variety extant.

Explanatory. In case any new variety under consideration shall be equal to, or exceed the standard in any of the foregoing

Carnation Bay State

\$3.00 PER HUNDRED

Having bought a large stock of this new variegated carnation last year, we can offer first class rooted cuttings of this variety at \$3.00 per hundred. Also rooted cuttings of Beacon, Enchantress, Rose Pink Enchantress, Victory, White Enchantress, White Perfection, Winona, Winsor, \$3.00 per hundred. Unrooted cuttings, \$2.00 per hundred. Reduced prices made on large orders. Send orders as early as possible.

SHEPARD'S CARNATION CO.

292 Fairmount Street,

LOWELL, MASS.

going comparisons, it shall be allowed the full number of points allowed to the attribute in question. If the variety under judgment shall show in any of its attributes a marked departure from existing types, and if in the opinion of the judges such departure from existing types shall give the variety unusual and exceptional merit value, the judges shall be authorized to award a certificate on the ground of "Novelty" although the variety in question may not, under the regular scale, score points enough to entitle it to such award. It is not contemplated that such action will be taken by the judges save in exceptional cases, and when taken their report shall specify the number of points scored under the regular

scale, and shall give full explanation of the reason for such extraordinary award.

All awards made by the judges shall be subject to the approval of the Society.

All certificate awards shall give the full number of points scored by each variety under each separate heading.

LORRAINE BEGONIAS

Made Exclusively for Florists

Our ribbons, chiffons, and nettings are made exclusively for florists—most of them on our own special order and contract with the mills at home and abroad.

We have made color harmony, color matching, and color contrast a study—most important points in the artistic work of the florist.

We have also made qualities and prices to please the most critical and the most economical. Pages 61 to 67 of our new catalog (free to all in the trade enclosing their business card) describes a few of the thousands of grades and patterns carried in stock.

Samples and prices at your service for special work.

All Silk Mesh Netting

Have you a good supply of our new "RICHMOND" pattern?

M. RICE & CO. LEADING FLORISTS' SUPPLY HOUSE Of America **Phila.**
1220 RACE STREET

CHICAGO NOTES.

Park Flower Shows.

Mid-winter flower shows have been held at both Garfield and Lincoln Parks during the past two weeks. Manager Sells of the former, states that he feels repaid for the extra labor, but that he would be glad to see a much larger number of visitors at these special times. While the conservatories are always open to the public and there is always plenty to be seen, on these two weeks the houses were open and lighted every evening. At Lincoln Park the orchids were the special feature and the crowds of visitors were larger here as the park is more easily reached. Rudolph Schiele is in charge here and is a great lover of the orchids. Some of the best specimens are from the H. G. Selfridge collection.

Personal.

Mrs. Josephine Garland, mother of the well-known Garland Bros. of Des-plaines, Ill., is very ill at the home of her daughter, Mrs. Fred Wittbold, at Lakeview. Mrs. Percy Jones, also a daughter, is assisting in caring for her.

Miscellaneous.

Election of officers took place at the Chicago Florists' Club meeting Thursday evening, January 6.

The Fleischman Floral Co. has just installed a 30-horse power car for delivery service, fitted with shelves and heating apparatus.

The Rudolph Jahn Floral Co. is the name of a new firm at 294 Dearborn

street. They are successors to the Butler Floral Co., 293 Dearborn street, and Mr. Jahn is the former manager for the old company. The change took place the first of the year and the move was made to the opposite side of the street.

Geo. Walther is again in charge of his store on 63rd street. Mrs. Percy Jones and Henry Van Gelder took charge of the business of the late Percy Jones in the Flower Growers' Market in place of Geo. Walther on the 1st of January.

See obituary columns for notices of death of Martha F. Frauenfelder, Aug. H. Boseck and August Pierson.

CLUB AND SOCIETY NOTES.

The regular meeting of the Buffalo Florists' Club has been postponed to the first Tuesday in February, when there will be nomination of officers, and two papers read by members. All members are requested to be present.

J. K. M. L. Farquhar of Boston, was the lecturer before the Bar Harbor (Me.) Horticultural Society on Thursday evening, January 6. "Italian Gardening and Gardens" was the subject—one on which Mr. Farquhar is probably better equipped to talk than any other man in this country. The lecture was illustrated by numerous stereopticon pictures of great beauty and rarity.

A press despatch from San Fran-

cisco states that the trustees of the Carnegie Institute have decided to withdraw \$10,000 annually given by the organization to Luther Burbank, the plant wizard of Santa Rosa. The commercialism which it is alleged has been a feature of the experiments of Burbank is given as the cause.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

ORCHIDS IN BLOOM ROEHRS, Rutherford, N. J.

FLORISTS SEIZE COAL.

There was a bit of a coal famine at Morrison a few days ago, and the greenhouse men were "up against" it. They did the reasonable thing under the circumstances and seized two cars of coal owned by the Chicago & Northwestern railroad. If they had been unable to get coal it would have meant very serious losses to them. Of course, it was not strictly according to Hoyle, but there seems to be an unwritten law that when there is a coal famine abroad in the land, any coal on track belongs to him who finds it and needs it the most. While the greenhouse men could be prosecuted, of course, nothing of the kind will be done. They will pay for the coal and that will be all that will become of the incident.—Burlington, Ia., Hawkeye.

HENRY F. MICHELL CO., Philadelphia

UNIFORMITY OF VARIETAL CHARACTER IN GARDEN VEGETABLES.

Read by Dr. William W. Tracy, Bureau of Plant Industry, before the New Jersey State Horticultural Society, Trenton, N. J., Dec. 22, 1909.

One of the most important phases of modern scientific investigation is the work of securing plant variations especially adapted to different climatic and soil conditions and economic requirements. It is carried on along two quite distinct and seemingly conflicting lines.

Two Lines of Work.

First, the breaking up of existing natural forms through judicious crossing, the aim being to secure the greatest possible variations along lines of possible increased usefulness or adaptation to specific cultural and economic conditions and requirements, and, second, the breeding of stocks of seed which shall uniformly develop into plants of the exact varietal character desired.

The first line of work is the one which is most generally attractive, not only to those who engage in it, but to the general public. It was his work along this line that has made the name of Burbank famous the world over, and it is along this line that your own Professor Halsted has been at work in New Brunswick. His work there, however, has been very different from that of Burbank in California. The latter's aim seems to have been, by taking advantage of the marvelous variations which result from crossing and the very favorable climate of California, to secure startling so-called novelties like Spineless Cactus and Wonderberry, with little regard to the real practical value. Prof. Halsted, on the other hand, has modestly and conscientiously aimed to secure really useful variations which shall be of practical value to horticulturists of the State.

The second line of work, the breed-

ing of stocks of seed, every one of which shall develop into plants of the exact varietal character best suited to some specific set of conditions and uses is far less attractive to those who engage in it and generally is less appreciated by the public, but it is quite as important a factor in the real advancement of horticultural art and practice, and I ask your attention for a few minutes to consideration of some phases of this work.

Some Characteristics of Seeds.

First, I want to speak of some characteristics of seeds, not that you do not know of them, but because of the truth embodied in the old saying, "Familiarity breeds contempt," and in practice we come to ignore or fail to appreciate the value and beauty of common things. Few of us really see the beauty which is all about us every day, because our attention is so fixed on what we have to do that we have no time to see or to enjoy that which costs us nothing. The injunction to "consider the lilies of the field," is just as wise and necessary as it was 2000 years ago. A seed is essentially, simply a plant packed for transportation, and carries within itself the unalterable potentiality and limitation of development of the plant into which it may grow. We may, through control of conditions of climate, soil and culture, secure the more or less perfect development of these potentialities, but we cannot add to or change them. They are made up of a balanced sum of tendencies which the seed has inherited in different degrees of intensity from each of its ancestors back for an indefinite number of generations. In a few exceptional cases the varietal characters of the plant into which the seed will develop are indicated by distinguishing characteristics in the seed itself, but such indications are not readily discernible or to be depended upon and we can only know with certainty the varietal character of the seed through a knowledge, not only of the character of the producing plant, but that each and all of its ancestors back for a number of generations had been of exactly the same character.

We have spoken of the character of a seed, but seeds, particularly those of vegetables, are rarely used in this way, but collectively and for the purpose of growing a crop in which there is in most cases little opportunity for the selection or rejection of individuals, so that the use of seed, every plant of which will develop into a plant of the exact varietal character desired, becomes of the utmost importance.

Importance of Uniformity of Varietal Character.

There has already been developed in the case of most of our vegetables varieties adapted to different cultural conditions and market requirements, and the success and profit of the planter is very largely dependent upon a wise selection of the sort best adapted to his conditions and requirements, and the securing of seed which shall

Of Interest to Retail Florists

The last week in the
BUFFALO old year ended satisfac-
torily to the trade; in
fact the week throughout was a busy
one for all. The calendar for this
week was well filled with social oc-
casions and the charity ball on Fri-
day consumed a good portion of vi-
olets, gardenias, orchids, lily of the
valley, etc. On Saturday the new ex-
ecutive (Mayor of Buffalo) was
greeted with grand tribute. The big
executive chamber of the city and
county hall in which the simple cere-
mony took place was a veritable gar-
den of roses. The floral greetings
from the friends of the new mayor
filled the room and presented a pic-
ture of splendor that reminded the
spectators of a great flower show.
Every desk in the Mayor's office was
crowded with Beauties, Richmonds,
Killarneys, carnations and blooming
plants and ferns, flowers being piled
against every wall and along the rail-
ing of the big room, there being

many designs of baskets, horseshoes,
etc. The cut flower market was good
throughout the week, but high prices
were out of the question and an
abundance of material was had, of
good quality. Lily of the valley, peas,
violets and red stock generally was
much in demand and a good week's
business was had by all.

SILKALINE.

The Meyer Green Silkline, introduced to the trade twenty-five years ago, is the strongest and best ever offered for florists' use for mossing designs, tying smilax and general work. Each and every spool is full 2 oz. of thread. Meyer Green Silkline is for sale by all leading supply houses in the country who want to give their customers a good, honest, reliable green thread. There have been many inferior threads put on the market of late years. Silkline can be had in three sizes, F, FF or FFF; F or FF for mossing designs and tying bouquets; FF and FFF for stringing smilax and asparagus, also for heavy work where great strength is required. If you cannot obtain them of your jobber send to Meyer direct. See his advertisement.

Flower Market Reports

Weather conditions do not favor the production of good flowers just at present. Another drawback to high quality is the fact that crops manipulated to be at the full for Christmas are now on the ebb. Yet there can be very little fault found with the stock being supplied by growers for this market, except in the case of American Beauty roses, which are really in poor form and very few of them qualified to take their place among the specials. From now on until the middle of March the Beauty will no doubt be encumbered in the same way. Other roses are excellent but to realize top figures they must be double excellent. Quantity seems to be shortening up, generally, which is a promising condition. Violets are holding up pretty well but it will require a run of bright moderate weather with pleasant sleighing, etc., to hold them at the present figure. Trumpet daffodils are among the latest additions to the market list but they run very small and flimsy thus far. Carnations are grand as to quality and rather sluggish as to demand.

Social events of the past week made a Happy New Year day for the florists. Some of the wholesalers report business in excess of that of last year which was then considered good. Prices did not reach the height attained at Christmas before the slump, but remained steady at from one-half to two-thirds. Many of the retailers think business would have averaged better for the holidays had prices started out more moderate and kept more uniform. Growers are now cutting high grade stock but the demand is more for medium since the holidays; nothing is going to waste however unless it is very short Beauties which are of poor quality. Easter lilies are becoming more plentiful. Carnations are of good quality and the prices are keeping up. Richmonds and Killarneys are selling well and especially White Killarneys, on account of extra demand for funeral work. Double violets are not here in very great quantities for the cold weather continues to be a hindrance to long distance shipping. Singles also are not too plentiful and sweet peas are sadly in need of sunshine. At this writing a genuine blizzard is raging which will not add to the pleasure or profit of the florist.

A review of the last week's business of 1909 places this year in a much brighter light than its beginning promised. Ever since this season started Detroit florists received their full share of prosperity. While prices at New Year's were slightly lower business was very good and almost up to New Year 1909. We are

Out of the Ordinary Ribbons

To do the usual the ordinary way is not the P/M way or aim. To improve the old, discover the new and make our ribbons a little better always, is the quest worth while.

Every florist using P/M ribbons feels that he has the latest and choicest to be had and that his work has that exclusiveness and individuality about it not obtainable in using inferior makes.

A Few of our Leaders:—

Pattern Killarney			FOR THE KILLARNEY ROSE		
Width	No.			Price

Flower Market Reports.

(Continued from page 51)

All reports Indianapolis cate a record-breaking Christ-

mas trade. The weather was favorable up to Christmas eve when the heavy snow storm badly interfered with traffic. Stock of all kinds was plentiful and growers as well as retailers were well satisfied with results. The demand for flowering plants seems to be increasing every year. Poinsettias, azaleas, cyclamens and begonias seem to be the favorites and a clean-up is reported by the majority of the retailers. There seems to have been a noticeable falling off this year in the cut flower trade owing to stiff prices asked. Violets, lily of the valley and orchids for corsages had the heaviest call in years. Plant baskets maintained their popularity and were more or less substituted for American Beauty roses and other high priced stock. Red immortelle wreaths, boxwood, holly and laurel festooning were handled in the usual quantities.

New Year's business

NEW YORK was not marked by any unusual features,

Friday's shipment, as a rule, were those of an ordinary week end in size and growers showed wisdom by not reserving their stock for this holiday, as the buyers' requirements were moderate. No advance in prices above those prevailing during the week, was possible. Beauties and Killarneys were in good supply. Richmonds and Marylands not quite so numerous and Bridesmaids and Brides were not conspicuous in quantity. Carnations sold very well at moderate figures and none were left by Sunday. Violets suffered a set back New Year's Eve and clearances were effected only with the aid of the street men. Lily of the valley did not have much of a move to it, neither did sweet peas. As a whole the market was tame and if it were not that supplies were ordinary the

result would have been different. The first half of the present week is dull. Stock is coming in—particularly carnations and pink roses,—as if crops were on. Quotations are unsteady on all kinds of flowers. Roman hyacinths and paper whites are plentiful and getting cheaper. Tulips and daffodils are in the market though it doesn't look as if there was much room for them with the limited demand now prevailing. Cypripediums move slowly.

PHILADELPHIA Transient trade was almost at a standstill New Year's week owing to the storm blockade. If it had not been for many ad-

vance orders booked weeks ago for social affairs things would have been very bad, indeed. On the whole, the total overturn was pretty good—all things considered—but, of course, not as good as last year by a long way. There was an abundance of good flowers in roses, carnations, and all the leading staples. Orchids and lily of the valley improved in demand mainly on account of the large amount of mortuary work. Violets shortened up and moved fairly well.

Greenville, Ind.—Dille & Konzelmann is the name of a new flower growing concern which has started in this place.

ANOTHER FRUIT TREE FUNGUS.

Consul-General James W. Ragsdale, of Halifax, N. S., reports that Prof. W. H. Smith, of the Provincial Agricultural College, in addressing the Canadian Maritime Fruit Growers' Association at Kentville on December 2 mentioned the discovery of what is believed to be "silver leaf" in the orchards of Nova Scotia, a scourge not hitherto found in America. He was in some doubt about this, but his opinion was confirmed by the expert at Ottawa, and he will know for a certainty in the spring. He described the disease "as a fungus in character, which feeds on the sap, and does not make itself known for three or four years. The leaves first turn bluish and then oily white."

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

WANTED—March 15th, a Nurseryman of experience in packing and grading, and also a herbaceous man. Chas. R. Fish & Co., Worcester, Mass.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

FOR SALE Greenhouse property, with stock and all; 12,000 sq. ft. glass, 1 13 room house, 1 5-room house with all improvements; a nice big store front; good retail trade; established 15 years; acre of ground, with lot on main street. 7710 Lorain Ave., Cleveland Ohio.

FOR SALE—A hothouse, with two wings, each about 50 ft. long, put up in sections, including heater and all piping; will sell at a bargain. Apply to A. C. Chisholm, 1320 Blue Hill Ave., Mattapan.

FOR SALE—500 boxes of double glass, from 10x12 to 16x24; prices positively cheap to get rid of it on the grounds as it must be taken away within the month; also 2 of largest Furman Sectional Boilers practically new, used 2 seasons, 20,000 feet pipe from 1 up to 4 inch. wrought and cast iron. At Duncan Greenhouses, Sparkkill, N. Y. Address M. Tomlack, Post Office, Sparkkill, N. Y.

FOR SALE—Greenhouse property opposite Woodlawn Cemetery, Everett, Mass. Store, dwelling house 12 rooms, 3000 ft. of glass, hot water heating, 1500 baskets of pansies in ground, houses all stocked ready to step right in and do business. One acre of ground. H. A. care HORTICULTURE.

Why HORTICULTURE has stood the test as a profitable Advertising medium for the trade.

Because It is read by the men of standing and influence in the Horticultural field, every one of whom is a prospective buyer.

Why HORTICULTURE is so widely read.

Because Its contents are distinctly representative of American Horticulture and are thus indispensable to the Florist, Nurseryman, Seedsman and Gardener.

An Admirer of HORTICULTURE in the Central West writes; "It has won on its merits. It is our most prized weekly visitor."

And Now How HORTICULTURE has managed to elbow its way in between its older rivals and why the best trade advertisers find it an indispensable auxiliary.

It's No Secret That the men who read HORTICULTURE are the sort of men that advertisers like to talk to and if you have anything to advertise you can't afford to get along without them.

UNIFORMITY OF VARIETAL CHARACTER IN GARDEN VEGETABLES.

(Continued from page 46)

develop into plants which shall be as uniform as possible in habit, season of maturity and character of market product. The importance as a factor upon which profit is dependent of absolute uniformity of varietal character in all the plants of any particular culture is far greater than is generally recognized. We think we do not exaggerate in the least when we say that in the case of most cultures of vegetables, if all or even 90 per cent. of the plants were as nearly alike the ideal plant of the sort as are the best 20 per cent. of them, the actual profit of the culture would be increased 25 per cent. and often a great deal more. Uniformity in habit of plant and character of market products lessens the cost of cultivation as it permits of the different cultural operations being done at the exact time when they would be most beneficial to all of the plants. Lessens the cost of harvesting and marketing the crop for similar reasons. Increases the value of the product. In most of our markets uniformity in the contents of a packet is a most important factor in determining the relative price it will command. The addition of superior specimens, if they be of different varietal character, will lessen rather than add to sale value of a package.

I have often asked experienced cultivators what would it be worth to you if every plant in the field was like these, pointing to some five or six plants which were much alike and very good, though by no means the best that could be found, and have been answered, "If I could grow a field of cabbage, or a house of lettuce every plant just like those I would soon be rich enough to quit work," or words to that effect. Sometimes differences in the real value of plants in the same culture are due to unavoidable or unintended differences in the sowing of the seed, or in the handling of the plants; often we have seen differences in the same culture sufficient to result in profit or loss, resulting from the sowing the seed just before or after a slight shower, though on the same day. Again, one can often see all through the season a difference in the rows of plants handled by different workmen. I have known of at least one case where the mere altering of the "hang" of the cultivator used in the last cultivation of a field of beans resulted in a loss of over 20 per cent. in the bulk of the crop, and even a greater difference in the appearance of the sample.

When we consider the difficulty of finding two plants, or even two flowers of the same plant which are exactly alike even in external form, we must recognize the probability that plants in which the active and potential variant tendencies exist in exactly the same proportionate strength are even more rare.

No two seedling plants can ever be precisely alike; they are very rarely even as much alike as are plants propagated by division, but it is quite possible and practical to grow seed every grain of which will develop into plants more alike than is the case

with most of the vegetable seed now used.

Conditions Which Cause Variation.

Every seed carries within itself a multitude of potential variations inherited in different degrees of intensity from each of its ancestors back for an indefinite number of generations; some of these variant tendencies though quite as distinct as those which distinguish varieties may lie dormant without any apparent influence over the external form of the plant, yet they do not cease to exist and through the influence of the pollen of some other plant, changed external conditions, or other cause, may become active and dominant in some individual seed, and bring about in it a new combination and balance of influences resulting in a radical change of varietal character. Each generation of the same combinations of variant tendencies lessens the probability of a new combination and consequent external change.

The general proposition that a seed will develop into a plant like the one that produced it is so commonly accepted that we have such sayings as, "like produce like," etc., and with most gardeners the sight of a plant of special merit creates a desire for some of its seed; there are, however, many conditions which may result in a seed developing into a plant very different from that which produced it. First, there is always the possibility, even with plants whose flowers are generally self-fertile, that any particular seed may have developed as the result of cross fertilization and in this way inherit quite different variant tendencies, or in very different proportionate power from those of the plant upon which it grew. This may be true even if the staminate plant seems practically identical with the seed producing one, for in it there may be a different balance of variant influence having its origin in differences in earlier generations. There is also the possibility that the producing plant may owe its superiority to the cross fertilization of quite distinct plants, but does not itself show any evidences of such crossing though they may appear in subsequent generations.

Some Facts Concerning Inherited Tendencies.

The balance between the multitude of variant tendencies inherited from different ancestors, and the consequent character of the plant itself is very seldom fully established, often it is not even hinted at, in the first generation after the combination; it usually requires a number of generations before this balance is sufficiently settled to reveal the full result of the crossing, as the slightest difference in the relative strength of any single variant may, and often does so affect the balance of influence as to result in a material change in the character of the plant and of the seed it will produce. We can then only predict with certainty the exact character of the plant which any seed will develop into in proportion as we know not only that the seed itself has not been influenced by pollen from plants different from the one that produced it, but that all of the ancestors of the producing plant back for as many generations as possible have been of pre-

cisely the same combination and balance of variant tendencies. We think the fact that the effect of an accidental or intended crossing often, we may say, generally, does not show at least in its full force until the second or third generation is of great importance, but it is often overlooked; and we imagine we have a pure plant of a distinct type when in reality it is a cross, and certain to show its mixed origin in later generations.

Some Causes of Disappointment.

In common practice men save seed of some especially pleasing and perfect plant with little regard to the surrounding ones, if they are only of the same sort; or to the character of the ancestors of the plant they admire and when they sow this seed by itself and get plants like the parent plant they are delighted, and think they have a pure strain, only to be disappointed the next year. This is the history of many a seedsman's novelty which was introduced in good faith, and with high hopes that at last he had a really superior stock, for the original plant was almost perfect; its seed was carefully saved and planted where there was no probability of mixing; the plants thus produced were uniformly good, but alas, in the next crop of seed some tendency which had remained dormant up to this time comes into power in some of the seeds though not in others, and the stock has lost its seeming uniformity and value.

The multiplication of varietal names used by seedsmen is a recognition, though perhaps an unconscious one, of the value of uniformity in varietal character, for in many, many cases a new name is given a certain stock of seed, not because it is distinctly different in varietal character from some older sort of proven value, but simply because a larger proportion of the seed will develop into fairly representative plants of the sort. Many stocks of seed sold are so variable that it is difficult to recognize the exact characteristics the name stands for. In practice it not infrequently happens that seed supposed to be of a new variety is sent to two different growers to be planted for the seed crop, and it is so variable that one grower supposes that one plant is the ideal while the other thinks that a very different one was what was wanted, and they each aim to develop a stock which differs from that of the other. The two lots come in to the seedsman, are mixed and sold, and so the variation is increased.

(To be continued)

PHILADELPHIA NOTES.

The Christmas snow storm caught the Conard & Jones Co. unawares as to coal. By herculean efforts enough to keep going was wallowed through the snow. A small cave-in of a section of the greenhouse plant was an incident.

The newspapers of the country have circulated everywhere the news of the trying family affliction and bitter distress which has come to that honored representative of the seed trade, Robert Buist of Philadelphia. We extend to him our sincere sympathy in this hour of anxiety and humiliation.

CATALOGUES RECEIVED.

Forest Nursery and Seed Co., McMinnville, Tenn.—Wholesale Trade List for Spring, 1910.

Sluis & Groot, Enkhuizen, Holland.—General Wholesale Price List of Vegetable, Flower and Agricultural Seeds. Issued under date of December 15, 1909.

W. E. Marshall & Co., New York.—Seed Catalogue 1910. A neat and attractive publication showing painstaking work in its preparation. Covers in grey green tint show portraits of Improved Branching Aster and a Bean of high degree.

J. Bolgiano & Son, Baltimore, Md.—"Bolgiano's" for 1910, is just out in brilliant dress and full of good suggestions for the garden, field and lawn. I. X. L. Tomato has the right of way on the title page. This house has been established 92 years.

Skidelsky & Irwin Co., Philadelphia, Pa.—1910 Wholesale List of Bulbs, Plants, Seeds and other Florists' Specialties. A business-like document showing throughout the mark of the man who understands the florist trade and its needs to the limit. If there is anything you want look for in this catalogue.

Charles H. Totty, Madison, N. J.—Chrysanthemums and Other Plants for 1910. No introduction is needed for anything that this noted chrysanthemum expert puts forth. Suffice it to say that the publication is up to Totty's best standard and the chrysanthemums that the progressive grower must have are listed in its pages.

Henry Mette, Quedlinburg, Germany.—Trade Catalogue 1901-1910 of Vegetable, Flower and Farm Seeds. As usual, this eminent house has sent out a very interesting and comprehensive catalogue. The list of novelties is quite large. Covers in colors, one showing over one hundred varieties of shelled beans, in natural sizes, colors and markings.

Conard & Jones Co., West Grove, Pa.—New Floral Guide for 1910. We have reviewed this excellent publication year after year, noticing always that it grows better and better each time. The plate of rose Wm. R. Smith which adorns the title page this year is a gem. Over one-third of the pages are devoted to roses in all classes; cannas and garden flowers in full variety make up the balance of this very creditable catalogue.

A. T. Boddington, New York.—Boddington's Garden Guide, Spring 1910. This is always one of the handsomest catalogues of the year and the one just received is fully the peer of its predecessors. H. A. Bunyard's artistic talent is finely displayed in the cover subject—*Dimorphotheca aurantiaca*, in orange, green and gold. The illustrations throughout are of generous size and well placed. Sweet peas are given

a prominent place. A short history of the sweet pea has been contributed by the Rev. W. T. Hutchins.

Holmes' 1910 Handbook of Seeds—Holmes' Delicious Sweet Corn in natural colors on front cover, very artistically brought out; Holmes' Prolific Green Lima similarly treated on back cover. A compact manual, well written and well printed. The illustrations are mostly originals from photographs, and add greatly to the elucidation of the text. The two great novelties of this year, mentioned above, will undoubtedly take their place in the horticultural world along with Holmes' Houser Cabbage, Holmes' Premo Sweet Corn, and many other excellent introductions of this house. Not only vegetables but grasses and forage plants; and in the realm of flowers; in farm and dairy supplies, implements, fertilizers, insecticides, poultry supplies—in short, everything for the farmer, gardener and florist is well represented in this catalogue.

John Lewis Childs, Floral Park, N. Y.—Childs' Combination Catalogue. Seeds, Bulbs, Plants, Shrubs, etc. Colored title page, hardy ever-blooming pinks, and back cover adorned with attractive small fruits. An interesting catalogue, strong on novelties. Gives more space to the discredited Wonderberry than anything else. We admire "sand" and tenacity of purpose in a good cause but! "Our Mayor's wife who had a roly-poly pudding made of them" and "My pastor's wife who had a steam pudding" are still alive, it seems, and all is happy. "Yesterday I made a pie for a banker's family," says one enthusiastic Michigan matron. All these people were "charmed by the foolish whistling of a name" perhaps, but another cylinder will now have to be put on the machine for the "Wonderberry" triumph of Burbank is, we are told, totally eclipsed by Childs' "go you one better." Our Improved Wonderberry or Sunberry. "Sic transit gloria mundi."

SEED TRADE NOTES.

The Ohio Valley Seed Company, Evansville, Ind., has increased its capital stock to \$25,000.

The anxiety to fill up shortages is warrant for the stir in the wholesale seed world at present. May all the good workers in this important campaign have a happy New Year in the bosom of their families wherever they belong. Easy enough to say; but hard to accomplish with railway schedules demoralized as they have been for two weeks.

The Ozark Seed Company, Springfield, Mo., has moved into its new building at 209 West Commercial street. The new quarters are large

and commodious and give plenty of room to care for a large and increasing business. John Barrett is president of the company and E. I. Pine is manager.

In ordering goods please add "I saw it in HORTICULTURE."

OBITUARY.

August H. Boseck.

August H. Boseck, for twenty years superintendent of Wunder's Cemetery, Chicago, died Tuesday, December 28, at his residence, 3953 North Clark street, at the age of 60 years. He is survived by a widow and three children.

August Pierson.

August Pierson, superintendent of Oak Hill Cemetery, Chicago, for seven years, died December 28 at the home of his daughter, Mrs. A. C. Jackson, Kimbark avenue, following an operation.

George H. Serviss.

Death came to George H. Serviss, florist of Batavia, Ill., on the night of December 23, following an illness of many months at his home at 75 Harrison street. The deceased had lived in Batavia for the past twenty-five years. He leaves a widow and two children.

Martha F. Frauenfelder.

Martha Froese Frauenfelder, wife of Conrad Frauenfelder of Chicago, died January 1st after a long illness. The funeral was from the home January 4th, at 2 o'clock. Mrs. Frauenfelder leaves two children, Edna and Hazel, and a husband, who is a well-known florist on West Madison street and who is now very ill with pneumonia. The sympathy of the trade is with Mr. Frauenfelder and his family in their affliction.

John P. Sorenson.

John P. Sorenson, for fourteen years horticultural inspector in Salt Lake County, Utah, died at Latter-Day Saints hospital on December 20. Mr. Sorenson was born in Denmark in 1837 and emigrated to Utah in 1871. He was a very efficient official. For years he had charge of the horticultural exhibits at the Utah State fairs, and it was due to his energy and ability that the exhibits were so uniformly creditable. He leaves a widow and ten children.

BUSINESS CHANGES.

Washington, Ia.—Joseph Melinsky has bought out the Keck Floral Company.

Albany, N. Y.—F. W. Eberle has purchased the interest of F. A. Sherman in the seed business of Sherman & Eberle.

Davenport, Ia.—The Bills Floral Company was dissolved on Dec. 15, 1909, and the business has been taken by H. M. Bills from this date. The plant comprises 18 houses, aggregating between 30,000 and 35,000 square feet of glass, heated by steam, 275 h. p. boilers. A large retail business is done at this place.

Salem, O.—V. A. Cowgill has leased the J. E. Bonsall place for the coming year and will run it in connection with his retail trade already established. There are five houses, 16x330, filled with Kaiserin roses, the crop from which Mr. Bonsall has been selling through the McCallum Co., Pittsburgh. The place which Mr. Cowgill has been running for the past three years was bought from Mr. Bonsall originally, but has been almost entirely rebuilt. Six houses have just been completed, three 31x130 each, one 16x65, one 25x65,

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{3}{4}$ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

E. H. Hunt, 76-78 Wabash Ave.,
Chicago, Ill.

one 20x50. Salem is a city of 15,000 population and Mr. Cowgill reports an unprecedented Christmas trade, especially in the plant line.

FIRE RECORD.

Lima, O.—The greenhouses and contents of E. N. Zetlitz were damaged by fire on the night of Dec. 20.

Beardstown, Ill.—Frank Bros., florists, suffered a small loss from a blaze which started in their office on Dec. 29.

South Portland, Me.—The store and greenhouses of Frank W. Dyer, were entirely consumed early on the morning of December 27. The fire started in an adjoining grocery store. Mr. Dyer's loss amounts to several thousand dollars.

Kansas City, Mo.—The George M. Kellogg Flower Company's store at 9th street and Grande avenue, was completely destroyed, together with the Rialto Building in which it was located, early on the morning of Dec. 23. The fire is supposed to have been started by escaping gas. The loss was heavy.

Peoria, Ill.—Spontaneous combustion caused a fire in the second story of the building occupied by the Stocker Seed Company, in the heart of the wholesale district, on the night of Jan. 1. The blaze was discovered by a watchman, but extinguished by the firemen before the building was destroyed. Several thousand dollars' worth of seeds were lost. The property loss was not heavy.

Hartford, Conn.—An overdose of fumigating with hydro-cyanic acid ruined 10,000 carnation plants in the greenhouse of John Coombs a few days before Christmas. The loss including flowers in bloom for the holidays is estimated at \$3000. In the issue of HORTICULTURE for January 30, 1909, page 143, appeared a valuable contribution on the use of this fumigating agent by A. J. Lovelless of Lenox, Mass., and the directions there given, had they been carefully followed, would undoubtedly have saved this \$3000 as well as a good many other dollars lost in a similar manner elsewhere.

**PRATT'S

SPRAYED

YOU ARE SQUANDERING YOUR COAL

Abusing your plants and reducing your crop

If you are still clinging to the primitive and antiquated gravity system of circulating hot water. Below is another testimonial as to **what a man gets** when he takes the Automatic Circulator into partnership.

From the proprietor of a large eastern carnation growing establishment where a complete system has just been installed. "The water only loses about five degrees of heat on the longest run we have, whereas there was a loss of fifty to sixty degrees when we depended on gravity, which is gratifying."

Another firm, one of the largest and most notable in the Central West, says: "At this time of year we cannot make many changes, but from what I observe will change to hot water next summer"

The Story of the Automatic Circulator is

Defective Circulation Absolutely Annihilated. Regular and Uniform Temperature in Every Part of the House Day and Night. It Never Sleeps, but Works While YOU Sleep. An Indispensable Feature of the Modern Greenhouse Heating System. Write and tell us your present equipment and we will tell you where and how you can save coal, labor and worry and increase your product. The address of the writers of the above testimonials will be given on application.

NEWS NOTES.

Kennett Sq., Pa.—Two greenhouses belonging to C. M. Swayne were badly crushed under the weight of snow on Christmas day.

Kinmoth Falls, Ore.—Arthur C. Lewis has perfected a plan for heating his greenhouses with water piped from a hot spring. Since tapping the subterranean stream the temperature

of the water has increased at the rate of about 10 degrees F. a week.

Detroit, Mich.—A section of the boiler blew out on Christmas eve at the greenhouse of F. Kalbe. To add to the difficulty he could not procure another section in this locality and had to wire Buffalo. It is to be hoped that weather conditions stay moderate, thereby preventing further damage to his property.

Greenhouse Property To Lease

I seek to find the right man or concern to lease the greenhouses and adjoining necessary buildings, including a power house, on the estate of the late Frank Jones of Portsmouth, N. H.

The plant consists of one large brick boiler house containing two horizontal boilers of ample capacity, and coal storage. Connected with this building a brick and stone head house, about 20 feet wide. At right angles to and connected with this house, are fourteen greenhouses 60 feet long and two large double houses. Also a tropical plant house disconnected, and two grape houses filled with Black Hamburgs in excellent condition.

The benches in the sixteen houses are of slate, with iron supports. There are also a great number of cold frames close at hand.

The construction of everything is first-class in every respect, far better than is usually built for a high class commercial proposition. There is not a broken light of glass, a broken brick, tile or slate slab on the premises; nor is there any rust or decay or displacement of anything from the foundations to the ridge pole. The estate is situated about one mile from the Boston & Maine station, approached by a broad avenue. There are excellent markets at Boston, Portland and Portsmouth.

The mansion on this estate and small parks adjoining it are to be used for private purposes and the proprietor desires to be relieved from the responsibility of the greenhouses and surrounding grounds.

A satisfactory lease for everybody considered, whereby the lessee could from the start make money, so far as the rental is concerned, could be negotiated.

A Greenhouse Growth

Unless a greenhouse has been planned and located with the idea of possible additions, when they **are** made, the result is bound to be disappointing, giving an unbalanced and often inconvenient range, far different from what we, as skillful designers, would have secured.

When you do build, be sure you **start** right. When you are ready to build, we are ready to do the building.

NEW CARNATIONS

The Two Prize Winning Introductions of the Cottage Gardens

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Price, Rooted Cuttings

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid. Increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

AWARDS

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Price, Rooted Cuttings

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery Feb. 1st, January Cuttings All Sold

These varieties bring from \$2.00 to \$4.00 per 100 more than any other carnation sold in the New York market.

We claim to have the largest and most complete collection in the country, and an immense stock for immediate shipment, from 2 in. pots of good standard sorts, at \$2.00 per 100; \$18.50 per 1000, and up to 50c each for New Varieties.

We have a splendid stock in 2 in. pots of the following at \$2.00 per 100. Double Lobelia, Kathleen Mallard; Alyssum, Giant and Dwarf; Lemon Verbenas; Fuchsias, 6 Varieties; Coleus Verschaffeltii and Golden Bedder; Lantanas, 8 Varieties; Ivy Leaved Geraniums, 6 Varieties, Scented Geraniums.

Double Petunias, mixed colors, \$3.00 per 100. Canna Roots, home grown, 1,000,000 good strong division at \$18.50 per 1000. King Humbert, \$6.00 per 100; \$50.00 per 1000. Dahlia Roots, whole field clumps, \$5.00 per 100 and up.

R. Vincent, Jr. & Sons Co., WHITE MARSH, MD.

Carnation Dorothy Gordon

You are looking for the variety that will show the most profit, plus the greatest satisfaction to your customers.

Very well; this Carnation will do both. Dorothy Gordon is vigorous and disease-free, with flowers of uniform color—a shade darker than Pink Enchantress.

It produces at least a third more carnations than does Enchantress, and much larger—average flowers of Dorothy Gordon measure 3 inches or more in diameter. It has a stiff stem, and is a long keeper.

It has regularly brought us double the profits of the leading commercial sorts—Enchantress for instance. Let us illustrate:

“Enchantress” sells at wholesale in the Philadelphia markets at \$6 per 100; “Dorothy Gordon” has regularly brought us \$9 per 100. In addition, “Dorothy Gordon” produces easily one-third more flowers, or an additional \$3—giving a return of \$12 from the same greenhouse space that would be required to grow \$6 worth of “Enchantress.”

We are selling strong rooted cuttings at \$10.00 per 100, or \$75.00 per 1000.

We are ready to demonstrate to you that you can grow Dorothy Gordon with greater profit than any other commercial carnation. We invite you to come to Wyncote and see it growing in our houses; if you cannot do this, write for full particulars—we'll furnish some Carnation facts that will interest you?

JOSEPH HEACOCK CO., Disseminators; Wyncote, Pa.

ROOTED CUTTINGS CARNATIONS HEALTHY STOCK

Plant Novelties From China

The Primrose family is justly appreciated one of the most delightful and useful. For pot-culture the garden varieties of *Primula sinensis* and *P. obconica* are indispensable. The wild types of both these *Primulas* occur in the neighborhood of Ichang, Central China—*P. sinensis* on the bare limestone cliff of the gorges and *P. obconica* on moist grassy banks. In all nearly a hundred species of *Primula* are known from China where the genus finds its headquarters. The great majority of these are alpine plants and not suitable for general cultivation. Some, however, are very amenable in this matter and are distinct improvements on older denizens for gardens. *Primula pulverulenta*, *P. cockburniana* and *P. Veitchii* are three novelties of exceptional merit. In habit and foliage the first-named resembles the well-known *P. japonica*, but has flower-scapes 3 ft. or more tall each bearing 9 to 11 whorls of flowers. The individual flowers are a third larger than those of *P. japonica*, rich crimson in color, with often twenty or more in a single whorl. The flower-scapes are clothed with a white farina (hence its specific name) and it is this peculiarity together with its large flowers and taller scapes that makes the new plant so very superior to *P. japonica* and undoubtedly the finest hardy Primrose at present in cultivation. *P. pulverulenta* is a true perennial of vigorous growth, very floriferous and remains in flower for a couple of months. *P. cockburniana* has neat, ovate, obtuse, pale green leaves and bright orange-scarlet flowers, an inch across, borne in several whorls on scapes 1 to 1½ ft. tall. The color of the flowers in this plant is unique in the family and one of the rarest colors in the vegetable kingdom. Unfortunately, the plant is practically a biennial. Hybridists, however, have already secured several crosses between this *Primula* and *P. pulverulenta*. Some of these have the perennial character of the last-named with flowers the same as *P. cockburniana*.

In stature and habit these hybrids are intermediate. "Unique" and "Unique Improved" are names given by the raisers to these hybrids and there is a great possibility of a new race of hardy Primroses, distinguished by these remarkable orange-scarlet flowers, being developed from these two species. A shady position, fairly stiff loam and cow dung with abundance of water at the roots are the essentials in the successful culture of these two new Primroses. An ideal spot would be the side of a woodland stream free of rank weeds.

Primula Veitchii is a true perennial, with leaves resembling *P. obconica*, but with a dense felt of white hairs on lower surface. The flowers are freely produced in whorls on scapes 1 to 1½ ft. tall, and are of a pleasing bright rose-color. A hardy *P. obconica* sums up *P. Veitchii*—*Verbsap*. A light loam, rich in leaf-soil, and a moderately dry situation are necessary for its successful culture. These *Primulas* seed freely and the seeds germinate readily.

The Fume-worts, of which over 60 species are known from China, are mostly better suited for the rockery than the ordinary garden. The best known of the family is the old *Dicentra (Dielytra) spectabile* introduced by Fortune, and now not so much cultivated as it deserves. A new species, just introduced and not yet in commerce, is *D. macrantha* with axillary clusters of large, pale yellow, pendulous flowers. This plant will probably find many friends in due course.

Very different to the above are *Corydalis thalictrifolia* and *C. Wilsoni*. The first named has foliage resembling the maiden-hair fern in shape, rather fleshy in

CORYDALIS THALICTRIFOLIA

A new yellow-flowered greenhouse plant suitable for basket culture.

texture, and erect racemes of large, yellow flowers produced in profusion. *C. Wilsoni* is a smaller plant with finely cut foliage, covered with a white farina, and erect racemes of golden-yellow flowers. Similar to this latter are *C. tomentosa* and *C. tomentella*. These *Corydalis* are denizens of limestone cliffs, growing in pockets in company with *Primula sinensis*. Though not hardy they have decorative value of no mean order, making charming plants for pot, and more especially basket culture. Seeds sown in May in a cool greenhouse and the seedlings potted on will flower the following winter. Their culture is of the simplest and those on the lookout for pleasing decorative plants, for basket culture or pots in a cool greenhouse, will do well to give *Corydalis thalictrifolia* and *C. Wilsoni* a trial.

Rehmannia angulata is a tall-growing biennial which has become very popular on the other side for greenhouse work. The large, fox-glove-like, rose-colored flowers are produced in great profusion on branching stems 6 feet or more tall. This plant requires liberal treatment and when well-grown makes a highly decorative plant especially useful for winter and early spring work. This plant is easily raised from seeds which are freely produced. Those who complain of *Rehmannia angulata* being too strong-growing will welcome the advent of the dwarf-growing *R. Henryi*. This plant is one of the Arnold Arboretum's recent introductions, grows nine inches to a foot high, and has flowers as large as *R. angulata*, pure white save for a touch of yellow within the throat. This plant has not been really cultivated yet but the few plants that have flowered give considerable promise. Hybridizing these two species may produce a race of plants having greater decorative value than the types and a much wider range in color. With these *Rehmannias*, as with other of the Novelties dealt with in these articles, the potential value may prove of much the greater importance to Horticulture.

S. W. Wilson.

British Horticulture

A FLOURISHING SOCIETY

It is now 33 years ago since the National Rose Society first came into existence, with the late Dean Hole as the president and the late Rev. H. H. D'ombrain as secretary. Since that time the Society has steadily grown in numbers, influence, and usefulness. At the annual meeting, recently held in London, it was reported that the gate money received from the general public this year at the Royal Botanic Society's gardens exceeded that at any previous exhibition held by the Society. The finances are in a very satisfactory state, a substantial amount being carried to the reserve fund. During the past year 900 new members have joined the Society—115 more than in the previous year. Allowing for the losses by death and resignation the total number of members is now 3,797. In the course of the meeting an alteration was made in the rules to provide that in future in all exhibition boxes for single blooms the tubes must be five inches apart each way from centre to centre of the tubes. A pleasing incident was the presentation of the Dean Hole memorial medal to the Rev. J. H. Pemberton, of Havering, Essex, an eminent rosarian, and author of "Roses, Their History, Development, and Cultivation."

THE CULT OF THE SWEET PEA

Another organization which has evidently come to stay is the National Sweet Pea Society. The report presented at the recent annual meeting stated that 280 new members have joined the Society during the year just ended, the membership now standing at 938. The finances are equally gratifying, the balance at the bank being the largest carried forward in the Society's history. The Society's trials were not so entirely successful this year as they had been in previous seasons, owing to the vagaries of the weather, and the consequent difficulty experienced in inspecting the trials in the best condition. There were 350 varieties of stocks of sweet peas on trial. Arrangements have been made for next year's shows, and also for the trials. These will be made on a more extensive scale than has hitherto been possible. Mr. Chas. Foster will again superintend the trials, which will be conducted at the Times experimental station, Sutton Green, Guildford. The annual meeting was followed by a dinner and conference, at which papers were read by Mr. W. J. Unwin, of Histon, and Mr. W. Cuthbertson, of Mark's Tey, Essex.

ITEMS OF INTEREST

The Wisbech Fruit Growers' Association has passed a resolution, strongly protesting against the Government's subsidizing Jamaica to the extent of £20,000 whilst totally failing to recognize the claims of the home growers.—The annual dinner of the Glasgow Seed and Nursery Trade Association was a successful affair.—The widespread nature of black scab amongst the potato crops in Shropshire and Staffordshire this season was lately referred to at a meeting of the Shropshire Chamber of Agriculture.—In consigning a barrel of apples to a London broker, Mr. J. Marsh, a Nova Scotian farmer inserted a note stating that he desired to correspond with "a fair maid between the age of 16 and 25." The sequel is a happy wedding.—Negotiations are now in progress for the amalgamation of the Royal Botanic Society and the Royal Horticultural Society.

Anthurium

This large genus of stove and greenhouse plants, may, for convenience, be divided into two sections; namely, those grown for the grandeur of their foliage, and those grown for the curious shape and coloring of their inflorescence. No greenhouse foliage collection should be without a few varieties of each of these decorative plants. The fine noble looking leaves of the foliage varieties always attract the attention of visitors and the flowering ones, if scattered here and there throughout the foliage house, because of their quaint appearance and bright color somewhat relieve the monotony of leaves and always court admiration. They are shade loving plants and for that reason alone, an odd shady, warm corner may be made to yield a few cut flowers a little out of the ordinary.

Anthuriums are propagated by division of the crowns, or cutting up the rhizome, and by seeds. This last method requires a good deal of patience as the seed takes about a year to ripen after fertilization has taken place. To increase stock by the former way select the plant to be treated, turn it out of the pot, and wash the soil carefully from the roots, care being taken to injure them as little as possible, divide the crowns with a sharp knife, leaving a piece of root to each crown; cut the rhizome into pieces about two inches long, these also having roots attached to each piece. A good potting material to use for a first potting is equal parts of fern root, the fibre of loam, sphagnum moss, and sharp sand, with a good sprinkling of charcoal. The mixture should be broken in pieces small enough to use conveniently in the smallest pots that the crowns and pieces can be potted in. The crowns should be a little above the rim of the pot when finished off. The cut-up rhizomes should be covered up a little until they break an eye. They should be placed in a humid atmosphere, with a temperature of about seventy degrees, care being taken not to overwater, until they start into vigorous growth. Established plants should have more loam and fern root, and less sphagnum moss and sand, in the compost for potting them; about a fifth of dried cow manure may be added and a sprinkling of chicken bone. About midseason they will be well rooted, and can be fed with the usual stimulant. I have seen the showy leaved varieties benefited by a topdressing of sphagnum moss and dried cow manure applied about the end of June, an equal size of leaf being maintained throughout the season.

A few good, ornamental leaved varieties to grow are: *A. cordifolium*—one of the best, and can be grown in a lower temperature than some of the others; *A. crystallinum*—probably the one most commonly grown; *A. splendendum*—quite a distinct species, and very striking; *A. Veitchii*, *A. Waluiewi*, *A. Waroqueanum*. Among the best to grow for flowers are: *A. Andreanum*—a very beautiful species, running into many forms; *A. Ferrierense*—a hybrid between *A. ornatum* and *A. Andreanum*, an excellent variety; *A. Scherzerianum*—a very compact, dwarf-growing species; it flowers quite freely, and makes a handsome specimen flowering plant. There are quite a number of different varieties of this last named species, among which may be mentioned *A. Scherz. maximum*, *A. S. pygmaeum*, *A. S. Wardii*, *A. S. Williamsii* also known as *A. S. album*.

The Gladiolus

A Few Observations from My 1909 Note Book.

Judging from the great number of new varieties being introduced by gladiolus growers all over the world, it would seem that this popular bulb was receiving its full share of the attention of the plant breeders. I have grown and tested the past season something like 400 varieties and I will describe briefly the best of these.

"Reine Blanche" (Barre), a new pure white, from Europe is sure to be a valuable sort for florists' use and the cut flower grower as it does not pink like Augusta and the only show of color is so deep in the throat that it does not show. It is a *gandavensis* of average size flower and very vigorous.

I received from Vaughan's Seed Store the two new Princess seedlings of Dr. Van Fleet. The best one was Mastodon, a "chip of the old block," but a decided improvement, the spike growing well above the foliage thereby furnishing a good long stem. Margaret by M. Crawford is also a very fine red.

C. L. Goodrich, Luther, Ia., sent me some of his new seedlings to test. They were all magnificent especially the following. Clarinda (No. 119), rose ground striped crimson, throat white mottled violet, very large flowers; Montezuma (No. 162), scarlet and crimson with large pale yellow throat; Mt. Shasta, pure white ground slightly penciled and tinted pink; very large flowers well arranged on the spike; No. 183, a large flower, very pleasing blend of light lilac and lavender, marked with crimson on tip of petals; No. 1270, a very large and most beautiful flower, pink ground flamed and marked crimson, throat mottled with white; Agricola, white, striped and shaded with light crimson on the edges, dark crimson band on three lower petals.

Among the varieties from A. E. Kunderd, Fort Wayne, Ind., the following were splendid: Improved 1910, a variety resembling the old variety but with finer spike of larger size flowers. Improved May,—this is also a great improvement on the old sort. New Garden Pink,—this is one of the best sorts that I have seen of the *gandavensis* type; flowers of good size eight or ten opening at the same time and a beautiful blending of pink and white. Mrs. Frank Pendleton, Jr.,—this variety which was sold through my agency to W. W. Rawson & Co., is the finest gladiolus I ever feasted my eyes upon. It is a type of its own being a cross of Lemoinei and *Gandavensis*, the result producing a flower of immense size of a most delicate salmon-pink with a deep blood red blotch in the throat at the base of the three lower petals. Mr. Kunderd is also producing some wonderful sorts in his new ruffled strain.

At W. W. Rawson & Co.'s last summer I saw in bloom the most beautiful varieties of recent European introductions. The yellow and white varieties were far superior to anything yet offered by American growers. The following deserve special mention—of the white sorts Hoenstaufen, pure white, suffused soft pink, throat scarlet edged yellow; Deutsche Kaiserin, pure white, with the exception of delicate lavender on the tip of the petals; Elizabeth Kurtz, very large flowers of pure white. In yellow there were Yellow Prince, a very large clear yellow; Mrs. Carpenter, also a very fine almost solid color, and Helios, very large pure yellow deeply ruffled and fluted. Then there was Wm. Steinhausen, a giant flower of a salmon red color, quite distinct and novel, and Neues Jahrhundert, the most brilliant combination of red and white I have ever seen, the flowers at the apex of the spike growing like a hyacinth. Hybridists have for years been working to produce a hyacinth-flowered gladiolus, that is to get the flowers to form all around the spike.

Luther Burbank wrote me that he produced such a type a few years ago, but sold the entire stock to a Philadelphia seedsman who shortly after went out of business and that he had never been able to get track of them since. However, A. Graverau, a French specialist, has been working on this type for several years and has already listed one variety, "Triomphe de Paris," to be followed soon by others. V. Lemoine & Son, Nancy, France, have also introduced two varieties of this type, Couronnement and Triomphe de Nancy, the last named being a very dainty sort of a tender salmon shade.

Of the Lemoinei varieties that I tested this past season these were the most beautiful. Henry Lemoine, a rich yellow with a crimson blotch with crimped petals; Lady Howard de Walden, clear yellow with a brown blotch edged sulphur yellow, and Tricorne, a pale salmon rose with irregular dark red blotches, a very odd variety. In Nanceianus, Abbe Roucourt, a dark crimson; Director Von Angyal, another crimson, and Desdemone, an enormous flower of ashy-rose color, striped violet with a large dark red blotch edged with sulphur yellow—a splendid variety—were all superb.

Gladiolus Childsi is deservedly popular with a great many growers and private gardeners and a few varieties that I will mention are magnificent, viz., Attraction, a bright red with a pure white throat; I. S. Hendrickson, irregularly marked pink and white; Jay, compact spike of large well open flowers, dark pink with mottled throat; Melrose, a white flaked pink with bright crimson center, very large flower, and Wild Rose, a bright rose tint of a very tender shade. Another very fine sort of Mr. Childs' list is Contrast, a *gandavensis* of intense scarlet with a large pure white center.

The following varieties from Vilmorin Andrieux & Co., Paris, were among the best that I tested of the *gandavensis* class. Triomphe de Caen, large white flowers slightly striped with pink and somewhat fringed; Sans Pareil, the finest orange-rose I ever saw, with a large white throat; Nuee d' Orage, almost solid slate color, very distinct color; Florence, very large flower of bright lilac with a large white blotch on the two lower petals.

Among some varieties sent me for trial by Mr. G. D. Black, Independence, Iowa, was a variety of his own raising that was very fine. It is a clear yellow with a dark red blotch; a fine spike and very vigorous, good size flower and altogether the best American yellow I have yet seen.

P. O. Coblenz, New Madison, Ohio, sent me the following under number all of which were splendid, 40, 207, 304 and 312.

There is much work ahead for the breeders in the blue section. I have grown a good many varieties, but have yet to see what I call a first class variety in this section. They are of a weak constitution and in most instances very shy seeders.

I find that there is much disease in various sections of this country as well as Europe in the commercial strains, and some of the species from the Cape (S. A.) are likewise badly affected. The U. S. Bureau of Plant Industry at Ithaca, N. Y., is carrying on an investigation of the diseases of this bulb, and will issue a bulletin on the subject later giving the result of their experiments.

Pinchot We believe there is a general feeling of regret among the friends of the forests over the loss of Gifford Pinchot's services as chief of the forestry department. He was zealous and honest—one of the few whose appointment was due to no influence of politics but because he understood his business. The selection of such a man for such a position stands to the credit of President Roosevelt. We are glad to learn that the new forester and his assistant are both in sympathy with the methods and policy of Mr. Pinchot.

A helpful document The talk by Edward A. Stroud before the Florists' Club of Philadelphia which we present in full in this issue, will be found distinctly helpful, sound and practical and will repay a careful reading by every florist. While enthusiastically in sympathy with horticultural progress on the highest plane it is at the same time a thoroughly sensible business document. Dissemination through the medium of the trade press alone seems hardly adequate for such a production. Papers of this character might be acquired as they are delivered from time to time by the S. A. F. for distribution in pamphlet form. They are well worthy of preservation in some such permanent manner for the edification and inspiration of the horticultural trade.

A questionable reform It is announced that the promenade committee of the junior class of Yale has adopted a plan by which the costly expense of flowers at the promenade for chaperons and partners will be abolished. All applicants for tickets were forced to sign a pledge that they would give no flowers under penalty of not getting tickets. Where is "the milk in the cocoanut" in this proposition? Is there any reason for the boycott on flowers other than the specified "costly expense?" From what we know or think we know of the expense accounts of the average college student we are inclined to the belief that this action is all a case of saving at the spigot and wasting at the bung-hole. Surely the least reprehensible of a students' follies is the bestowal of flowers on his friends. It is a bad sign for any class in college or out of college when flowers—the most innocent and beautiful of nature's gifts—are put under the ban. What will the "junior class at Yale" take up as a substitute?

From now until Easter Ten weeks until Easter. From the standpoint of the wholesale plant grower it is but nine weeks, for his "harvest" will have been about all gathered a week before the great day and to that end all his energies will now be turned. The city florist isn't bothering his head much about Easter yet. What he is most concerned about is the little four weeks which lie betwixt him and Ash Wednesday and the dreaded Lenten season which it ushers in. Yet the dullness in flower buying during Lent is, and has been for some years back, a rather intangible spook. Certain people cease for a while certain gaieties and thus, it is true, one source of income is lost to the florists. On the other hand flower buying for

other purposes actually increases and, although prices go away down, the warmth of oncoming spring brings compensation in greatly increased daily crops. The general impression appears to be that the next four weeks will make a record for hustle and prosperity generally. We hope the confidence will prove not to have been misplaced and in the meantime the less said about Lent, the better. Each year sees less and less of ashes and sack-cloth.

"A health unto the happy!
A fig for him who frets;
It is not raining rain to me,
It is raining violets."

Thus sings Robert Loveman. Keep it in mind when you see the shadow of Lent approaching.

Trans-Atlantic Notes

THE RAISING OF SEEDS OF PRIMULA OBCONICA

Some much needed, sensible advice is afforded in an article in the issue of the "Gartenwelt" for December 11, 1909, from which we extract the following remarks. In a widely circulated well-managed journal for amateurs, it was stated "that those who were frightened at the high prices asked for seeds of *Primula obconica* should cultivate their own seed bearing parents, and they would then be certain of harvesting seeds of which 80 per cent. would germinate."

This advice will not do. The amateur, equally with the market grower cannot grow good *Primula* seed. Only the specialist is capable of doing this with *Primula obconica*, and furnishing all the requirements. It is not sufficient that any one should select from among a relatively small number of plants those which exhibit certain good features, retaining these as seed bearers. When the blooms are not artificially impregnated, it is scarcely possible to avoid the bees, carrying pollen from one plant to another, and in that manner spoiling the purity of the colors of the flowers. The specialist, from years of practice with one and the same species of plants, has a more acute eye for the finest flowers, and the minute differences in them, and is enabled to select the most suitable plants as seed bearers. Similarly with other flowering plants and vegetables. One of the first raisers of *P. obconica* stated to the writer that he had known florists who had saved *Primula* seeds for one and two years, and were very proud of their achievements, and were of the opinion that their seedlings were superior to those raised by him (the specialist). When, however, in the course of a few years, they had had the opportunity of comparing their plants with those of the specialists, the result was usually, that they came back to the specialist for their seeds. It may be remarked, here, that the trustworthy specialist, in his own interest sells only seeds that are fresh and of a high vegetative quality, which are calculated to afford not 80 per cent. of plants, but 90-100 per cent.; and when the results are bad, this is usually the fault of the cultivator. Perhaps the soil he employs is too light, or consists partly of leaf mould. In such soil the seeds do not vegetate at all, or very unsatisfactorily. It would appear that the tan-

nic acid present in such soils, kills the plants as soon as the germ emerges from the envelope. The seeds appear full and healthy, but do not vegetate further. Beside this chemical there may be biological causes in the bacterial-flora of the leaf mold not yet ascertained. Certainly, seeds of *Primula obconica* can be obtained by the gardener and florists at home; but in the case of these plants, when large flowers finely colored, and of fine form are desired, price should play no role; and to the prudent cultivator, good seed is never too dear in price.

CATTELEYA ELDORADO ALBA SYN C. ELDORADO VIRGINALIS

What cultivator of orchids has not been charmed by the tender beauty of the *Cattleya albinos*? Is it their variety, or their blinding whiteness that ensnares him? Although *Cattleya Eldorado alba* flowers are of moderate size, they are well developed, and 13cm to 15cm in widths is not a rarity. This species opens its flowers at a season when cattleyas are rather scarce—August and September, to the number of 2 to 4 on a spike; and the bloom is pleasantly fragrant. All parts of the flower are white except the throat which is orange. It is a native of the Amazon region, and not difficult to cultivate.

ROSE JOHANNESFEUR, ETC.

There are comparatively few novelties of the *rugosa*, and *lutea* classes of the rose. Really fine varieties for the general cultivator are *R. rugosa* C. F. Meyer, and the new clear white *Nova Zembla*, a sport from the former. *R. lutea* Soliel d'Or is likewise useful when it remains healthy; but as the foliage is readily spoiled by the sun's rays, the plant commonly dies off. *R. Les Rosati* is an improvement in this respect. It is stated by some cultivators that this perfectly hardy variety makes but little new wood which may indeed be true in some soils and positions. The new, hardy variety *Johannesfeur* raised by crossing *Princess de Bearn* with *Jaune bicolor* exhibits the features of the Hybrid *Perpetual* and *R. lutea* and, rightly speaking, it belongs to the *R. lutea* species. There are but few of the rose novelties of the last ten years that have any enduring value, and scarcely one which in the smallest degree approaches *Johannesfeur*. It has great vigor of growth, an erect habit, broad, leathery foliage which is not attacked by mildew or rust and is therefore assured of a long existence. The rather large flower is of good shape; full, and the blooms expand in all sorts of weather. The buds appear singly and several together on strong shoots. The color is not easily describable. It is bright red on a broad golden ground flooded over with a golden glimmer, not met with on any other rose. The plant like the *H. P.* blooms twice in the season, even as late as the month of October.—O. Jacobs in *Dis Gartenwelt*, 18 December.

London, Eng.

NEWS OF THE CLUBS AND SOCIETIES

NEWPORT HORTICULTURAL SOCIETY.

The Newport Horticultural Society celebrated its twentieth anniversary Tuesday evening, January 11, with a dinner in Mercury Hall, which was attended by a large number of members and guests, about 90 in all—sitting down to the four tables. President James Robertson, Past Presidents Andrew K. McMahon, James McLeish and Richard Gardner; Senator John P. Sanborn, Representatives Robert S. Franklin and Robert Kerr, Mayor Patrick J. Boyle, John K. M. L. Farquhar of the Massachusetts Horticultural Society, J. A. Pettigrew, superintendent of parks of Boston, and Mr. John P. Hammond.

The dinner was arranged by a committee consisting of Andrew K. McMahon, chairman; Alexander McLellan, secretary; Herbert Bliss, John P. Hammond, James J. Sullivan and Chas. Newton, and the efforts of the committee were successful, not only in providing an excellent dinner, but a pleasurable entertainment for all. The hall and tables were attractively decorated.

After the dinner had been given full justice, Mr. James Robertson, the president, made a brief address of welcome and introduced Past President Richard Gardner as toastmaster. Colonel McMahon read letters from Congressman William Paine Sheffield and Representative R. Livingston Beeckman, expressing their regrets at being unable to be present and wishing the society enjoyment of its anniversary celebration and success in its future work. Colonel McMahon then spoke of Mr. Richard Gardner as the original organizer of the horticultural society and as one specially fitted, from this fact and his active interest from the beginning to the present time, to write the society's history.

Mr. Gardner gave an interesting history of the organization. He said that when he arrived in Newport, 27 years ago, he was at once impressed with the beauty of the place, the attractiveness of the estates of the summer residents and the possibilities of an organization of the gardeners for the study of horticulture. There was then no organization and no meeting place for the gardeners, except in the potting sheds of the greenhouses when the work of the year was completed.

In the potting shed of "The Breakers," then the property of Mr. Pierre Lorillard, in December, 1889, the Newport Horticultural Society had its inception. At that time four men—Arendt Brandt, Alexander McLellan, John T. Allen and David Gordon happened to call together on Mr. Gardner and after a talk it was decided to organize a society for the gardeners of Newport. A few days later the organization was effected, with Michael Butler as president, Richard Gardner and James Hill as vice-presidents, James Galvin as recording secretary, Joseph Gibson as financial secretary; Robert Christie as treasurer, and William F. Smith as sergeant-at-arms, and with 36 members. The first exhibition was given in November, 1890 with a cash premium. Mr. Gardner spoke interestingly of the success of the society

in the advancement of horticulture in Newport and of the support it has received in the community.

Senator John P. Sanborn responded to the toast, "The State of Rhode Island," and at the conclusion of his speech Archie J. Stark sang "The Skip-pers." Mayor Boyle spoke for the city of Newport and Representative Robert S. Franklin for the legislature, and Mr. John Perry sang a rollicking song, "Jim O'Shea," in the chorus of which the members of the society and their guests joined. Mr. Farquhar responded to the toast, "Horticulture," giving an interesting account of its growth and the changes which are taking place in the floral world.

Colonel A. K. McMahon was called upon to speak for the past presidents of the society. Of these twelve presidents, three—Messrs. Butler, Mahan and Bradley—have died, and six were charter members.

After a song, "My Southern Rose," by Mr. Ritter, the next toast was "Our Absent Members." Mr. Alexander McLellan replied.

Mr. John P. Hammond responded to "Newport: Its Parks and Trees," Mr. Paulding sang "The Land of Bohemia" and the concluding toast, "The Ladies," was given by Mr. Clark Burdick. At the conclusion of this response, Mr. Archie Stark sang another selection and the gathering was brought to a close, all joining in singing "Auld Lang Syne."

COMMERCIAL FLORISTS' ASSOCIATION OF ROCHESTER.

The regular monthly meeting and election of officers for the forthcoming year took place January 10th. The officers of 1909 were unanimously elected to hold office for 1910 and are as follows: President, F. W. Vick; vice-president E. P. Wilson; secretary, H. B. Stringer; treasurer, W. L. Keiler. This meeting was the first to be held in the new permanent quarters of the association, No. 416 Cutler Building. Meetings take place second Monday each month at 8 p. m.

NATIONAL COUNCIL OF HORTICULTURE.

There will be a meeting of the National Council of Horticulture at the Auditorium Annex, Chicago, January 17, 1910, at ten o'clock a. m., to arrange details for next year's work. All interested in exploiting horticulture along broad lines, or in other matters properly belonging to the work of the Council, are invited to cooperate. It is earnestly hoped there will be a good attendance.

H. C. IRISH, Secretary.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Mr. E. H. Wilson will give a talk, with lantern slides, on his Chinese explorations, before this club at its next meeting, Tuesday evening, January 18. The annual banquet of the club will take place on Thursday, January 27, at Horticultural Hall, Boston. Tickets may be procured from the secretary, W. N. Craig, North Easton, Mass., or Peter M. Miller, 32 South Market street, Boston.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The interest taken by the club members in the Carnation Convention caused an unusually large attendance at the meeting Jan. 4th. Thirteen new members were elected and two proposed. The finance committee reported very satisfactory progress on the fund for the entertainment of the Carnation Convention delegates.

Nomination of officers for 1910 being in order, the president appointed as nominating committee, Wm. Falconer and B. L. Elliott, who after the consulting turned in the 1909 incumbents for re-election, which was so accepted by the club.

It was "Rose Night," but owing to the cold weather there was only one exhibit from outside growers, the new rose Radiance from Jno. Cook.

The Pittsburgh Cut Flower Co. showed two vases of choice roses; Randolph & McClements' Begonia Incarnata which they find a good Christmas plant; R. & J. Farquhar & Co., of Boston, through their representative Geo. Cruickshank, five pans of very fine Cyclamen. Mr. Cruickshank read an interesting paper on the culture of cyclamen. The judges awarded a first-class certificate to Jno. Cook for Rose Radiance and to R. & J. Farquhar & Co. a letter of thanks and commendation for cyclamen. Subject for next meeting, "Carnations."

H. P. JOSLIN, Sec'y.

DETROIT FLORIST CLUB.

The question of holding a flower show next fall was most spiritedly discussed and finally decided in the affirmative at last week's meeting. A good deal if not all of the opposition had its origin in the financial failure of the flower show ten years ago. But really this is a wound which should have healed long ago and it certainly does not furnish any argument today. Our always busy president listened to the arguments and prepared his list of committees at the same time, so that as soon as the vote in favor of a fall flower show was cast he announced the following committees:

Arrangements:—Wm. Dilger, Fred Breitmeyer, Alb. Pouchelon, Walter Taepke.

Prizes:—M. Bloy, Herm. Knope, Wm. Brown, Robt. Klagge.

Finance:—Alb. Pouchelon, J. F. Sullivan, Frank Danzer, A. von Boeslager.

Entertainment:—Wm. B. Brown, A. Scribner, R. M. Rahaley, F. Stock.

Advertising:—Frank Danzer, J. F. Sullivan, Hugo Schroeter.

The ball is started; now roll it swiftly to its goal.

FRANK DANZER.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The executive committee of the Chrysanthemum Society of America have accepted the invitation of the Morris County Gardeners' and Florists' Society to hold their annual meeting and exhibition at Morristown, New Jersey, next fall.

CHAS. W. JOHNSON, Sec.

NEW YORK FLORISTS' CLUB.

The monthly meeting of this club, last Monday evening, was inauguration night and took the form of a good-natured jollification. The hundred or more members and friends in attendance all seemed pleased with the selection of new officers and listened attentively and applauded enthusiastically as each incumbent in turn took his place on the platform and promised loyalty and devotion to the interests of the organization during his term of office. In resigning the chair to his successor, Mr. Miller, retiring President Turner took occasion to thank the members for their generous support during the past year.

J. H. Pepper reported for the transportation committee that the rates on the P. R. R. to the Carnation Convention at Pittsburg, on block ticket, would be \$8.40 each way and \$2.50 additional for Pullman accommodations.

The awards committee reported on their trip to Cottage Gardens to inspect Carnation Mrs. C. W. Ward, giving that variety 88 points and confirming the award of preliminary certificate.

Last year's dinner committee was reappointed. New committees were appointed as follows: Legislative—P. O'Mara, C. B. Weathered, F. R. Pierson; Essays—W. F. Sheridan, J. H. Pepper, John Young; Awards—C. H. Totty, Harry Turner, Wm. Duckham, I. S. Hendrickson, F. H. Traendly, Robt. Simpson, C. Weber, W. H. Siebrecht; Exhibition—A. J. Manda, W. E. Marshall, Robt. E. Berry, Julius Roehrs, Jr., Jas. T. Scott; House and Entertainment—J. B. Nugent, Jr., R. M. Schultz, Robt. Koehne; Outing—H. A. Bunyard, R. G. Wilson, C. Schenck, J. K. Allen, W. G. Badgley, H. Weston, Phil. Kessler, L. Schmutz, Jr., John Birnie, Jos. Manda, A. G. Rasbach.

The treasurer reported a balance on hand of \$3,863.35. The award committee reported on exhibit of new pink seedling carnation by E. W. Euggren, 85 points with recommendation of preliminary certificate.

Resolutions on the death of the New York Florists' Bowling Club, were presented by Captain R. E. Berry and they were adopted by a rising vote.

After adjournment the members were hospitably entertained by President Miller.

CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club held its regular meeting Thursday evening and elected officers for the coming year. George Asmus is re-elected president, Harry Philpott of Winnipeg is vice-president, Ed. Winterson, treasurer and Louis Winterson, secretary. The new members of the board are H. N. Bruns, J. P. Degnan and Alex. Henderson. After election the members took up the discussion of the use of artificial flowers and the practice was condemned. No action was taken. After the meeting many went to Flenner's to witness the sixth annual tournament being held by the Chicago Bowling Association. In this tournament the Chicago Florists' Club has not been so successful as had been anticipated. The Florists' Bowling Club played its regular league game on Wednesday.

FIELD OF LILIUM LANCIFOLIUM RUBRUM.

At Farquhar Nurseries, Roslindale, Mass.

FLORISTS' CLUB OF WASHINGTON.

The first meeting of 1910 was held at Gude's Hall. This meeting was in the nature of a Colonial Smoker, and after the meeting adjourned a social hour followed in which refreshments were served. A very cute souvenir was given each member in shape of a clay pipe. Gude Bros. made a fine exhibit of sweet peas.

A new by-law was adopted by which applications for membership must be referred to a credential committee of three, who will report at the second meeting. President Kramer appointed the following men members of the committee: W. W. Kimmel, O. A. C. Oehmler and Bolling of Chevy Chase.

It was decided that the February meeting be made a ladies' evening, and the following committee be appointed to select hall, refreshments and other details, viz.: George Cooke, chairman, John Robertson, Ed. S. Schmid, W. Marche, W. W. Kimmel and O. A. C. Oehmler. It is proposed to make this meeting a very enjoyable affair. Nomination of officers will be in order at next meeting.

NEW ENGLAND DAHLIA SOCIETY.

The annual meeting of this organization at Tremont Temple, Boston, on the evening of January 12, was quite exciting for a time, the quarrel of several months' duration between two factions, coming to a focus. It was finally decided to leave all differences to the new executive board for adjustment.

Officers were elected as follows:—President, Henry W. Kendal, Newton; vice-president, E. B. Gill, Medford; secretary, Loring M. Bates, West Bridgewater; treasurer, Wilbur D. Moon, Lynn; executive committee, C. N. Bacon of East Boston, J. H. Flint of Salem, George A. Rawson of Newton, N. Allen Lindsey of Marblehead, T. H. Tyndale of Boston.

CLUB AND SOCIETY NOTES.

At the meeting in Horticultural Hall, Boston, last Saturday, there were on exhibition a nice group of *Primula sinensis* from Martin Sullivan, gardener to Mr. W. Whitman, and a new vermilion colored cineraria from W. C. Rust, gardener to Dr. C. E. Weld.

The Western New York Horticultural Society will hold its 55th annual meeting at Convention Hall, Rochester, N. Y., on January 26 and 27. This society has 1400 members and W. C. Barry is president. The program covers a multitude of useful topics. A round trip rate of one and three-fifths regular fare has been granted from any part of New York State.

ROSE MISS OCTAVIA HESSE.

"Fraulein Octavia Hesse," which is the subject of a colored plate in the last issue of *Rosen Zeitung*, was produced by H. A. Hesse of Weener, Germany, from a crossing of a *Wichuraiana* hybrid with *Kaiserin Augusta Victoria*. It is described as strong growing, making growths up to 9 ft. in one year. The foliage is large, with 5 to 7 leaflets, light green and very dense on the plant. The flower buds are similar to *Kaiserin*, blooms double, medium sized, but considered large for a *Wichuraiana* cross, pale yellow deepening to orange in centre, tea scented and very lasting; produced singly on long stems or in clusters. The rose has been tested several years and has proved very hardy, and not only an excellent subject for pergolas and pillars, but for cut flower uses.

IN BANKRUPTCY.

Stoneham, Mass.—James H. Delay; liabilities \$3,540.71; assets uncertain.

BUILDING UP A RETAIL TRADE IN A GROWING COMMUNITY.

Read before the Florists' Club of Philadelphia Jan. 4th, 1910, by Edw. A. Stroud.

In addressing you on the subject of building up a retail trade in a growing community, I will tell you a few of my experiences and some of the methods I have employed in conducting a retail business which I established some years ago in Overbrook. It is possible for a florist in town to confine himself to a few departments of the business and make a success of it financially, but I do not think this is possible with a florist in the suburbs. To make his business a success he has to take up many different lines of work. He should be a landscape gardener, a grower of plants and flowers, a decorator, and in fact a general all-round man.

After a family has moved from the city, with its confined quarters and few opportunities for the cultivation of taste in the planting of their grounds, and as a rule, with little or no knowledge in this direction, it is of vital importance that the suburban florist be well versed in this department, so that he may advise them wisely and correctly.

If the suburban florist is fortunate enough to have some ground, in addition to his greenhouses, where he can show his customers results which may be obtained in the immediate vicinity, he could give them object lessons; this I believe would accomplish more good than any catalogue he could issue.

For example: The hardy border, with the best and up-to-date perennials; the rose garden; the spring show of bulbs, pansies, forget-me-nots, and English daisies; the peony bed, with its varieties neatly labelled. The summer garden filled with annuals and new cannas, the fall border with late asters and helianthus, followed by the hardy chrysanthemums. Some years ago there was not a May-flowering tulip in Overbrook; from the method described I sold this fall some 15,000 bulbs, and from a small bed of columbine last spring I sold 1000 plants.

Now, of course, to carry on this business it is necessary to make desirable connection with the nurserymen, seed and plantsman, and also the wholesaler of cut flowers, acting as their agent. Let me give you an example: For instance, when Mr. A. comes along and admires a certain beautiful rose in bloom, and desires one, you take his order, go to the 'phone, order the same, and thus make a quick turnover with comparatively little labor.

My idea of a retail business in a growing community is to use your glass principally for show houses, keeping them supplied from the large growers. It is foolish to try to compete with them in the growing line. An important factor is the sale of house plants. There is scarcely a home in which there is not a growing plant. Then, too, a great many people enclose their porches with glass in winter time, making a temporary conservatory, to be filled with foliage and flowering plants, which of necessity must be replaced from time to time, making a profitable source of income.

AN APHINE TEST

ON

Sweet Peas and Double Violets

*Violets and
Sweet Peas
a Specialty*

JOHN H. SLOCOMBE

FLORIST

555 Townsend Avenue

George E. Talmadge, Inc.,
Madison, N. J.

New Haven, Conn., Dec. 13, 1909.

Gentlemen:—We grow Double Violets and Sweet Peas and so cannot use Cyanide after Peas are up in November. We have not yet found an insecticide that would kill green and black fly and not give the Violets spot—or as Cyanide kills Peas, and tobacco spots, we would like to know what tests you have made on Double Violets and Sweet Peas. If your goods fill the bill we can use a lot of it.

Yours truly, J. H. SLOCOMBE.

OUR REPLY

(Madison, N. J., Dec. 20.) "Replying to your favor of the 13th inst., we are today sending you a sample of Aphine that you may try it on your plants to see whether it will do the work for you. This will be more satisfactory to you than any promises we may make as to what Aphine will do. We will appreciate it if you will advise us of the results of your test."

THE RESULTS

(New Haven, Conn., Dec. 29, 1909.) "Your sample of Aphine received and tested a few days ago. It looks to us like a good thing, so we are enclosing check for \$2.50 for one gallon of same. "Yours truly, "J. H. SLOCOMBE."

(Western Union) New Haven, Conn., Jan. 4, 1910. Ship immediately C. O. D. ff two gallons Aphine. J. H. Slocombe."

ANOTHER PUBLIC TEST OF APHINE

Has been arranged, to be held at the Boston Flower Market, Boston, Mass., on Saturday, January 22d, 1910.

(Further particulars in next week's issue of this paper.)

If you are not familiar with the new insecticide discovery, APHINE, send for descriptive circular.

If your supply house does not yet handle it, write us for names of our nearest selling agents.

\$2.50 per gallon.

Used at an average strength of 1 part APHINE to 15 to 40 parts water.

APHINE MANUFACTURING CO.
Madison, N. J.

The sale of Christmas and Easter plants is so universal that its importance need hardly be mentioned.

After spring comes the spring bedding which, probably, taking the whole season through, embraces the biggest volume of the work. Of late years this department has grown to such an extent that I depend entirely on the large growers of bedding plants, placing my orders early so as to insure a good quality of stock. It seems to me there is a great deal more money to be made in buying geraniums at \$18 per 1000 out of 2½ inch pots in February, and selling them for \$80 per 1000 from 4 inch pots in May and June, than by growing them myself; besides I can then confine myself to a few specialties which oftentimes I cannot buy.

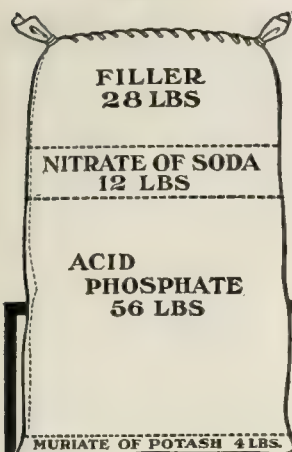

Under the head of bedding plants, comes the filling of porch-boxes. I have been trying to get away from the usual filled box of geraniums, coleus, petunias, verbenas and cheap vines; using instead, such decorative plants as crotons, pandanus, dracaenas, ferns, etc. The cost of filling such a box as I have described is considerable more; instead of \$2.50 to \$3.00, running from \$8.00 to \$10.00, but wherever I have used them, they have more than pleased, and repaid the pur-

chaser. The reason being that they give an immediate effect, combined with lasting qualities if given proper attention. Also at the approach of frost the boxes can be taken into the conservatory.

The sale of cut flowers is the next branch of importance. My experience has been that one cannot get or expect to get the same prices as the city florist receives, for the reason that in a growing community the florist caters almost exclusively to a family trade, who wants the flowers but not the frills, considering a fancy, ribbon-tied box unnecessary. I have found that people of wealth like to buy flowers frequently at moderate rates, say from one to two dollars worth, but will not spend large amounts except on special occasions, when they will go the limit.

Even so, I have found at Christmas time very few among my customers who are willing to pay \$3 per dozen for red carnations, or \$25 per dozen for Beauties. To meet this demand for moderate prices, I have had to grow flowers which will satisfy the buyers, and at the same time give me a profit. These flowers which I grow for this purpose cannot always be bought at the wholesalers. The following varieties are some of them; starting in the

100 lbs. of an ordinary Fertilizer
(testing 2-8-2)

Needs Sixteen Pounds of
Muriate or Sulphate of

POTASH

to make it a 

Well-balanced Fertilizer
(testing 2-8-10)

If you prefer ready-mixed fertilizers, insist on having enough Potash in them to raise the crop as well as to raise the price.

Crops contain more than three times as much Potash as phosphoric acid.

It was found years ago that the composition of the crop is not a sure guide to the most profitable fertilizer, but it does not take a very smart man to figure out that a **balanced fertilizer should contain at least as much Potash as phosphoric acid.**

Insist on having it so.

Talk to your dealer and ask him to carry Potash in stock or order it for you. It will pay you both, for

If you do not find the brand you want, make one by adding enough **Potash** to make it right.

To increase the Potash 5 per cent., add 10 pounds of Muriate or Sulphate of Potash to each 100 pounds of mixed fertilizer; to increase it 10 per cent., add 20 pounds.

fall with the dahlias, cosmos, hardy-chrysanthemums, paper white narcissus. Later on the stocks, wall-flowers, schizanthus, daisies and indoor bulbs, following with the spring flowers—peonies, sweet-peas, Spanish iris, outdoor grown bulbs, etc. I have an arrangement by which I supply flowers once a week, on any day the customer desires, at \$1.00 and upwards a week. This plan has met with fair success.

In decorations the public seems to have more confidence in the town florist, thinking that he is necessarily more up-to-date and more competent. It is only by showing the people that we are capable of the same work as the town florist, that we are able to get them to trust us with their orders. The decorations and use of flowers and plants is an art which cannot always be acquired. It is not merely the mechanical part, but the knowing how to blend colors, and the proper arrangement to give the best effect. I have seen a bouquet spoiled where the mechanical work was excellent, but where the ribbon with which it was tied did not blend in color, and the trade of an artistic person was lost by this error. I feel we are in a transition stage in our business, when new methods and new ideas are needed. What was considered beautiful ten years ago is, in many cases, distasteful now. One point in which we are far behind other lines of business is in advertising. I would advocate the sending out with the monthly bills a small card, calling attention to some specialty which we have for sale during the next month. I am anxious to see our business put on a higher plane, to make it more of a profession, not

mere labor. It is a shame to see the way the shrubbery is butchered in our suburbs, just because the work is entrusted to anyone who comes along. We are far behind our European neighbors horticulturally, and we can only attain to their high standard by teaching the people that their grounds, gardens and plants should be taken care of by men who have been trained in all departments of the business.

There is great need for young men in this work. I would like to see a course in floriculture started in our colleges, on the same plane as the course in agriculture. For experimental purposes the public parks could be utilized. The school gardens are a step in the right direction. I do not know what our florist clubs are doing to help along this work, but they should do, as people are becoming more cultivated; the love of the beautiful is growing, and it is time for us to wake up. In many cases the public is far ahead of the florist, knowing far more about the business in general than he does.

I am afraid the desire to get money quickly has done more to put our business on a wrong basis than anything else. So many people have been advised incorrectly, and have gotten such poor results after a large expenditure of money, that they have given up in despair.

In conclusion I would not advise anyone starting a business in a growing community unless he is well trained and has sufficient capital to purchase enough ground to erect a store, office and greenhouse, in a prosperous locality. Even with this equipment it will require patience and probably a loss of money until one is

thoroughly established, after which I see no reason why it should not be a profitable investment.

PUBLICATIONS RECEIVED.

Eradication of Farm Weeds by Sulphate of Iron.—Published by Frank Baackes, vice-president and general sales agent American Steel and Iron Co. Sulphate of iron is a by-product of wire manufacture. This pamphlet tells some interesting facts regarding weeds and the efficacy of this chemical in eradicating them. Copies may be had on application to the office of the company, Commercial National Bank Building, Chicago, or Hudson Terminal Building, New York.

Elgin, Or.—R. C. Mays, E. G. Bailey and Sherman Chappell have leased 40 acres of land just south of town and will install a nursery with the opening of spring. An order for 40,000 trees with which to begin operations has been placed.

What "HORTICULTURE" Thinks of the New Rice Catalogue

¶ This beautiful album 11 x 14 inches, in covers of moss green with watered silk effect and embellished with halftone illustrations on heavy coated paper, is a credit to Messrs. Rice & Co., and the industry which they so worthily represent. "Don't turn your back on a good thing" is the motto on the introductory page. We should say that the florist who has not this useful book on his desk is certainly turning his back on a good thing. The illustrations are beautiful reproductions of beautiful handiwork, many of them new and representing every item of value to the up-to-date florist, from a complete wedding outfit of gates, kneeling stool, bell and vases, down to a toothpick. The issuing of such an elaborate work is an evidence of notable enterprise. The typographical make-up and finish are also of a high order.

Free to all in the trade enclosing their business card.

PLANT COLLECTING IN CHINA.

The lecture hall of the Massachusetts Horticultural Society was filled with a splendid audience on Saturday, January 8, drawn by the announcement that Mr. E. H. Wilson, head of the Arnold Arboretum botanical expedition to Western China, would deliver a lecture on his experiences in that vast, hitherto unexplored, country. This was the opening lecture of the regular winter course, and certainly gave a brilliant start to the series. Mr. Wilson's talk was illustrated by upwards of sixty stereopticon slides, many of them superb views of majestic mountain scenery, others showing some of our popular plants and trees in their wild home.

"Any garden, greenhouse or florists' shop," the lecturer said, "will speedily prove to those interested how deeply indebted we are to the different parts of the world for the beautiful plants and delicious fruits we have around us and enjoy so much. It is true that the bulk of our every-day flowers and fruits are the result of the cultivator's skill, but the raw material necessary for him to work on had to be procured first. To secure this the world has been ransacked to such an extent that few countries remain unexplored. The subject of plant collecting in the heart of China is a subject vast and inex-

haustible, but well worthy of your attention."

Mr. Wilson said that during the ten years he had travelled in China he had collected some sixty thousand specimens, comprising about fifty-five hundred species, and sent home seeds of over fifteen hundred different plants. In concluding his talk he said:

"Though much work has been done, it must not for one moment be supposed that the Chinese flora is in any sense exhausted. Large tracts of country and even whole provinces have never had a plant collected in them. When it is remembered that in China every glen and mountain range possesses plants peculiar to it, it will at once be understood that the work is far from being completed. My last expedition recently concluded was promoted by Professor Sargent in the interest of the Arnold Arboretum. As a result of this expedition seedlings of nearly nine hundred different plants are at this present moment growing in the nurseries of that institution. Seeds and plants have been distributed in a most liberal way to ardent cultivators in this country and in Europe in order that in so far as possible nothing may be lost. The hardness of those new introductions is the crucial thing. This must of necessity be a matter for experiment. All that can be said at present is that in England these new Chinese plants have proved much hardier than was expected and are giving every satisfaction. Since deciduous trees and shrubs from China and Japan thrive generally better here than in England there is reasonable

hope that the majority of these new introductions, when established, will prove hardy around Boston. Should only a moderate percentage prove hardy they cannot fail to have great influence on our gardens in the near future.

"A writer in the recent Kew Bulletin declared the present to be the Chinese era in horticultural history. This is a strong term, but those interested will speedily learn that it is the simple truth. Plant collecting has its peculiar difficulties and disappointments. Nature herself, the birds of the air and the animals of the field, often seemingly combine to prevent the collecting of the seeds of this or that plant. But no collector, be he ever so energetic, can accomplish much unless ably supported by the men at home who handle the seeds and cultivate the plants. Delays in sowing the seeds, too much or insufficient water, and a hundred and one other things may ruin the work of the collector in the field. For my own part I have been very fortunate in this respect. In England my seeds were handled by the foremost propagators in that country; in America by Jackson Dawson and others. I take this opportunity of placing on record my whole-hearted appreciation of the care and attention these competent and skillful growers have bestowed on the seeds and plants I have been privileged to introduce."

A number of herbarium specimens of new rhododendrons, clematises and other handsome flowering plants collected by Mr. Wilson were on exhibition and were inspected with much interest by the audience after the close of the lecture.

Rhododendrons For Forcing.

To close out quickly we offer special values for an exceptionally fine lot of bushy shapely plants splendidly set with buds of best selling varieties:

	Per dozen.	Per 100
18 to 24 inches high, 10 to 15 buds.....	\$10.00	\$75.00
15 inches high, 6 to 10 buds.....	6.00	50.00

Azalea Mollis.

A splendid lot of bushy, well budded plants, 15 inches high, in fine shape for early forcing, \$4.50 per dozen; \$35.00 per 100.

Pot Grown Lilacs.

Charles X and Marie Lefraye, well budded, shapely stock, \$6.00 per dozen; \$50.00 per 100.

HENRY A. DREER

714 Chestnut St., Philadelphia, Pa.

CHICAGO NOTES.

The Wholesale District.

Many changes are taking place in the wholesale district since the coming in of the new year. The J. B. Deamud Co. has added two new employees, Nick Miller of Park Ridge, and T. C. Yarnell, formerly with the American Florist. January 10th, the buyers found the Randolph corner of the Allas block vacant and Frank Bentley missing. He was later located at the further end of the hall with Kyle & Foerster. The stock from New Castle, Ind., will be shipped to this firm. Leonard Kill is no longer at Peter Reinberg's and various other changes are rumored to be under way with this house.

Notes General and Personal.

Note on death of Mrs. Josephine Garland will be found in obituary column.

C. Frauenfelder, who has been seriously ill with pneumonia, is improving at this writing.

A continued scarcity of coal is causing anxiety to the florists, and the big concerns are generously helping carry the smaller ones.

Tall, slender vases are more popular this season than the low effects, carrying the flowers well above the heads of the guests and arranged with drooping effect are very graceful.

A. I. Simmons, retail florist at 63rd street, has moved temporarily to the opposite side of the street while his store is being remodelled. Mr. Simmons, who has been in poor health for several years, is now much improved.

Mr. and Mrs. Harry Philpott, of Winnipeg, B. C., were in the city last week. Mr. Philpott says the flower business done by his firm this winter in that extreme northern climate has been very good. Their flowers are shipped from Chicago, Minneapolis and Toronto, and though the thermometer registered 35 degrees below zero not a box has been lost by freezing.

Visitors: J. S. Wilson of Des Moines, Iowa; G. Sheppard, representing A. M. Sheppard & Son of Minneapolis, Minn.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern Originating with Us. To be introduced Fall, 1909.

Of all the valuable introductions in ferns that we have sent out, beginning with the Pierson (Nephrolepis Piersoni) we consider *Elegantissima compacta* the most valuable of all, particularly from a commercial standpoint. While this resembles *Elegantissima* in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with *Elegantissima* except in a general way, because it occupies a place by itself, and is as distinct from *Elegantissima* as that variety is from Piersoni, — in fact, it bears the same relation to *Elegantissima* that Scottii does to Bostoniensis.

Elegantissima compacta has an ideal habit. The fronds are considerably shorter than those of *Elegantissima*, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2 1/4-in. pots, \$5.00 per dozen, \$35.00 per 100; 4-in. pots, \$7.50 per dozen, \$50.00 per 100; 6-in. pans, \$1.50 each; 8-in. pans, \$3.00 each.

We make a specialty of all kinds of Nephrolepis, carrying a large stock of all sizes at all times, — Piersoni, *Elegantissima*, Superbissima, Bostoniensis, Scottii, Whitmani, Amerpohli, etc.

Seed Trade

About Potatoes.

With so many leading lines of the 1909 seed crops short, but little attention has been given to seed potatoes by the trade in general, yet if we are to believe reports apparently trustworthy, from Maine, a very serious situation awaits solution. As far back as last October we received information indicating that Maine potatoes were rotting badly, and warned the trade of the fact in a current issue of HORTICULTURE.

In the interim so many matters have claimed attention we have not given much thought to potatoes, but in the last few days our attention has again been directed to them, and we find that our information of last fall had a pretty solid basis of fact. How much of the Maine stock is affected is not very definitely known, but enough to lay practically the entire crop under suspicion.

It is only fair to state here that the information we have received is somewhat contradictory, some correspondents saying that the damage has been greatly exaggerated, and charging dealers of other states with responsibility for these stories. While there is doubtless some truth in these charges, it is not unreasonable to say that "where there is so much smoke there must be some fire," and doubtless Maine potatoes are damaged to a considerable extent. On the other hand, New York and Michigan stocks are fine, though the crop is light and the tubers not as large as they are some years. Summing up the situation, it looks as if good clean stock wherever grown will be in demand at strong prices, and no one who has such stock has any license to worry.

California Seed Products.

Prices on California seed products show a general shading off from last year, which is in marked contrast to the general situation. Beets, including mangels, beans, peas and all vine seeds are on a higher level of prices than last year for the 1910 crops, and while we have no definite information on sugar corn, the impression is that prices will be somewhat higher.

It is gratifying to note that in the main these advances have been accepted philosophically by the seed trade, while the canners after more or less violent remonstrances find themselves compelled to accept the situation.

There are two reasons why the canners have been less tractable than the seedsmen: One is that they are not so well informed as to conditions justifying these advances, and the other, the low prices ruling on their products, and the stagnation affecting many lines of their industry, and particularly canned peas.

The Canners' Interests.

While nearly all food products have advanced enormously in price in the last decade, canned foods have changed very little, although the cost of manu-

facture has greatly increased. Bearing these facts in mind, one cannot wonder at the canners' rebelling against anything that would add to the cost of their products. There are many signs of an improvement in the canned goods market, and it is hoped this important industry may share in the general prosperity.

A Mail Order Tip.

It is yet too early in the year to give anything approaching a reliable forecast of what the mail order business will be for the coming season, but it is noted with general satisfaction that indications are distinctly favorable.

The death of Frank Finch, the mail order seedsman of Clyde, N. Y., leaves a fine opening for a man of ambition and moderate capital. It is said that the business can be acquired at a very low price, and it is a really valuable enterprise. We learn that the entire edition of his catalogue for 1910 is printed and awaits distribution. This edition exceeds 100,000 copies. Who wants this business? Anyone interested should act quickly. Address Estate of Frank Finch, Clyde, N. Y. This is the tip we get.

The Department on Adulteration.

A fine superstructure of fallacies can be built up on a basic misstatement.

The Department starts out on its holy mission in this wise:

"Farm seed is considered to be adulterated when it contains seed of inferior kind or quality in excessive quantity."

This is aimed at the seedsman, as a matter of course, but how does it affect the farmer if he cuts a crop and finds an excessive quantity of an inferior quality? Is the farmer an adulterator? The Department is out, apparently, to lash the seedsman so as to curry favor with the farmer vote, but the weapon is one that cuts the farmer also!

The next sentence of the Department's manifesto is as follows:

"When inferior seed is present in considerable quantity it is naturally presumable that intentional adulteration has been practiced."

Is that so. In the name of the seven motherless cats, why? Why is it "naturally presumable?" If the harvest of a field in the rough state contains a considerable quantity of inferior seed—it has been adulterated! Who adulterated it? The softly blowing winds, the birds of the air, or the fishes in the sea? The mere statement of such a proposition is quite sufficient to laugh it out of court.

Yet that is the basis on which the Department launches a 24pp. pamphlet on seed adulteration, written by F. H. Hillman. It is a pity that the animus and special pleading should be so evident as there are some useful information and illustrations in the pamphlet—explaining and illustrating the appearance of various grasses and forage seeds, found either separate or in mixture. The value of the information is largely discounted, however, on account of the malicious and unfounded inferences intended.

The sooner the Department departs from the unwarranted use of the word "adulteration" in regard to the American Seed Trade the better it will be

for its own honor and good standing. It has everything to lose and nothing to gain from such unfair tactics.

Notes.

W. H. Grenell, of Saginaw, Mich., a late high official in the American Seed Trade Association—and a distinguished wholesale grower of peas and beans—in a recent interview, highly complimented HORTICULTURE on its excellent forecasts of seed crops from time to time. He considered such articles of the greatest value to the seed trade, and the best of their kind issued by any trade paper.

You wouldn't think so if you hadn't tried it, but sweet peas are one of the hardest things to work into an effective catalogue cover. A Los Angeles firm (Germain S. & P. Co.), in their 1910 seed book have achieved what has heretofore been considered impossible: a really artistic, effective, and striking design cover, composed entirely of sweet peas. Nothing approaching this has ever been done before. Who was the artist?

Fremont, Neb.—During the past year the Western Seed Company enlarged its plant in the Factory district with an addition 36 by 42 feet, four stories high. This increases the storage capacity 20,000 bushels of grain and gives additional space for the sacking. Two conveyors were added which doubled the cleaning capacity. Additional elevators were also put in so that two cars of grain may be unloaded at the same time. Improvements were also made in the sorting room that will facilitate the work and more windows were put in, giving the sorters additional light.

UNIFORMITY OF VARIETAL CHARACTER IN GARDEN VEGETABLES.

Read by Dr. William W. Tracy, Bureau of Plant Industry, before the New Jersey State Horticultural Society, Trenton, N. J., Dec. 22, 1909.

(Continued from page 50)

Results of Department Trials.

The Department of Agriculture at Washington has made a trial extending over three seasons of more than 225 samples of garden beet purchased under 175 more or less distinct varietal names. Sixty to 80 roots of each sample were grown, and each season it would have been possible to gather all of the roots into some 23 to 25 groups so that all the roots of each group would be more uniformly of the same varietal character than were those of a majority of the different samples. In most cases, less than half of the roots of any single sample could be rightfully put into the same group, and there was less than a score of samples in which as many as 75 per cent. of the roots could be grouped together. Many of the samples were made up of quite distinct varietal forms in such even proportions that it could not be told which one of them the name was supposed to stand for.

There is undoubtedly less of such variation in the common commercial

stocks of some vegetables than we found in the beets, but it exists to a greater or less degree in all. It is evident that this is not a desirable condition, and we think it can be fairly ascribed to a general want of appreciation of the importance of an accurate conception, and explicit description of distinguishing varietal characteristics.

Some Catalogue Defects.

The country is flooded every spring with the beautiful seed catalogues filled with illustrations and glowing descriptions of the sorts offered, but which are often wanting in definite varietal description. I pick up the first catalogue which comes to hand, which is the 1910 descriptive catalogue of the seeds offered by a reputable seedsman not 300 miles from Trenton. I found it a beautifully printed book of 80, 8 by 10 pages, 38 of which are devoted to descriptions of the vegetable seeds offered, the verbal description being supplemented by more than 70 most excellent half tone engravings. Turning to the two pages devoted to garden beets I found that 1460 words and 5 excellent half tone illustrations are devoted to the description of the 19 different varieties offered. Now there may be difference of opinion as to the space which should be given to different varietal characteristics in a description of garden beets, but certainly such a description would be very incomplete if it did not include some reference to such points as the shape of the root, the outside color, and the color of the flesh. We find that in the description of the 19 varieties offered in this fairly typical catalogue, the shape of the root was well shown by illustrations in the case of four varieties, was more or less fully described by the use of from one to eight words, in the case of nine others, but was not referred to in any way, either direct, by classification or inference in the case of six. The outside color, certainly an important varietal character, was described by the use of from one to seven words in the case of twelve sorts, but there was absolutely nothing regarding it in the description of the remaining seven. In only eight of the 19 sorts was there any reference to the color of the flesh. In only seven of the description was the size or color of the leaf or leaf stems referred to in any way. This catalogue was gotten up and distributed by a shrewd and successful business man at no inconsiderable cost of time and money for the purpose of inducing planters to buy the seed he had to offer, and if the descriptions are incomplete it is so because the seedsman thought that fuller descriptions would not increase his sales sufficiently to warrant the expenditure. Again, there is often a material difference in the cost of growing seed of different varieties of the same species, and seedsman in accordance with what

is regarded as good business practice will endeavor to push the sales of the sorts which bring them the greatest profit. Some of the most valuable varieties ever originated have never come into general use, and have even been lost because the seed could not be grown and handled as profitably as that of other sorts.

The Greatest Needs of Today.

The greatest needs in modern horticultural practice is first, a more complete and accurate knowledge on the part of the planter of varietal differences, their economic value, and adaptation for his own condition of soil, cultural practice and market requirement, and second, the raising of stocks of seed which will be more uniform in varietal character. Development of the first will surely be followed by improvement of the second, for when the planter comes to know the exact varietal character which is best suited to his needs, and intelligently calls for truer and more even stock of that exact sort, the seedsman will be forced to supply it in order to hold the business. Such a knowledge of varietal differences and their value can only come through carefully conducted and studied varietal trials, made not only in the immediate vicinity of the planter, but at other points as well, to emphasize the importance of trials in the immediate vicinity because very often there are adaptations to local conditions and requirements which would only be shown in a local trial, but it is well that such a trial be supplemented by a careful study of those made elsewhere in order to gain the advantage of repeated trials and a possible advantage from a difference in cultural methods and conditions. In such trials clearly discernible char-

MARTIAL BREMOND

Martial Bremond of Ollioules, France, is the largest grower of strictly first class French bulbs in existence. His clientele is composed of the most critical buyers all over the world. They are men who have bought Bremond products for many years, and know the value of his bulbs. Horse-shoe Brand Products in French bulbs are "Bremonds" and which means that they are the best the market affords, in the various sizes offered.

HENRY F. MICHELL CO., Philadelphia

acters which of themselves are of no practical utility may become very important because of their correlation with invisible and intangible qualities which are of great practical importance. For instance, the character of the point of a bean pod is of itself of no economic importance, but it is an indication of the relative development of woody fiber, and the consequent stringiness and quality of the pod, and such illustrations might be multiplied indefinitely.

Possibly some of you may think that the study of slight varietal difference is not very important work, and is hardly worthy of the attention of the scientist. Others may think it is not of practical importance and time would be more wisely spent in compounding a properly balanced food ration or spraying material or designing a "snide" package that will look larger than standard, but when one is studying natural forces and conditions, nothing is too small to be worthy of most careful study, and the discernment of what may seem to the superficial observer to be trifling differences, may be of the greatest importance.

All education is simply the training of the mind to note differences and what they stand for. Your child goes to the kindergarten and learns to note the differences between a full circle and one that is open on one side with the upper end turned back, and one that is open on the side with the lower end turned back, and that the first stands for O, the second for C, and the last for G, and if he even becomes an Agassiz or an Edison, it is because he sees and comes to understand the significance of a difference in the bones of a fish or the color of an electric spark which you or I either could not see at all or would regard as of little importance, certainly as not worthy the attention of a great scientist. The differences in the broken circle of the letters stand for nothing to the Indian, but he follows a track in the forest by means of the direction in which the broken twig hangs or upturned leaf lay which would signify nothing to an Agassiz or an Edison. The direction in which a broken twig falls or the shape of a fossil bone may mean nothing to us, but the shape of the cotyledons of seedling lettuce or the color of the flowers on a bean plant does or it ought to, and we will raise lettuce and

beans which will best meet our conditions and requirements in proportion as we come to note such differences and use seed which will more uniformly develop into plants of the exact varietal character best suited to our conditions.

GERMAN DEMAND FOR TOBACCO EXTRACT.

Consul-General Robert P. Skinner, of Hamburg, calls attention to the increasing demand in Germany for this American product:

Small supplies of the American extract have been sent to the large nursery gardens in Halstenbad, Pinneberg, and elsewhere, and have given what are described as "astonishing results." Plant pests of various species which pursue their work of destruction both above and under the soil have been successfully combated with a solution of 1 to 400 parts of water, the dose varying according to the nature of the plants treated.

A still greater demand for this article is in a fair way to be created among vineyard owners whose vines have been suffering without known remedy from "sauerwurm," or traubenwichter (conchylis ambigua Huba) a genus of the Tortricidae. This is a vineyard moth commonly found in Germany, Switzerland, France and northern Italy, and of a genus related to that known in the United States as the grape berry moth, concerning which a pamphlet by Mr. V. Seingerland was published by Cornell University in 1904. This moth flies in two generations annually; the first in April and the second in June or July. The brownish red caterpillar lives from the middle of May until the middle of June as the "heuwurm," and from the end of August until the end of September as the "sauerwurm." The pupa of the former is lodged in the leaves of the vine, which are rolled up by the caterpillar, while the latter hibernates in cocoons on the trunks and trellis posts of the vines. These caterpillars feed on the blossoms or newly formed fruit of the grape cluster and work great damage.

Various methods of destruction have been adopted, including the sprinkling of chemicals over the vines, and the trapping of the moths on glue-coated fans to which they are attracted at night by lamps or fires, and finally by burning the hibernating pupae after scraping them from the trunks and

trellises. The remedy, in most cases, proved to be only moderately efficacious, and damaged the quality of the wine almost as seriously as the worms themselves.

Some eighteen months ago a Hamburg importer of American tobacco extract brought it to the attention of the Konigliche Weinbau-Versuchstation at Neustadt on the Haardt, by which excellent organization it was carefully tested, eliciting on November 2, 1909, the following words of commendation: "Your product has, indeed, shown better results than any other chemical applied." My informant was so encouraged by this report that he is preparing to do a very large business.

Useful addresses in connection with the German importation of tobacco extract may be obtained from the Bureau of Manufacturers.

SULFOCID.

In the multitude of sprays of varying value which now flood the country this product of the B. G. Pratt Company, the introducers of the well-approved "Scalecide," stands out as being a compound of the highest value and efficiency with the lowest comparative cost. The introducers have a plentiful supply of testimonials to show and these and all other desired information can be had for the asking. See advertisement.

Of Interest to Retail Florists

New York City.—The Climax Manufacturing Company, of Castorland, N. Y., manufacturers of lock-corner, easy-folding boxes for florists' use, have opened a New York office at 20 East 42nd St. Mr. U. C. Hirschy will be in charge and will appreciate calls from local or visiting florists.

Evansville, Ind.—Louis Fritsch, who has been in business here only a short time reports results so gratifying in his West Side store that, should it continue as it has begun, he will open a fine large store in the fall.

The West Side has about 10,000 population and is growing fast. Mr. Fritsch has two greenhouses located near the largest cemetery in Evansville and is now planning to erect two more in the spring.

Kansas City, Mo.—Sam Murray reports a tremendous holiday trade. "Plants, plants, Lorraines leading, and they were fine, well hardened up." These last three words speak a volume for anybody who wants to succeed in the plant business. "Well hardened up" is the foundation on which the

commercial plant industry must stand. Mr. Murray says that he sold 3 in. top cuttings for 50c. each up to \$20 for 12 in. Quite a few for \$18, \$15, \$12—lots at \$10, \$5, \$3, \$2 each. Properly grown the Lorraine begonia is in the very first rank of flowering plants.

Reports from the WASHINGTON retailers are to the effect that not in years has there been such a rush of debutante orders and the prices have been exceptionally good. Flowers are fine, and plenty of them to meet demand. Washington is still in the grasp of the Ice King and there is no promise of better things in the near future. The law of compensation holds good to the florist, though, for prices are still stiff—and no indications of weakening. American Beauties are in the lead in demand and bring \$10 to \$12 per dozen.

New York City.—The Greek-American Florists' ball will take place on Monday, Jan. 17, at the Terrace Garden on East 58th street. It will be, as usual, no doubt, a big and memorable success.

Flower Market Reports

A good steady demand **BOSTON** has characterized this week's business, so far.

The market is gratifyingly strong—much more so than it was last week and with the exception of violets there is no downward tendency in values on any line. Flowers are of prime quality throughout. Carnations seem to realize that the convention in which their interests centre is close at hand and are doing their very handsomest. Altogether the situation is very satisfactory in all respects.

Trade the past week **BUFFALO** was much on the quiet side and stock of most kinds was had in abundance. Carnations are coming in more plentifully, the colored ones especially. Beauties and other roses were in good supply as well as other material generally. Narcissi are too plentiful and not moving. Jonquills are about the only thing in yellow and have had good demand.

Even the most optimist-
CHICAGO. ic do not feel altogether satisfied with the market since the holidays. Those who come nearest to it say it is about normal for the season. At any rate, the cold weather the florists were wishing for in November is here with compound interest, for the delay and zero weather continued for several weeks does not promote that extensive use of flowers so ardently hoped for. Social events among the wealthier classes are moving Beauties, orchids, etc., but the sale of carnations has been remarkably slow. It is an open question whether the high prices at Christmas have caused a lessening of the use of flowers by the masses or the prolonged cold weather has decreased the demand. Retailers say there is an unusual number of deaths, causing their trade to be mainly funeral work. Many wholesalers are complaining of the way the ferns are keeping this season.

Business here was **PHILADELPHIA** rather dull and spasmodic last week—the usual condition week after New Year's. Carnations suffered more than roses—the former piling up by the end of the week to quite large proportions. The usual relief furnished by transient trade and the fakirs, did not materialize—on account of cold weather and bad walking. For that reason the general trade was distinctly below par as to tone and general results. Among roses, American Beauty was probably most congested. White roses, Easter lilies, lily of the valley, and mostly all white flowers were in demand, as there was a large amount of funeral work. Not long ago New York reports claimed Philadelphia was the dumping ground for Manhattan's

FRESH CUT FLOWERS

Shipped to all parts of New England and Canada. High grade carnation blooms our specialty, shipped direct from the grower to the retailer at wholesale price.

SHEPARD'S GARDEN CARNATION CO.
292 Fairmount Street, Lowell, Mass.

Out of the Ordinary Ribbons

To do the usual the ordinary way is not the P/M way or aim. To improve the old, discover the new and make our ribbons a little better always, is the quest worth while.

Every florist using P/M ribbons feels that he has the latest and choicest to be had and that his work has that exclusiveness and individuality about it not obtainable in using inferior makes.

A Few of our Leaders:—

Pattern Killarney

FOR THE KILLARNEY ROSE

Width	No.	Price
"	7	\$0.65
"	16	1.15
"	22	1.35
"	40	1.65
"	60	2.25
"	100	2.65
"	150	2.90
"	200	4.00

Flower Market Reports.

(Continued from page 87)

Trade continues to be **NEW YORK** quite moderate but fairly steady. The usual lull after New Years hangs on exasperatingly and there is a lack of that brisk activity in the wholesale district which should mark the trading at the height of the mid-winter season. All varieties of standard flowers are being received in more than ample supply and, as a rule, in excellent quality with prospects good for an abundance of everything right along. But there is naturally a reluctance to permit wholesale quotations to go any lower than they are at present, at least during January. Much stock changes hands, however, at figures considerably below quoted rates, but to secure such bargains one must take large quantities in original lots and lay down the cash on the spot.

Washington reports a shortage of pink carnations and on white flowers of every description. Red flowers are also selling well.

Detroit reports business as rather quiet last week with stock accumulating a little. Bulb stock is becoming more plentiful.

PHILADELPHIA NOTES.

Twelve thousand a year for a twelve by twenty flower store seems a good deal in Philadelphia. But they tell us that eighteen thousand is the rental of a prominent Pittsburg flower store.

Mr. Fitzgerald of the Scientific Tree Service Co., will be the speaker at the next monthly meeting of the P. H. S. scheduled for the 18th inst. Prizes are offered for Primulas and other seasonable winter flowers.

NEWS NOTES.

Berlin, Conn.—W. H. Shumway, who makes a specialty of seedling carnations, has two or three new ones ready for inspection. Mr. Shumway extends a cordial invitation to any who are interested in new varieties to visit his place and see them. His place is easy of access, ten minutes by trolley from N. Y., N. H. & H. R. R. station at Berlin Junction.

The boiler house and a small section of the large greenhouse of Victor Pauloz was destroyed by fire on the morning of Dec. 31. The fire was discovered by neighbors about 6 o'clock, Mr. Pauloz having left the place on

his customary trip to town earlier in the morning. The main greenhouse was saved by prompt and hard work, but his stock was very much damaged, including many palms, etc., in his keep as "boarders."

Atlantic City, N. J.—A movement is on foot to provide and maintain, municipally, flower plots at the ocean end of each avenue on the plan which has been carried out each year by private subscription in the case of Iowa ave. The annual expense of maintaining the latter is given as \$46.59, and the cost to the city for a full series from Maine to Jackson avenues would not amount to more than \$2000.

OBITUARY.

Hermann Kuhley.

Hermann Kuhley, one of the largest wholesale florists in Berlin, died on November 26, in the 51st year of his age.

James Stocksill.

This old-time nurseryman died on December 25, at Baltimore, Md., at the age of 78 years. He was formerly in business at Geneva, N. Y.

J. D. Chamberlin.

James Dale Chamberlin, 95 years old, veteran and pioneer resident of Toledo, O., died January 4 at 1363 Miami street, East Side, where he had lived for 50 years. Mr. Chamberlin is said to have been the originator of the idea of preserving fruit by hermetic sealing, and was the first to introduce evaporated fruit, both of which industries now occupy a large place in America. He was a native of Union county, Pa.

Mrs. Josephine Garland.

Mrs. Josephine Garland, whose severe illness we noted last week, passed away January 6th at the home of her daughter, Mrs. Fred Wittbold. Mrs. Garland was the mother of the Garland Bros. at Desplaines and of Mrs. Percy Jones and Mrs. Fred Wittbold, and was a woman of splendid character. Mrs. Garland was deeply affected by the death of her son-in-law, Percy Jones, and her granddaughter last summer, coming but one day apart, and has not been in her usual good health since.

FLORIST'S ESTABLISHMENT WRECKED.

The store of Chas. R. Tuson and adjoining greenhouse, in Windsor, Ont., was wrecked by an explosion of natural gas, January 12. The leak had been suspected for some days and an employee looked for it with a lighted match with above result. No one was injured. The property damage was \$2,000. Fully insured.

THE CULTIVATION OF THE CYCLAMEN.

Paper read before the Gardeners' and Florists' Club of Pittsburgh, Jan. 4, 1910, by George Cruickshank.

The best time to sow Cyclamen seed is from the middle to the end of August. Sow thinly. Cyclamens should never be crowded, even in the seed boxes. Sow the seed in a good mixture of light loam, leaf mould, sand and crushed charcoal, in about equal proportions. Cover the seed very sparingly and place glass over the boxes to prevent evaporation, setting in a temperature of 60 degrees to 65 degrees.

As soon as the seedlings appear above ground, place the boxes well up to the light to prevent the first leaf from becoming leggy. When the second or third leaf is shown the young seedlings should be pricked into other boxes about two or three inches apart, leaving them there until they are ready for 3 or 3½-inch pots. We think this a better method of handling than potting them into thumb pots, as they are liable to go dry at times, a condition very detrimental to Cyclamens at any stage of their growth. They transplant into 3½-inch pots without suffering any setback whatever.

When shifting into the first pots a little less leaf mould and sand should be used than is used in the seedling boxes, adding a small quantity of well-rotted manure, and in re-potting into larger sized pots a mixture of equal parts—fibry loam and manure, with leaf mould, charcoal, sand and a good sprinkling of crushed oyster shell to keep the compost open, using plenty of drainage. The larger pieces of oyster shell can also be used along with pieces of broken pots for drainage. Pot moderately firm; never use fresh manure for potting, nor quick-acting fertilizer for feeding. We have known grand exhibition plants to be grown in this compost without the aid of any fertilizer whatever; too much feeding towards the flowering stage tends to soften the flower stems. During winter a temperature of from 56 degrees to 60 degrees with plenty of moisture will suit them, and in spring they ought to be transferred to a more airy house, still keeping them on the warm side, well up to the glass. In summer they can be grown in the coolest house possible, with cheesecloth shading when the sun is shining, but the atmosphere should never be as dry as that in which chrysanthemums or carnations are grown.

When the nights begin to grow cool in autumn, the temperature should not be allowed to drop below 54 degrees or 55 degrees at nights, or the plants will get a check at the very height of their growing season. Not until the flowers are pretty well up should the temperature be lowered to 46 degrees or 50 degrees at night, and as they come into full flower, the ventilator should never be closed tight except in the very coldest weather, taking care to raise it before the sun strikes the house in the morning. Due attention to this

will keep the flowers a long time fresh and clean, preserving a larger number of flowers on the plants at the same time.

The benches where Cyclamens are grown should always be kept clean. Before placing the plants, the benches should receive a good washing with some strong insecticide, then putting on new gravel or ashes to make sure everything is clean. It is also a wise precaution to spray in between the plants occasionally so as to keep clear of the small white mite, which so often wrinkles the leaves and flowers of the Cyclamen. If your plants are affected any with this insect, they ought to be dipped in a strong solution of X. L. All insecticide two or three times. This operation is best done the last thing at night, syringing the plants with clear water first thing in the morning. The other two insects that attack Cyclamens, thrips and greenfly, can be got rid of with ordinary fumigating, always bearing in mind that prevention is better than cure. If troubled with the ordinary garden grub in your soil or manure, which quite frequently does great damage to the Cyclamen, sterilizing the soil is the only way of completely eradicating it.

A grower of the Cyclamen may know all those points of good cultivation and still not have the desired success, owing, no doubt, to having neglected some of them at a time when he was otherwise busy. Cyclamens once or twice neglected never make up what they have lost. I would like to impress the fact that there are not so many important things to be learned about their cultivation as putting and keeping in practice the small details, which we all know make success or failure in the cultivation of any plant.

AUSTRALIAN APPLE TRADE.

Consul-General John P. Bray reports that a shipment of 1800 cases of American apples, which arrived at Sydney on November 15 from San Francisco (via Tahiti and New Zealand), was condemned by the New South Wales government fruit inspector owing to the presence of the codling moth. The whole shipment was subjected to fumigation under government supervision, after which it was re-packed. As this entails considerable extra expense to the importer, it is believed locally that next season's importations will be much smaller than those of the current season. A further shipment of American apples, about 8000 cases, was expected to arrive in a few days.

Washington, D. C.—President Taft appointed Henry S. Graves, director of the Yale Forest School, January 12, as forester of the United States to succeed Gifford Pinchot. He also appointed Albert F. Potter, at present acting forester, as associate forester. The new forester and the associate are both known as Pinchot men. Both have served under Mr. Pinchot and both are in sympathy with his administration policy. It was largely through Mr. Pinchot's efforts that the Yale Forest School was established and Mr. Graves went from the post of assistant chief of the division of forestry under Mr. Pinchot to become director of the school in 1900. He had served in the forestry division for two years.

Morton Grove, Ill., Oct. 6th, 1909.

Mr. D. D. Johnson

Dear Sir:-

We have used the 6 cans of Evergreen Brand Flower Fertilize shipped us Sept. 6th and noted remarkable results.

You may increase our second order of 500 to 2000 lbs. and ship soon as possible.

Yours truly,

Poehlmann Bros. Company.

A. H. Poehlmann

Odorless and Sanitary

It will annihilate all disease germs; thus it prevents stem rot and other diseases from destroying the plants.

The Price is Low

compared with common Fertilizers or Bone Meal, for when purchasing the EVERGREEN BRAND you get PLANT FOOD, hence eliminating the expense and handling of "filler" or "make weight" material usually found in large quantities in common Fertilizers.

It is immediately soluble in water. Can be used Dry or in Solution.

1 lb. to the 100 Sq. ft. of Benching

TRY IT. We have arranged to ship small quantities, as follows: Boxes containing 1, 2, 4, 6 or 8 cans each.

Cans contain 12 pounds. Price \$2 00 per can. Terms net cash with order.

Full instructions with each shipment.

NEWS NOTES.

President Foulk of the American Nursery Co. asks us to state that the announcement made January 1 to the effect that the business established by F. W. Kelsey in 1875 would be continued by that gentleman is incorrect, as that business was turned over to the American Nursery Co. on January 1, 1908, and remains their property.

An automatic bird scarer known as the "Demon" has been introduced with success in the fruit-growing districts of Australia. Said to save crop, money, time and temper; also, we presume, the birds—which is, in a way, of equal importance. The device might be adopted by small fruit growers in this country to advantage, if it does what is claimed for it.

The Haskell Implement and Seed Company of Boston, which was organized two years ago by A. P. Webster, formerly of Auburn, and with which the George B. Haskell Co., of Lewiston, is allied, has consolidated with the Ames Plow Co., of Boston, which has been in existence for over 50 years. The name of the Lewiston store will be changed to the Haskell Implement Seed Company and its capital will be doubled. W. H. Peckham, formerly with the company in Lewiston, will be the manager of the new concern.

FIRE RECORD.

Washington, D. C.—A small greenhouse near Trinity College was burned Dec. 31. Loss about \$500.

Rhinebeck, N. Y.—The stoke house and the ends of two greenhouses owned by J. C. Hamlin were damaged by fire on the night of Jan. 3.

Everett, Mass.—The boilerhouse connected with the Woodlawn cemetery greenhouses, was destroyed by fire late on the evening of Jan. 9, caused by an overheated boiler. The damage is estimated at several hundred dollars.

Woburn, Mass.—A fire destroyed the store house attached to the greenhouse on the estate of Charles A. Sanborn, 309 Washington street. The fire originated from a defective chimney in the store house. The loss will be about \$700.

**PRATT'S
SCALECIDE**

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water.

Send for Booklet, "Orchard Insurance."

B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4½ inches wide, nozzle 6½ inches long; ¾ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

CATALOGUES RECEIVED.

Ford Seed Co., Ravenna, O.—"Sound Seeds" for 1910.

Berrydale Experiment Gardens, Holland, Mich.—A number of novelties in small fruits are listed in this publication.

Frederick Roemer, Quedlinburg, Germany.—Wholesale catalogue of Choice German Flower Seeds. A very full list of the productions of this well known grower.

Arthur Cowee, Berlin, N. Y.—"The Flower Superb." This is another of those attractive publications from the gladiolus man of America. There are seven portraits of gladioli in natural colors.

The Newburys, Mitchell Nurseries and Greenhouses, Mitchell, S. D.—Glad to see by the unique and tasteful catalogue just received that the "Largest Horticultural Establishment in the Dakotas" continues to flourish.

Weeber & Don, New York.—Garden Farm and Flower Seeds for 1910. Handsome covers in green tints. There are 16 pages listing novelties in flower and vegetable seeds, distinguished from the body of the book by being printed in blue ink.

J. J. H. Gregory & Son, Marblehead, Mass.—"Gregory's Honest Seeds" for 1910. Vegetable and flower seeds, small fruits, shrubs and plants are included in this volume issued by a house with a record of over half a century. Covers in vermilion, green and white.

J. G. Harrison & Sons, Berlin, Md.—A catalogue of nursery stock, small fruits, etc., very artistically gotten up. The clusters of cherries on first cover page in natural colors fairly make one's mouth water. Crawford's Late peach, Millionaire and Klondike strawberries are the subjects of other color plates.

Burnett Bros., New York City.—Seeds, Bulbs, Plants, Spring, 1910. An 80-page catalogue, freely illustrated and very creditable to this young and growing seed firm. Front cover in dark moss green and gold, back cover a country estate with Burnett's Special Lawn Grass Seed occupying the foreground.

Arthur T. Boddington, New York City.—Florists' Catalogue of Seeds and Bulbs for Forcing and Planting, 1910. Covers in orange and black type, with "The Seal of Quality" as a central ornament. A catalogue of florists' specialties, at trade prices. An exhaustive list—comprising old and new varieties—and generously illustrated.

J. M. Thorburn & Co., New York City—Thorburn's High-Class Seeds, 1910. The years roll on and this time-honored firm has now reached its 108th year. In accordance with long-established custom, the title page of this catalogue is plain and dignified, but the back cover bears a splendid illustration embossed in brilliant colors, of Eschscholtzia Thorburni. As usual, the list of vegetable, flower, tree and shrub seeds is very complete and the volume has a distinct value as a book of reference.

James Vick's Sons, Rochester, N. Y.—Vick's Garden and Floral Guide for 1910 is just a beauty. The color work on the covers is exceedingly fine, the front showing a group of four varieties of onions and the back four superb asters, viz: Vick's Violet King, Vick's Early Upright Pink, Vick's Rose King and The Rochester. The latter is the flower which has been honored by being selected as the official flower of the City of Rochester. There are many fine illustrations throughout the book, in which asters hold a prominent place.

R. & J. Farquhar & Co., Boston, Mass.—Farquhar's 1910 Garden Annual. This energetic seed and nursery house, always aiming to lead the country in the beauty of their catalogues has actually outdone itself in the volume now before us. The subject for cover page adornment is Hydrangea Hortensis Nikko Blue. It is a reproduction of an original painting and with a bronze background is very striking. On the back is a group of peony-flowered dahlias natural size and colors. Many new half-tone engravings embellished the body of the work which is very comprehensive and interesting, particularly the department devoted to hardy perennial seeds and plants and decorative garden shrubbery.

Nails rusted off—roof bars rotted out.

This Will Never Happen to Your House If We Build It

It's just the natural result of wooden eaves, nailed on roof bars and wooden posts. There's no wooden frame house that will stand a fraction the time that the Hitchings Iron Rafter house will—not to mention the difference in the amount of light that actually reaches the plants. The light, flat iron rafters and small roof bars make our house practically as light as day.

Don't be fooled into buying an out of date house for a little less money—it will cost more in the end.

Hitchings & Company

Designing & Sales Offices General Offices & Factory
1170 Broadway, N. Y. Elizabeth, N. J.

ORNAMENTAL CONSERVATORY AT NORTH BEVERLY, MASS.

More and more residence conservatories are being built. It is but the natural result of the fact that people want their flowers handy by, where they can continually enjoy them, no matter what the weather. So the gardener brings in his best specimens from the greenhouse and keeps the conservatory like a regular bloom bower. It gives the gardener a chance to show what he can do. It is a continual reminder to the owner of the pleasure and importance of his greenhouses.

This one is a splendid example of the imposing architectural effect possible with the Sectional Iron Frame Construction. It is a decided get-away from the boxy effects of the usual conservatory. In the center is a gurgling fountain; around the sides are plant tables. The high sides give a spacious effect.

The conservatory opens off the breakfast room. Will gladly send you an interior view, if you are interested.

NEW CARNATIONS

The Two Prize Winning Introductions of the Cottage Gardens

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Price, Rooted Cuttings

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter on strong, erect stems 36 to 42 inches in length.

AWARDS

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Price, Rooted Cuttings

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery Feb. 1st, January Cuttings All Sold

These varieties bring from \$2.00 to \$4.00 per 100 more than any other carnation sold in the New York market.

Plant Novelties From China

The genus *Lilium* holds a peculiar place in the affections of all sorts and conditions of people. The purity of the coloring in their large, handsome, often delicately fragrant flowers give them an air of distinction and a decorative value not excelled by any other family. The far East is the headquarters of the genus and the home of the majority of its most esteemed members. *Lilium auratum*, the noblest of all, is Japanese in origin and so also is *L. speciosum* and its varieties. *Lilium longiflorum* (with its varieties now generally known as the Bermuda Lily) is of Chinese origin being botanically regarded as one of the forms of the polymorphic *L. Brownii*. In all 32 species of *Lilium* are known from China, 17 of which are peculiar. These include some of the most useful and beautiful of the family and, what is of the utmost importance, Lilies possessing a sound, hardy constitution.

It is well-known that many species of *Lilium* have an unfortunate habit of dying out after once flowering to the disappointment of the cultivator. This is an inherent failing with certain species under cultivation and the only thing to do is to leave these severely alone. A disease too frequently attacks certain species with fatal results. But one of the most fruitful causes of failure in out-door Lily culture is unsuitable soil. It has become an accepted dogma that all Lilies require peat. Not only is this grossly erroneous but it is fatal to good results in fully half the known species. Cultivators should remember that Lilies like other plants have their own individual likes and dislikes and that what is meat to one is poison to his neighbor. If anyone wants an object lesson in this let him plant *L. auratum* and *L. Henryi* in a *Rhododendron* peat-bed and watch the results over three or four seasons. The first-named Lily will thrive, the *Henryi* dwindle away. If a bed of loam

be used the reverse will be found to obtain. A good, broad generalization as to soil required can be based on the habitat of the species. Those found in swamps and moorlands require peat; those frequenting precipitous and rocky ground require loam. There are, of course, exceptions. Of the twenty odd Chinese Lilies known to the writer only one (*L. Duchartrei*) requires peat. For all the others good strong loam and leaf-soil and a well-drained situation are the requisites. Fairly deep planting commensurate with the size of the bulb is another important item, for the roots

LILIAM LEUCANTHUM

A new vigorous-growing, hardy lily.

diately above the bulb are essential "feeders" nourishing the flowering stems.

The best known of recent Lilies from China is *Lilium Henryi*, a native of the mountainous country around Ichang, and more especially the conglomerate rocks; this Lily is now appreciated one of the finest and hardiest. An orange-colored *L. speciosum* growing 6 ft. tall, well describes *L. Henryi*. It is very floriferous, strong plants often bearing 20 to 40 flowers on a single stem.

Lilium leucanthum and *L. chloraster* were originally regarded as forms of *L. Brownii*, but are really distinct. The first-named is a strong growing lily, 5 to 6 ft. or more tall, well clothed with moderately broad leaves having bulbils in their axils. The flowers vary in number from five to ten and usually arise from a common level but occasionally the floral axis elongates; in shape and size they resemble the well-known *L. Harrisi*, are greenish white with a suspicion of purple without and the purest white within. Occasionally the purple tinge reflects through on the inner surface of tube giving a charming and delicate effect. The flower-stalks are stout, 3 inches long, and the mouth of the tube is usually at right angles with the stem. The bulb is large, flattened, dark purple in color.

L. chloraster is similar in habit of growth but produces no bulbils and has flatter, more open flowers in shape midway between *L. longiflorum* and *L. auratum*. *L. myriophyllum* is allied to the above but differs markedly in general appearance. The stems are 3 to 4 ft. high and densely crowded with very narrow, usually one-nerved leaves bearing no bulbils. The flowers are in terminal umbels of two to six or more, large, fragrant, funnel-shaped, 5 to 6 inches long with apex of segments folded back. On the outside a broad band of purple reaches to the apex in each segment; the inside of the tube is a rich canary-yellow, the rest of the flower purest white.

The above three Lilies are natives of the rocky, precip-

LILIAM SUTCHUENENSE

A New and Charming Lily.

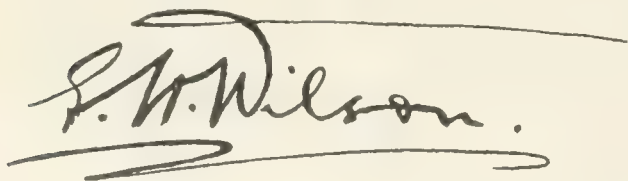

itous valleys of western China between 3,000 and 5,000 feet, growing amongst tall grasses and scrub. In certain places they abound and when in flower present a wonderful sight. Opinions differ as to which of these three is the finest; the writer inclines toward *L. myriophyllum* and believes it the finest hardy tubular-flowered Lily extant. It is only fair to add that others regard *L. leucanthum* in this light.,

L. sutchuenense may be described as a refined *L. tigrinum* with slender stems 2 to 5 feet tall bearing racemously three to forty flowers. The leaves are very narrow, almost thread-like, with one nerve prominent and rough on the underside. The flowers are only half the size of *L. tigrinum*, intense scarlet with numerous black dots; occasionally the latter are completely wanting. The bulb is small with pinkish scales. A loam-loving Lily it requires a situation where it is fairly dry during winter months. An old wall would be an ideal spot for its culture. Being of somewhat delicate constitution this Lily is better suited for pot culture perhaps than outdoors in the border. Its elegant foliage, intense scarlet flowers and graceful habit make the Lily one of the most charming of the whole family. It is easily raised from seeds and will flower within two years.

L. Duchartrei is a peat-loving Lily somewhat resembling *L. sutchuenense*, with broader leaves, with an umbellate or subumbellate inflorescence of three to twelve flowers, white heavily covered with purple spots and striæ.

L. Bakerianum is another Lily from western China well worth attention. The flowers are medium-sized, with a broad, campanulate tube and reflexed segments. At first greenish-white the flowers change to creamy-white with age and are spotted within the tube with tiny purple spots. The stem is slender with scattered, recurved, rather broad leaves.

Of the other Chinese Lilies some are well-known, others are only known to botanists. The above seven species will each in its own sphere have hosts of friends. For general purposes *L. leucanthum*, *L. chloraster* and *L. myriophyllum* are without rivals as hardy, vigorous-growing Lilies with large funnel-shaped flowers. *L. Henryi* is already well-known and the other three for more restricted purposes will amply repay those who take up their culture.

Begonia Glory of Cincinnati

This new begonia, which is well illustrated on the cover page of this issue, promises to take a leading place as a commercial flowering plant. It was raised by that eminent Lorraine grower, J. A. Peterson of Cincinnati,

Ohio, as a seedling from *Begonia Socotrana* crossed with another winter flowering species of which the name is not given. As compared with *Gloire de Lorraine* this plant comes into bloom a little later, the flowers which are bright Lorraine pink are larger and borne on more upright stems, and are even more lasting in texture. The foliage—as shown in the illustration—is quite different from that of *Lorraine* being large and waxy in the way of *B. Socotrana*. The variety is a very rapid propagator and, although it is but two years old, Mr. Peterson expects to have abundant stock to disseminate the coming season.

Nemesia lilacina

Nemesias are plants of recent introduction from South Africa, and with others from the same region have been under observation in order to ascertain their suitability for flower gardening in the open air, and pot culture in the greenhouse. But the finds were not of an encouraging nature, few being fitted for cultivation in gardens. *Nemesia lilacina* (N. E. Brown) was found in the vicinity of Okahandja in German Southwest Africa, and the plant has found acceptance in England, the credit for which is due to Messrs. Sutton & Sons among others, who have repeatedly shown the plant in great variety of colors. The plant flowers in great abundance from early summer till destroyed by frost. In good soil it reaches a height of 9 inches, and if not crowded in the beds, a breadth of 1 foot.

The antirrhinum-like flowers which have a length of 1-3 inch and 5 to 6 m. m. diameter are borne on slender stalks, arising from a multitude of branches and branchlets. The leaves of a lanceolate form about 1¼ inches in length, toothed, and of a pale green color, retire backwards from the mass of the blooms. The colors of the latter vary from light pink, rosy lilac, to deep pink. *Nemesias* are of the easiest culture, and sown on a mild hotbed the seeds vegetate in a fortnight. The plants after a gradual hardening off should be planted where they are intended to flower, which should be sunny and free from shade. The plant belongs to the class of summer bloomers which have a flowering season of four to five months duration without intermission.

British Horticulture

THE DAHLIA SOCIETY

The amalgamation of the National Dahlia Society and the London Dahlia Union has met with the full measure of success which the supporters of the Societies anticipated. At the annual meeting of the newly constituted society recently an encouraging report was submitted. It was recorded that some 150 varieties were submitted to the Committee, but certificates were only granted to

ten. There is evidently not the same readiness to grant certificates to novelties as was formerly the case, and this increased discrimination is to be welcomed. During this year exhibitions will be held at the Crystal Palace and the Royal Botanic Gardens. A new departure has been arranged in holding a conference in March, to discuss various matters of moment to dahlia cultivators, and it is hoped that this will stimulate an increased interest in the culture of this flower. For the first time last year the society offered prizes for pœony-flowered dahlias, also for garden cactus varieties, and these will also be included in the next schedule. The following were elected as the officers: President, E. Mawley; chairman of committee, George Gordon; secretary, E. F. Hawes, Royal Botanic Gardens. The committee are entering upon a new year of work with every promise of a further period of useful service on behalf of an indispensable flower, whose popularity is still very high notwithstanding the other rivals to public favor.

ITEMS OF INTEREST

Mons. P. de Vilmorin will preside at the twenty-first annual dinner of the Societe Francaise d'Horticulture de Londres.—A presentation portrait of Mr. Harry Veitch, a member of the well-known firm of nurserymen, has been painted by Mr. Hugh G. Riviere. A replica has been given to Mrs. Veitch.—Owing to the extension of their postal order business, Messrs. Dobbie and Co. have removed their business headquarters from Rothesay to Edinburgh. A scheme is on foot for forming a syndicate to run 20 fruit shops in various parts of London.—A proof of the healthiness of the gardener's profession is afforded by the fact that one of the fraternity at Brighton has lately reached his 101st anniversary.—An interesting demonstration of Colorado orchard heaters has been given on a fruit plantation in Wisbech, the results being of a very satisfactory character to the various experts who attended.

London.

W. H. Adsett.

Trans-Atlantic Notes

UNION OF GERMAN NURSERY PROPRIETORS

An arrangement having for its objects the exchange of stores, and covering the needs of members of the union, has been called into existence by the union of German nursery proprietors, in the form of "a Green list" of offers and inquiries, which is sent to every member of the union, annually, in the months of January and August, and which has proved of great usefulness to the trade. In order to afford opportunity to non-members to make their needs known without much round-about inquiries, outlay, or cost, it has been decided to enlarge the "Green list" and make no charge for offers from purchasers as far as space allows. The spring list of the same will appear at the latest on January 15, this year.

A NEW BOTANICAL GARDEN AT COLOGNE

On December 23, last, the municipal authorities of this city sanctioned the expenditure of the sum of 62,500 m., for the ground work in connection with this undertaking; and farther, a playground at Cologne-Deutz, of a decorative character, was approved of. The cost of the latter was estimated at 45,800 m.

DR. STRASBURGER,

Director of the Botanical Garden and Botanical Institute of Bonn, has been nominated a member of the Swedish Scientific Society at Upsala.

FRANZ HAAGE

This well known nurseryman and president of the Society of Erfurt Nurserymen, died on the night of December 25 last.

THE MARGERETEN ISLAND, BUDAPESTH

The nursery trade at Budapesth held a conference recently at which the proposal to establish a University botanical garden on the island was opposed, and the determination arrived at, that steps be taken in the support and continuance of the nursery business hitherto carried on there.

A patriot
of distinction

The daily papers have been paying their respects to the Indiana congressman who, it is stated, worked the limit of his prerogative in the distribution of free

seeds by dispatching through the post office, under his frank, sixty-one big mail bags full of seeds for his constituents. No doubt this enterprising law maker will be found lined up with the bunch who are clamoring for an increased postal rate on magazines and trade papers in order to meet the deficit in postal income. And should any seed dealer have the audacity to criticise the gentleman's assiduous zeal in giving away seeds he may be punished by finding this generous congressman among the 99 per cent. purity advocates and others who seem to think it is always "open season" to hunt the seedsman.

The seedsman
and his customer

Our seed trade correspondent has a word to say in this issue regarding the seed trade guarantee or disclaimer, so called.

The subject is one of vital interest to every seedsman but it has been subjected to the sharpest scrutiny by the keenest intellects in the seed trade for many years, with the object in view of conserving the rights of both dealer and public, and the official disclaimer of the American Seed Trade Association can fairly be regarded as the outcome of much combined wisdom. Still, there may be weak spots in it that will bear strengthening, as some think. It is much to be desired that the public should understand that the purpose of the disclaimer is not to shield the dishonest dealer but rather to protect the honest dealer against the dishonest or misguided customer. We know there are those who seem to prefer to believe otherwise and the seed trade has been forced to take much unmerited abuse from such sources. It stands to reason that any rational merchant will take every possible precaution against serving his customers in such a way as to shake their confidence in him and his goods. Rather than have a customer suspect he has been imposed upon, even when such suspicion is absolutely groundless, he will replace goods that have been condemned by the purchaser and give all reasonable guarantees as to the integrity of his dealings. He should not be asked to do more.

A rare
treat in prospect

Boston invites the orchid admirers of America to a rare treat next May.

Preparations are being made, not only in this country but abroad, to present in Massachusetts Horticultural Hall a spectacle of the most gorgeous character bringing together a collection of orchids and rich tropical vegetation such as has never before been grouped under one roof on this continent. For many months back, intending exhibitors have been on the alert to secure, regardless of expense, unique additions to their collections, all striving to qualify for successful competition for honors at this notable event. The orchid, as represented by several species of cattleyas, dendrobiums and cypripediums and a few other genera, has within recent years been accorded a high place in the cut flower industry but it is, we think, generally recognized that this is only a beginning. The time is coming when our present relations with the orchid as a commercial flower will only parallel our attainments in the line of roses or carnations thirty years ago when the Bonsilene and the De-Graw were the "high-liners." The Boston orchid show will leave its indelible impress on the commercial florists' industry and the gardener or florist who willingly absents himself from this unprecedented demonstration of the cultural and decorative possibilities of the most refined representatives of the floral kingdom will have reason to regret his short-sightedness as such an opportunity comes but seldom in a man's life.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Make a Good Start.

Now is the time, more so than any other part of the year, when well-weighted plans for the coming months should be laid. Catalogues are now coming in and they should have careful perusal. In your list of things needed include a few of the newer things that seem worth trying. The best strains of all kinds are neither too good nor too expensive for the florists' use.

Sowing Seeds.

At about this time it is right to make sowings of such things as centaurea, lobelia, petunia, salvia, torenia and some other seeds that are slow in growth and require from now on to grow into good salable plants by bedding out time. Make a sowing of pansies now. As soon as large enough they should be pricked off into flats, and if they are kept on the move they will be fit to be planted into frames in the early spring. Pansies thus handled will be excellent stock with bloom by the first week in May, and as good as, if not better than, fall sown stock. Also sow for the greenhouse seeds of *Asparagus plumosus* and *Sprengeri*, *Dracaena indivisa*, *gloxinias*, *Primula obconica*, *Musa Ensete*, *Grevillea robusta* and *smilax*. These all require a warm temperature and bottom heat for successful germination.

Propagation.

From now on and for two months is a time when conditions are found most favorable for the propagation of stock, but florists have to carry on propagation at all seasons where there is an open market, so there is hardly any let-up to speak of. But growers should manage their work in a way so as to do the largest and main part of their propagation at this season. It is well known that good cuttings must come from good stock plants, so see that they have proper attention. Put in batches of begonias, carnations, geraniums, fuchsias, lemon verbenas, lantanas, double petunias, ivy-leaved geraniums, vincas, fancy and scented geraniums, English ivies, heliotropes and lobelias. It is time enough yet for the soft-wooded and fast-growing plants as *achyranthes*, *coleus*, *impatiens* and many others as they are better when propagated later. Where a large quantity of new stock is wanted not a square foot should be left idle any longer than possible.

Lilies for Easter.

If *Harrisii* lilies have a good start, say six to eight inches high, with a little judgment they should be all right for Easter. They are generally allowed from six to eight weeks from the time the buds show until they are in full flower, so the growers can figure out when to have them in bloom. You can do more real forcing in the last four weeks previous to flowering than you can with safety in two months in mid-winter. *Giganteum*, *multiflorum* and *Formosum* are considered to be the best varieties of longiflorum for

forcing. Lilies make good progress in a temperature of 60 degrees; when the buds have made their appearance they should have an increase of 10 degrees. As the days get longer this is usually not difficult to afford just before Easter time. Be sure to ventilate when ever possible and, with a little attention to fumigation, good results should follow.

Rambler Roses.

If the supply of wood is plentiful they should have the wood that flowered last year cut away and tips of the unripened growth topped back. No other pruning is required. See that they are tied before the eyes break, and when the canes are long, bending spirally around three or four strong stakes is a good way. Another plan is to trim and tie in fan shape, or in fact any way one's fancy may suggest. Bending induces an even break all over the canes. It takes about eight or ten weeks for Ramblers to come into flower. Give more or less heat as occasion demands.

Spiraea.

It is time to start these now, because Easter is so early this year. When root action starts they should be moved into where a temperature of almost 50 degrees at night can be maintained. Be careful that they don't suffer from want of water; they should have plenty of water all the time. A month before they come into flower see that they have some weak liquid manure; it can be given at least once a week.

Hydrangeas.

Hydrangeas will not come in any too soon if started now for Easter. They should be brought into a temperature of 50 to 55 degrees at night—that is, if they have been grown during the summer in pots. Those that have been grown in the field and lifted and potted in the fall should have been in a cool house since Christmas, and it is good policy as far as forcing is concerned to go slowly and increase the heat later on. The terminal buds should be full and plump, and the wood also well ripened. If such is not the case it will be of little use to try to force them. They are great lovers of plenty of water at the root and should not be allowed to want for the same. If the drainage is not good look them over and remedy it.

The Care of Plants Left Over.

Poinsettias that have been left over should be gradually dried out and placed under some dry, warm bench, where no water will reach them. Keep in this dry state until the beginning of April. There will be plenty of time to propagate after that date. See that there is a dozen old plants of *stevia* saved. Stand these in some cool corner of the house and cut down within about six inches of the pot, and by March they will produce some fine cuttings. *Begonia Gloire de Lorraine* that is in 5 or 6 inch pots can be put in a cool house of about 50 degrees at night and dried off slowly. They will make some good cuttings in May, or they can be made into large specimen plants by pinching back the old growths, shaking off the old soil and re-potting.

JOHN J. M. FARRELL,
Connecticut.

DUTY ON IMPORTED NURSERY STOCK.

Editor HORTICULTURE. I am importing nursery stock from Europe, and would like to know what is the import duty on evergreens, and what on deciduous trees and shrubs, or to whom shall I apply for information at Washington, D. C.?

Please answer through the columns of HORTICULTURE.

N. B.

Portland, Ore.

The duty on all trees and shrubs, deciduous and evergreen, is 25 per cent ad. valorem. As regards evergreens there is an apparent ambiguity in the clauses of the tariff act in reference thereto, but at the New York custom house it is interpreted as above and duty is assessed accordingly.

CARNATIONS OR ASPARAGUS?

Gentlemen:—I would like to know through your valuable paper if it pays better to grow asparagus than carnations, and how best to grow it—for strings or bunches. Also the best time to plant it. How long will it be when fit to cut and ship.

J. B.

Atlantic Highlands, N. J.

In reply to inquiry asking if asparagus or carnations pay best, we wish to say if your greenhouses are modern, up-to-date houses, carnations will pay best, but if houses are old fashioned, get good, strong 3-in *Asparagus Sprengeri* plants from any wholesale dealer advertising in HORTICULTURE, use one-third well rotted cow manure and one-third clay soil, and part leafmould, and you will have a good crop by June 1, when asparagus is in good demand for school graduations. Use temperature 65 degrees to 75 degrees, and after May 15th, harden it up, and you will have quite good returns from your investment. A. G.

CARNATION LADY ALGY.

This new carnation was exhibited by A. H. Wingett at the meeting of the Lenox Horticultural Society on Jan. 15th and was unanimously awarded a first class certificate. In color it is pure salmon pink. It has been the good fortune of the writer to see it growing this winter, and among a house containing the best varieties splendidly grown, "Lady Algy" attracted instant attention. It is a sport from *Beacon*, and when I say it has all the good qualities of its parent, growers will know that there is not much amiss with it. Certainly we do not know of anything to equal it especially in attractiveness of color either in natural or artificial light.

EDWIN JENKINS.

We understand that J. W. Duncan, assistant superintendent of the Boston Park system, is planning to locate in the West within the near future. Mr. Duncan has been an active and popular member of the fraternity in Boston and will be greatly missed. He was elected president of the Gardeners' and Florists' Club at the last annual meeting.

AMERICAN CARNATION SOCIETY.

19th Annual Meeting to be Held in Pittsburgh, Pa., Wednesday and Thursday, January 26-27, 1910.

The nineteenth annual meeting and exhibition of this Society will be held at the Fort Pitt Hotel, corner Penn. avenue and Tenth street, Pittsburgh, Pa., January 26-27, 1910. Exhibition and meeting will both be held in this building, and this hotel will be headquarters as well.

Officers for 1909-1910.

President—Albert M. Herr, Lancaster, Pa.

Vice-President—Fred Burki, Gibsonia, Pa.

Secretary—A. F. J. Baur, Indianapolis, Ind.

Treasurer—F. E. Dorner, Lafayette, Ind.

Directors—Albert M. Herr, Fred Burki, A. F. J. Baur, Fred E. Dorner, Wm. Weber, Eugene Dailedouze, Wm. Gammage, J. S. Wilson.

Judges—W. N. Rudd, Morgan Park, Ill.; Wm. Nicholson, Framingham, Mass.; Richard Witterstaetter, Sedamsville, Ohio.

Officers and Local Committees of Pittsburgh Florists' Club.

President, Fred Burki; vice-president, P. S. Randolph; treasurer, H. L. Blind; secretary, H. P. Joslin; assistant secretary, C. L. Crall.

Executive Committee—E. C. Reineman, Jno. L. Wyland, Jno. Bader.

Finance—E. C. Reineman, chairman; H. Meuschke, E. C. Ludwig, P. S. Randolph, Jno. Bader, Geo. W. Burke.

Reception—Chas. L. Crall, chairman; Gust. Ludwig, De Forest Ludwig, Gust. Frishkorn, Thos. Jenkinson, B. L. Elhott.

Entertainment—H. L. Blind, chairman; Samuel McClements, E. C. Reineman, T. P. Langhans.

Press—Wm. Falconer, chairman; H. P. Joslin, Geo. W. Burke, E. C. Reineman.

Exhibition—A. W. Smith, Jr., manager; H. L. Blind, W. A. Clarke, N. N. Potter, John Jones.

Decoration—Ernst Zieger, chairman; J. W. Ludwig, Ed. Blind, Wm. Loew, Jas. Wiseman.

Papers.

The following persons will read papers on the subjects named below, and discussions will follow:

"The Carnation; Its Uses, Varieties and Culture," W. T. Bell, Franklin, Pa.; "The Calendar of the Carnation," Jos. H. Hill, Richmond, Ind.;

"My Experience With Carnations Under Glass," Fred Burki, Gibsonia, Pa.; "The Carnation Society and the Rose Society Should Hold Joint Meetings," C. L. Washburn, Chicago, Ill.; "The Carnation Society Should Continue to Hold Its Meetings Alone," Eug. Dailedouze, Flatbush, N. Y.

Question Box.

This feature can be made of great value. Many have perplexing problems

A. M. HERR
President.

and there is no better place to have them solved than in a meeting of men experienced in the same line of work. Send questions to the secretary and he will have some one prepare an answer.

The Exhibition.

All exhibits for competition (except for certificate of merit) must be in position by 1 p. m., January 26th, at which time judging will begin. Exhibits not in place by that time will be debarred from competition. New varieties may be staged at any time for certificate of merit.

The exhibition will be reserved for inspection by members up to 8 p. m., Wednesday night. This will give ample time for judging and a thorough inspection before the hall becomes crowded. Kindly be present on Wednesday afternoon. Bring a friend with you and see that he becomes a member before he leaves.

Schedule of Premiums.

Section A comprises the vases of one hundred blooms each in the respective color classes. First prize, \$10.00; second prize, \$6.00 in each; class 1 to 9.

Section B comprises the vases of fifty blooms each in the various specified varieties and colors, open to all varieties disseminated prior to July, 1909. First prize, \$5.00; second prize, \$3.00 in each; class 10 to 32.

Section C—For varieties disseminated the previous season. Fifty blooms to each vase.

No. 33.—Fifty Mrs. J. C. Vaughan. Premiums offered by Mt. Greenwood Cemetery Association, Morgan Park, Ill. First prize, \$6.00; second prize, \$4.00.

No. 34.—Fifty Pink Delight. Premiums offered by F. Dorner & Sons Co., Lafayette, Ind. First prize, \$6.00; second prize, \$4.00.

No. 35.—Fifty Mrs. Chas. Knopf. Premiums offered by Chas. Knopf Floral Co., Richmond, Ind. First prize, \$6.00; second prize, \$4.00.

No. 36.—Fifty Ruby. Premiums offered by S. J. Reuter & Son, Inc., Westerly, R. I. First prize, \$6.00; second prize, \$4.00.

No. 37.—Fifty Mayday. Premiums offered by E. T. Grave, Richmond, Ind. First prize, \$6.00; second prize, \$4.00.

No. 38.—Fifty O. P. Bassett. Premiums offered by Bassett & Washburn, Chicago, Ill. First prize, \$6.00; second prize, \$4.00.

No. 39.—Fifty Wa-no-ka. Premiums offered by Wanoka Greenhouses, Barneveld,

FORT PITT HOTEL, CONVENTION HEADQUARTERS

F. E. DORNER
Treasurer.

No. 45.—Fifty Marchioness. Premiums offered by Bellamy Bros., Syracuse, N. Y. First prize, \$6.00; second prize, \$4.00.

No. 46.—Fifty Alvina. Premiums offered by Hy. Eichholz, Waynesboro,

Pa. First prize, \$6.00; second prize, \$4.00.

Section D—American Carnation Society Medals.

Class No. 47.—A Gold Medal will be given for the best vase of 100 blooms, any variety, any color. Must score not less than 90 points.

A Silver Medal will be given for the second best vase of 100 blooms, any variety, any color. Must score not less than 88 points.

A Bronze Medal will be given for the third best vase of 100 blooms, any variety, any color. Must score not less than 86 points.

Section E—Special Medals of the Society of American Florists.

Class No. 48.—A Silver Medal will be awarded for the best vase of 50 blooms of a carnation not yet disseminated. Must score not less than 88 points.

A Bronze Medal will be awarded for the second best vase of 50 blooms of a carnation not yet disseminated. Must score not less than 86 points.

Varieties entered in this section must be of American origin.

Section F—Certificate of Merit.

Class No. 49.—New or undissemminated varieties may be entered for this certificate of merit under the following conditions:

A variety may be entered under a name or number, but a name must be furnished before a certificate will be issued.

An entrance fee of \$5.00 will be charged for each variety, when entry is made.

Not less than 50 blooms must be shown and the variety must have been bloomed at least three years.

To receive a certificate of merit a variety must score 85 or more points.

Varieties may be staged, and judged in this class, at any time during the convention. A vase of a new variety competing in an open class may also be entered for a certificate of merit.

In all other respects, except as stated above, the rules governing the general classes must be observed.

Section G—Preliminary Certificate.

Class No. 50.—This can be competed for by a two-year-old variety. Twelve blooms must be shown, and a \$2.00 entry fee will be charged for each va-

A. F. J. BAUR
Secretary.

riety. The variety must be properly labeled with the Society's card, under name or number. It must score not less than 85 points and may be judged at any time during the convention.

Section H—Special Premium.

Class No. 51.—Six plants in bloom of carnation Alvina in not over 8-inch pots. Premiums offered by Henry Eichholz, Waynesboro, Pa. First prize, \$6.00; second prize, \$4.00.

Only a few days after your present issue goes to print our Society will be in annual session in Pittsburgh. All arrangements, both local and national, seem to be working out nicely, and unless something unforeseen prevents, this will be the greatest convention we have ever held. There will be a great exhibition, judging by the entries booked, and the man who wins the gold medal this year will have a winner.

I shall leave here on Monday night, Jan. 24th, for Pittsburgh. All mail which will not reach here by Monday should be addressed to me in care of Ft. Pitt Hotel, Pittsburgh.

A. F. J. BAUR, Sec.

Executive Committee.

E. C. REINEMAN
Executive Committee
and Chairman Finance Committee.

PITTSBURGH READY FOR THE CONVENTION.

The Headquarters.

This hotel which has been recently enlarged is located within 200 yards of the Union Station and is easily the leading hotel of the down-town section; absolutely fireproof.

The "English" room in which the exhibition and banquet will be held is 38 by 107 feet. The meetings of the Pittsburgh Florists' and Gardeners' Club are held at this hotel. Other leading hotels are the Lincoln, Anderson, Monongahela, Seventh Avenue, Henry and Schenley.

What to See.

Visitors, if possible, should see Phipps' Conservatories in Schenley Park. The genial superintendent of the park, G. W. Burke, makes all visitors welcome, while in the foreman of the conservatories, Jno. W. Jones, will be found one of the best plantsmen in the United States, and the houses under his charge are models of all that greenhouses should be.

On the north side near the Fort Wayne station are the conservatories of Allegheny Park, Jas. Moore, foreman. These, while not approaching the size of the great conservatories in Schenley Park, contain interesting collections, especially of fancy caladiums.

Turning to the commercial growers we have the Pittsburgh Cut Flower Co., located at Bakerstown on the B. & O. R. R., 18 miles out of Pittsburgh, with its 300,000 feet of glass, over half of which is devoted to the growing of carnations. Here are a number of houses 50 by 450 feet. At the head of this plant is Fred Burki, president of the Pittsburgh Florists' and Gardeners' Club and vice-president of the American Carnation Society. Their wholesale store is at 222 Oliver avenue, Pittsburgh.

At Westview are the rose and carnation houses of H. L. Blind & Bros.

Beside the large plant at Westview, they maintain two retail stores in Pittsburgh.

The A. W. Smith Co., who have a large part of the ground floor of the Keenan building, Liberty avenue and Seventh street, as well as portions of the second and third stories, have greenhouses located on Mt. Washington, Pittsburgh, and 40,000 feet of glass in Ohio. Their retail store is one of the sights of Greater Pittsburgh.

Randolph and McClements, at Baum and Beatty streets, are in the heart of the fashionable East End, where from small beginnings they have grown to large proportions, and have a large share of the wealthy patronage of that district. A great proportion of the plants used by this firm are grown in their own greenhouses. P. S. Randolph of this firm is also vice-president of the Pittsburgh Florists' and Gardeners' Club.

In this district is also located the Zieger Co., who are making enviable progress.

At the North Side market across the Allegheny river are located the firms of E. C. Ludwig and of G. & J. W. Ludwig. J. J. Fuchs, S. S., Fritz Ueberle, Federal Street N. S., Mrs. E. A. Williams, Penn avenue, Breitenstein Co., Liberty avenue, and A. M. Murdoch, Fifth avenue, are among the other retail stores.

Of the growers, J. B. Murdoch & Co., near Canonsburg, Pa., have their wholesale plant at 714 Penn avenue, Pittsburgh; C. S. Crall is located at Monongahela. At De Haven some 12 or 15 miles from Pittsburgh, are located Jno. L. Wyland, S. J. Hatch, and F. H. Westhoff. This seems to be a favored locality for carnations, and the output is of a high class.

Beside the wholesale commission houses already mentioned, viz.: The Pittsburgh Cut Flower Co. at 222 Oliver avenue, and the J. B. Murdoch Co. at 714 Penn avenue, is the McCallum Co. at 937 Liberty avenue. The Florists'

MARTIAL BREMOND

Martial Bremond of Orléans, France, is the largest grower of strictly first class French bulbs in existence. His clientele is composed of the most critical buyers all over the world. They are men who have bought Bremond products for many years, and know the value of his bulbs. Horse-shoe Brand Products in French bulbs are "Bremonds", and which means that they are the best the market affords, in the various sizes offered.

"NOTHING SUCCEEDS LIKE SUCCESS"

¶ And success comes to the well-booked man—to the painstaking man—and the man who knows. It is our aim as the LEADING FLORISTS' SUPPLY HOUSE AND RIBBON SPECIALISTS—to keep you posted on all the newest and most up-to-date Florists' Supplies and Ribbons. ¶ And in pursuance of that policy, we have issued a catalogue—THE MOST COMPLETE AND VALUABLE CYCLO-PÆDIA of your business, ever laid before you—profusely illustrated and fully priced. You know we are Originators. ¶ As this edition is limited and very expensive, we will mail only upon request. ¶ Therefore, if you will write us at once, enclosing your business card, a copy will be mailed you with our compliments.

M. RICE & CO. LEADING FLORISTS' SUPPLY HOUSE
Of America
1220 RACE STREET Phila.

Exchange, corner Diamond and Market streets, is headed by P. J. Demas.

In visiting the Phipps' Conservatories at Schenley Park, do not forget the Carnegie Institute located at the park entrance. An hour or so will be well spent in going through the halls of this noble building.

The Pittsburgh Florists' and Gardeners' Club strongly advises that all who propose to visit the convention secure their hotel accommodations at once. A circular giving list of hotels and rates has been issued. They have made, through their reception committee, arrangements for the especial entertainment and comfort of the ladies. All who visit the great city with her 600,000 population—all carnation lovers—will be welcomed with open hearts and hands, and with heartfelt wishes that the memories of the convention will be pleasant and lasting.

AMERICAN CARNATION SOCIETY.

Notice of Registration.

Rainbow—White Seedling × Enchantress. White, overlaid with pink. Size, 3½ inches. Grand habit. Large high-built flower, making fine display. Fragrant, with long stiff stem and fine calyx. Fine keeper and shipper.

Sultana—Gov. Roosevelt and Mrs. Lawson. Light crimson. 3 to 3½ inches. Fine form, free worker, ideal habit, long stiff stem and fine calyx. By Wanoka Greenhouses, Barneveld, N. Y.

A. F. J. BAUR, Sec'y.

A NEW ENTERPRISE IN THE SOUTH.

Messrs. Geo. C. Groenewegen and H. de Schepper have settled as florists and nurserymen in Decatur, Benton Co., Arkansas, under the name of Hollandia Nursery Co. Land, climate, labor and

shipping facilities are good at that point. Their plan is to grow standard varieties on contract or fixed prices for nurserymen and florists.

The Durant Nursery Company are said to be preparing to start a branch of their nursery at Muskegee, Okla.

You are cordially invited to attend the Public Test of

Aphine

At the Boston Flower Market

No. 1 A-Park Street, Boston, Mass.

Saturday afternoon, January twenty-second, Nineteen-
ten

between the hours of two and five o'clock.

We will be pleased to have you submit at this test any plants, shrubs, or stock that may be infested with insects or disease, so that we may demonstrate to you the wonderful merits of this new insecticide discovery—APHINE.

Yours respectfully,

Aphine Manufacturing Company

Madison, N. J., January 15, 1910.

Rhododendrons For Forcing.

To close out quickly we offer special values for an exceptionally fine lot of bushy shapely plants splendidly set with buds of best selling varieties:

	Per dozen.	Per 100
18 to 24 inches high, 10 to 15 buds.....	\$10.00	\$75.00
15 inches high, 6 to 10 buds.....	6.00	50.00

Azalea Mollis.

A splendid lot of bushy, well budded plants, 15 inches high, in fine shape for early forcing, \$4.50 per dozen; \$35.00 per 100.

Pot Grown Lilacs.

Charles X and Marie Legraye, well budded, shapely stock, \$6.00 per dozen; \$50.00 per 100.

Wholesale Grower, . . Pekin, Ill.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern Originating with Us. To be introduced Fall, 1909.

Of all the valuable introductions in ferns that we have sent out, beginning with the Pierson (Nephrolepis Piersoni), we consider Elegantissima compacta the most valuable of all, particularly from a commercial standpoint.

While this resembles Elegantissima in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with Elegantissima except in a general way, because it occupies a place by itself, and is as distinct from Elegantissima as that variety is from Piersoni, — in fact, it bears the same relation to Elegantissima that Scottii does to Bostoniensis.

Elegantissima compacta has an ideal habit. The fronds are considerably shorter than those of Elegantissima, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2 1/4-in. pots, \$5.00 per dozen, \$35.00 per 100; 4-in. pots, \$7.50 per dozen, \$50.00 per 100; 6-in. pans, \$1.50 each; 8-in. pans, \$3.00 each.

We make a specialty of all kinds of Nephrolepis, carrying a large stock of all sizes at all times, — Piersoni, Elegantissima, Superbissima, Bostoniensis, Scottii, Whitmanii, Amerpohlii, etc.

F. R. PIERSON CO., Tarrytown-on-Hudson, N. Y.

TARRYTOWN HORTICULTURAL SOCIETY.

The eleventh annual dinner of the Tarrytown Horticultural Society was held at the Florence Hotel, Tarrytown, N. Y., on Wednesday evening, January 12.

About seventy-five sat down to the dinner, which was one of the best ever prepared at the hotel. The table was beautifully decorated with flowers.

John Woodcock, president of the Society, bid everyone welcome in a few well chosen remarks and after the dinner Henry C. Griffin acted as toastmaster and called upon a number of those present for speeches.

J. Austin Shaw gave an interesting speech and well maintained the prestige of the professionals.

Andrew H. Brown made a short address, and on behalf of the gardeners of the Society presented Edward W. Neubrand, the secretary, with a pair of military brushes and a pair of gold cuff buttons. Mr. Neubrand was very much surprised and thanked the donors for the gifts.

F. R. Pierson, president of the S. A. F., was the next one called upon. He spoke of the flourishing condition of the Society and of its success locally and elsewhere. Surrogate Frank V. Millard, M. D. Raymond, former editor of the Tarrytown Argus, Senator Charles P. McClelland of Dobbs Ferry, James Duthie from the Nassau Horticultural Society and Assemblyman Frank L. Young of Ossining, also made addresses.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

No less than two hundred members with a goodly number of ladies were in attendance at the monthly meeting at Horticultural Hall on Tuesday evening, January 18. The magnet was E. H. Wilson, who was scheduled to present his lecture on "Plant Collecting in China," with stereopticon illustrations. The lecture was, in the main, the same as delivered before the Massachusetts Horticultural Society at an earlier date and fully noted in our issue of last week, but was fuller in some respects and more pictures were shown, giving great pleasure to the audience, which was demonstrative in its approval.

There were some good exhibits of flowers on the platform. Duncan Finlayson showed cypripediums and a grand plant of *Laelia anceps alba*, which won for him a cultural certificate. Honorable mention was given Littlefield & Wyman for a white seedling carnation. S. J. Reuter & Son showed carnations Sangamo and Admiration, the latter winning a well-deserved honorable mention. A report of merit was given to Shasta, shown by Patten & Co. Other exhibitors were Montrose Greenhouses with handsome roses; D. White, Freesia Purity; H. A. Stevens, carnations and a new freesia of promise.

It was announced that Sam J. Goddard would give a talk on "Carnations" at the February meeting.

HORTICULTURAL SOCIETY OF CHICAGO.

The annual meeting of the Horticultural Society of Chicago was held at the Art Institute, Friday, Jan. 14. W. E. Kelly was re-elected president; W. N. Rudd, 1st vice-president; Ernest Weinhoeber, 2nd vice-president; August Poehmann, 3rd vice-president; J. H. Burdette, secretary; N. H. Carpenter, treasurer. Trustees were elected for two years as follows: E. A. Kanst, C. A. Samuelson, Geo. Asmus, and Geo. Haigh. A committee consisting of N. H. Carpenter, Mr. Hutchinson and J. C. Vaughan were appointed to secure suitable and permanent rooms for the society. The executive committee were advised to secure a place for the annual flower show the coming year. The sum of \$830 was shown to be in the treasury, by the ex-secretary, Ernst Weinhoeber.

STATE FLORISTS' ASSOCIATION OF INDIANA.

The annual meeting of this association was held on January 11 in Indianapolis at the Commercial Club. Officers were elected as follows: President, J. S. Stuart, Anderson; first vice-president, H. Junge, Cumberland; second vice-president, Charles Knopf, Richmond; secretary, A. F. J. Baur, Indianapolis; treasurer, H. L. Wiegand, Indianapolis. The association decided to invite the American Rose Society to hold its annual convention in Indianapolis in 1911. A committee was appointed to provide ways and means for a chrysanthemum show next fall. The meeting was followed by the usual banquet.

ST. LOUIS FLORISTS' CLUB.

The St. Louis Florists' Club held its regular monthly meeting on Thursday, Jan. 13th, at 2 o'clock in the afternoon. Being the first meeting in the new year, the attendance was large and the meeting interesting. President Windler and all the officers were in attendance. There was on exhibition a vase of Baur & Smith's new white carnation Shasta, which interested the carnation growers very much. The committee gave it the club certificate of merit and thought it was the best existing white.

Mr. C. M. Davidson was present with one of the National Clock and Electric Mfg. Co.'s thermostatic machines and demonstrated its value to the members. Mr. William C. Young, ex-president of the club, who recently returned from New Orleans, gave the members a good talk on his trip in the southern country. The feature of the afternoon was a paper by F. J. Fillmore on "The Troubles of the Grower." This was one of the best papers read at the club for some time.

The new committee on florist club advertising was appointed by the president. They are John Cannon and C. De Wever. Treasurer W. C. Smith will read a paper on "The Troubles of a Wholesaler" at the next meeting, which takes place Thursday afternoon, February 10th, at 2 o'clock.

THE SPRING EXHIBITION OF THE AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society and the Council of the Horticultural Society of New York met at the American Museum of Natural History where the spring exhibition is to be held, on Wednesday last for conference. Working committees were appointed to take the matter up in earnest to prepare now for the coming exhibition. The facilities that are offered to the Rose Society for the exhibition are superb.

The city editors of the New York papers have been notified and requested to take notice of the show as an event worthy of the fullest public support.

There will be a joint meeting of all the committees within a few days to perfect the details. A new edition of the premium list will be issued covering all extra prizes that have been received.

We want everyone that has anything that is worth showing to take an interest in it and send it along. If you cannot do anything better send us a single bouquet, but do something and give us the best you have got. This invitation is sent to amateurs and commercial men alike.

BENJAMIN HAMMOND,
Sec'y.

Two Superb New Roses

Raised by JACKSON DAWSON

Now Offered for Sale for the First Time

LADY DUNCAN

THIS fine rose was awarded a silver medal by the Massachusetts Horticultural Society. It is a hybrid of the ever-excellent Rugosa and the Memorial Rose (*R. Wichuraiana*). It has the prostrate, long rampant growth of *Wichuraiana*, while the Rugosa blood shows in the luxuriant, dark, glossy foliage and in the profusion of large, single flowers. The petals of rich, glowing pink melt into an exquisite, large, yellow centre. Lady Duncan is perfectly hardy, even to Canada; is a strong grower, free bloomer and of long duration of blooming.

DAYBREAK

A ROSE of *Wichuraiana* type, crossed with the Rambler Dawson. A vigorous grower, profuse bloomer, excellent, too, for forcing. The flowers are single in great pyramidal clusters of deep, yellowish pink, somewhat darker than Lady Duncan, the petals of a lighter shade toward centre. The foliage is bright, glossy green, and the habit trailing, like its parent *Wichuraiana*.

The stock is limited.

Order now for Spring Delivery

Good strong plants which will yield a mass of blossoms in late June of this year. \$1.00 each, \$10.00 per dozen.

ARTHUR T. BODDINGTON

Seedsman,

342 W. 14th Street, NEW YORK CITY

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this Society was held on the 18th inst. Henry A. Fitzgerald of the Scientific Spraying Co. gave a talk on the pruning of trees, the filling of cavities, etc., and wound up a very interesting discourse on the spraying of evergreens. Thos. Roberts and Jno. Fowler, from the Torresdale district, claimed that scale is diminishing in their locality. The lecturer thought this was not true generally, and stated that while the scale might apparently seem to be cleaned out, it would appear again in a couple of years, and that constant vigilance was the only safety. He also stated that the proper time to spray evergreens was the month of August.

The president appointed committees for the year, these being practically the same as 1909—excepting that Robert Craig takes the place of Edwin Lonsdale as chairman of the committee for examining new plants. William Kleinheinz presided. It is announced that the National Gardeners will have a banquet at Dooner's on March 15th, the first night of the spring show, at which 100 covers will be laid.

ELBERON HORTICULTURAL SOCIETY.

At the meeting, on Jan. 17, there was a large attendance of members and several out of town visitors. There was a fine display of carnations, and quite a discussion took place on the culture of carnations after the judging was finished. The awards were as follows:

A. Bauer, 1st for White Perfection, Rose Pink Enchantress and Harlowarden; Peter Murray, 1st for Enchantress, Winsor and Variegated Lawson; Jas. Kennedy, 1st for Beacon. Cottage Gardens Co. received a certificate of merit for Mrs. C. W. Ward. Alma Ward was also exhibited, but, unfortunately, got damaged on the express, so it could not be judged properly. Charles C. DeWild was awarded a preliminary certificate for a very fine pink seedling; Peter Ewen for bed seedling; James Dowlen certificate of culture for Red Lawson.

ALEX. FLEMING, Rec. Sec.

ST. LOUIS LADIES ORGANIZE.

Supplementing the action taken at a preliminary meeting at the home of Mrs. John Steidle a month ago, a meeting of the St. Louis Florists' Ladies was called by Miss M. Meinhardt, president of the Ladies' Society of American Florists, at the Washington hotel, St. Louis. There were present Miss M. Meinhardt, Mrs. F. H. Meinhardt, Mrs. J. J. Beneke, Mrs. Otto Koenig, Mrs. Theo. Miller, Miss J. Meinhardt, Mrs. F. C. Weber, Mrs. C. A. Kuehn, Mrs. H. G. Berning, Mrs. Carl Beyer, Mrs. John Steidle and Mrs. Geo. B. Windler. The object of the meeting was to form a Ladies' Home Circle to meet once a month, and at each meeting one of the ladies is to entertain the members with something interesting. Mrs. John Steidle was elected president and Miss M. Meinhardt secretary and treasurer. Mrs. J. J. Beneke was selected to entertain at the next meeting in February. The ladies then sat down to a fine lunch.

Seed Trade

Winter Tares or Vetches.

The winter vetch (*Vicia villosa*) has been receiving much attention as a soiling crop during the past few years. It is now listed and largely dealt in by leading seedsmen. For light soils it is far ahead of the spring vetch (*Vicia sativa*) which has been for ages cultivated both for feeding and soiling purposes. In the lighter soils of Germany, France, Great Britain and other foreign countries the winter vetch has become greatly esteemed, and its valuable qualities are now being generally recognized in the United States and Canada. In the Connecticut valley and elsewhere it has been used as a winter crop for tobacco land—and with excellent results. It should be borne in mind that the spring vetch (*Vicia sativa*) is also sold under the name of winter vetch, especially in Great Britain, and stocks are bought by parties in this country and are resold here as "winter vetch." This may be honestly done but it is wrong and leads to confusion. *V. villosa* is also called hairy or sand vetch. The Bureau of Plant Industry and most of the State Agricultural Experiment Stations have experimented with it and are now in a position to give full and detailed information as to culture and various ways it can profitably be used.

A Clever Guarantee on Seeds.

Can anyone guess whose order sheet this comes from:

In sending this order I rely upon your reputation as honest and experienced growers, that you will use every care to send me only seeds which you really believe are the best that have been produced for planting in 1910. Should I discover that any mistake has been made, I shall advise you promptly, so that you may redeem the promise made on second page cover of for 1910,—either to replace the seeds or refund the price paid, as I may direct. I recognize the fact that a mistake may occasionally occur and also that success depends largely upon conditions of soil and climate, which are beyond human control;—consequently no honest seedsmen could assume responsibility for an amount beyond the actual cost of the seeds.

Respectfully referred to the powers that be in the American Seed Trade Association.

HORTICULTURE will give a year's subscription to anyone telling origin and giving a reason why it does not fill the bill better than the time-honored waiver in general use.

HORTICULTURE will also give a year's subscription to anyone telling origin and giving a good reason why it does fill the bill better than the time-honored waiver in general use.

Notes.

Our Chicago Correspondent reports that the warmer weather has made shipping of onion sets active. Many have been sent to Mexico for early planting.

John C. Bodger, representing John Bodger & Sons Co., Gardena, Cal., was in Philadelphia from 11th to 14th inst., and reports good encouragement for the California seed growing industry. This firm has a five-hundred-acre farm near Los Angeles and makes a specialty of sweet peas, tomatoes, lettuce, limas, asters, and cosmos.

CATALOGUES RECEIVED.

German Nurseries & Seed House, Beatrice, Neb.—Garden Book for 1910. Seeds, Plants and Trees are included in this excellent list. The covers are adorned with flowers and fruit in colors.

Van Zonneveld Brothers & Philippo, Sassenheim, Holland.—Wholesale catalogue and Price List of Bulbs and Plants. An exceptionally comprehensive catalogue, listing roses, peonies, rhododendrons and miscellaneous hardy plants and roots and bulbs of all classes in wide variety. The title page bears a splendid colored portrait of hyacinth Lord Balfour and the back cover page shows a group of narcissi in colors.

Mr. Sonderegger, the proprietor of the German Nurseries, in talking of the great success of his nursery stock and seeds in all parts of the country, gives much of the credit to the rather severe climate of his district. It produces vigorous, hardy stock that can stand the raw, cold winters, and the dry, hot summers, if necessary. We know that the company will be pleased to send their catalogue to anyone interested. To those who mention this paper when writing, they will send a free trial packet of their New Coreless Tomato seed.

INCORPORATED.

Rocky Ford, Col.—Rocky Ford Seed Company Association; Will Morrison, H. D. Clute, J. P. Mallowney; not for profit.

Cincinnati, O.—Hyde Park Rose Company, \$10,000; Gustav Meier, Albert Sunderbruch, Henry Sunnenberg, Frank Sunnenberg, Joseph Sunnenberg.

Pen Mar, Pa.—Pen Mar Orchard Co. to sell nursery products. W. F. Johnson, Pittsburg; W. F. Given, Baltimore; and E. L. Worthington, Charleston, W. Va. Capital \$20,000.

DOROTHY GORDON

Being disseminated by Joseph Heacock Company.

Grow this Carnation for Big Profits in 1910!

After two years of careful watching and tending—giving it every opportunity to show its defects, if it had any—

After putting it on the cut-flower market and seeing it produce a sensation in the retail field, and after hearing it highly praised by every prominent grower who saw it—

After all this, we are ready to PROVE that our new Carnation Dorothy Gordon, of which you have heard so much recently and which is illustrated on the preceding page, is a real, genuine success—and that the grower who has it will make money!

Carnation Dorothy Gordon has a rapidly widening circle of friends; you'll surely begin to grow it for your trade sooner or later. This is your opportunity to get in NOW. Here are some of the noteworthy features of this new Carnation:

Vigorous constitution—freedom from disease.

Very large size and excellent form of flowers; these average over three inches in diameter. See illustration on facing page.

Wonderful profusion of bloom—one-third more flowers than Enchantress.

Excellent color—a trifle darker than Rose Pink Enchantress and more uniform in shade. Delightful fragrance.

Long, stiff stem and a bud with unusual keeping qualities.

Let's take these matters up in detail. Here is a Carnation that bears solid, lasting flowers of good standard color, three to three and a quarter inches in diameter. That's a big thing in itself, but add to it the fact that plants of this variety bear 130 good, commercial buds where the best sorts—Enchantress, for instance—bear only 100, and it looks bigger yet, doesn't it? But even that isn't all: buds of

Carnation Dorothy Gordon

Bring a price fifty per cent higher than buds of Enchantress, according to our actual experience for two years in the markets of Philadelphia. In other words, we have made Dorothy Gordon show up double the profits of Enchantress under the same conditions and with equal care. Here is a little table of figures based upon our own sales, that explains it:

100 Enchantress, worth say . . .	\$6 00
50 per cent extra realized for Dorothy Gordon . . .	3 00
	<hr/>
	\$9 00
One-third more Dorothy Gordon from same number of plants . . .	3 00
	<hr/>
	\$12 00

We're enthusiastic, to be sure, but in Dorothy Gordon we have something to support it, as the above table will show.

Up to October, 1909, without a particle of advertising, we had sold 60,000 rooted cuttings of this Carna-

tion on its own merits at the prices given below. While we have now greatly enlarged our facilities, it is still evident that our present supply will not be adequate to meet the demand. Dorothy Gordon is in the hands of an experienced propagator at our plant, and we quote strong rooted cuttings at the following popular prices:—

\$10 per 100, \$75 per 1,000

That we are maintaining these figures is shown by our books, which are open to inspection at any time.

Our plant is likewise open to you—we urge you to come to Wyncote and investigate this worthy new Carnation for yourself. "Seeing is believing," and if we cannot sell Dorothy Gordon on its own merits we do not want to sell it at all.

We are easily reached from Philadelphia—twenty-five minutes from City Hall on the "Reading," with a service of 100 trains a day through the week. We're open every day except Sunday, and will welcome you at any time.

But don't put it off—you owe it to yourself to investigate Dorothy Gordon. If you cannot do it in person, drop us a line for full particulars.

Again — **don't put it off!**

Extract from the minutes of the Florists' Club of Philadelphia, January 5, 1909

Your committee on Novelties visited the establishment of Joseph Heacock Company and examined their new Carnation, "Dorothy Gordon," on December 30. The variety resembles Rose Pink Enchantress in color and form, but it is superior to that variety in being of a more uniform color, and is also larger and of greater substance. It is of stronger constitution and has a stiffer flower stem. Your committee tested the keeping qualities and find them to be good. The flowers were kept in an ordinary potting shed, and were salable four days after being cut.

Of Interest to Retail Florists

Kansas City, Mo.—The George M. Kellogg Flower and Plant Company, formerly in the Rialto Building, has leased the building at 1122 Grand avenue.

New Haven, Conn.—The florists here are much incensed over the action of the Yale students in barring flowers from the Junior Promenade and regard the treatment given them as most unfair. The florists have always advertised in the college magazines, have entered into the spirit of all the college festivities, have been generous to college patrons and given credit to students frequently to their own loss. The action of the committee in pledging students not to purchase flowers is regarded by some as an unlawful procedure.

Dayton, O.—Fourteen of the representatives of the Mathews Florist establishment gathered at the Hotel Atlas, Wednesday night, the 12th inst., in the annual banquet of the institution. During the evening there were speeches by nearly all of the

Mathews.

DETROIT There was nothing very rushing or exciting during the last week unless

it was shoveling of snow to give prospective buyers a chance to reach the store entrances. Every January and February we have a heavy snow storm and we received probably a couple of inches more this year than last and it has cut into the counter sales and hampered business in many other ways. During the midst of it came the call for the annual florists' dance and young and old braved the storm, responding most numerous to this call and not dispersing till 2 A. M.

CHICAGO NOTES.

In Bankruptcy.

The following announcement was received by the Chicago houses last week.

"Notice is hereby given that on the 11th day of January, A. D. 1910, Henry Payne of Hinsdale, Ill., was duly adjudicated a voluntary bankrupt, and that the first meeting of the creditors will be held at the Court House in Wheaton, Du Page County, Ill., on Friday, the 21st day of January."

Mr. Payne is a well-known florist and built his first greenhouses in 1893. He had about 25,000 feet of glass, and his flowers were handled by the Chicago Wholesale houses. Mr. Payne has found it an effort to keep things running for several months and several Chicago florists are among his creditors. Thos. S. Huntley was appointed referee.

Scarcity of Coal.

Coal, or the lack of it, has been the all absorbing theme with the florists during the past week. The condition reported last week has continued, and many faced the serious question as to what they should do when the last bit of coal was gone. One large range of houses was kept warm with wood for fuel, till help came in the form of a carload of coal. Many of the smaller ranges would undoubtedly have frozen them over with coal from their reserve supply. As if in sympathy for the situation the weather warmed and the third week in January opened warm with a fine mist in the air.

Personal.

C. C. Cropp completed 25 years of service in Vaughan's Seed Store, of which he is secretary and manager, on January 12th. As a mark of the high esteem in which he is held he was presented with a handsome mahogany desk by the employees of the store and greenhouses. Mrs. Vaughan made the presentation in a very gracious manner.

Visitors—Wm. Dittman, of New Castle, Indiana. Mr. Dittman has 60,000 feet of glass, mostly to American Beauties, and says that from Sept. 1st they bloom steadily. He attributes their non-cropping habits to the fact that he keeps his houses so cool. C. G. Anderson, Kenosha, Wis., who is opening a retail flower store at 220 Main St., Kenosha. Elmer D. Smith, Adrian, Mich.; Edw. Amerpohl, Janseville, Wis.; Albert J. Brown, Grand Rapids, Mich.; Albert McCullough, Cincinnati, O.

Frederick Sperry, of Vaughan & Sperry, is ill at his home in Lake street.

FIRE RECORD.

Short Hills, N. J.—Fire caused by overheated furnace caused damage of \$3,000 to the houses and stock of Thomas Jones, on the evening of Jan. 10. Two houses, filled with asparagus and smilax, and one with carnations, suffered from fire and frost, 25 feet of each house, together with sheds, being burned. Mr. Jones will rebuild sheds with concrete as soon as weather permits.

PERSONAL.

Edwin B. Randolph, florist of Delavan, Ill., was married to Miss Mary A. Aitchison, at La Prairie on Dec. 30.

LONG DISTANCE PHONES, 2617-2618 MAIN.

HOERBER BROS., 51 Wabash Ave., CHICAGO, ILL. Cut Flowers

Long Distance Phone Randolph 2758. Telegraph, Telephone or Bring in Your Orders. We Grow Our Own Flowers. ALWAYS GOOD, FRESH STOCK. Roses and Carnations Our Specialty.

BOSTON Business is unseasonably quiet here this week. It is no time for changing prices, but if the product was heavier than it is at present there is no doubt that values would be forced downward in a most disastrous way. If business was normal in volume the supply would surely run short, but the fact is that it is unusually inactive for this season of the year. There is an evident scarcity of Richmond, Beauty and Killarney roses and on the other varieties there is no overstock. Trumpet narcissi are selling at a lively clip. Other bulbous stock goes slow. Violets are tending downwards.

BUFFALO The market took a decided change the past week and stock on most lines was on the scarce list, especially roses of short and medium quality. There has been an exceptionally good demand for white material and white roses had a heavy call. The demand is increasing daily for White Killarney and some excellent stock is coming in. My Maryland, Richmond, Killarney, Bonsilene and Perle have been excellent. Beauties are not plentiful and have had no great demand. There has been a good supply of carnations which have had a fair demand, the light colors moving well. All other stock in normal supply. Asparagus is somewhat short in supply, but there is plenty of smilax.

CHICAGO A complete change has taken place in market conditions during the past week. Where an over-abundance of nearly all kinds of stock was to be seen then, the tables now are comparatively empty. Not one sunny day so far this month, and each day finds plants more and more off bloom and the growers say they see no prospects of any immediate improvement. Carnations have been so plentiful that prices were very unsatisfactory, and now the tables are turning and the grower having a good stock of carnations has been able to take in the dollars. Roses are soaring also and the stock is so scarce there is no telling where the price may go. All kinds of white flowers are scarce. Violets are coming in from the East in good shape and selling readily. Bulbous stock is in fair supply.

WASHINGTON Since the last meeting there has been a decided slump in the flower market. Carnations went tumbling down, fine flowers selling for \$1.50 per hundred. Roses, too, are demoralized, but not so bad as carnations. All bulbous stock is congested, especially narcissi, which sell from \$1.50 per hundred down. Good observers, though, seem to think that prices will stiffen before another week. Washington cleaned out New York, Philadelphia and Chicago the past week on yellow orchids.

(Reports continued on page 127)

New York City.—Ford Bros., wholesale florists, 48 W. 28th street, will remove on May 1 to the store next door, now occupied by the Manhattan Market. A. H. Langjahr, now located at 55 W. 28th street, will take the store vacated by Ford Bros.

The Hose Question

Isn't it about time you were thinking of getting some new lengths of Hose to replace those old ones that have been patched and mended so often that your men are losing patience? Besides that—think of the time and labor cost trying to keep them in working order?

The P/M Brand

other make at the price. Quality guaranteed 25 and 50 ft. lengths. 16c. per ft., couplings included.

The Bull Dog Brand

Next to the P/M this well-known make is in great favor with florists, 15c. per ft., couplings included.

The 30c. Hose

This may sound an extravagance to many and yet we are told by some of our customers that it is even more economical in the long run than anything lower priced. 30c. per ft., couplings included. All hose sold by us is guaranteed.

Ribbons and Supplies

Note this well as to our ribbons: Every florist using them feels that he has the latest and choicest the world affords, and that his work has that exclusiveness and individuality about it not obtainable in using inferior makes. We also have the finest line in florists' fancy pins and all kinds of supplies.

Flower Market Reports.

(Continued from page 125)

The market is fairly
NEW YORK active and shows con-
siderable improvement
over the record for the two preceding
weeks. Buyers are critical and it is
only the choicest grade of material
that will realize the standard prices.
On Monday a very pronounced activity
prevailed in the wholesale district, but
Tuesday's conditions were very flat,
due mainly to the inclement weather.
The supply is not burdensome on any
line, carnations alone showing any
tendency to over-abundance. Golden
Spur narcissi are coming in quite freely
now and are of good quality, consid-
ering the date. Tulips are also begin-
ning to make an impression, but a
majority of them are short stemmed,
and the price realized for such is very
small—hardly enough in some in-
stances to pay cost of bulbs. As an
oddity a few chrysanthemums still
linger about. English wall-flowers are
seen in goodly quantity and they seem
to be well liked.

The market here

PHILADELPHIA toned up a little
last week. There

may not have been very much increase
in business but supplies slackened up
considerably. Growers who made a
special effort for the holiday trade are
shipping very little at present. Ameri-
can Beauty roses are scarcer with
prices holding firm. Other roses are
keeping up very well as to quality.
The most activity seems to be among
the shorter grades; which are in de-
mand for design work—and for the
time being bring a proportionately
better price than fancy stock. "Good
goods always sell themselves"—if there
is a market for good goods! Carna-
tions a little more plentiful, with
prices rather low. The cold, stormy
weather has kept people indoors more
than in average years and the general
trade feels it. Prices are not as good
as at this time last year; but from
reports from New York, Chicago, and

Boston, it would seem that Philadel-
phia is no worse off. Perhaps a little
better if anything—and certainly much
steadier. There are fewer gardenias
around and the demand for these is
very fair. Orchids, violets, lily of the
valley and other staples, seem to be
in ample supply at moderate prices.
Pink snapdragon is on the scarce list.

IN BANKRUPTCY.

In the District Court of the United
States for the Southern District of
Ohio, Eastern Division.

In the Matter of Armondo L. Munk,
Bankrupt. No. 2177—In Bankruptcy.
To the creditors of Armondo L. Munk
of Mt. Gilead, in the County of

Morrow and District aforesaid, a
Bankrupt.

Notice is hereby given that on the
11th. day of January, 1910, the said
Armondo L. Munk was duly adjudi-
cated bankrupt; and that the first
meeting of his creditors will be held
at the Clerk's office in the Court
House in Mt. Gilead, Ohio, on the 25th.
day of January, 1910, at 9 o'clock in
the forenoon, at which time the said
creditors may attend, prove their
claims, appoint a trustee, examine the
bankrupt, and transact such other
business as may properly come before
said meeting.

Dated at Cardington, O., Jany. 13,
1910.

W. P. VAUGHAN,
Referee in Bankruptcy.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTI- CULTURISTS.

Registration of Rambler Rose.

(Name not given, Ed.)

Public notice is hereby given that the application of Mr. Southwick Cary Briggs of 1719 Lamont St., Washington, D. C., for the registration of the rose described below having been submitted to the American Rose Society on December 13, 1909, and no reply having been received from them within the required time, the registration becomes complete.

Raiser's description.

Color, delightful shade of deep pink, flower 3 inches in diameter, semi-double, free-flowering, 5-7 blossoms on a spray. Habit: vigorous grower and very hardy. Parentage: hybrid of Madame Gabriel Luizet X Wichuriana, seedling crossed by Baron de Rothschild.

H. B. DORNER, Secretary.
January 12, 1910.

The regular meeting of the Buffalo Florists' Club is to be held on Tuesday, Feb. 1st. Very important matters are to come up and nominations of officers is also in order. President Slattery is booked for another paper and a good attendance is looked for.

Obituary.

Joseph A. Dirwanger.

Joseph Anton Dirwanger, at one time the leading florist of the city of Portland, Me., but who has been laid aside by illness for a number of years, died at his home, No. 145 High street, Friday night, January 14, from a complication of disorders which have sorely afflicted him for a long time past.

Mr. Dirwanger was born in Bavaria, Germany, 83 years ago and learned the trade of a florist in the Royal Gardens of the King of Bavaria, then a separate country. He came to this country in 1851. He was employed as gardener on the estate of Gen. Rathbone, Albany, N. Y., and of John M. Wood of Portland. He then went into business for himself, having his greenhouses located in the rear of the old Dow mansion on Congress street. He was located there for a long time, nearly 40 years in all.

Mr. Dirwanger was a well-informed gardener and particularly successful in

JOSEPH A. DIRWANGER.

the culture of orchids, acacias, ericas and subjects of a similar nature and at his establishment there could always be found something out of the common, a fact which drew for him the acquaintance and patronage of the best society people of Portland.

Socially, Mr. Dirwanger was a gentleman—a nobleman, rather—in whom the affable and companionable traits were very highly developed. An unstinted and open-hearted welcome always awaited the visitor at his home and he was never so happy as in the society of his florist and gardener friends, to whom he always extended the most generous hospitality, by whom he was greatly beloved and in whose esteem he took a pride that was almost child-like. No man ever lived who was more deeply appreciative of a courtesy. He was a nature lover and fishing was his great pastime and in his years of infirmity his delight was to rehearse in memory the happy bygone days on the trout streams and lakes of Maine and New Hampshire. It was his custom for

years to get together an annual fishing party of congenial spirits and spend a week or two in the wilds. Many well-known florists of Boston, New York and Philadelphia were from time to time participants in these outings, among the latter being the late W. K. Harris, between whom and Mr. Dirwanger there existed a very close friendship.

For many years Mr. Dirwanger was a member of the Society of American Florists, serving as vice-president for his state, and attending the conventions accompanied by his wife.

He is survived by his widow and several children, including Miss Elizabeth Dirwanger, Mrs. George N. Coyle, Mrs. J. E. Richards, all of Portland, and a son, Joseph A. Dirwanger, Jr., whose home is in California. He is also survived by his brother, Albert, who has also been a florist in Portland many years.

George Milne.

George Milne, who has conducted a florist greenhouse on Lincoln street, Winchester, Mass., for the past six years, died at his home on Tuesday, January 11, of cerebral hemorrhage after an illness of two days. He was born in Scotland and was in his 42nd year. Mr. Milne leaves a wife and two sons, besides two brothers and two sisters living at Quincy, Mass., and in Scotland. The burial was in Wildwood Cemetery.

George P. Bloomer.

George P. Bloomer, formerly of Brooklyn, but latterly a resident of Bellmore, L. I., became exhausted by the severe storm Jan. 14 and died on the veranda of his home. He was 82 years old, and for some years was a florist at Bellmore.

James M. Dean.

James M. Dean, 86, nurseryman at New Canada, Minn., for 46 years, died at his home Tuesday afternoon. He leaves a widow and six children, one of whom is a teacher in the St. Paul public schools.

Mrs. J. C. Craig.

Nellie, wife of J. C. Craig, florist, died on January 15, at her home, 738 Oakley Boulevard, Chicago. The funeral was held on January 18, and interment was at Mount Carmel.

D. W. DeMott.

David W. De Mott, a well known violet grower for the New York market, died at his home in Highwood, N. J., on Thursday, January 13.

Luther A. Line.

Luther A. Line, formerly engaged in floriculture, died at his home in Carlisle, Pa., on Jan. 6, aged 75 years.

NATIONAL FLOWER SHOW.

The National Flower Show Committee had a meeting in Boston on Friday and Saturday of last week. In addition to the local representatives there were present President F. R. Pierson and Messrs. Robert Craig of Philadelphia, and W. A. Manda of South Orange, N. J. The committee has many knotty problems to solve and they are working on them with might and main.

HELP WANTED

WANTED—March 15th, a Nurseryman of experience in packing and grading, and also a herbaceous man. Chas. R. Fish & Co., Worcester, Mass.

SITUATIONS WANTED

WANTED: A position under a good gardener in a private establishment by a respectable young man, aged 23 years, five years' first class experience. Address T. A. H., 17 Everett St., Wellesley, Mass.

FOR SALE

FLORIST PLACE FOR SALE—Fully equipped and in good running; half way between New York and Boston, in town of 7000, with 7 or 8 small surrounding places to cater to. Good retail business, cut flowers, plants and designing. Excellent place for wholesale trade, having 11 shipping facilities. Place consists of 8½ acres of land, fine 8-room dwelling house, steam heated, practically new; barn with carriage shed and outbuildings, hen houses, etc.; greenhouses and large pottery shed, 2500 ft., and 1000 ft. glass respectively, heated by one large hot water boiler; new boiler already set up for another greenhouse which is needed to supply local demand. Own unlimited water supply with newly built pump house and pump; costs nothing but the pumping. Place started and built four years ago. Large Protestant cemetery 3 min. walk, with new Catholic cemetery being laid out within view of this place. Store down town sells plants and flowers all the year round. Reason for selling: have other business taking all my time when the florist is hustling. Will assist buyer in every way. This is a real business proposition and worth looking into. Price \$7000. Address W. S., care HORTICULTURE.

FOR SALE—500 boxes of double glass, from 10x12 to 16x24; prices positively cheap to get rid of it on the grounds as it must be taken away within the month; also 2 of largest Furman Sectional Boilers practically new, used 2 seasons, 20,000 feet pipe from 1 up to 4 inch, wrought and cast iron. At Duncan Greenhouses, Sparkill, N. Y. Address M. Tomlack, Post Office, Sparkill, N. Y.

FOR SALE—Greenhouse property, with stock and all; 12,000 sq. ft. glass, 1 13-room house, 1 5-room house with all improvements; a nice big store front; good retail trade; established 15 years; acre of ground, with lot on main street. 7710 Lorain Ave., Cleveland, Ohio.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHELSKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

by Henry I. Moon, on "Nurseries and Points of Horticultural Interest at Home and Abroad," with over 150 illustrations by lantern slides.

Short speeches were made by members of the firm and others and music was rendered by some of those present.

NEWS NOTES.

Beaumont, Tex.—Ed and Jerry Stedman have purchased eight acres of land in the vicinity of the Country Club, to establish a strawberry farm. A modern hot house will be erected.

Chatham, N. J.—W. J. Badgley has bought out the stock of the other shareholders in the Wilson Plant Oil and Fertilizer Co. He will carry on the business under the same name as before.

DURING RECESS.

Morris County Gardeners' and Florists' Society.

The fourteenth annual smoker was combined with the installation of officers and it was a successful affair all through. Besides members of the society we had a goodly number of outside visitors, Monmouth county, Orange, Bernardsville and Elberon each sending a delegation. Arthur Herrington was master of ceremonies, ably seconded by Messrs. Duckham, Schultz and Totty. The talent which entertained was fine, and the funny songs and characters kept the audience in a roar. A "full and plenty" of everything to satisfy the inner man was on hand. Letters of regret were read from Wm. J. Stewart and J. Austin Shaw.

Announcement was made that the Chrysanthemum Society of America would hold their next meet in Morris-town and would also exhibit in conjunction with the local society and all the assisting clubs, a number of which have already pledged themselves.

E. R.

The Greek Ball.

The annual ball of the Greek-American Florists' Association was held at the Terrace Garden, New York City, on Monday evening last. It was a record crowd that thronged the brilliantly lighted and lavishly decorated building, there being not less than two thousand people in attendance, including many representatives of the wholesale and retail florist trade of the metropolis and as a special dignitary, the Greek ambassador, who came from Washington and made an eloquent address from one of the boxes. It was a splendid affair in every detail and an object lesson in what may be accomplished by united effort in which every interested individual gives the best that is in him. There were many blinky eyes in evidence in the wholesale district Tuesday morning, for it was close to daylight when the gay affair came to a close.

Fun at Morrisville, Pa.

On the evening of January 14th the Wm. H. Moon Co., of Morrisville, Pa., gave a dinner for their foremen and office men, about sixteen in all. After a bounteous menu a lecture was given

Evergreen Brand

A New Fertilizer

Specially manufactured for growing FLOWERS, FERNS, PALMS, etc.

It contains all the PLANT FOOD elements necessary to plant growth, and is compounded in proper proportion to get the best results in growing FLOWERS and PLANTS.

It removes Acid from the soil, consequently sweetens sour land and makes it productive.

It permanently enriches the soil.

It is all available.

Contains no "filler."

The plants can use it all.

Now Used by Largest Growers, With Excellent Results

Morton Grove, Ill., Oct. 6th, 1909.

Mr. D. D. Johnson

Dear Sir:-

We have used the 6 cans of Evergreen Brand Flower Fertilize shipped us Sept. 6th and noted remarkable results.

You may increase our second order of 500 to 2000 lbs. and ship soon as possible.

Yours truly,

Poehlmann Bros. Company.

Aug Poehlmann Ly

Odorless and Sanitary

It will annihilate all disease germs; thus it prevents stem rot and other diseases from destroying the plants.

The Price is Low

compared with common Fertilizers or Bone Meal, for when purchasing the EVERGREEN BRAND you get PLANT FOOD, hence eliminating the expense and handling of "filler" or "make weight" material usually found in large quantities in common Fertilizers.

It is immediately soluble in water. Can be used Dry or in Solution.

1 lb. to the 100 Sq. ft. of Benching

TRY IT. We have arranged to ship small quantities, as follows: Boxes containing 1, 2, 4, 6 or 8 cans each.

Cans contain 12 pounds. Price \$2.00 per can. Terms net cash with order.

Full instructions with each shipment.

ROCHESTER FLORISTS' ASSOCIATION.

More than sixty members gathered in the Association's new rooms in the Cutler Building, on Monday evening, January 10th. The new club rooms are centrally located, convenient and pleasant, and plans are under way to have on file the various horticultural journals, and books of interest to the profession will be available at an early date.

The annual business meeting was held at the same time, and the reports of the officers were exceedingly satisfactory. That the Association is an assured success and in a most prosperous condition is shown by the report of Mr. W. L. Keller, treasurer. The report showed the receipts from the Flower Show and other sources to be \$1637.34, and a balance on hand of \$1367.06, as against \$12.00 last year.

A proposed revision of the Constitution was also presented, but action was deferred one week, at which time it is to be made a special order of business. It is probable that the name will be changed to The Rochester Florists' Association, which will permit many to become members who are connected with the nursery and seed trade, as well as private florists and gardeners.

Among other suggestions, that of a Question Box received hearty approval, and it will be made a feature of the regular meetings. So successful have the officers conducted the affairs of the Association during the past year, that a motion was made that the following officers be re-elected for the ensuing year, and was unanimously carried: President, F. W. Vick; vice-president, E. P. Wilson; secretary, H. B. Stringer; treasurer, W. L. Keller.

After the business of the evening was transacted, a lunch was served.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular meeting of the Society was held in Pembroke Hall, Wednesday, January 12. All the newly elected officers were at their posts, president James Duthie occupied the chair, and over forty members were present. President Duthie opened the meeting with a few well chosen words for the welfare of the Society, and was duly applauded.

The annual dinner of the Society will be held at the Oriental Hotel, Glen Cove, N. Y., January 25, and anyone caring for a grand feast and a jolly good old time should secure tickets at once.

A splendid exhibit of carnations was made by Geo. Wilson, which well deserved the cultural certificate given. On motion, Mr. Wilson promised to teach us next meeting how to grow beauties like those exhibited.

Instead of the point competition it was voted to have monthly prize contests, and the February meeting will be Carnation Day. Three prizes are offered for vases of 12 white, 12 pink and 12 red, also cultural certificate for best vase of 12 mixed carnations.

A first prize of \$10.00, donated by President Duthie, and a second of \$5.00 offered by Mr. A. Morrison, are to be given at the end of the year to

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{3}{4}$ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

E. H. Hunt, 76-78 Wabash Ave., Chicago, Ill.

the two competitors winning the largest number of prizes.

With a good reserve of cash in bank and a fine set of officers, with James Duthie in the chair, an executive committee which knows how to do business, and trustees as good as bankers, there is no doubt that 1910 will be the banner year of this society.

OSCAR E. ADDOR, Cor.-Sec.

ALABAMA STATE HORTICULTURAL SOCIETY.

The Seventh Annual Session will meet in Bessemer on Friday, January 28th, and Saturday, January 29th, 1910.

Bessemer is a hustling city and is within easy access of Birmingham. The steam and trolley rail service between the two cities is excellent. The Committee in charge is endeavoring to secure special rates over the railroads of the state for those coming to the meetings. It is announced that all who contemplate attending the meetings will be cordially entertained free by the citizens of Bessemer by sending in their names to Mr. W. R. Gunn, secretary board of trade of that city.

The full program will be issued in a few days. Papers and discussions will be given on horticultural subjects such as fruit growing, both in the home garden and for market; vegetable gardening, plant diseases, destructive insects, forestry, landscape gardening relating to the beautification of the home and school grounds and the city itself, and other topics of interest.

Among the many speakers will be Mr. Walter Swingle, of Washington, D. C., on citrus fruits of Alabama; Dr. J. F. Wilson, of Poulan, Ga., on the pecan; Prof. F. E. Lloyd, the State Botanist, presenting a special feature in the form of a public lecture, illustrated by lantern slides, on a description of the Mexican Desert Plateau, including among the wild plants the Guayule, a rubber plant upon which \$30,000,000 of American capital has been invested; an illustrated lecture on forestry, by P. F. Williams; Injurious Insects, by Dr. W. E. Hinds, of Auburn.

W. F. Heikes, of Huntsville, is president, and P. F. Williams, Auburn, Ala., is secretary.

"SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance."

FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.

The 14th annual banquet of this club was held at the Westminster Hotel, Providence, on Jan. 18.

During the evening the newly elected officers were inducted and the retiring president, Charles S. Macnair, was presented a gold fountain pen. There were nearly 50 members and guests at the tables. After the dinner, Michael J. Sweeney was introduced as toastmaster. His introductions of the several speakers were original and witty.

Responses were made by William Appleton, William E. Chappell, James B. Canning, Alex. Macrae, James Hockey, Joseph F. Schellinger, William S. Pino, Dr. Holland, H. H. Pepper, Owen McManus, Cornelius G. Hartstra and Eugene Appleton. These were interspersed with music. Prof. H. J. Wheeler made an address on the horticultural possibilities of New England.

The new officers of the club are: President, Robert Johnson; vice-president, Eugene Appleton; secretary, William E. Chappell; treasurer, William Hill.

PERSONAL.

J. P. Cleary sailed from New York on January 8 on the "Minnewaska" for London.

T. Mellstrom, representative for Sander & Sons, will sail for Liverpool on Wednesday, January 26, on the Campania.

S. Woodrow, recently in the employ of the Fernwood Nurseries, has taken a position as traveling salesman in New York City and Hudson River territory for Bobbink & Atkins.

Charlie Schimmell of Ford Bros., wholesale flower establishment on West 28th Street, New York, has been dangerously ill with pleuro-pneumonia for two weeks. His condition has considerably improved this week.

Visitors in Boston: J. A. Peterson, Cincinnati, Ohio.; T. Mellstrom, representing F. Sander & Son, St. Albans, England.

Visitors in Philadelphia this week: L. W. Wheeler, representing Peters Co. and other California seed growers; Edward Roehrs, representing Julius Roehrs Co., Rutherford, N. J.

New York visitors: H. Van Zonneveld, of Van Zonneveld Bros. & Philippo, Sassenheim, Holland; L. W. Wheeler, representing California and Colorado seed growers; L. M. Kimberlin, Santa Clara, Cal.

SPRINGFIELD, OHIO, NOTES.

The Florists' Club.

The Springfield Florists' Club held a social session on the evening of Jan. 10, to which every florist in the vicinity, not a member of the club, was invited as a guest.

The affair was a most enjoyable and profitable one for all who attended; tables were set in the packing house of the Highland Floral Co., handsomely decorated with potted plants by that enterprising firm, and heavily loaded with all the things that go to make up a good, square meal for a hungry man.

Dinner was announced at 6.30 and about 35 members and guests "drew up and fell to," giving hearty approval to the menu prepared and served by the club's excellent standing committee on refreshments.

After the tables had been cleared and cigars passed, opportunity was given for expression of views, more especially concerning the interests of the local florists, and some points were suggested from which good results are expected.

The contemplated flower show to be held here next fall came in for full share of discussion; a creditable showing will no doubt be made when the time comes.

Trade and Personal News.

All the mail order houses here are busy mailing their catalogues, about a million of the books being now ready for distribution; the "Blue Rose" is the prominent feature of several of the lithographed covers. The general feeling is that an increased trade will be enjoyed the coming season and large preparation is being made for it.

The Schmidt & Botley Co. have just completed a commodious cold storage house, and will be in fine shape to care for their large bulk of dormant stock.

The Fairview Floral Co., under its new management, have issued a handsome 100-page catalogue with lithographed cover, and will make a strong bid for a share of spring business.

Club President Murphey and John M. Good are both confined to their homes with illness and have the sincere wish of all for speedy recovery.

Ed. George, of Painesville, O., and C. Betcher, of Canal Dover, O., were recent visitors. GEO. H. MELLE.

A FERTILIZER APPROVED.

The unqualified endorsement of a house of the standing of Poehlmann Bros. invests the advertisement of Evergreen Fertilizer on page 134 of this issue with especial interest and convincing strength. The fertilizer question is one of the most vital with which the cultivator has to contend and if the D. D. Johnson Co.'s products are what the Chicago florists' testimonials lead us to believe, they will

find plenty of good business coming their way.

Mr. Johnson, who is a young man of ability, spent most of his time last year giving tests of his fertilizer through Michigan, using it upon celery and other market garden crops with much success, and this year he is pushing the floricultural end of the business.

THE PETERS & REED POTTERY CO., Zanesville, Ohio.

Unlike the Automobile Industry the prices of Addressing Machines have been greatly decreasing in the past few years.

The Elliott Addressing Machine Company at 100 Purchase Street, Boston, Mass., have recently perfected a Fiber Address Plate which is sold at the extreme low cost of \$4.00 per thousand.

This price is approximately from \$6.00 to \$30.00 per thousand cheaper than anything that has before been offered in the way of a Card Index Address Plate.

This is specially adapted to publishers whose subscription list change so often that a high priced Address Plate is out of the question.

Publishers who use addressing systems save 9-10 of their time previously consumed by the monthly addressing and they save 10-10 of the mistakes so common to hand addressing.

If you use a mailing list of more than 1,000 names write to

TEMPERATURE ALARMS

Damage to greenhouse stock by too high or too low temperature can be absolutely prevented by the use of a good temperature alarm.

With such a device when the temperature rises or falls above or below a predetermined point a bell rings in any desired place about the premises.

Thermostatic Electric Alarm.

Our Thermostatic Electric Alarm has a field of regulation between 30° and 120° and can be set at any point between these two. Its accuracy is **guaranteed** and, as it is constructed of the best materials and has no complicated parts, it will last practically a life time.

Style A is cast in aluminum and is 8 inches high, 4 inches wide, 2 inches deep and is highly finished.

Differential Temperature Alarm.

This device will insure absolute prevention against too high or too low temperature. It has a range of regulation between 20° and 110° Fahrenheit and can be set to ring a bell anywhere about the premises when the temperature goes above or below a designated point. Its sensitiveness and accuracy we **guarantee**, as it is made of the best materials obtainable, and contains no complicated parts. The care in manufacturing, the design used, and the materials employed enable us to make a temperature alarm unequalled by any similar device.

Temperature Alarm Number 2.

For ringing an alarm only when the temperature goes too low, our Temperature Alarm No. 2 is best adapted. This device is connected with an electric bell and battery and will sound an alarm anywhere about the premises when the temperature falls below a previously determined point. It registers from 20° to 120° and the pointer can be set at any figure between these two. When so set it is **guaranteed** to give the alarm. The casing is made of sheet aluminum, size 4 inches diameter by 1½ inches high.

Differential Temperature Alarm.

Agencies wanted to handle our goods.
Progressive, energetic and reliable
firms preferred.

National Clock & Electric M'f'g. Co.

Temperature Alarm Number 2.

Hitchings' Greenhouses Are Easily Enlarged

They are built in sections 8 feet, 4 inches long, each one complete in itself, so that when the house is enlarged, it isn't necessary to pull half the house down. It way makes a simple, inexpensive way. Before you decide on your new house, it is up to you to find out all you can about how Hitchings & Co. build Hitchings houses. A personal talk, of course, is the best way; the next best is to look carefully through our printed matter which we will gladly send you for the asking.

Hitchings & Company

Designing & Sales Offices General Offices & Factory
1170 Broadway, N.Y. Elizabeth, N.J.

Here's An Interesting Greenhouse Combination

The tall building is sort of a club house with bowling alley on one floor and guests sleeping rooms above it.

The lower floor is devoted to work room purposes.

The greenhouse leanto runs the full length of the club house, and the palm house, with numerous other houses, out of sight just back of it, open from it.

More and more, greenhouses are being joined to or made a direct part of important buildings on the grounds, as garage, club house, tea rooms and the like.

The durability, adaptability and attractiveness of the L & B Sectional Iron Frame Construction makes it the best for such cases even as it is best for all other purposes whatsoever.

It is a construction with over fifty years of "know how" behind it.

DAHLIAS Every Day in the Year

These illustrations show how we grow California Privet here at Harrison's Nurseries—and the way our Privet looks when planted as hedges along driveways, walks, etc.

We have the right soil and climate here for growing California Privet, and take unusually good care of our plants. We cultivate the blocks each week, and during the dormant period last year we cropped the smaller sizes—one- and two-year—back to the ground. These plants developed a wonderfully bushy growth in 1909 and are now in prime shape.

The upper view represents a block from which tens of thousands of plants will be dug this spring. This is the kind of Privet you'll be proud to furnish your customers—fine, vigorous, well-rooted and branched plants, every one. In fact, Harrison's California Privet is so strong and thrifty as to be almost a distinct and separate variety in itself.

California Privet Plants for Hedges By the Rod or by the Mile

Whether you want enough Privet to plant a rod or a mile, we want to supply you; write us NOW for particulars and prices. Owing to the mild climate of our locality we dig our Privet only as ordered; this does away with the necessity of digging and storing through the winter. When shipments are to be made, the roots are carefully protected and wrapped, and in this condition, Harrison's Privet can be shipped to any distance without drying out.

Try us on an order for California Privet; we have nearly 300,000 plants in sizes varying from 4-5 feet, down to 12-18 inches. We offer in addition very attractive stocks of Barberry, Arborvitae, Colorado and Koster's Blue Spruce, Norway Spruce, etc., also Fruit and Shade Trees of all kinds. Particulars on request. Plant Novelties From China.

JASMINUM PRIMULINUM.

The Jasmines are not, strictly speaking, hardy subjects but their floriferous character and usually large and brightly colored flowers make them popular plants for sheltered walls, cool greenhouses, etc. *J. nudiflorum*, a Chinese species, is perhaps the best known and its clear yellow flowers borne throughout the winter months are much appreciated wherever its culture is possible. An evergreen and glorified *J. nudiflorum* very well describes the new *J. primulinum*. This species is native of the plateaux of Yunnan, South China (from whence the writer introduced it), and although it will withstand a certain amount of frost it is not a hardy plant. It is, however, peculiarly adapted for greenhouse culture and will in time become a recognized winter-flowering pot plant for general decorative and market purposes. Cuttings of young shoots inserted in early spring in the ordinary way root readily and if grown on flower freely the following winter. Small plants in 3-inch pots flower as freely in proportion as larger plants, but the larger the plant the more flowers and greater the effect. After rooting the plants should be grown on and plunged outside in a sunny position. On approach of frost remove indoors and keep on "dry side" fully exposed to sun. One-potting should be avoided but abundance of water and liquid manure are essential. After flowering cut hard back and remove weak growths entirely. As new growth appears the plants should be potted on and this continued year after year until the bushes reach the limit of size consistent with the purpose for which they are grown.

Jasminum primulinum is bushy in habit, grows 4 to 6 ft. tall, with branches arching and decumbent. The flowers are produced from the axils of every leaf, are clear yellow in color, in size approximately as large as a dollar piece and usually semi-double after the manner of the old-fashioned hose-in-hose Primroses. The longer the shoots the greater the number of flowers produced. Its easy culture and attractive flowers subtended by deep green leaves makes it unrivalled as an ornamental, yellow, winter flowering shrub.

Buddleia is another subtropical genus with members creeping over into the temperate zones. China has recently given us two species and numerous varieties of surpassing merit which have speedily come to the front as ornamental shrubs. Indeed none of the writer's introductions have secured such a host of devotees in so short a time as these *Buddleias*. Their easy culture, extreme floriferousness and beauty are responsible for their rapid popularity. As a winter-flowering shrub and companion to *J. primulinum* *Buddleia asiatica* is to be strongly recommended. This plant is erect in habit, growing 4 to 6 ft. tall, every shoot, both primary and lateral, terminating in a slender, cylindrical, tail-like raceme, 9 to 18 inches long, of pure white delightfully fragrant flowers. The cultural hints given for *Jasminum primulinum* also apply to this *Buddleia* except that propagation is effected from half-ripe wood. In Shanghai and other places in the far East, this plant is one of the most esteemed of all winter-flowering shrubs. In the "seventies" of last century this

plant appears to have been in cultivation in England but was lost subsequently until re-introduced by the writer.

Buddleia variabilis and its numerous varieties are mid-season shrubs flowering in August and September. The original *B. variabilis* was introduced from China by way of France but was an indifferent thing, straggling and sprawling in habit with poor colored and small spikes of flowers. But as the specific name indicates the plant is variable and the writer has been fortunate in securing some excellent forms.

B. variabilis var. *Veitchiana* and *B. variabilis* var. *magnifica* are both erect-growing shrubs with primary and lateral branches terminating in arching, cylindrical "tails" 1 to 3 ft. long, of fragrant flowers. In "*Veitchiana*" the flowers are bright mauve with orange-yellow throat. In "*magnifica*" the flowers are deep rose-purple with the edge of petals somewhat reflexed. *B. variabilis* var. *Wilsoni* has a more loose habit, laxly arching branches, and pendulous tails of flowers in colors resembling *Veitchiana*. The individual flowers are large and the inflorescence is often over 40 inches long! It is difficult to decide which is best but opinions incline toward "*magnifica*" on account of its deeper and richer color. All three should be grown as they furnish a succession of flowers. "*Veitchiana*" is first to flower in end of July and early August; "*magnifica*" follows a fortnight later and "*Wilsoni*" some ten days after this.

B. variabilis and its varieties are native of the dry river valleys of central and western China usually growing side of streams and not infrequently in the shingly beds and islets of summer torrents. Abundance of water in the growing season is of more importance than a rich soil. Under cultivation they thrive in any ordinary garden soil and are just as happy in the back-garden of some city workman as in the palatial grounds of the country magnate. To secure the best results the one thing necessary above all others is hard pruning in early spring. This and abundant water is all they need. Cuttings of half-ripe wood inserted in late September root readily.

In the Arnold Arboretum these plants survive the winter though often killed to the ground. They are partial evergreen in character and for general purposes in New England and the States west where the climate is more severe they should be lifted in early winter and stored in cellars or under greenhouse benches. These *Buddleias* are admirably adapted for summer and early autumn bedding anywhere in this country. For summer resorts where a display of flowers in August and September is the one thing requisite they are ideal subjects. In large pots or tubs they would make the most decorative of plants for piazzas, etc. Anyone can grow them with ease.

These *Buddleias* and Jasmine were unanimously awarded first-class certificates when exhibited before the Royal Horticultural Society of London. They every year become increasingly popular on the other side and a great future awaits them here where the increased sunshine will afford even grander results. Whoever takes up this culture for the purposes indicated above will have cause to pleasantly remember HORTICULTURE.

S. W. Wilson.

Xanthoceras sorbifolia.

XANTHOCERAS SORBIFOLIA.

Many good flowering shrubs have come to us from Northern China and some, such as *Forsythia suspensa* and *Magnolia stellata*, are among the most popular of our garden occupants today but the subject of this note, which also comes from the same region, does not appear to have been so largely planted as its merits entitle it to be. In this country it is quite hardy as far as the northern boundary of Massachusetts and forms a somewhat upright branching shrub with pinnate leaves and terminal and axillary racemes of white flowers which have a crimson blotch at the base of each petal. The accompanying illustration gives a good idea of its floriferous qualities in a young state, and if planted in a good loamy soil in a sunny position it never fails to produce in ray large quantities of its handsome racemes. In the gardens of the Summer Palace at Pekin large specimens forty feet high with trunks one foot in diameter are to be seen and although we cannot expect it will attain such large dimensions in this country yet it makes a very ornamental large shrub and is apparently free from any injurious diseases. *Xanthoceras* is a member of the natural order Sapindaceæ to which such well-known plants as the chestnuts and maples belong.

The good seed sown in the organizing of a ladies' society in affiliation with the S. A.

F. has begun to bear fruit in a very practical and gratifying way, as shown by the

action taken by the St. Louis ladies as told in our news columns last week. We predict for this St. Louis local organization a great success from the very start and look to see the example thus set followed in other places.

"Please send HORTICULTURE to my home address so that I may have a better chance to read it." The above note just received from a well-known, always-busy florist, is identical in sentiment with many

written and verbal testimonials which come to us from various sources all indicating that HORTICULTURE is in the enjoyment of that highest and most valuable asset—a clientage who support the paper for its *reading* value. In these days when our contemporaries are imputing "padded circulation" and various other misdeeds to one another it is gratifying to realize that HORTICULTURE's policy of endeavoring to provide that quality of reading matter which will be carefully read—not merely glanced over and then cast aside—has the approval and appreciation of the trade. Its circle of readers is constantly widening and its influence unquestionably extending in a most substantial way.

The carnationists

As we go to press the carnation enthusiasts in session at Pittsburgh, having completed the serious work of the convention, are enjoying themselves around the festive board as the guests of the generous-hearted representatives of Pittsburgh horticulture. We have given our readers, in this issue, all the news of the convention which has come to us thus far and whatever is missing will appear in full next week. When all the returns are in we have no doubt that the prediction made by Mr. Fred. Dorner, ten years ago, still holds good. Mr. Dorner said, "Many will not admit it but it remains nevertheless a potent fact that the interest manifested in new varieties centers in the American Carnation Society, and is its moving spirit; remove it and the society will crumble and decay." The interest in novelties is still as keen as when the esteemed ex-president of the Carnation Society expressed the above quoted sentiments and, apart from the ever-potent factor of sociability and fraternity, it furnishes the main incentive for the annual gatherings of the carnation hosts. We think the time will come, however, and in the very near future—when the society devoted to the interests of the "divine flower" will see the necessity and wisdom of exploiting their pet specialty from another standpoint—one which will widen its influence with the public, increase its use for many purposes and place carnation culture on a higher pedestal than it has even yet attained.

The post office "deficit"

Much has been said and much written, of late, concerning the alleged post office deficit and the responsibility of the magazines and trade papers for a large proportion of it, by persons either prejudiced for selfish reasons at the start or seemingly very ignorant of their subject. Exaggerated estimates of the loss sustained by the Department in the carrying of second-class mail matter have been diligently circulated and the bias is well-shown in the fact that the influence of the class magazines and weeklies in creating new business in the first-class postage department is studiously ignored. Take the industry followed by the readers of HORTICULTURE, for instance—almost infinitesimal as compared with the great interests of agriculture, science, mechanics, finance, medicine, religion—and think for a moment of the amount of letter writing induced by the advertising alone, which is carried from week to week, all of which pays first-class rates and which could never have materialized except for the reasonable charges made in the past for circulating these mediums of interchange, agencies which have no equal in the diffusion of useful, practical and business-building knowledge. The project of placing a heavy burden of additional postage on those who publish and those who read these publications will, we believe prove as unpopular as it is unprogressive, as soon as all the facts concerning the business methods of the post office department become public.

A happy thought

Horticulture's qualities

AMERICAN CARNATION SOCIETY.

A Rousing Convention and Magnificent Exhibition—Boston Selected for Next Meeting. March, 1911, in Connection with National Flower Show, is Probable Date.

Officers Elected

PRESIDENT—FRED. BURKI, PITTSBURGH, PA.

VICE-PRESIDENT—E. ALLAN PEIRCE, WALTHAM, MASS.

SECRETARY—A. F. J. BAUR, INDIANAPOLIS, IND.

TREASURER—F. E. DORNER, LAFAYETTE, IND.

The nineteen annual meeting of the American Carnation Society was a great success from point of view of attendance as well as the extent and quality of the exhibits. Both are the best in the history of the society. The local club which was thoroughly well organized, contributed much to make this convention such a winner. The consensus of opinion is that for quality and quantity of bloom nothing has ever approached it in this country or, for that matter, in the world. The visitors were met with real Pittsburgh weather, dark and murky, but luckily very mild, so that all exhibits arrived in good condition, none being frozen, and all on time. The judges—John Birnie, M. A. Patten, Eugene Daille-douze and E. A. Stroud—completed their work in record time. The sensation of the convention is the deep scarlet carnation Hoosier Lad exhibited by F. Dorner & Sons Co. An unfortunate circumstance has been the sudden illness of Mr. J. Reimels of Woodhaven, L. I., who, we regret to state, had to be taken to the hospital. A great many of the wives of the members attended the convention. On Wednesday night the ladies were entertained at the theatre by the local club, and the male portion were given a smoker. Total attendance about two hundred. New York was very strong with twenty-nine members.

OPENING SESSION.

The opening session of the convention took place on Wednesday evening. President Fred. Burki of the Pittsburgh Florists' and Gardeners' Club, in a few chosen words introduced Prof. John A. Brashear. Brashear is an astrologist and stated he was glad to be among friends and expressed thanks for the opportunity of addressing the society. The Professor introduced practical and poetical philosophy into his address and spoke of the color in flowers, also referred to an interesting conversation with Mr. John Thorpe on this subject. Many people, he said, are color blind and to some people all things appear gray. Mr. Brashear drew comparisons of the colors of flowers and the stars, and the effect of light upon them. In closing he extended to the society a very hearty welcome.

Robert Craig replied in his usual

eloquent vein, and stated that the Professor's words were an inspiration and gave a brief insight into things sublime by comparing the heavenly bodies to the flowers and carnations exhibited here. He said that the gentleman had done the society a great honor by coming down from the heavens and addressing them, also that Pittsburgh had made a grand record for its great industries, floral activities and philanthropy. He alluded to the famous Phipps conservatory and the great showing they made at all times. In conclusion he presented to Prof. Brashear an immense bouquet of carnations to be given to his wife, whom he stated had been an invalid for many years, but had never been without flowers presented to her by her friends, and these flowers had come from all over the United States and Canada. Mr. Craig emphasized the fact that it had not been the first time that he had enjoyed the hospitality of the Smoky City.

President A. M. Herr then read his address.

PRESIDENT'S ADDRESS.

Ladies, Gentlemen, and Members of the American Carnation Society: Your President extends greeting and a welcome to our sessions, we hope to have them interesting enough to have you at each one of them.

This society was organized in Philadelphia, and the first regular meeting held in New York, but it always seemed to me that it took the second annual meeting in this city to get us thoroughly acquainted with each other, and Pittsburgh will always be a bright spot in the memory of those of us who were fortunate enough to have attended that meeting. Those of us who are here today will no doubt long remember the 19th annual meeting and our Pittsburgh welcome.

Getting acquainted is one of the chief benefits to be derived from these gatherings. I know of several instances where men have attended our meetings for the first time and gone home having met but two or three members. In one instance on the train going home a new member told me that the only person who spoke to him during the whole convention was the secretary. In cases of this kind the in-

dividual himself is largely to blame, but we should, during the few days we are together, be a more universal brotherhood, and have at least a "howdy" for each and every visitor. I would suggest a permanent committee of introduction and information to whom strangers can apply for assistance in getting acquainted.

Can we make our meeting more interesting and profitable to ourselves and our flower than they now are? We have told and retold the story of production, the proper houses, etc.; there are of course new difficulties and advanced methods to discuss along these lines each year, but it seems to your president that we could and should devote at least one session to the improvement of our business methods; that they have improved no one can deny, but the improvement today over that of our meeting here seventeen years ago is very little more than what has been forced upon us by the general upward trend of all business. Other industries do not wait to have improvement forced upon them, they are continually searching for it, grasping and utilizing it.

We should know how much money each square foot of ground surface in our houses should bring us to meet our expenses, labor, heating, operation, wear and tear on the place.

We should have a small but conspicuous tag attached to each bunch of flowers we send into the market and let this tag follow them into the retail shop, so that in the course of time buyers would learn to ask for it and demand it as a guarantee of quality. This tag could be marked with the letters A. C. S. or some other special mark and the whole be copyrighted and for use only by paid up members of this society, and all infringements prosecuted. In addition to the special mark could be added the grower's name and the date the flowers were cut, this to be left to the discretion of each user. Poorly grown flowers and over-aged flowers by this method would soon be left in the race. To succeed and properly advance our business our flowers should give pleasure and satisfaction to the user and this suggestion is offered as a means to that end.

Can we improve our methods of sell-

ing carnations? Mr. Fox gave a talk in Philadelphia from the retailer's point of view on prices for special days of demand. We all know of instances when the retail market price of carnations was from \$1.00 to \$1.50 per dozen and the wholesale price was \$1.00 to \$1.25 per hundred, less the 15 per cent. commission to the middleman. This proportion between the grower and retailer is not a good business proportion, and if it were not for the advanced prices of special days the grower would be in a bad way. Adjustments will have to come some day, and it should come through this society.

Is there overproduction of carnation blooms? I was told by a Pittsburgh man that if roses had been plenty for Christmas, carnations would have gone begging. All hail to the rose! But carnations have their devotees as well, and if given to them in proper shape and form I believe the day of overproduction is far in the future, providing the retailer, the grower and the middleman can get together and work towards a mutual end. Let us put on our thinking caps and see what we can do towards this. At our meeting in this city before, we had a paper by Thomas Cartledge who stood at the head of the Philadelphia retail trade. He reviewed the various carnations then grown by name giving his retail experience with each as per this example, "Grace Wilder has been our leading pink, only because we could get it in quantity. Aurora has sold equally as well when we could get it, although it sometimes shows a slaty, ashy purple tint when a little old." We want to grow "best sellers"—a review of this sort each season would help us find them out.

Our exhibitions will admit of some improvement as exhibitions to the public, but as an educator to the grower, the lines on which we are working are as nearly right as we can hope to get them; as a guide to the buying of new sorts, each individual will have to work that out for himself with the new flowers for comparison with older sorts in front of him.

There is one point I would like to see worked out, and that is, to have a report, from those who buy novelties the first year, sent to the secretary on Dec. 1st of the following winter, giving their honest opinion of the variety from the buyer's point of view. Let the secretary publish these reports in pamphlet form and send them to applying members only. The buying of novelties is an experiment from a profit point of view, no matter how much we may try to eliminate it, but a pamphlet of this sort would be a great help to buyers of new sorts in their second year. If necessary this pamphlet could also be copyrighted. You will note that I am trying to make membership in this society a necessity to all live carnation growers.

We need also a permanent committee of finance to devise ways and means for the procuring of the funds necessary to the welfare of this society.

In closing I want to compliment this society upon its choice of a secretary, a better one would be hard to find, his work has been especially arduous for this first year, but it certainly has been faithfully performed. Our secretary should have at least

"Yes, sir; just back from Pittsburgh. Why don't you get out with the boys to these conventions? Do you lots of good, old man; just what you need."

\$250.00 per year and the work would be cheaply done at that.

Let us all work toward getting this society to the position it should hold and the prosperity of our society will bring prosperity to all its members.

SECRETARY'S REPORT.

Secretary A. F. J. Baur then presented his annual report, showing that up to April 1st, the society had 394 members; added 55 in 1909, and had four deaths. He stated that Section "C" which provides for the exhibits of previous season's novelties should be a permanent one. He thanked the local men for the great interest they had shown.

Treasurer F. E. Dorner then made his financial report as follows:

TREASURER'S REPORT.

Expenditures.

Paid by orders on treasurer...	\$826.48
Balance cash on hand, Jan. 24, 1910	283.68
	\$1,110.16

Receipts.

Balance cash on hand, Jan. 25, 1909	\$227.58
Cash from secretary.....	759.30
Cash interest from Permanent Fund	123.28
	\$1,110.16

Permanent Fund.

Reported Jan. 25th, 1909.....	\$2,375.31
One Life Membership.....	50.00
	\$2,425.31

All the reports were well received.

Letters were read from the Milwaukee Florists' Club, Mayor, and Citizens' Business League of Milwaukee, inviting the society for next year. F. R. Pierson remarked that as the Society of American Florists would hold their exhibition next year in Boston, he would suggest that the carnationists hold their annual convention in Boston at that time, as the Rose

Society would also take part, and he thought it would be an excellent idea for all branches of the trade to concentrate their efforts and that this was the psychological moment for the greatest success for an exhibition of this kind.

W. W. Coles and W. N. Rudd, also spoke of the benefits that would accrue to the whole trade from such a course. It was also stated that over \$500 in prizes would be offered for carnations at this Boston exhibition, and the premiums offered by the carnation society, would swell the total to a very large amount. Mr. Rudd urged the society to go to Boston. J. A. Valentine said that we are apt to confine our work, and that this was a great opportunity as he had had the privilege of seeing the schedule, that many plants he did not know would be staged, and from an educational point of view all would derive great benefits. He observed that most of the shows are in the fall, and that a spring exhibition would give greater opportunities for a wider knowledge of the trade. Robert Craig also spoke along these lines and was in hearty accord. Nic Zwiefel spoke against this proposition and for Milwaukee. W. W. Coles stated that it was contrary to the constitution to hold the carnation convention later than January.

NOMINATION OF OFFICERS.

Officers were nominated as follows: President, F. Burki; vice-president, Nic Zweifel, Milwaukee; S. J. Goddard, Framingham, Mass.; secretary, A. F. J. Baur; treasurer, F. E. Dorner.

On motion the number of judges was increased to six, and the following were nominated: W. W. Coles, W. J. Vesey, J. H. Hill, E. A. Stroud, F. H. Traendly, Eugene Dailedouze, W. N. Rudd.

W. T. Bell's paper on "The Carnation: Its Uses, Varieties and Culture," was listened to with much interest.

THURSDAY MORNING SESSION.

Thursday's forenoon session was devoted to committee reports, discus-

sions, papers and the selection of place of meeting for 1911. The nomenclature committee reported that there had been twenty-one seedlings and two sports registered during the year. Registration of Washington, a dark pink sport from Enchantress, was confirmed and a preliminary certificate was awarded to Princess Charming, a flesh pink seedling, shown by H. Eichholz.

Jos. H. Hill then read his paper, "The Calendar of the Carnation," which drew out an interesting discussion. A paper on "Carnations Under Glass," by Fred Burki, and one by C. L. Washburn, favoring a joint meeting with the American Rose Society, were next presented. Eugene Dailledouze took the other side of the latter question and did not approve of changing the date for the carnation meeting.

BOSTON NEXT MEETING PLACE.

On vote for place of next meeting, Boston was selected and the argument in favor of a joint convention with the American Rose Society and other bodies in connection with the National Flower Show at Boston in March, 1911, was approved amid much applause.

THURSDAY AFTERNOON'S SESSION.

W. H. Breitenstein read a paper, "A Carnation, the People's Flower." Nomination of officers was opened up again and E. Allan Peirce of Waltham, Mass., was nominated for vice-president. Election of officers followed and Mr. Peirce, together with the list unanimously nominated at the previous session for the various offices, was duly elected.

THE EXHIBITION.

The report of the judges on the exhibition was then read, as follows:

Section A—100 blooms white, first Cottage Gardens Co., with Alma Ward; second, Stratford Flower Farms with White Perfection; 100 flesh pink, F. Dorner & Sons Co., with seedling 4206 and the same firm second with Pink Delight. 100 light pink, Cottage Gardens Co., with Mrs. C. W. Ward. Jos. Heacock second with Dorothy Gordon. 100 dark pink, N. Zweifel with Bright Spot, E. G. Hill Co., second, with Afterglow. 100 red, Cottage Gardens Co. with Beacon, Dorner second with Scarlet Glow. 100 crimson, Wanoka Greenhouses, Sultana, W. W. Coles second with Mrs. W. W. Coles. 100 yellow, E. G. Hill Co., J. Whitcomb Riley. 100 any other color, Weber & Sons, Torador. Chicago Carnation Co. second with Conquest.

Section B—White Enchantress, A. T. Lorch first, A. C. Brown second. White Perfection, Chicago Carnation Co., Wagner Floral Co. Any other white, A. T. Lorch with White Lawson, W. N. Rudd second with Mrs. J. C. Vaughan. Enchantress, Finleyville Floral Co., Wagner Floral Co. Any other flesh pink, Dorner with Pink Delight. Rose Pink Enchantress, Dorner. Winsor, Lorch. Winona, Finleyville Floral Co. E. G. Hill Co. Lawson, Lorch. Afterglow, Hill, A. C. Brown. Any other dark pink, Chicago Car. Co., Aristocrat. Victory, F. R. Pierson Co. Any other scarlet, Chicago Co. A. Carnegie second. Any other crimson, J. D. Cockcroft, Harvard.

Section C—Dorner prizes for Pink Delight to Chicago Carnation Co. and

E. G. Hill Co. Chas. Knopf prize for Mrs. Chas. Knopf to Chicago Carnation Co. Grave prizes for Mayday to E. G. Hill Co. and W. Frank & Sons. Bassett & Washburn prize for O. P. Bassett to Chicago Carnation Co., Wanoka Greenhouse prize for Wanoka to W. A. Rowlands. Wanoka prize for Apple Blossom, ditto. Cockcroft prize for Georgia to Walter Thomas. A. C. Brown prize for Gov. Dineen to Chicago Carnation Co. Eichholz prize for Alvina, ditto.

Section D—The American Carnation Society Medals were awarded as follows: Gold to F. Dorner & Sons Co. for Hoosier Lad, a grand deep scarlet, 3½ inches across; Silver to R. Witterstaetter for President Valentine, a grand salmon pink; Bronze to E. Dailledouze for White House, a superb white.

Section E—The S. A. F. special medals were awarded, silver and bronze respectively, to Cottage Gardens Co. for Mrs. C. W. Ward and Alma Ward.

Section F—Certificates were given to R. Witterstaetter for President Valentine and pink seedling 1407-0; W. W. Coles for Mrs. W. W. Coles; Wanoka Greenhouses for Sultana and Rainbow.

Among the miscellaneous exhibits reported were a grand collection of ten vases of one hundred blooms each from the Pittsburgh Cut Flower Co.; awarded first class certificate. Collection of promising seedlings from Finleyville Floral Co.; Lamborn Floral Co.; honorable mention for collection; F. R. Pierson Co., seedling No. 40, fine deep pink; J. A. Peterson, honorable mention for Begonia Glory of Cincinnati. Cottage Gardens won the sweepstake prize for best vase of 100 blooms with Alma Ward. Baur & Smith got honorable mention for Shasta and May.

NEW YORK TO PITTSBURGH.

Quite a large party left New York on Tuesday evening for the Pittsburgh convention of the American Carnation Society. A special Pullman car engaged by the New York Florists' Club was completely filled. Those having berths in the car were: John Reimels, Woodhaven; J. D. Cockcroft, Northport; F. R. Pierson and nephew, and J. R. Fotheringham, Tarrytown; J. Birnie, West Hoboken; R. T. Brown and M. Matheson, Queens; Peter Beurlein and Chas. Beckman, Elmhurst; J. Warburton, Fall River, Mass.; B. Hammond, Fishkill; M. Bates, Tonawanda; W. Eccles, Oyster Bay; R. G. Wilson, E. Dailledouze and Mrs. Dailledouze and Mrs. Weir, Brooklyn; E. H. Enggren and Mrs. Enggren, Aqueduct; E. J. Taylor and Mrs. Taylor, Greens Farms, Conn.; J. H. Pepper, F. H. Traendly, H. H. Hulse and H. A. Bunyard, New York.

AMERICAN CARNATION SOCIETY. Registrations by Geo. E. Buxton, Nashua, N. H.

Bon Ami—Queen X Lady Bountiful. Pure white; size 3 to 3 1-2 inches. Strong open growth. Stem very stiff, 24 to 30 inches long. Early and continuous bloomer. Seldom splits.

Granite State—Queen X Lady Bountiful. Pure white; size 3 to 3 1-2 inches. Strong upright growth with no surplus grass. Stem 30 to 36 inches. Seldom bursts. Free bloomer.

A. F. J. BAUR, Secretary.

PHILADELPHIA NOTES.

The Joseph Heacock Co. have awarded the contract for their new 55 x 600 ft. house at Roeloff's last Saturday to the Lord and Burnham Co.

Louis Courlas succeeds V. Alexis in the Central Flower shop at 12th and Chestnut streets. The other member of the firm is T. Chochos.

Among the Philadelphia delegates to the carnation convention were: Robert Craig, Chas. E. Meehan, William Swayne, Edward A. Stroud and William Kleinheinz.

Herman Steinmetz has returned to his old location at 61 North Eighth street the 20th and Walnut street venture having been discontinued through partnership complications.

Do not forget club meeting comes Feb. 1st and that the redoubtable Adolph Fahrenwald is the speaker of the evening on the American Rose Society—Its Aims and Objects.

Jno. Welsh Young is a busy man these days with his place at Upsal and the new range at Roslyn. It is a wonder how he finds time to attend to affairs of state so admirably as he does.

Ladies' night at the Florists' Club has been scheduled for Friday, February 4th, 8 p. m. A fine program has been arranged by the committee and an enjoyable evening is assured.

The cyclamen houses of Craig's are a blaze of glory at present, and such a display of bloom in perfect form are worth going a long way to see. Try a dozen or two in your store and see how quick they'll sell.

The business of the late William K. Harris at 55th and Springfield avenue will be carried on as usual without any change in the title, and, as before, under the management of his son, W. K. Harris, and his son-in-law, Mark Mills.

The finest mignonette coming to Philadelphia is being handled by the Leo Niessen Co. We understand it is grown by Ernest Hoechl. It is not extraordinary as to size, although large; but very sweet, well colored, grown cool and keeps its foliage well.

William Crawford's new store (branch of R. Crawford, Jr., 11th and Locust streets), is now fully completed and in fine running order. A splendid roomy store finely appointed at 5210 Market street; a well built conservatory in the rear with plenty of light is a feature.

Jacob Becker at his new place, 49th and Chestnut streets, has now as much available growing space as at his old and new places combined—besides having more compactness—therefore, more easily and economically worked. He still makes a specialty of potted roses and other plants for Easter and spring sales.

The event of the week in retail circles was the opening of the Century Flower shop, No. 2, in West Philadelphia. The location is on 52nd street just above Walnut. The show windows are extensive and finely arranged and the interior decorations in excellent taste—white with gold decorations.

Visitors this week: J. S. Stinson and wife, of the Hollywood Greenhouses, Seattle, Wash.

NEWS OF THE CLUBS AND SOCIETIES

SOUTHAMPTON HORTICULTURAL SOCIETY.

At the annual meeting held Jan. 6, the following officers were elected: President, Wm. F. Halsey; vice-president, U. G. Agar; secretary, Benj. C. Palmer; treasurer, Julius W. King; financial secretary, Frank H. Smith; executive committee, Henry F. Herick, Chas. E. Frankenbach, Walter L. Jagger, Martin McLaughlin.

After the general business of the meeting W. G. Gomersall of Nyack, N. Y., well known among the gardening fraternity, made an interesting short address on general topics. As a final the members partook of an oyster supper.

In December, 1906, nine gardeners met and proposed the organization of a society. Among our people some were pessimistic and predicted failure, as is always the case when a new thing requiring pluck, energy and self-sacrifice presents itself. The result of that little meeting is a well organized society of twenty life and about one hundred and twenty active members. Our expenses, which have been large, have been paid at once when they became due, and our treasurer reports a balance on hand Jan. 20, 1910, of \$688.18. Three interesting exhibitions have been held, increasing in size, beauty, attraction and interest each year, the "horticultural exhibit" being now one of the leading important features of this beautiful summer resort. Although our interested members are not all gardeners, the real working force are gardeners, and there exists among them perfect harmony and unity of action. We all pull together in general aim and end; that is why we exist and why we grow, for we are still growing.

A committee is now at work preparing for an exhibit some time this summer, which we hope will exceed in all points the exhibits of the past. The officers and committees all consist of studious, practical men, who are out to make in every point and particular the Southampton Horticultural Society a booming success.

BENJ. C. PALMER, Sec'y.

NEWPORT HORTICULTURAL SOCIETY.

At a regular meeting of this society held on the evening of January 25th, a new plan for the entertainment and benefit of the society was favorably acted on. This plan as arranged to be tried at the next regular meeting, Feb. 8, is to have five members prepare a paper each on horticultural exhibitions and each one to treat on a separate part of the exhibition. The heading of these five parts and the members to handle them as arranged is as follows: Utility and Mission of a Horticultural Exhibition, by James Robertson; Preparing Exhibits, by John P. Hammond; Staging and Arranging, Bruce Butters; Judging, Richard Gardner; How to Secure Attendance, by John Forbes. A call meeting will be made for that event and as the papers will no doubt be unusually interesting, a lively meeting is fully expected.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The lecture at Horticultural Hall, Boston, on Saturday, January 22, was by Albert D. Taylor, his subject being "A Study of Continental Landscape Gardening." A large audience enjoyed it and pronounced it one of the most interesting presentations of this interesting topic they had ever listened to. Numerous stereopticon views from original photographs taken by Mr. Taylor were shown, many of them being of rare beauty. The lecturer traced the motive, and development of formal gardening in Europe down from the early days of the Christian era and through the mediaeval period to the present time showing why Italian gardens in Italy are harmonious and appropriate and suggesting why they fit so badly into any other setting than the landscape and surroundings in which they had their birth.

A handsome group of orchids, specimen plants of uncommon size and vigor was shown from the greenhouses of J. R. Leeson, Newton. Calanthes, cymbidium, angraecum and cypripediums were included.

NORTH SHORE HORTICULTURAL SOCIETY.

At the regular meeting of the North Shore Horticultural Society, held in Lee's Hall, Manchester, Mass., Jan. 21, Mr. Charles H. Totty gave a talk on Chrysanthemums in his usual entertaining way, covering the subject as only a specialist can. Every phase of American chrysanthemum culture was thoroughly discussed, there being a rousing attendance. This society is now incorporated under the laws of Massachusetts and has a good balance in the treasury. It will hold its usual two flower shows this summer, offering many valuable prizes in the shape of cups and medals to be competed for.

The annual banquet will be held on February 3, when a first-class menu, entertainment and dance will be given those fortunate enough to secure tickets. This affair is looked forward to as one of the best social gatherings of the year, locally; and the demand for tickets is always over the limit available, seating room being rather less than 200.

ALFRED E. PARSONS.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Change in Registration.

S. Cockburn & Sons of Woodlawn, N. Y., make application to have the name of their chrysanthemum, previously registered as Dr. Frederick A. Cook, changed to Mrs. Jane Cochran. Public notice is hereby given of the application and unless objections to the change are received within 30 days from publication of this notice the change will be made.

H. B. DORNER, Secretary.

January 20, 1910.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on the 20th with a good attendance of members. The annual financial report was read and showed a healthy balance in the society's favor. An animated discussion on "bulbs," particularly Roman hyacinths and their eccentricities here, was engaged in by most of those present, startling results being noted by some speakers. J. A. Newsham had two splendid specimen *Cattleya Trianae* on the table and the Metairie Ridge Nursery had a magnificent vase of miscellaneous roses, Ivory and W. R. Smith showing exceptionally well. The cucumber growers and the market men agreed to have samples of their wares on exhibition at next meeting.

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The second annual banquet of this popular organization will be held on Wednesday evening, February 2, 1910, at 7 p. m., at the Hotel Astor, New York City. A good dinner, good music, good speakers and a good time generally are promised those who attend. From past experience we know the promise will be made good. F. L. Atkins, H. C. Steinhoff, Herman Schoelzel and A. L. Miller are the dinner committee. "Nuf sed."

CLUB AND SOCIETY NOTES.

The Bar Harbor (Me.) Horticultural Society listened with much enjoyment last Thursday evening to an address by Mr. E. H. Wilson, on "Plant Collecting in the Heart of China." The lecture was illustrated by a series of stereopticon slides. The hall was crowded to the doors.

The annual meeting of the New London (Conn.) Horticultural Society was held last week at the Buckingham Memorial, Norwich, when the reports of the officers were read and approved, the treasurer's report showing a balance of \$178.31 in the treasury. There are 125 members. Directors for the year were chosen as follows: Thomas W. Head, Rev. Neilson Poe Carey, Otto Ernst, Alfred Flowers, R. R. Willcox, H. F. Parker, F. H. Allen, S. A. Gilbert, Gustav Newman and Michael Shea. The officers were re-elected as follows: President, S. Alpheus Gilbert; vice-presidents, Otto Ernst, Thomas W. Head; secretary and treasurer, F. H. Allen.

At the annual meeting of the New Bedford (Mass.) Horticultural Society on January 11, Frank C. Barrows was elected president and John P. Rooney, vice-president. The election of secretary was postponed until a later date. The present incumbent, Joseph C. Forbes, who has served as secretary for the past seven years and has been one of the greatest factors in the society's work, wishes to resign. The society endorsed the work accomplished by the City Mission garden and improvement contest last year, and will aid in furthering a similar movement this year if it can be carried out throughout the city.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Potting Carnations.

Carnations, whether old or new varieties, should be left in long enough to have a good bunch of roots formed before they are potted. When the root-lets are one-half to three-fourths of an inch in length they should be potted without delay as the sand contains no nutritive properties to speak of. The growth that they will make after sufficient roots have been made is of a weak nature and low in vitality. Soil suitable for potting should be fresh, that has been exposed to the weather. If very heavy lighten it up with a little sand and some old rotten manure. Screen it through a half-inch mesh, and the soil should be made moist if too dry. It should be so that it will press together well when potting, but should not be too wet. As deep potting tends to rot the stem, put the root crown only about a half-inch below the surface of the soil, just deep enough to hold the plant upright. Press the soil firmly and see that the pots are not too full, but leave a little loose soil on the top to prevent baking. If the soil is in the proper state, watering so as to fill the pots once should be enough. An hour or two after watering knock one of the pots out and see whether it has been wet to the bottom. If not, then immediately water again. After that give water only when needed to keep the soil fairly moist, not wet. Select a bench where the plants will have plenty of ventilation and a full exposure to the sun and place the pots on ashes or some other suitable material to maintain good drainage. Shade them from

the sun for a few days, and after the third day shade a little later in the morning and remove a little earlier in the afternoon. By the end of a week they can have full sun all day. During bright weather the young stock should be carefully tended as regards watering, syringing and ventilation.

Grafting Roses.

It is after the stock has been placed in the grafting case that the principal work pertaining to success begins. Practically the case should be air tight and piped so that a minimum of 80 degrees can be maintained. The sand or ashes in the grafting case must be thoroughly saturated and see that the pots are medium moist. Sprinkle the plants with a very fine spray overhead, and close the case immediately afterwards. In ordinary cases they will require no more spraying for five or six days; neither will they need any ventilation. When the callus has formed—which will be in about five days—they will require a little ventilation; but this should be administered with great care. Have a strict lookout and don't put on too much air at once. By carefully studying the conditions and gradually increasing the amount of air from day to day, in about twenty-five or thirty days the sashes can be entirely removed. In about a month the roses can be removed to the bench. Here they will require extra care in watering, ventilation, syringing and especially in shading for a week in order to make success complete. When the bark begins to swell examine the tying material to see it does not cut into the scion; and remove any suckers that chance to make their appearance.

Shrubs for Easter.

Pot-grown shrubs will be much more satisfactory to force than nursery-grown stock that has been potted up. Plants named in this list such as Azalea mollis, Amygdalus flora rubra, Deutzia gracilis and D. Lemoinei, lilacs, Cydonia japonica, Spiraea Van Houttei, weigelas, magnolias and rhododendrons should be placed in a moderately warm house to start their growth. It is always best to force all these in the early rather than the late stages of growth. From fifty-five to sixty degrees at night now, with a cooler temperature when the flowers come out, should be given. But every grower will have to use his own judgment as to more or less heat, as the occasion seems to demand, as the weeks progress. Magnolias, spiraeas, and weigelas, as a rule, will take a little longer time than the other varieties to develop.

Hybrid Perpetual Roses.

These should have been started by the first week in January as the Easter date is very early this year. When Easter arrives later, and on the approach of the natural flowering time of hybrid perpetual roses, the less time it will take for them to show their bloom. With the most important floral date falling early this year, more time must be allowed in order to have them in perfection by Easter week. It is better not to prune, say for ten days or until the buds break; you can then tell better how and where to cut off the canes so as not to have a leggy and scant appearance. If the stems are left too long, they will not break evenly all over; and if pruned too low you are very apt to leave eyes that

are blind. There will not be as much trouble to hold things back this year as there will be to have them come in on the proper time. Roses forced are all benefited by being held for a week in a lower temperature, as it gives stability to the plant and bloom. Give them a temperature of 55 to 60 degrees from this date on, syringing the plants on all bright days so as to encourage healthy growth. Watch out for mildew and green-fly, and if needed apply the proper remedies.

Bulbs.

Where a quantity of bulbs are required, keep up the supply by placing in heat at least once a week a batch of the various kinds. From now on there will be no trouble about the lack of stem as we are getting more sunshine now. Narcissi, hyacinths and tulips grown in pans for store or retail trade should not be drawn up so much now, as they ought to be as stocky as possible.

The Renovation of Palms.

The present time, before the spring rush is on, is a good time to look over your palms; some of them will need sponging and much can be accomplished in a week. If the plants are badly infested with scale, use some fir tree oil in the water, avoid sponging the young and soft leaves with it and always be careful to syringe all the plants over with clear water. See that the pots are clean; it makes them look more valuable. Take time to carry out the necessary renovation of the various palms; it will pay for the time spent. It is a good time now to shift or pot any palms that require it. Those that do not need potting should have as much of the surface soil removed as possible, although care must be taken not to injure the roots. Avoid big shifts. Just allow space for a little fresh loam around the old ball. Pot the soil in firmly and leave a liberal space for water. A good compost for palms is one of well-rotted cow manure to five of good fibrous loam. With the lengthening days and stronger sun, growth will start into its full energy.

Foliage Plants.

Crotons, dracaenas, dieffenbachias, Ficus elastica, and other fine foliage plants will all root readily now if a good steady bottom heat is at command. There is never an over-supply of aspidistras. See that some are divided and potted up and place in a warm house till they get a start. No other foliage plant will stand the same amount of abuse without showing it.

APHINE MFG. CO., Madison, N. J.

Dear Sirs:—Having just made comparative tests between Aphine and fumigation for our own information and benefit, we think you will be interested in the results.

For green fly on our rose plants we used Aphine as directed, 1 to 40, applying with an auto spray; choosing sunny days, and using a fine spray. We carefully sprayed the plants early in the morning. In a few minutes the fly began to drop and later when we syringed with the hose we found the plants well rid of fly. In addition we found no discolored buds as in fumigating, but what attracted our attention, the foliage seemed to be improved and invigorated.

From a financial standpoint it costs us \$3 and \$4 to fumigate 2000 lineal feet of rose houses each time, whereas we would use only a half gallon of Aphine for the same purpose.

The results has shown us that Aphine is higher in efficiency and lower in cost than fumigation.

Yours very truly,

A. H. & W. S. SCHULTZ.

The manufacturers of Aphine guarantee a uniform product at all times, and, (if used strictly according to directions), that it will do all that is claimed for it AND MORE.

\$2.50 Per Gallon.

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Piersoni, Whitmani, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity.

ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery February 1st, applies to
BOTH varieties.

NEWS NOTES.

Rowayton, Conn.—Geo. G. Morris, formerly of Windsor, will start in business here as florist and landscape gardener.

Mitchell, S. D.—The office of the Dakota Improvement Seed Co. has

been moved to the Commercial and Savings Bank Bldg.

Glenview, Ill.—Chas. A. Palmgren, formerly superintendent of the Swain, Nelson & Co. nursery, will start in business here this spring as Palmgren Nurseries.

MARTIAL BREMOND

Martial Bremond of Ollioules, France, is the largest grower of strictly first class French bulbs in existence. His clientele is composed of the most critical buyers all over the world. They are men who have bought Bremond products for many years, and know the value of his bulbs. Horse-shoe Brand Products in French bulbs are "Bremonds" and which means that they are the best the market affords, in the various sizes offered.

Seed Trade

Lawns and the Mail Order Trade.

A clever feature of the Henderson catalogue this year is a colored plate of a lawn scene emphasizing the virtues of the finer grasses. Very few of the good houses give the proper featuring to this important and lucrative department of the seed business. Henderson sets the pace so far, with a number of pages for golf, croquet, cricket, tennis, polo, and other needed formulas. A good word must be said also for Batchelor of Utica in this connection, and the Livingston Seed Co. of Columbus. There seems to be a good field here for the genius of a Burpee. If Burpee once gets started on the subject big results along that line will be apt to wake up the general trade as well as the general public. Of course, the bulkiness of lawn grasses proportionate to cost is the great deterrent with mail order houses in handling this line, but the increasing express and freight business they have been doing of late years shows them the way out, and we look for some new development in the near future. There is money in it. The public need to be educated up to quality here more than in any other feature of our business. Wayne MacVeagh paid Henderson seven dollars a bushel for lawn grass and bragged about results all along the main line. Ask anybody who's got the trade in that locality now. Yet Dreer and others were offering a first-class mixture at five dollars, and the writer believes equally as good as the seven dollar. In fact, it is no secret that the firms mentioned have often seriously considered whether they would not sell as much at seven as five. This point is especially worth considering in this year of short grass seed crops and high prices.

Selected for the Seedmen's Eye.

Among the resolutions adopted by the Farmers' Institute at Tiro are the following:

Resolved, That we recommend the amending of our bird laws so as to place the quail among the list of song birds.

Resolved, That we favor the enactment of a pure seed law.—Mansfield (Ohio) Shield.

Alleging that the Iowa Seed Company sold him one kind of clover seed when he ordered another, A. A. Gell brought suit against the company for \$1,175, claiming that amount as damages. Trial of the suit was begun recently before Judge McHenry in the law division of the district court.

Geil claims that he purchased \$175 worth of what he thought was medium red clover seed. He planted it in a ten-acre field on his farm, but instead of the variety he desired he alleges that the seed produced an entirely different sort of clover, one he claims is absolutely worthless. He claims the loss of the crop and ground and his labor in planting the seed has damaged him to the extent of \$1,175.—Des Moines (Iowa) Tribune.

According to allegations made in the

district court recently, Thomas Willett has no grounds for suing James S. Michael. The case came up when Willett purchased two pounds of White Plume celery seed from Michael, and after sowing it found that it was not an early variety, as he wanted and asked for, but was of a very late variety, and came up so late that he was unable to realize any money from the crop. Willett alleged he had been damaged to the extent of \$1,500. Michael, in defending himself, said when Willett purchased the seed he had the privilege of making any examination he wished, and that it is a custom of seed men not to feel any responsibility for selling goods under these circumstances.—Sioux City (Iowa) Journal.

A bill introduced in Albany, N. Y., January 20, by Assemblyman John M. Lupton of Suffolk County, if enacted, will compel produce commission merchants of the state to procure licenses from the State Comptroller and file bonds of \$10,000 each. Mr. Lupton is a seed grower in Mattituck, and his measure is in the interest of the farmers who send garden produce to the cities.

The bond would be required to compel commission merchants to make a true accounting to their consigners of all produce received and sold, and to remit to the consigners full net returns from the sale of all such products within ten days of the sale.—New York Times.

John Thompson, State Commissioner of Agriculture, is making a strenuous effort to improve the agriculture of the state by raising the quality of seed used by the farmers. He is sending a copy of the following letter to all the seed dealers of the state, urging them to comply with the seed laws passed by the last Legislature:

"Gentlemen:—I herewith enclose a copy of the Tennessee Seed Law, and wish to call your special attention to Sections 1-6, 11-12 of this act.

"This law has been in force for a sufficient length of time for every one to be thoroughly familiar with it, and we wish to urge you, and all seed dealers in the State of Tennessee, to comply with this law in every respect.

"With best wishes for your success and prosperity in the New Year, I am, Yours very truly,

"JOHN THOMPSON,
"Commissioner."

The sections of the law to which he calls their attention have special reference to the purity of seeds handled and the penalties for adulteration.—Nashville (Tenn.) American.

Notes.

Adrian, Mich.—W. H. Barrett, the tomato seed grower, has bought a vacant factory building, 60x320 ft. This will be used for curing, cleaning and storing tomato seeds.

San Francisco, Cal.—C. C. Morse & Co. are negotiating for a large tract of land in the vicinity of Haywards, where they are contemplating starting large seed farms.

Nashville, Tenn.—The Nashville Seed Company has recently given their salesroom at 215 Second avenue,

North, a thorough remodeling in preparation for their spring trade.

Chicago, Ill.—The onion seed warehouse of H. H. Chester was recently destroyed by fire, together with about 30,000 bushels of onion sets. They were fully insured and the fire has not interfered with business.

Fremont, Neb.—The Western Seed Co. has considerably enlarged its plant by adding a four-story building, 36x42 ft. This building increases the storage capacity by 20,000 bushels and gives additional space for the sacking. Conveyers have been added as well as another elevator, and a steam heater for heating and drying processes.

MOVEMENTS OF GARDENERS.

Dee Young, formerly of Springfield, is to take charge of the greenhouses of Mrs. George Hansen, Pittsfield, Ill.

Charles Newton, who has been gardener for some time to Mr. I. T. Burden at Newport, R. I., has resigned that position.

CATALOGUE RECEIVED.

Morris & Snow Seed Co., Los Angeles, Cal.—"A Few Hints on Gardening." This catalogue lives up to its name all right. Its descriptions and cultural notes are far in advance of the ordinary catalogue notes and it has an educational value much beyond the average.

CHICAGO NOTES.

The need of well-kept trees in the streets of Chicago was shown to an appreciative audience at the Klio Club Thursday by means of an illustrated lecture by City Forester Prost. Though he modestly disclaims being a public speaker, he keeps his audience thoroughly interested and with his stereopticon leaves no doubt in their minds as to the needs of the city streets.

The Chicago Council took its first step Jan. 24 towards reclaiming the entire water front for the city and park bounds by adopting an order directing the mayor to appoint "reclamation" commission to take the necessary court action to establish the rights of the city to at least 25 acres of made land, valued in the neighborhood of \$20,000 an acre.

The council also gave official endorsement of the project to hold an international municipal congress and exposition in Chicago in the fall of 1911.

The West Park commissioners at their annual meeting voted to raise the salaries of their employees, with the exception of Jens Jensen, who, according to the Tribune, will receive but \$1000, fixed salary, instead of \$2,400, as formerly. He will, however, be allowed extra pay for extra duties.

The executive committee of the Horticultural Society of Chicago will meet Feb. 4 at 2 p. m. at the Art Institute.

Among the Chicago florists who left for Pittsburgh with J. A. Valentine and Emil Glauber of Denver are C. L. Washburn, W. N. Rudd, C. C. Cropp, M. Barker, Geo. Asmus, N. J. Rupp, P. J. Foley, A. T. Pyfer, F. Lautenschlager, P. Olsen, Nic. Zweifel, W. C. Johnson, A. Poehlmann, E. C. Pruner.

Personal.

D. D. Johnson, of the Evergreen Brand Fertilizers, has returned from a trip to Ohio and leaves for Michigan in the interest of the business. D. D. Johnson states that a reasonably-sized package of the Evergreen Brand Fertilizer will be sent free to any State Experiment Station, provided the application is made direct by the official in charge of the station.

Adam Graham, Cleveland, Ohio, was in the city and expects to leave for Japan soon to take a well-earned vacation.

Robt. W. Leonard, traveling salesman for the Leonard Seed Co., of which his father is president, was married January 18 to Miss Allita Hotchkiss.

Visitors—C. B. Knickman, representing McHutchison & Co., New York; C. W. Scott, New York; Martin Reukauf, representing Bayersdorfer, Philadelphia; J. A. Valentine and Emil Glauber, of Denver, Col., en route for Pittsburgh; F. Dorner, Lafayette, Ind.; J. W. Steiner, with R. R. Davis & Co., Morrison, Ill. Mr. Steiner says the coal situation has been a serious one with them. One range of houses, containing about 40,000 square feet, devoted to the raising of cucumbers, was frozen because they could not get coal. The greater part of the crop had been harvested, but the range is left empty and therefore unproductive.

Battle Creek, Mich.—Messrs. Burt & Coggan will open a store at 11 West Main street in this city. This is in addition to their greenhouse on South avenue. The new store will be used as the firm's headquarters. They have nine greenhouses with a total of about 30,000 feet of glass.

The Dayton (Ohio) Florists' Club met last week at the home of J. F. Young. Plans for the contemplated flower show were discussed. A committee was appointed to arrange for a banquet to take place in February.

Flower Market Reports

BOSTON This market is well supplied with everything, excepting only American Beauty roses, which are in their usual scarcity at this time of the year. All other varieties of roses are abundant and of high average quality. The spring-like weather we have enjoyed during the past few days has hastened the daffodil and tulip flowers along and prices on violets, as well as daffodils, are weakening. Conditions have been favorable for good carnations. There are evidences, however, that the supply is slackening and it is expected that the special call for use on McKinley Day will clean up the local stock in good shape. Orchids are quite generally seen in the flower windows, cypripediums, cattleyas and dendrobiums predominating.

CHICAGO Even the most optimistic cannot see evidence of any great increase in business over that of last week, which we were obliged to report as somewhat dull. Now, as then, funerals supply the bulk of trade. All kinds of flowers are scarce enough to keep prices up and green stuff is also bringing good figures. The scarcity of white roses is particularly felt. Among the retailers is marked the frequency with which they report the increase of sales of orchids which are constantly gaining in popularity here. There is unusual demand also for lily of the valley this week.

INDIANAPOLIS No sunshine for fully three weeks, consequently stock has shortened up considerably, and this past week quite a difficulty was experienced in securing stock, especially of roses. It is impossible to secure enough to fill orders. These conditions in one way are beneficial as better prices are obtained by the growers. Among the retailers satisfactory reports are received from all quarters. Spring flowers are very much in demand. A steady demand is noticed on peas, lilac, lily of the valley and orchids. Greenery of all kinds is moving well and good prices are obtained.

NEW ORLEANS The month of January has been a good one here. The New Year's Day trade was exceptionally large many stores reporting an increase over Christmas week in cut flowers; and since then the whole trade has been kept busy. The town is well filled with visitors for the Mardi Gras festival and there are fetes galore for their entertainment. The old Bridesmaid is still the favorite pink rose here. My Maryland is too uncertain in color and Killarney is too single for this warm climate. Cattleya Trianae is about over, but C. Schroderae and Mossiae are still to come and there is a fine batch of Oncidium splendidum in sight from local growers. Hudson River violets are coming here direct and arrive in good shape and meet a quick sale. Lily of the valley and callas are good stock.

(Reports continued on page 105)

The Hose Question

Isn't it about time you were thinking of getting some new lengths of Hose to replace those old ones that have been patched and mended so often that your men are losing patience? Besides that—think of the time and labor cost trying to keep them in working order?

The P/M Brand

other make at the price. Quality guaranteed. 25 and 50 ft. lengths. 16c. per ft., couplings included.

The Bull Dog Brand

Next to the P/M this well-known make is in great favor with florists, 15c. per ft., couplings included.

The 30c. Hose

This may sound an extravagance to many and yet we are told by some of our customers that it is even more economical in the long run than anything lower priced. 30c. per ft., couplings included. All hose sold by us is guaranteed.

Ribbons and Supplies

Note this well as to our ribbons: Every florist using them feels that he has the latest and choicest the world affords, and that his work has that exclusiveness and individuality about it not obtainable in using inferior makes. We also have the finest line in florists' fancy pins and all kinds of supplies.

Flower Market Reports.

(Continued from page 163)

There was a PHILADELPHIA shortage in supplies last week on most items with the exception of bulbous stock and other miscellaneous items. Roses, particularly, were in short supply, and there was very little surplus to clear out to the street trade—as is usual on Fridays and Saturdays. The improvement reported last week kept up on nearly all lines with a distinct hardening in prices. The transient trade is much better, and the milder weather has stimulated outdoor wear in many things—especially in violets, which are now much more plentiful and selling well. While carnations have been rather plentiful the indications point to a shortening up of supplies in the near future, and better prices are looked for. The price of gardenias has not advanced any, notwithstanding the smaller crops, but the clean-up has been better so that average returns will be improved. Cattleyas are more plentiful and easier. Still a few cypripediums are in evidence and selling well. Spring flowers such as daffodils, lilac, daisies, mignonette are having a good run—for their own sake and also in part from the shortage in roses. Tulips have made their appearance. Mostly whites and yellows so far. Some very fine freesia is to be seen around, and also splendid mignonette and paper white narcissus in spots. While ordinary mignonette is quoted at 3 to 4, there is some extra quality bringing 6. An exception over regular market rates is also to be noted on Killarney and Maryland roses—a few exceptional lots bringing 25c. Pussy willows are in good demand for giving a rakish touch to a spring bunch.

Detroit reports that roses are very scarce at present, giving the grower the advantage of cleaning up daily at a good figure, with the retailer hustling for a fair profit on what little he sells.

The flower market of late has been very good at Twin Cities, Minn. On account of much cloudy weather in December and this month violets are rather scarce. Carnations are soft and almost everything in cut flowers is lacking in quality.

A GREAT NURSERY.

The Harrison Nurseries at Berlin, Md., which cover more than 2,000 acres and require the constant services of over one hundred men, with twenty-five or more teams of horses and mules, is doubtless the largest of its kind in the country, and the excellent system of handling the work carried on under the direction of Mr. Orlando Harrison, makes it also one of the best managed. The utmost care has for years been exercised to assure the production of trees and plants absolutely true to name and variety; and no visitor, though he may hail from the remotest section of "Missouri" and may, therefore, be receptively open to "showing," can go away from the Harrison plant doubting that the methods employed there do assure "true-named" stock.

Practically all of the stock sold from this nursery is grown there—this excepts, of course, such material as apple seedlings, imported evergreens, etc. This familiarity with their products from the start gives the employes of Harrison's Nurseries an intimate knowledge of every variety of tree and plant produced there. Hundreds of dollars are expended each year in the maintenance of experimental or test plots. The various fruits—peach, apple, cherry, pear, etc.—are planted here, "tried out" and watched and the results determine whether or not the variety in question shall be retained and offered for sale.

Visitors are always welcome at Harrison's Nurseries, and the great pains taken by the management to make the stay a pleasant one for all is the source of many a pleasant recollection to those who have stopped at Berlin. The Pennsylvania Railroad offers very good service in all directions; Philadelphia and Baltimore are each but a few hours' ride. The latter city is reached via steamer on Chesapeake Bay, which delightful little voyage adds greatly to the pleasure of the trip.

During Recess

Astoria Florists' Bowling Club.

The Astoria (N. Y.) Florists' Bowling Club gave a ladies' night Tuesday evening, January 25th, 1910. Thirty-six attended and all had an enjoyable time. The Florists' Bowling Club provided prizes to be competed for by the ladies and in turn the Ladies' Bowling Club, which is composed of the wives of the members of the Florists' Bowling Club, provided six prizes to be competed for by the gentlemen. Each lady received a prize. William H. Siebrecht, Sr., received the prize for the greatest number of strikes; John Miesem for lowest score in the first game; Herman H. Lorenz for making nearest to 77 in any frame; John Donaldson, for the greatest number of spares; John Boese for the lowest score in the second game; Philip Einsman for making nearest to 95 in any frame.

The ladies club bowls Tuesday afternoons and the gentlemen's club bowls in the evening. On this occasion the ladies remained in the building and the gentlemen joined them for supper. During the supper ex-captain John Miesem was presented with a token of the high esteem in which he is held by the club and in recognition of his services as captain. All had a very enjoyable time.

This is the second year of the existence of the Astoria Florists' Bowling Club, and it is certain that they will have a prize winning team at Rochester this year.

WILLIAM H. SIEBRECHT, JR.

Nassau County Horticultural Society

The annual banquet of this society took place at Glen Cove on Tuesday evening, January 25. The attendance numbered sixty among whom were C. H. Totty and W. Duckham from Madison, N. J., and Messrs. Boddington, Rickards, Burnett, Sperling and Maynard from New York, with a number of other representatives from sister societies. J. Austin Shaw made an excellent toastmaster. The tables were beautifully decorated, the banquet was fine, the music exhilarating and the responses full of wit and eloquence. The formal banquet closed at 10 p. m., but the majority remained for the real festivity which lasted until after midnight. Messrs. Totty, Boddington and Burnett made substantial donations to the society.

Dobbs Ferry Horticultural Society.

The members of the Dobbs Ferry Horticultural Society gave a very delightful dinner at J. Preusse's hall on Main street, Dobbs Ferry, N. Y., on last Wednesday evening. The tables were beautifully decorated with flowers brought by the different gardeners, and the dinner was served in a first-class manner. After dinner Joseph Dunbar acted as toastmaster. The speakers all made interesting addresses and were heartily applauded.

The officers of the Society are Thomas Lee, president; H. Kastberg, secretary and Claude Wilson, treasurer.

Albany Florists' Club.

Members and guests of the Albany Florists' Club enjoyed the annual banquet at the New Kenmore, on the even-

ing of January 13. Patrick Hyde, chairman of the banquet committee, served as toastmaster. Those who responded to toasts were: President Frederick A. Goldring, Fred A. Danker, James H. Danker, Rhinebeck; Eli D. Burke, J. D. Sambrook, Troy; George King, John J. Berberick, Frank M. Briare, Frederick Henkes and several of the invited guests and trade representatives from out of the city.

CLUB AND SOCIETY NOTES.

The annual dinner of the Nassau County Horticultural Society will take place at the Oriental Hotel, Glen Cove, N. Y., on Tuesday evening, January 25.

Prof. E. A. White of the Massachusetts Agricultural College delivered an address on "Ornamental Gardens" before the Worcester County Horticultural Society on January 18.

Lenox, Mass.—The capacity of the town hall was taxed on the evening of Jan. 24, when the annual ball of the Lenox Horticultural Society was held. The hall was decorated with palms, potted plants and cut flowers from the villa greenhouses and presented a very attractive appearance. Escher's orchestra from Pittsfield furnished music for the dancing, and a buffet lunch was served by Caterer McDermott. Many guests were present from Pittsfield, Dalton, Lee and other surrounding places, and special cars were provided to take them home after the ball.

AN INTERESTING LETTER FROM THE SUNNY SOUTH.

Have taken eleven subscriptions among the trade here recently, and will soon have some more. Horticulture has twice as many now, in this locality, as any other trade paper. We use perennial Ryegrass here as a winter grass, and have to depend on the sets of Bermuda for summer—as that is the only grass that seems to stand the climate here. Your Philadelphia representative, George C. Watson, recommended Bermuda and Texas Blue for this part of the world twenty years ago, and time has amply vindicated him. L. R.

FIRE RECORD.

Islip, L. I.—The greenhouse on the estate of Schuyler L. Parsons was totally destroyed by fire on the morning of Jan. 20. The loss is upwards of \$1,000.

Mansfield, O.—Fire recently damaged one of the Stuhldreher greenhouses and contents to the amount of about \$1500. The greenhouses are owned by Geo. and Leo Stuhldreher. There was no insurance on the property. Work will be started at once to rebuild.

St. Louis, Mo.—W. H. Kruse at 2846 Arsenal St. met with quite a loss by fire recently. His loss was nearly \$800, partly covered by insurance. The greenhouses, however, were not damaged. These latter are three in number, with a total of about 30,000 ft. of glass.

Everett, Mass.—A report recently circulated that the boiler house connected with the Woodlawn Cemetery greenhouse was destroyed by fire caused by an overheated boiler, is incorrect. There has been no fire at the Woodlawn Cemetery greenhouse or any of the other buildings.

HELP WANTED

WANTED—March 15th, a Nurseryman of experience in packing and grading, and also a herbaceous man. Chas. R. Fish & Co., Worcester, Mass.

SITUATIONS WANTED

WANTED—A position under a good gardener in a private establishment by a respectable young man, aged 23 years, five years' first class experience. Address T. A. H., 17 Everett St., Wellesley, Mass.

WANTED position with reliable seed firm, by young man with experience in the growing as well as the retail branches of the seed business. Seeds, care HORTICULTURE.

FOR SALE

FLORIST PLACE FOR SALE—Fully equipped and in good running; half way between New York and Boston, in town of 7000, with 7 or 8 small surrounding places to cater to. Good retail business, cut flowers, plants and designing. Excellent place for wholesale trade, having A1 shipping facilities. Place consists of 8½ acres of land, fine 8-room dwelling house, steam heated, practically new; barn with carriage shed and outbuildings, hen houses, etc.; greenhouses and large pottery shed, 2500 ft. and 1000 ft. glass respectively, heated by one large hot water boiler; new boiler already set up for another greenhouse which is needed to supply local demand. Own unlimited water supply with newly built pump house and pump; costs nothing but the pumping. Place started and built four years ago. Large Protestant cemetery 3 min. walk, with new Catholic cemetery being laid out within view of this place. Store down town sells plants and flowers all the year round. Reason for selling: have other business taking all my time when the florist is bustling. Will assist buyer in every way. This is a real business proposition and worth looking into. Price \$7000. Address W. S., care HORTICULTURE.

FOR SALE—Greenhouse property, with stock and all; 12,000 sq. ft. glass, 13-room house, 1 5-room house with all improvements; a nice big store front; good retail trade; established 15 years; acre of ground, with lot on main street. 7710 Lorain Ave., Cleveland Ohio.

GREENHOUSE FOR SALE—In Bridgewater, built in 1907, size 30x100, with greenhouse attached. Kroeschell hot-water heater. One-half acre land and adjoining land can be bought. Would sell house for removal. A. H. Hobart, Bridgewater, Mass.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write LARSHELSKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

burg has received the mate to his 5x6 tubular boiler, which he intends to install in the spring as a reserve.

Winchester, Mass.—The greenhouses of the late George Milne are to be conducted by his wife.

Cleveland, O.—A greenhouse owned by Fred C. Witthuhn, 3598 W. 25th St., was wrecked shortly before midnight Sunday night, Jan. 16, and broken glass was scattered for a quarter of a mile by the explosion of a boiler. The boiler room, in which the heating plant of the greenhouse was located, was blown to atoms, while great furrows were ploughed in the ground for several yards in every direction. Buildings blocks away were rocked by the explosion, which was heard for three miles. The explosion, according to the fire department, was due to a lack of water in the boiler. A slight blaze was started in the hothouse by the coals from the firebox of the boiler. It was extinguished with little trouble. The boiler was cast iron, sectional type, and was moved about 5 feet from its original position. No one was injured.

Obituary.

John J. Kuratle.

John J. Kuratle, one of the best known florists in Delaware, died at his home in Wilmington on January 14, aged 51 years. Death was caused by a cancer.

Richard Shannon.

Richard Shannon, long a prominent florist of Greene avenue, and of Parkway avenue, died at his home, 172a Clifton place, Sunday, January 16. He was born in Ireland in 1837, and had been a resident of Brooklyn for nearly fifty years. He leaves a widow and six children.

John Keefe.

John Keefe, for many years a well-known gardener at Newton Centre, Mass., died at his home on Middle street last Saturday afternoon. He was 62 years of age, having been a resident of this place many years. Funeral services were held at the Church of Our Lady Monday morning. The interment was at Calvary.

John P. Burn.

John Pugh Burn, aged 49 years, a well-known member of the firm of Meehan's Sons, florists, of Germantown, Pa., died on January 14, of acute indigestion while riding on a train near Columbia, S. C. On the train with Mr. Burn were his wife, son and daughter and Boyd Lanning, a friend. Mr. Burn was destined for Melbourne, S. C., where he owned property. A physician on the train was summoned, but Mr. Burn died before he could be taken to a hospital, having burst a blood-vessel. He was a son-in-law of Thomas Meehan and resided at Chew and Phil-Ellena streets, Germantown.

NEWS NOTES.

Eastport, Me.—George E. Ray will act as local agent for the Mitchell Company, florists, Waterville.

Marysville, Cal.—J. W. Evans, Jr., has leased the Karr property on F street for a term of years. Mr. Evans will use it for nursery and greenhouse purposes.

Somersworth, N. H.—G. S. Rams-

**Insure Yourself Maximum Crops of Excellent
Quality by Feeding and Nourishing
Your Plants with**

Evergreen Brand Fertilizer

Specially manufactured for growing Flowers, Ferns, Palms, etc.

Its recommendation is based upon careful, extended and disinterested experiments, showing that this material is a nourishing, easily, available food for crops.

It consists of about half Animal matter and half Minerals, treated and refined, thus it is free from all deleterious substances and will not burn or injure the most delicate plant root, unless an extraordinary amount is applied at the same time.

It is immediately available, and its effect upon most crops may be noticed within six days after its application.

It prevents the onslaughts of plant diseases or insect pests.

It will greatly benefit all greenhouse crops; notwithstanding the richness of the prepared soil, since it furnishes all the Plant Food elements in available forms and sufficient quantities to meet the needs of the plants,

It should receive careful attention, because its right use, permits not only an economical utilization by the plant but a control of its growth; it may be used in such a way as to change the natural tendency, and thus improve it for specific uses; thus, in addition to the increase in yield which it produces, it enhances its market value.

Its uniform action seems to be to stimulate the capacity of the plant for absorbing water and developing foliage and stem growth, and to bring out numbers of new shoots, hence roses and other flowering plants, the best results are secured when this fertilizer is applied during the early growing period, as the energies of the plant are immediately concentrated upon developing its growth.

Can be used at any time during the growing season, Dry or in Solution.

Put up in 12 pound cans, Price \$2.00.

THE APHINE TEST.

This newest and best recommended of the insecticides for florists' use was given a public test as to its efficiency in the Boston Flower Market last Saturday. Mr. M. C. Ebel, accompanied by R. M. Schultz, came on from New York prepared to demonstrate any quality claimed for the compound and were met by an interested audience all on the alert to learn the inside facts on this all-important topic. The demonstration was more than satisfactory and, so far as we can learn, the new insecticide has already taken a firm hold on the convictions of the gardening and floral fraternity of Boston. Messrs. Ebel and Schultz were joined on Saturday evening by their fellow-townsmen Chas. H. Totty, who had been in Manchester, Mass., delivering a lecture. The midnight train for New York bore three well-pleased Madisonians.

There will be a public test of Aphine in Philadelphia on February 12. Details later.

"Never A Kick In 22 Years"

Is what George Schuneman, the Long Island florist, who grows twelve-foot Sweet Peas, says about the heating that Hitchings & Co. have given him.

He is now using two of our largest Sectional Boilers connected in battery. He coals up once in twenty-four hours; uses only half draft and regulates them solely by smoke box damper.

You know that an unvarying temperature is absolutely necessary for sweet peas, or the buds drop off—the Hitchings Boilers have never gone back on him.

Hitchings & Company

Elizabeth, N.J.

Another Greenhouse and Garage

This time it is one of our every way practical, Curved Eave houses, about 33 feet long and 18 feet wide. Small, but just what the owner wanted for his practical needs and location.

The work room is entered through the garage. The entire combination is heated by the one boiler. It is an up-to-date greenhouse, up-to-dately located.

Although this greenhouse might be classed in the "runabout" size—we have turned out some "big six cylinder, 100 horse power" ones, like J. B. Duke's Curved Eave range for instance, with its twenty-five compartments.

Now that we are talking about Curved Eave houses, what do you know about our way of building them? If you think of building, it is rather important that you should know. Write us.

TEMPERATURE ALARMS

Damage to greenhouse stock by too high or too low temperature can be absolutely prevented by the use of a good temperature alarm.

With such a device when the temperature rises or falls above or below a predetermined point a bell rings in any desired place about the premises.

Thermostatic Electric Alarm.

Our Thermostatic Electric Alarm has a field of regulation between 30° and 120° and can be set at any point between these two. Its accuracy is **guaranteed** and, as it is constructed of the best materials and has no complicated parts, it will last practically a life time.

Style A is cast in aluminum and is 8 inches high, 4 inches wide, 2 inches deep and is highly finished.

Differential Temperature Alarm.

This device will insure absolute prevention against too high or too low temperature. It has a range of regulation between 20° and 110° Fahrenheit and can be set to ring a bell anywhere about the premises when the temperature goes above or below a designated point. Its sensitiveness and accuracy we **guarantee**, as it is made of the best materials obtainable, and contains no complicated parts. The care in manufacturing, the design used, and the materials employed enable us to make a temperature alarm unequalled by any similar device.

Temperature Alarm Number 2.

For ringing an alarm only when the temperature goes too low, our Temperature Alarm No. 2 is best adapted. This device is connected with an electric bell and battery and will sound an alarm anywhere about the premises when the temperature falls below a previously determined point. It registers from 20° to 120° and the pointer can be set at any figure between these two. When so set it is **guaranteed** to give the alarm. The casing is made of sheet aluminum, size 4 inches diameter by 1½ inches high.

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of Elegantissima has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Piersoni, Whitmani, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pots, \$12.00 per dozen.

DAHLIAS Every Day in the Year

Plant Novelties From China

The outstanding feature of the Chinese flora is its remarkable richness in ornamental trees and shrubs suitable for cultivation in the gardens of temperate lands. No other flora is anything like as rich in this respect. The climate of China is continental in character, and in the central and western parts above 4,000 ft. altitude, approximates very closely to what obtains here in New England. These parts of China are extremely mountainous, in fact they are nothing but vast seas of mountains—range upon range, separated by narrow valleys, and increasing in altitude westward until they culminate in the perpetual snows of the Chino-Thibetan borderland. The average rain-fall is about 40 inches and the snow lays on the ground from late November until early April. The most marked difference between the two climates is perhaps the more constant nature of the snow-fall in western China and less changeable weather generally in winter.

Various causes, chiefly, however, the clearing of land for agricultural purposes and the general absence of coal-mining in the past, have led to the almost entire deforestation of China except in the wildest and most inaccessible parts. But so suitable is the climate for the growth of ligneous vegetation that clearings neglected for a little time speedily become dense thickets composed of miscellaneous shrubs and small trees. The steep, uncultivable cliffs, etc., are clothed with similar vegetation. It is in these thickets that the astonishing rich variety of shrubs is found. The question of the hardiness of these new Chinese trees and shrubs is one of supreme importance to prospective cultivators in this country and the solution lies in actual experiment. In England these plants have proved, almost without exception, perfectly hardy. Now as a general rule deciduous trees and shrubs thrive better in this neighborhood than across the water. For example, *Cercidophyllum japonicum*, *Dirca palustris* and *Symplocos crataegoides* are perfectly hardy in the Arnold Arboretum whereas in England they are regarded as tender. Analogy therefore suggests that the majority of these new deciduous trees and shrubs will prove hardy, suitable and amenable to cultivation hereabouts. As every cultivator knows much can be done in the selecting of different positions, etc., towards making plants hardy, and also that a large class of plants which whilst tender in their juvenile stage are perfectly hardy once above the "frost-line" and with decent sized wood on them resist the severest of winters with immunity.

The three great families to which belong the great majority of our hardy, deciduous, flowering shrubs are the Rose family, Saxifrage and Honeysuckle families. The first-named includes beside Roses all the *Prunus* and *Pyrus* (in the broadest sense), *Rubus*, *Cotoneaster*, *Spiraea*, etc., etc. The second includes the *Deutzias*, *Philadelphus*, *Hydrangeas*, *Ribes*, etc.; the third the *Viburnums*, *Diervillas* and *Loniceras*. In China all the large genera in these families run riot in number of species and so many are new and undescribed that it is impossible to discuss them satisfactorily. Further, so great is the number in every instance that to deal with them in even the briefest detail in these articles is absolutely out of the question. The "Alfred Rehder" series of articles have already given some idea of the wealth of these different genera and later it is to be hoped that the same writer will deal with the individual merits of these new species as they make themselves known in the Arnold Arboretum. The members of these familiar groups are all worth growing, all are good but some are better than others. The mass of raw material belonging

COTONEASTER DIELSIANA
As Cultivated by Messrs. Veitch.

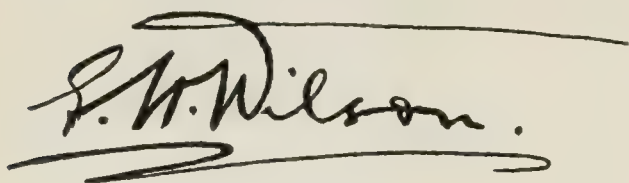

to the above and other prominent families in cultivation in the Arnold Arboretum as the result of its recent enterprise in China is phenomenal and is calculated to in a measure alter the whole aspect of shrubberies in the parks and gardens of the Atlantic coast of the country. The writer's time and space is exceedingly limited and all he can do at the moment is to mention an odd plant of proven merit here and there and leave the rest for time to prove and others to expatiate upon.

In China probably a couple of dozen or more *Spiraeas* occur. Of these *S. Thunbergii* and *S. japonica* are well-known and esteemed old friends. Three novelties of proven merit and possibly superior as hardy shrubs to any member of the family previously in cultivation are *Spiraea Henryi*, *S. Veitchii* and *S. Wilsoni*. This trio agree in having flat corymbs of white flowers but differ one from another in habit and foliage. The first-named forms a sturdy bush, 3 to 5 ft. tall, with branches straight and spreading and almost leathery leaves, shining above. *S. Veitchii* has erect and slightly arching branches 6 to 8 ft. tall, large corymbs of flowers and neat, ovate, smooth leaves. *S. Wilsoni* has soft, hairy leaves and arching stems 4 to 6 ft. tall. The flat-trusses of flowers are produced from the axils of the leaves along the entire length of the past season's growth and when in flower look like continuous sprays of the purest white, the leaves being almost entirely hidden. In merit it is difficult to decide which is best the writer's opinion inclining towards *S. Veitchii*.

The *Cotoneasters* are favorites with all on account of their ornamental fruits. This family has been aug-

mented considerably by recent introductions. One of these in *Cotoneaster Dielsiana* better known under the appropriate name of *C. applanata*. This new deciduous shrub grows 5 to 6 ft. tall, with slender, whip-like branches horizontally disposed. The leaves are small, ovate, with a grey felt covering the under side. The fruits are rich scarlet, borne severally together in branches from the axil of every leaf and are retained until very late in the year as also is the foliage. The graceful habit and free fruiting properties combined with its rich color places *C. Dielsiana* at the head of its family for beauty and general usefulness.

Another good *Cotoneaster* is *C. moupinense*, a shrub 4 to 10 ft. tall, with comparatively large, wrinkled leaves, arching branches and pendulous trusses of fruits. There are two forms of this plant, one with scarlet and one with black fruits.

More Gladiolus Notes

INADEQUATE LISTING

In looking over several gladiolus lists of American specialists and notably those in the catalogues of seedsmen I note that in many of them the varieties are listed without any regard to the class or type to which they belong. This is confusing to the advanced collector and the purchaser who prefers some particular class or strain, and I think it would be worth while for the catalogue people to give this matter some consideration.

All of the European lists are properly classified and in some instances the originator's name with the various synonyms of the variety are given. For instance, under the list of *Gladiolus gandavensis* will occur, *Reine Blanche* (Barre); synonyms, *Radium*, *White Excelsior*, *Reine d'la Anjou*, etc. Now the intending purchaser will know at once that this is not the same variety by this name offered by one of our American growers, and he will recognize the synonyms when he sees them in other lists.

I purchased last spring of a Holland specialist a few hundred bulbs of *G. Hollandia*, and shortly afterwards, in looking over an English list saw the variety *Mikado*. I was attracted by the similarity of the descriptions of these two varieties so that when I sent my order for bulbs to this firm, which included a few of *Mikado* for trial, I asked them if this variety was *Hollandia* under another name, and, if it was, to leave them out of the order. Without replying to my inquiry they sent them on and I planted them, to discover when they came in bloom that my suspicions were well-grounded. They were *Hollandia*. The firm referred to was undoubtedly imposed upon.

INTRODUCTIONS SHOULD BE UNDER NAME

I believe that all really worthy new creations should be introduced under name.

Many growers have taken advantage of Mr. Groff's method of disseminating his hybrids in mixtures and have segregated and given names to many of the best

in these mixtures with the result that we now have several Groff's with two or three synonyms each, some of which I call to mind, viz., *G. Taconic*, introduced two years ago by Arthur Cowee, Berlin, N. Y., was this year sent me under two other names—*G. George Betscher*, from C. Betscher, Canal Dover, O.; and *Coblentz No. 54*, from P. O. Coblentz, New Madison, O. Both of these gentlemen were unaware that their varieties were identical with *Taconic*.

G. Mrs. Francis King, segregated by Mr. Coblentz and introduced by Vaughan's Seed Store, is either of a *variabilis* character, or there are two varieties under this name. *G. Independence* was offered for two years as *Mrs. Frances King*, but the two varieties are entirely different—the former being of a *Gandavensis* type, with a smaller flower, while *Mrs. Frances King* is of the *Nanceianus* class in appearance, if not in pedigree. I tested these varieties from stock obtained from both distributors and segregators.

G. Rosella, a very beautiful variety introduced by Mr. Cowee some three or four years ago, is now sailing under another name, as is also *G. Geo. Paul*, a *Nanceianus* of Lemoine's.

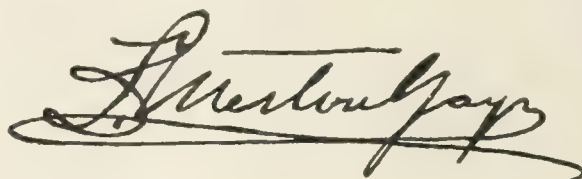

SPLENDID WHITE VARIETIES COMING

The next few years promises to bring forth some wonderful new creations in white gladioli. I already have been promised for trials next year three new large-flowering, absolutely pure white varieties from as many hybridizers, and if these varieties are up to description we will soon have some whites right up in the *G. America* class.

In the *Rural New Yorker*, Dr. Van Fleet says, "White garden gladioli appear to be albinos, however, and rarely produce white seedlings with sufficient vigor to increase with commercial rapidity. Best results may probably be looked for in crossing the finest procurable whites and yellows together, though the raising of seedlings from choice white and very light kinds both self-pollinated and interhybridized should not be neglected by the breeders desirous of improving existing varieties." The grand variety *America* has proved to be a magnet towards which hybridizers and growers of seedlings have been attracted, myself being among the number as I have a few hundred two and three-year-seedlings and about 4500 yearlings.

From reports I have received there are several million *America* seedlings now being grown, one noted plant breeder writing me that he has 400,000. It is a great producer of seed and responds abundantly to artificial pollinating. Dr. Van Fleet says it has proved an indifferent parent with him, but on the other hand, Luther Burbank says he has thousands of "best in the world" from his planting. My experience so far, however, bears out Dr. Van Fleet.

I am informed by a friend in Ohio that one of our most prominent rose specialists has become a gladiolus enthusiast and if he applies his efforts in this direction as persistently and energetically as he has with roses in the past, he will soon be in the front row of gladiolus specialists.

Cineraria hybrida

The season has arrived when these handsome, cool greenhouse herbaceous plants are throwing up their beautiful flower-heads. The florists' varieties are said to be an evolution from *C. cruenta* and for beauty and general utility they are among the best flowering plants we have, at this season. In an ordinary living room, if brought in when in full flower, and watered carefully, they will keep in good condition for over two weeks and it is a wonder that they are not grown in larger quantities by the trade than they are. Another thing in their favor is that they can be had in flower from Christmas until late in April, and they are not hard on the coal bill.

As they are almost entirely grown from seeds in this country, the greatest difficulty is to obtain a good strain of seed, and they will vary greatly in a single packet. The first to germinate are not by any means always the best; quite often, the smaller plants in the seed pan give the largest and best marked flowers. In my opinion, there has been very little advance in these plants for the last twenty-five years. The habit of the plant, size of flower, markings, and colors were just as good then as now. Of course I am quite willing that others may think otherwise. To have plants in flower at Christmas they should be sown in April, and for later use, at intervals up to August.

A good compost to sow the seeds in is equal parts of finely sifted loam, leaf mold and sharp sand; about a fourth of finely powdered charcoal may be added, as it prevents the seedlings from damping. They should be sown in a shallow pan, or box, which should be well drained. Place some of the rough siftings over the crocks and add about an inch of the above mixture, make it moderately firm, and have as even a surface as possible, scatter the seeds thinly and regularly over this, and press them slightly into the soil, cover very lightly with some of the sifted mixture and water with a very fine rosed can. Cover the pans with a pane of glass, until the seedlings appear, when the glass should be raised a little to admit air, and as the plants grow stronger remove it altogether. A temperature of sixty degrees is about right, until three or four leaves are formed. During the summer give all the air possible. A shady north house is an ideal place to summer the plants in, but they will also do well in a frame, facing north.

When the plants begin to crowd in the seed pan they should be potted off, in a mixture similar to what the seeds were sown in, but not so finely sifted, and as the plants increase in size and vigor a rougher compost may be used, with an addition of a fourth of dried cow manure. An eight-inch pot is large enough for general use, but if exhibition plants are desired, tens or elevens can be used, and for a final shift we use half fibry loam, equal parts of rough leaves and dried cow manure, with a small handful of bonemeal to every three shovelfuls of the mixture. A little sand may be added if the loam is rather stiff. When the plants are well rooted in their flowering pots, give waterings with cow manure water,

twice a week, until color begins to show in the flower buds. *Cinerarias* enjoy a moist atmosphere at all times, until they come in flower, and in the hot months of summer dewings overhead will do them good, keeping the leaves nice and stiff. About the first of October, the plants should be removed to a house where they can get all the sunshine during the day, a night temperature of as near forty degrees as possible maintained, and allowed to rise to about fifty-five during the day; the result will be a firm vigorous growth. The stellata type of *cineraria* is a fine addition to the above plants, and should be largely grown for decorative work, many showing a distinct preference for them. The much advertised Scarlet *Cineraria* "*C. Metador*" has flowered here and is a vigorous grower, but it does not come true from seed and with us the color is poor, a dirty brick color, as I should call it, and it has the habit of curling up the back of the petal, which I consider a bad point in any *cineraria*. Hybridists, however, may improve it, as it is a distinct break in color from anything we have seen. The *cineraria* is subject to attacks from green, and white fly, which if not checked would soon destroy the plants. We find a good remedy for both is half an ounce of cyanide of potassium, ninety-eight per cent. pure, one ounce sulphuric acid, two ounces of water, to every one-thousand cubic feet of space contained in the greenhouse. Fumigate once in two weeks having the foliage as dry as possible during the operation.

George F. Stewart.

West Medford, Mass.

Some Orchid Novelties at the Royal Horticultural Society

Notwithstanding the severity of the weather but little slackening in the number of orchids shown before the Royal Horticultural Society by amateurs and nurserymen on Tuesday, January 11, was apparent. From Lieut. Col. Holford's garden came several cypripediums of fine bold proportions, and awards of merit were bestowed on *C. Atlas* a cross of *C. Ceres Fascinator* and *C. insigne Harefield* var., large in all its parts, the pouch of a rosy brown tint, petals buff spotted with brown, the dorsal sepal circular in shape, the central area green, edging white one-half an inch wide. The same award was given to *C. Bantam*, a flower with a varnish on all its parts, with some yellow color on the petals, the pouch on the interior yellow crimson, and exteriorly of a dull crimson, the dorsal sepal white, and edged with white and erect brown lines running upwards; a distinct looking flower of middle size. Mr. Ogilvie, The Shrubbery, Oxford, showed a plant of *Lycaste Skinneri armeniaca*, having white sepals and petals and lip of a blush color—a pleasing and rare combination of coloring. It received a first-class certificate. Messrs. Sander & Co., St. Albans, showed a new *Phaius* named *Cooperi*, the upper segments of which are brownish crimson, lip yellowish white, the interior of the flower a mixture of rose and pale yellow. Botanical certificate.

Treasurer
 Beatty's retirement

The news that H. B. Beatty, for so many years the honored treasurer of the Society of American Florists, has sent in his resignation will be learned with regret by many members of the Society who know with what fidelity and conscientious-

ness the funds of the organization have been cared for by Mr. Beatty. Still more to be regretted is the reason given for Mr. Beatty's decision—ill health. We sincerely hope that the near future will bring restored health and activity to our friend with whom it was our privilege to be for many years associated in the official work of the S. A. F. The selection of ex-President W. F. Kasting by the Executive Board to succeed Mr. Beatty as treasurer was a wise one and, we believe, will give widespread satisfaction.

A pernicious
 fad

In a recent number of the *Journal of Horticulture* (London) we find quoted an article appearing in the *Daily Review* commenting upon the remarkably clever imitation, not only in form and color but in fragrance of natural flowers, which is seen in the artificial flowers now so generally in use. Thoughtful flower growers cannot but look upon this growing custom as a serious menace to their industry, something that should be discouraged by every possible means but, strangely enough, very few seem to give it any serious thought. "Only a fad which will be short-lived," it may be said. Perhaps so. We certainly hope so. But would it not be better to make sure of it and get out and do something that will help to accomplish its early demise? No business man ever has a more direct route to the editorial heart than the florist enjoys, nor can any argument possibly be advanced which will be more convincing in this particular case than a gift of natural flowers judiciously applied. Keep everlastingly hammering in the columns of your local newspaper, and in any and all other ways that are open, upon the fact that the use of imitation flowers for any purpose where natural blossoms are fit is simply vulgar. And then make good your own position by delivering "straight goods" the quality of which will be their own best recommendation.

A weak
 spot

Without reflecting in any manner on the other very excellent papers presented before the American Carnation Society at Pittsburgh, all of which we shall publish as space permits, we must say that Mr. Breitenstein's paper which appears in this issue, pleases us very much because it handles an old subject from a new view point and touches on certain standards and certain lines upon which much of the future prosperity of the carnation industry must depend. The principle on which Mr. Breitenstein's presentation is based is identically that which has been repeatedly enunciated in these editorial columns. Granted that carnations are splendidly grown, it is all the more evident that they must also be splendidly presented to the public and splendidly sold before the interests of the man who grows them are fully conserved. Rarely in exhibitions anywhere or among the florists' stores is any special appeal made to the public whereby the particular beauty and appropriateness of this flower for a hundred uses in the home and elsewhere is adequately impressed on their mind. Manufacturers and dealers in any other commodity of art or utility for daily use are much wiser in their day and generation than our flower producers appear to be. To present one's goods in irresistible guise and to employ every available means to magnify the uses to which they may be put is one of the great principles of modern salesmanship. A moment's thought will demonstrate that it is not alone the retail dealer but the flower grower whose prosperity is adversely affected by the remissness which is hinted at in Mr. Breitenstein's paper and the antiquated display methods which blanket so much of the possible good in a business way which might otherwise be accomplished.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Cyclamens.

There are few plants that surpass the cyclamen for blooming and the florist should be well supplied with a desirable stock. Seedlings that were sown last fall should not be neglected at any time. They will now be ready for a shift into 2½ or 3-inch pots. A compost of fibry loam and some well-decayed leaf mould in equal parts, with a dash of sharp sand added and also a quantity of finely crushed charcoal to keep the whole porous and sweet, with good drainage in the bottom of the pots. Give them a temperature of 50 to 55 degrees at night, keep them well up to the light, syringe on all bright days, and be careful about watering and they will come along nicely.

Gloxinias.

Gloxinias that were started in flats will now begin to make considerable roots, and when the young growth has made one or two inches across they should be potted up before they get crowded. A mixture of equal parts of loam, cow manure and leaf mould, with some fine charcoal and sharp, clean sand, is what they like. Pots of 5 or 6-inch are sufficiently large—that is, if the tubers are of ordinary size. Drain the pots well and in potting press the soil moderately firm, leaving the tops of the tubers just level with the surface. Immediately the tubers are potted, put them in heat; a temperature of about 60 degrees at night will answer. Keep on the dry side until well rooted. As soon as they begin to move, stand the plants where they will be near the glass, otherwise the shoots will be too long and weak to produce flowers of the requisite substance. Do not spray the leaves, and shade from the direct sunshine; and a good many will be in bloom for Memorial Day, when they should be found extremely useful.

Fuchsias.

If you have any plants of old fuchsias still at rest be sure and get them out, shake the old soil off, repot in good fresh soil, cut back the unripe tops, place them in from 50 to 55 degrees by night, syringe overhead frequently and water moderately, and they will break and give you strong succulent cuttings which will make stronger plants than those started earlier. Plants that were propagated early in December should now be in 3-inch pots. They should be kept growing by shifting as they require it. A suitable compost is one part good loam to one-quarter of well decomposed cow manure. By paying attention to all these points, a growth of astonishing magnitude may be had in a few months.

Marguerites.

Be sure not to pinch any more on plants that will be wanted for Easter. They make very nice, serviceable plants for church or house decoration, both the white and yellow varieties. They do well in a light sunny house, with a temperature of about 50 degrees at night. When the roots get well matted in the pots feed liberally with liquid manure, and see that they do not suffer for want of water. Cuttings of marguerites put in now and grown

NEW CARNATION, MRS. WALTER W. COLES.

This is a bright scarlet crimson; good, stiff, wiry stem. Average flower over 3 inches in diameter. Calyx absolutely perfect. The only variety on

our place that never splits, and the most wonderfully free, continuous bloomer.

W. W. COLES.

Kokomo, Ind.

along in pots are sure to make fine plants for flowering next Christmas.

Sweet Alyssum.

This is a very indispensable plant for vases, especially the double-flowered variety. If your stock is short, now is a good time to work up a supply by putting in cuttings and these will give you plants later on.

Azaleas for Easter.

As Mad. Van der Cruyssen and Niobe require a little longer time than ordinary varieties do, it will be necessary to put these and any others that require a longer time into a warmer temperature now. But such varieties as *Vervaeana*, *Deutsche Perle*, etc., will require only about four or five weeks to bring them in about right. A warm moist house suits them best, and a night temperature of from 55 to 60 degrees is about right. Syringe them two to four times a day when the weather is bright. When growth starts ahead of the flowers see that it is removed; as the flowers show color stop syringing. Give the plants a few days to harden off before Easter, as it promotes the lasting qualities of the flowers.

Sweet Peas.

Where there is plenty of room, and all other conditions are favorable, there is plenty of money in this crop. By sowing at this time there will be less difficulty than with the early crops. Those who have the room can secure an immense crop of fine flowers for spring and early summer. They will last for picking from four to six weeks

and will find a good market. A good compost for sweet peas should consist of about three parts loam to one of manure. They should have a temperature of 45 to 50 degrees at night with a rise to 60 to 70 degrees with sunshine. To grow sweet peas successfully, ventilation is one of the most important factors. If the space on the benches is not ready, sow from four to six seeds in a 4-inch pot; they can be planted in the benches in about four weeks. Keep the leading shoots faithfully tied up to the strings so as not to have crooked stems.

Violets.

Now when the days are lengthening and becoming brighter, an abundance of side growth is put forth by violets which makes fine thrifty material for propagation. This is the very best time for the rooting of violet cuttings, and the boxing of rooted runners. None but the healthiest and sturdiest cuttings should be taken for the future stock. The cuttings can be rooted in the coolest end of the propagation bench and they can be boxed up when rooted. They can also be pricked out into flats about 3 inches deep. A sandy soil, fairly rich and put through a sieve is used instead of pure sand. Be sure and water carefully and guard against sunshine, until root formation has taken place, when they will bear the full sun and a good supply of fresh air. When well rooted place close up to the glass and in a cool, airy house, and you will have fine stock.

JOHN J. M. FARRELL.

South Norwalk, Conn.

MASSACHUSETTS HORTICULTURAL SOCIETY

Complete Prize Schedule for the Great Orchid Exhibition to be held May 26, 27, 28, 29 and 30, 1910

No. 1. Display of Orchid plants in bloom, arranged for effect, embracing at least 20 Orchid genera and bi-generic hybrids, and unlimited as to the number of species, varieties and hybrids, to fill 400 sq. ft. of space. In the arrangement, stove and greenhouse plants may be used, and the general effect produced (with or without such plants) will be considered by the judges. Cut blooms of rare sorts not exceeding in number 5 per cent of the total number of Orchid plants in the exhibit will be admissible.

First prize, Gold Medal and \$1,000; second prize, Silver Medal and \$500; third prize, Bronze Medal and \$250.

No. 2. Display of Orchid plants in bloom, arranged for effect, embracing at least 10 Orchid genera and bi-generic hybrids, and unlimited as to number of species, varieties and hybrids, to fill 150 sq. ft. of space. Specifications as in No. 1. Commercial growers excluded from competition.

First prize, Gold Medal and \$200; second prize, Silver Medal and \$100; third prize, Bronze Medal and \$50.

No. 3. For the best recently introduced Orchid plant not previously exhibited in the United States. Gold Medal.

No. 4. For the best new seedling Orchid plant not previously exhibited in the United States. Gold Medal.

No. 5. Largest and best display of cut Orchid blooms arranged with ferns or other foliage. Variety and decorative effect will be considered.

First prize, Gold Medal and \$100; second prize, Silver Medal and \$50; third prize, Bronze Medal and \$25.

No. 6. Best collection of cut Orchids of new varieties not before exhibited in the United States. Ferns or other foliage may be used in the arrangement. Gold Medal.

No. 7. Group of flowering and foliage stove or greenhouse plants arranged for effect.

First prize, Gold Medal and \$100; second prize, Silver Medal and \$50.

No. 8. Best new species of stove or greenhouse plant in bloom not previously exhibited in the United States. Gold Medal.

No. 9. Best new species of stove or greenhouse foliage plant, exclusive of ferns, not previously exhibited in the United States. Gold Medal.

No. 10. Best new species of coniferous plant, not yet disseminated, likely to be hardy in Massachusetts. Gold Medal.

No. 11. Best new species of shrub or climber in bloom, likely to be hardy in Massachusetts, not previously exhibited in the United States. Gold Medal.

No. 12. Best new species of hardy herbaceous plant in bloom, likely to be hardy in Massachusetts, not previously exhibited in the United States. Gold Medal.

No. 13. Group of botanical Orchids,

not less less than 25 plants and 15 genera. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 14. Six Orchid plants, distinct genera. First prize, Silver Medal and \$50; second, prize, Bronze Medal and \$25.

No. 15. Three Orchid plants, distinct genera. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 16. Three Cattleyas, distinct species. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 17. Specimen Cattleya, any species. First prize, Silver Medal; second prize, Bronze Medal.

No. 18. Specimen Cymbidium. First prize, Silver Medal; second prize, Bronze Medal.

No. 19. Three Cypripediums, distinct species. First prize, Silver Medal and \$15; second prize, Bronze Medal and \$10.

No. 20. Specimen Cypripedium. First prize, Silver Medal; second prize, Bronze Medal.

No. 21. Specimen Dendrobium. First prize, Silver Medal; second prize, Bronze Medal.

No. 22. Laelias, distinct species. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 23. Specimen Laelia, any species. First prize, Silver Medal; second prize, Bronze Medal.

No. 24. Laelio-cattleyas, or Brasso-cattleyas, distinct. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 25. Six Miltonias. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 26. Specimen Miltonia. First prize, Silver Medal; second prize, Bronze Medal.

No. 27. Six Odontoglossums, not less than three species. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 28. Specimen Odontoglossum. First prize, Silver Medal; second prize, Bronze Medal.

No. 29. Specimen Oncidium. First prize, Silver Medal; second prize, Bronze Medal.

No. 30. Specimen Saccolabium or Aerides. First prize, Silver Medal; second prize, Bronze Medal.

No. 31. Specimen Sobralia. First prize, Silver Medal; second prize, Bronze Medal.

No. 32. Specimen Vanda. First prize, Silver Medal; second prize, Bronze Medal.

No. 33. Three Orchids, bigeneric hybrids other than Laelio-cattleya or Brasso-cattleya. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 34. Specimen Orchid, bigeneric hybrid other than Laelio-cattleyas and Brasso-cattleya. First prize, Silver

Medal; second prize, Bronze Medal.

No. 35. Three Orchids, distinct genera not otherwise provided for in the schedule. First prize, Silver Medal and \$25; second prize, Bronze Medal and \$15.

No. 36. Specimen Orchid, any genus not otherwise provided for in the schedule. First prize, Silver Medal; second prize, Bronze Medal.

No. 37. Best specimen Orchid plant in exhibition. First prize, Gold Medal.

Intending exhibitors must file their entries with the Secretary not later than April 17.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

This society will hold an exhibition in July, 1910, place and date to be announced later. A preliminary list of prizes has been issued, of which the following is a copy.

President Harry Turner's Cup, value \$25.00, for the best 25 vases of Sweet Peas.

The W. Atlee Burpee Cup, for the finest and largest collection of Sweet Peas.

The W. Atlee Burpee Prizes, for vase of waved or Spencer type Sweet Peas introduced 1910. 1st \$5.00, 2nd \$3.00, 3rd \$2.00.

W. W. Rawson & Co.'s Prize, Silver Gilt Medal for a vase of Sweet Peas never before exhibited or disseminated, of American origin.

Rawson's Silver Medal, for the best 25 vases Spencer or Unwin types exclusively, open to trade only.

Rawson's Silver Medal, for the best 20 spikes of Sweet Peas Rawson's Snowflake.

Rawson's Bronze Medal, for the best three vases comprising white, lavender and pink; open to amateurs.

Rawson's Silver Medal, for the most successful exhibitor among the amateur classes.

Watkins & Simpson Prize, value \$10.00, for the best vase of Nora Unwin, Frank Dolby, Mrs. A. Watkins, A. J. Cook, E. J. Castle.

Arthur T. Boddington Prizes, a challenge cup, value \$50.00, \$25.00 to the winner of the cup; 2nd prize \$15.00, 3rd prize \$10.00; for a collection of Sweet Peas, 25 varieties.

Henry A. Dreer Prizes, for 21 vases of Sweet Peas, the 21 "incomparable" stand-ard varieties as enumerated in Dreer's Garden Book for 1910. 1st \$20.00, 2nd \$5.00.

Jerome B. Rice Seed Co.'s Prizes, for vase of white Sweet Peas. 1st \$5.00, 2nd \$3.00, 3rd \$2.00.

HARRY A. BUNYARD, Sec'y.

A NEW CALANTHE.

On January 27, at Horticultural Hall, Worcester, Mass., Geo. McWilliam of Whitinsville, exhibited a seedling calanthe of great beauty under the name of *C. Orpetiana*. It is named in honor of E. O. Orpet, gardener on the Thayer estate at Lancaster, who is himself an enthusiastic orchid raiser. The parents of the variety were *C. vestita rubro-oculata* and *C. Regneiri*. Seed was planted in 1902.

NAME OF CHRYSANTHEMUM.

We would call attention to an error in our note on chrysanthemum registration by the S. A. F. last week whereby the name of the new variety was given as Mrs. Jane Cochran. Same should have been Mrs. Jane Cockburn.

NATIONAL FLOWER SHOW

To Be Held in Boston, Mass., Spring 1911—Schedule of Prizes
as Prepared by the Committee

Miscellaneous Flowering Plants.

	1st	2nd	3rd
Acacias 15 plants, not less than 4 varieties	\$60.00	\$40.00
6 plants, not less than 3 varieties	30.00	20.00
3 plants, one or more varieties...	20.00	15.00
Acacia pubescens—Specimen plant.....	25.00	15.00
Acacia paradoxa—Specimen plant.....	15.00	10.00
Acacia—Any other species or variety, specimen	15.00	10.00
Allamanda—Specimen plant, any variety...	15.00	10.00
Amaryllis—36 plants, not less than 18 varieties	35.00	25.00
Amaryllis—12 plants, not less than 9 varieties	15.00	10.00
Anthurium—6 plants, not less than 3 varieties	25.00	15.00
Anthurium—Specimen plant.....	10.00	5.00
Antirrhinum—12 plants in variety.....	10.00	5.00
Azalea Indica—24 plants, not less than 6 varieties	75.00	50.00
Azalea Indica—12 plants, not less than 6 varieties	50.00	30.00
Azalea Indica—6 plants, not less than 3 varieties	25.00	15.00	\$10.00
Azalea Indica—3 plants, not less than 3 varieties	15.00	10.00	5.00
Azalea Indica—Specimen plant, pink or rose	15.00	10.00	5.00
Azalea Indica—Specimen plant, white....	15.00	10.00	5.00
Azalea Indica—Specimen plant, any other color	15.00	10.00	5.00
Azalea Mollis—12 plants, not less than 4 colors	25.00	15.00
Azalea pontica or rustica—12 plants, not less than 4 varieties.....	25.00	15.00
Begonia Gloire de Lorraine—6 plants.....	15.00	10.00
Begonia, Flowering—6 plants, 6 varieties.	15.00	10.00
Begonia—6 plants, not less than 2 varieties.	15.00	10.00
Bougainvillea—6 plants.....	25.00	15.00
Specimen plant.....	15.00	10.00	5.00
Calceolaria, shrubby—6 plants.....	15.00	10.00
Calceolaria hybrida—6 plants.....	15.00	10.00
Camellia—12 plants, not less than 6 var....	35.00	25.00
6 plants, not less than 3 var....	25.00	15.00	10.00

Genista—12 plants.....	35.00	25.00
6 plants.....	20.00	15.00	10.00
Specimen plant.....	15.00	10.00	5.00
Flowering Plants—Group arranged for effect, with palms and other foliage plants, to cover not less than 200 square feet.....	100.00	75.00
Forced Shrubs—Group forced shrubs and herbaceous plants (hardy trees and vines admissible) arranged for effect, to cover not less than 300 square feet....	100.00	75.00
Hydrangea—12 plants, not less than 3 var.	35.00	25.00
6 plants, not less than 2 var.	25.00	15.00
Specimen plant.....	15.00	10.00	5.00
Lilac—12 plants, not less than 3 var....	25.00	15.00
3 plants, one or more vars.....	10.00	5.00
Marguerite—6 plants, not less than 2 vars.	15.00	10.00
3 plants.....	10.00	5.00
Specimen plant.....	5.00	3.00	2.00
Rhododendron 24 plants not less than 6 varieties	60.00	40.00
Rhododendron—12 plants, not less than 3 varieties	30.00	20.00
Rhododendron—Specimen plant, red or crimson	25.00	15.00	10.00
Rhododendron—Specimen plant, pink or lavender	25.00	15.00	10.00
Rhododendron—Specimen plant, white or nearly white	25.00	15.00	10.00
Rhynchospermum—Specimen plant.....	15.00	10.00	5.00
Spiraea (Astilbe)—12 plants, not less than 3 varieties	15.00	10.00
Wistaria—Specimen plant.....	10.00	5.00
Geranium (Zonal Pelargonium)—12 plants, not less than 12 varieties.....	15.00	10.00

	1st	2nd	3rd
Primula Kewensis—12 plants.....	10.00	6.00	4.00
Primula obconica—12 plants.....	10.00	6.00	4.00
Primula—Collection of 24 plants, not less than 6 species.....	15.00	10.00
Schizanthus—6 plants.....	10.00	5.00

Bulbs.

	1st	2nd	3rd
Hyacinths—8 10-in. pans, distinct varieties	\$25.00	\$15.00	\$10.00
3 10-in. pans, white.....	10.00	6.00	4.00
3 10-in. pans, pink and red.....	10.00	6.00	4.00
3 10-in. pans, light blue.....	10.00	6.00	4.00
3 10-in. pans, dark blue.....	10.00	6.00	4.00
Hyacinths—50 single pots, not less than 12 varieties.....	25.00	15.00	10.00
Lilies—Display, to cover not less than 100 square feet. Foliage plants may be used for effective arrangement.....	50.00	30.00
Narcissus, Large Trumpet—12 10-in. pans, 12 varieties.....	20.00	15.00	10.00
Narcissus, Short or Medium Trumpet—12 10-in. pans, 12 varieties.....	15.00	10.00	5.00
Narcissus—3 10-in. pans, Glory of Leiden..	5.00	3.00	2.00
3 10-in. pans, Bicolor or Victoria	5.00	3.00	2.00
3 10-in. pans, Empress.....	5.00	3.00	2.00
3 10-in. pans, Emperor.....	5.00	3.00	2.00
3 10-in. pans, Golden Spur.....	5.00	3.00	2.00
3 10-in. pans, Double Von Sion	5.00	3.00	2.00
3 10-in. pans, Any other double	5.00	3.00	2.00
Tulips, Early Single—15 10-in. pans, distinct varieties.....	20.00	15.00	10.00
Tulips, Early Single—8 10-in. pans, distinct varieties.....	15.00	10.00	5.00
Tulips, Early Single—3 10-in. pans, white..	5.00	3.00	2.00
Tulips, Early Single—3 10-in. pans, pink...	5.00	3.00	2.00
Tulips, Early Single—3 10-in. pans, scarlet or crimson.....	5.00	3.00	2.00
Tulips, Early Single—3 10-in. pans, yellow.	5.00	3.00	2.00
Tulips, Early Single—3 10-in. pans, any other color or colors.....	5.00	3.00	2.00
Tulips, Early Double—6 10-in. pans, not less than 3 varieties.....	15.00	10.00	5.00
Tulips, Darwin—12 10-in. pans, 12 varieties	20.00	15.00	10.00
Tulips, Cottage or Late, other than Darwin—12 10-in. pans, 12 varieties.....	15.00	10.00	5.00
Miscellaneous collection, arranged for effect, other foliage plants admissible, to cover not less than 150 square feet....	50.00	30.00

Orchids.

	1st	2nd	3rd
Orchids—Collection, to cover not less than 100 square feet, arranged with foliage plants for effect.....	\$100.00	\$75.00	\$50.00
Orchids—Collection, to cover not less than 100 square feet, arranged with foliage plants for effect. For non-commercial growers only.....	100.00	75.00	50.00
Orchids—Collection, 12 plants, 12 distinct varieties.....	50.00	30.00

A CARNATION, THE PEOPLE'S FLOWER.

(A paper read before the American Carnation Society by H. W. Breitenstein.)

Flowers are no more a luxury in modern life than are good clothes, comfortable homes and the many things in daily use that place living above an existence. There is probably no normal human animal without an inherent love of the beautiful and that finds no commoner expression than in a fondness of flowers. The indulgence in this expression, it must be conceded is primarily a matter of cost. He of limited means—and he is legion—must have value received, be it in color, for cheer in dull environment, fragrance, to stimulate the sense, perhaps reminiscent of a happy yesterday or may-haps to anticipations of the morrow, the influence is only for good. Nevertheless, it must not be a "flower for a day."

The Carnation has been the Peoples' Flower, its beauty and fragrance appealing to the senses and its cost placing it within the means of all having more than enough for the common necessities of life: then its hardness giving prolonged pleasures. Mark well the assertion, "has been the Peoples' Flower." Perhaps it still is, and maybe, shall so remain; that, it seems, is "up to you."

From observation, it seems to lose in popularity. Why? Certainly not in that it is less beautiful. What is the answer? Is it not, in that it becomes more and more ephemeral each year as it loses its hardihood, its fragrance, and gains nothing in beauty. Admitting that it grows larger; size alone is not beauty and bulk at the sacrifice

of natural charms does not hold the affections of the people. Might it not be well to consider what qualities are most essential to the pleasures of the consumer, without which all were in vain.

Color we have and, from a decorative point of view, no flower offers more. If given the proper treatment one can obtain from the most gorgeous to the softest of tones, and now is perhaps the best time to make the one exception. We need yellow—now come to its own in popularity and deservedly so, as no color diffuses more warmth and nature uses it profusely.

One essential feature to a more general use of the flower is naturalness. One cannot obtain a very artistic arrangement without more natural environment, hence the obvious need of carnation foliage, with which the flower, for table decorations (perhaps its greatest use other than for memorial purposes) would be incalculably enhanced, also for personal adornment and for favors. A full bouquet of carnations with their warmth of color relieved by a touch of foliage makes an adornment any lady would be pleased to accept and proudly wear.

Simplicity is the key note of art. Be it in music, painting, sculpture, architecture or any other branch, and its highest expression is faithfulness to nature, as she reveals herself. Where are the monster chrysanthemums which were a fad some years since? They are replaced by the smaller and more perfect ones of today even the small natural ones having more uses. What Rose has won favor more than the semi-single, fragrant, hardy ones? The American Beauty is a notable exception, not for the beauty of its color

so much as for fragrance and especially for its endurance.

A PRIZE OPEN TO EVERYBODY.

Kroeschell Bros. Co. of Chicago, have sent us a sample of their new 5-inch carnation measure which they will be pleased to send to any and all who apply, accompanied by the following letter which we are sure will be read with much interest:

Chicago, January 22, 1910.

Mr. W. J. Stewart,
Editor HORTICULTURE.

Dear Sir: Referring to the new carnation measure which we are just getting ready to offer the growers of the country.

Several years ago the writer circulated among the florists of the country, the Kroeschell Carnation Measure, which is so well known. This measure was four inches in diameter. At that time there was no carnation that would entirely cover the measure, and when asked why the measure was made so large, he stated: "I want to set a mark for the growers to work to and I am sure that many will make the effort which will result in finally covering the disc."

The prediction of the writer has come true; in an issue of your journal following the last Carnation Convention, we note a grower showing a photographic reproduction of one of his carnations completely covering our carnation measure. So today we set a new mark. Our new carnation measure has been increased to five inches in diameter, and while this may seem to be asking a great deal, yet, we feel that the growers are moving forward steadily, and surely, and that with this new mark continually before them, some growers will in time put even this five-inch carnation measure out of business.

To help the good work along, we offer as a special inducement a prize of \$25 in gold or a beautiful gold medal of equal value, to the grower who exhibits the best dozen of carnations at either of the following shows, covering the new carnation measure of five inches in diameter:

National Carnation Show, Pittsburg, 1910;
Chicago Flower Show, 1910; National Flower Show, Boston, 1911

Yours truly,
KROESCHELL BROS. CO

AMERICAN CARNATION SOCIETY

Final Convention Proceedings and Banquet

The enthusiasm of the Carnationists and attending visitors to the Pittsburgh Convention never dulled from their arrival to the time of departure. It was not unusual to say a "good-bye" to a fleeting guest, and to meet him later in the day and be told that it was impossible to leave such a happy throng behind. The air was resonant with bubbling jubilation. It was like a large family reunion—everybody patronized, everybody knew everybody, and those who did not know one another soon became acquainted. The fact that the hotel housed the whole convention, including the carnations, the carnationists and the meetings, added greatly to the success of the nineteenth annual reunion. I will say, there was some pretty maneuvering as to where the convention should go next year, but one could feel it in his bones, so to speak, that Boston would win the prize. The members should be congratulated on their good judgment. It augurs well for the society and for the National Exhibition in 1911.

The local club worked harmoniously and like a well-oiled machine, and was guided by a master hand from start to finish.

The "English Room," where the exhibition was held, made a unique setting. The floor was approached by four steps (downward) so that one could stand at the entrance and get a panoramic view of the whole—an inspiring sight when one can look backward to the "initial performances." The dark oak walls and sombre trimmings of this hall intensified and emphasized the coloring and beauty of the flowers.

If criticism could be offered to future exhibits of this sort, I would say that the tables were too high, and that the stereotyped arrangement of the tables in parallel lines is wrong from an artistic and aesthetic point of view. If the tables could have been arranged in graceful serpentine form around the hall, interrupted here and there by a mantle, or altar decorations of carnations and the center of the hall allowed to remain more open, filled here and there with table and other decorations showing to what good use this grand flower could be adjusted, it would have a tendency to broaden not only the ideas of the grower and the storeman but the ultimate consumer, who is the fellow we are after. Prizes to the retailer, covering all his work, and prizes for the most unique and novel arrangements of carnations would not only educate but enlarge the scope of work and success of the A. C. S.

The meetings were all well attended

and the interest keen—no extraordinary point, however, was revealed and few novel suggestions brought out. The social end was well taken care of and did not interfere with the business meeting. The banquet was magnificent from all viewpoints, nearly three hundred attending, and the oratory was filled with enthusiasm.

The Banquet.

The "English Room," by the magicians wand was evolved into the banquet hall and visitors inspired to flowery oratory; the ladies vying with the kaleidoscopic colorings of the "divine flower" in rich and beautiful toilets. The blooms previously staged were banked on either side of the banquet hall and the round tables were decorated with the same festive blooms.

The banquet was but a climax to a long list of successes, and from a floral, oratorical and gastronomical view, a rare awakening to all participants, not forgetting the interspersing of beautiful music and song, all of the highest order. The menu was in keeping with everything else. It was adorned with an embossed spray of red carnations and gave, in addition to the list of pieces by the Carnegie Tech Glee and Mandolin Clubs, a series of verses and rollicking choruses in which the entire company from time to time joined.

William Falconer was toastmaster. After the banquet the first thing in order was the presentation of the S. A. F. medals.

Fred Dörner, Jr. received the gold medal for Hoosier Lad, with graceful acknowledgement. Richard Witterstaetter received the silver medal for President Valentine and Eugene Dailledouze the bronze medal for White House. Both made modest acknowledgement.

At this point a telegram from the Boston banqueters, appreciating the fact that the convention was going to Boston and according a cordial welcome and that a pot of Boston beans would be immediately put on the fire, was read amid great enthusiasm.

The toast-master then called on President Herr to make a few remarks about the society, which he did in a most complimentary and sanguine vein. Ex-President Valentine then spoke for the S. A. F. & O. H., in a humorous and eloquent manner, stating that he thought when he had become an Ex that he had laid down the laurels of office, but it was not to be. He spoke of the segregation of the different societies and of their work and thought that more cohesion would be better for all concerned. He congratulated the A. C. S. upon their good sense in going to Boston, and spoke along the lines that unity was strength.

Mr. P. S. Randolph had for his subject, "Our Boys and What Are We Going to Do With Them?" He thought

they should follow in the footsteps of their fathers and that they would have an easy time as all the pioneer work and hard labor had been well nigh completed.

E. C. Reineman spoke enthusiastically for the Pittsburgh Florists' Club, of which he was the first president, which has now a membership of 160.

The toast-master, in introducing the next speaker, F. R. Pierson, stated that next year the flower show in Boston would be the finest and largest the world ever saw. President Pierson for the S. A. F. & O. H., and for the National Flower Show, 1911, discussed the future of the society and outlined the work for the great exhibition in the Hub city. He said that the Boston show was the greatest opportunity that the allied horticultural societies had ever had and that all should take advantage of it. It was an immense undertaking and \$10,000 had already been guaranteed. The Chicago National Show had cost \$25,000 and had been successful. The 1911 Show would be entirely different, coming as it would in the spring, and with the co-operation of the Carnation Society, the Rose Society, the Massachusetts Horticultural Society, the allied New England and other societies, could not help but be a tremendous success.

W. F. Kasting spoke of the "Influence of the Carnation in Politics," in which he claimed that this flower had played an important part, and gave several instances and anecdotes relating to same.

H. B. Howard spoke for the "Trade Press and Its Influence." He said that while the Carnation and other societies held their annual conventions, the trade paper was a convention in itself 52 times a year.

Judge Vesey spoke for the ladies in a practical, poetical and sentimental vein, and seemed to think that flowers even in their single state played an important part with lovers in the aboriginal ages.

Arthur G. Burgoyne of the Chronicle Telegraph spoke for the Pittsburgh press and recited an original poem.

Robert Craig replied to the toast, "The Old Boys," and their influence in the past. He asked his audience to overlook their faults and to remember only their virtues and the work they had done, and joined the names of Peter Henderson, John Thorpe, W. R. Smith, Wm. Scott, Edwin Lonsdale, and regretted that he had not more time to mention others.

Prof. Brashear, Sam'l McClements and others also spoke, and after the singing of Auld Lang Syne, three cheers for the Pittsburgh Florist Club and the Pittsburgh ladies, and much handshaking, the banqueters retired, all voicing the praise of the welcome and hospitality which had been so generously bestowed.

Mr. Falconer made an ideal toast—

The Best Florists' Book Ever Published

master and his introductions of speakers were always accompanied with some sage, humorous apropos remarks.

Proceedings Subsequent to Last Week's Report.

On Thursday afternoon it was voted to increase the secretary's salary to \$250. After a long discussion a resolution was adopted increasing fine for late entry to \$2.00. A preliminary certificate was awarded to Frank W. Whitney for grand white carnation Wodenthe which scored 90 points. F. R. Pierson was elected a trustee.

A Visit to Bakerstown.

On Friday about one hundred journeyed to Bakerstown where the Pittsburgh Cut Flower Co. have their immense plant. The party was taken from Pittsburgh in two large inter-urban trolley cars and were met at the end of the line by huge sleighs so that all were treated to a good old straw ride, much enjoyed by all. After inspecting the houses, Mr. Fred Burkl spread before the visitors a generous collation, with real Pittsburgh stogies. After three cheers for their host the party returned to Pittsburgh, and reluctantly to their homes.

FIRE RECORD.

Islip, L. I.—The greenhouse on the estate of Schuyler L. Parsons, 10x50 feet, filled with Easter lilies and other plants, was totally destroyed on the morning of Jan. 20. Loss \$1,000.

Mansfield, Mass.—W. C. Winter had a slight fire in his main greenhouse Wednesday morning, Jan. 12. It was extinguished without the aid of the fire department.

OBITUARY.

James Best.

In the passing of James Best, florist and nurseryman, who died Sunday, January 15, Santa Clara County, Cal., lost one of its pioneers and a very substantial citizen, who played well his part in the development of the valley.

Mr. Best was born in Cornwall, England, October 26, 1832, and he went to California from Australia about forty years ago, settling in Santa Clara valley, where he made his home up to the time of his death.

A NEBRASKAN ENTERPRISE.

Rev. C. S. Harrison informs us that the C. S. Harrison Select Nursery, at York, Nebraska, which a little over a year ago doubled its plant, is now about to incorporate with \$15,000 capital; at the same time taking in Fred Yule of Lincoln, having a branch in the capital city. The Elmwood Select Nursery of Paynesville, Minnesota, under the care of Frank Brown, is a branch of the York Nursery, especially engaged in raising evergreens; for soil and climate in that region are much more favorable than in Nebraska. Splendid success has attended the northern enterprise thus far and they expect to raise evergreens by the million there.

Victoria, B. C.—The Layritz Nursery Co. of this city have established a branch at Kelowna, where A. E. Boyer will be resident manager. Preparations are being made for extensive planting and building.

A CORRECTION.

In Mr. Wilson's plant notes on page 145, last week's issue, sixth line from bottom of first column, "one-potting" should read "over-potting."

A movement is on foot to organize a horticultural society in Yonkers, N. Y.

THE PUBLIC APHINE TESTS

Held in New York in December, and in Boston in January, have given such satisfactory results to the manufacturers of Aphine, that another test will be held in Philadelphia on Lincoln's Birthday, February 12th, 1910.

Further particulars in next week's issue.

If you are not familiar with the new insecticide discovery APHINE, send for descriptive circular.

If your supply-house does not yet handle APHINE, write us for names of nearest selling agents.

News of the Clubs and Societies

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Resignation of Mr. H. B. Beatty.

Owing to impaired health Mr. H. B. Beatty, treasurer of the S. A. F. & O. H., tendered his resignation as treasurer at a meeting of the Executive Board held at Pittsburgh, Pa., on January 26th to 28th, 1910. The resignation was accepted by the board. The appointment of Mr. W. F. Kasting of Buffalo, N. Y., as the successor of Mr. Beatty, was confirmed. Mr. Wm. F. Kasting having been duly qualified according to Article II, section 3, paragraph (d), is now Treasurer of the Society.

The following is the resignation of Mr. Beatty and the resolutions passed by the Board.

Pittsburgh, Pa., Jan. 27, 1910.

Mr. F. R. Pierson, President,
Society of American Florists and
Ornamental Horticulturists,
Fort Pitt Hotel, City.

Dear Sir:—

I hereby tender my resignation as treasurer of the Society of American Florists and Ornamental Horticulturists, to take effect as soon as my successor can be elected and qualified.

As a large majority of the directors of the Society are in the city, I trust that you may be able to get them together today or tomorrow, to elect my successor, as I desire to turn over all funds of the Society as soon as possible.

Very truly yours,
F. B. DORNER, Secretary.

Fort Pitt Hotel,
Pittsburgh, Pa., Jan. 27, 1910.

WHEREAS, The Executive Committee of the Society of American Florists and Ornamental Horticulturists has received the resignation of Mr. H. B. Beatty, as treasurer of the Society,

THEREFORE BE IT RESOLVED, That in accepting this resignation we desire to place on record our appreciation of his long and valued services to the Society and his unbounded liberality with the office.

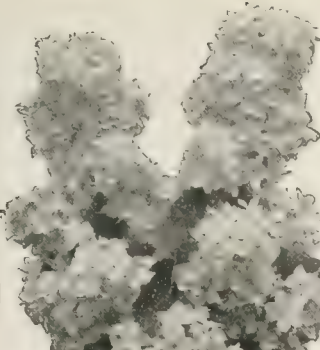

We part with him with the greatest regret which we feel sure will be shared by every member of the Society.

It is only our consideration for his impaired health, which we are assured is due to overwork in his many interests, that compels us reluctantly to accept his resignation at this time.

E. B. DORNER, Secretary

FLORISTS' CLUB OF PHILADELPHIA.

The regular meeting on Tuesday last was well attended, the attraction being the paper by Adolph Farenwald, "Why the Small Rose Grower Should Join the American Rose Society." Abundant food for thought was brought out in this paper, and the between remarks made by the essayist, the principal point being that the average rose grower does not show the same amount of enthusiasm as the carnation grower, hence the latter society has better attended meetings and exhibitions. The various points were debated by Chas. E. Meehan, W. A. Leonard, Robert Kift, Leo Niessen and S. S. Skidelsky. The latter gave some illustrations of how, only a few years ago, it was difficult to sell a new carnation; now old varieties have been superseded by better ones and today new ones are continually coming out, so that the carnation introducer and the carnation grower are compelled to go to the conventions to keep up-to-date, while in roses so

Beautiful! Novel! Valuable!

The Newest Lilacs

Double and Single
Extraordinary Offering

The improvement in the Lilac, especially in the double sorts, is marvelous, and all lovers of this flower will be delighted with these novelties. In size, form and color they far surpass the old favorites and we confidently recommend them to our patrons. Nothing that has been introduced recently is likely to prove so popular as the new Lilacs.

A beautiful illustrated booklet on Lilacs will be mailed on request, also our Illustrated General Catalogue which contains accurate and trustworthy descriptions of the best

few changes in varieties are made, as compared with carnations.

At the March meeting Albert M. Herr will be the essayist; his subject, "Carnations."

Much satisfaction is expressed here that the Carnation Society goes to Boston next year at the time of the National Flower Show, and it is hoped that the Rose Society will do likewise.

NEW YORK FLORISTS' CLUB.

At the next meeting of the New York Florists' Club the following prizes will be awarded: Prize for the best exhibit of carnations. Prize for novelties sent out in 1908-09; not less than 25 flowers of one variety. Prize for the best 50 carnations or any variety. These prizes are offered by Reed & Keller, Stumpp & Walter, Vaughan's Seed Store.

All exhibits should be sent in care of Mr. Walter F. Sheridan, 39 West 28th street, who will see they are properly staged.

The essayist of the evening will be

Mr. W. H. Taplin on "Carnations." Ladies are invited.

JOHN YOUNG, Secretary.

ILLINOIS STATE FLORISTS' ASSOCIATION.

The fourth annual meeting of the Illinois State Florists' Association will take place Feb. 15th and 16th. As the meeting is at Urbana where the State University and the State Agricultural Experiment Station are located, the meeting will be of unusual importance. The conservatories, put up after the most approved models, will be worth the visit to anyone intending to build soon and the meetings themselves will be of special interest because of the location. A large attendance is expected.

Prof. W. P. Brooks of the Amherst Agricultural College, lectured before the Worcester County (Mass.) Horticultural Society on January 27, on the uses and abuses of commercial fertilizers.

OSMUNDA FIBRE

We offer for immediate delivery in any quantity either the Yellow or Black Fibre of the Finest Grade, suitable for Orchids.

We can also supply at once Rotted or Azalea Peat, Leaf Mold, Live or Baled Sphagnum Moss.

SAMPLES AND PRICES UPON REQUEST

C. W. BROWNELL & COMPANY, WALDEN, N. Y.

MINNESOTA STATE FLORISTS' ASSOCIATION.

At the January meeting of this association the flower show committees were asked to give their final report at the next meeting. The city with the largest guarantee fund will get the show next fall; after that the show will be held alternately in one of the Twin Cities. The entertainment committee reported that the second annual dance will be held at the Ark Auditorium on February 7th (not on the 16th as was originally intended, as the sale of tickets for this date would have been curtailed, it being in Lent).

Nagel & Son exhibited five cyclamens, which scored 88½ points. Messrs. Swanson and Nagel were elected delegates for the year to the State Agricultural Society, which has the management of the State Fair. The president of each auxiliary society is delegate according to the Constitution of the Agricultural Society. It was decided that 50 per cent. of the net profit of the flower show should go to the Minnesota State Florists' Association.

CHICAGO FLORISTS' CLUB.

Installation of officers was the main business at the regular meeting of the Chicago Florists' Club, Feb. 3rd. Geo. Asmus is again occupying the president's chair. Genial Harry Phillipot showed his devotion to the Chicago florists by coming all the way from Winnipeg to be installed vice-president, and says he expects to be here for each meeting. Louis and Ed. Winterson are respectively secretary and treasurer.

ABOUT PLANT TUBS.

Bobbink & Atkins' tub department is very busy at the present time. Most buyers realize how important it is to place their orders for tubs of special size at this season sufficiently ahead so as to be fully ready for spring use. The square model, mission finish, is especially called for this season. This style looks well associated with any kind of architecture.

The prevalent opinion in the Western New York Horticultural Society, in session at Rochester last week is that nurserymen will be able to supply but a small percentage of the young apple trees that will be demanded for planting next spring.

ORCHIDS IN BLOOM ROEHRS, Rutherford, N. J.

CATALOGUES RECEIVED.

S. S. Pennock-Meehan Co., Philadelphia, Pa.—Folder of Smith's Patent Display Vase. A specialty of distinct value for the practical florist.

O. V. Zangen, Hoboken, N. J.—Wholesale Price List of Selected Florists' Seeds, Bulbs and Plants. A very interesting and complete list. All seeds listed by oz. or tr. pkt.

Wm. Elliott & Sons, New York, N. Y.—This catalogue is always happy in the garden scenes selected to adorn its covers. This year's issue shows a pretty formal lawn picture on the front cover and a park view with lake and flower beds on the back, all in natural colors. The contents are up to the usual standard of variety and excellence.

W. Atlee Burpee & Co., Philadelphia, Pa.—Wholesale Seed List for Market Gardeners and Florists. This is the well-known "Blue List." Some very meritorious novelties will be found listed in it. Burpee's "Seeds that Grow" is also received—a Wholesale Catalogue for Seedsmen and Dealers who buy to sell again. This comes in brown covers and is known as the "Red List."

Peter Henderson & Co., New York City—"Everything for the Garden," 1910. A very handsome production as usual. The covers in dark green tints are relieved by embossed gold lettering and flowers in natural colors. The new climbing rose Dr. Van Fleet is beautifully done on the front cover and sweet peas adorn the back. There are colored inserts devoted to sweet peas, roses, etc. This is a 200-page book.

Elmer D. Smith & Co., Adrian, Mich.—Chrysanthemums and Asters. Mr. Smith has now limited his business to these two specialties and, as everybody knows, there is no better authority on what varieties to grow and how to grow them than Elmer D. Smith. The typographical finish is very fine. Half-tone portraits are given of between sixty and seventy varieties of chrysanthemums. White Helen Frick

ORCHIDS! ORCHIDS!

ORCHIDS

We have changed our domicile from Secaucus, N. J., to Mamaroneck, New York. We are the largest collectors and importers of Orchids and we are now booking orders for all commercial Cattleyas for delivery next Spring.

CARRILLO & BALDWIN,
Mamaroneck, New York,

has the position of honor on the cover page.

Leonard Seed Co., Chicago, Ill.—Descriptive Catalogue, 1910. A handsome pansy plate in colors, makes an attractive cover page. The descriptions in this catalogue are unusually exact. This is S. F. Leonard's 25th year in the seed business in Chicago and the conviction on perusing the contents of this very complete descriptive list is that the house is good for 25 years more of prosperity. They have our hearty good wishes for many happy returns of the quarter centennial turn.

R. Vincent, Jr. & Sons Co., White Marsh, Md.—"Geraniums." This is more than a catalogue; it is an album. The typography and paper are of a high order and there is a number of handsome full-page portraits of Mr. Vincent's favorites, five of which are in natural colors and the others with soft tint of green background. Novelities from home and abroad are well represented in this publication and everyone interested in the zonal pelargonium should send for a copy. Wholesale prices are quoted on an insert sheet.

DREER'S DOUBLE PETUNIAS

Our **DOUBLE PETUNIAS**, for more than half a century, have been the acknowledged standard. The strain this season is equal in high quality to its predecessors, and is well known to the trade.

We offer fifteen distinct varieties, in strong 3-in pots, which will quickly furnish an abundance of cuttings.

Strong 3-inch pots, 75cts. per doz., \$6.00 per 100. The set of 15 for \$1.00.

YOU cannot afford, if you grow Carnations and are looking for larger profits on your present capital, not to investigate Dorothy Gordon carefully before you complete your season's arrangements—for Dorothy Gordon has the other commercial Carnations excelled at every point, and it's simply a

matter of justice to yourself to give it at least a fair trial this year.

We have asked our friends to visit our plant and see it growing, and a great many have done so. Have YOU? If not, we urge you to come now, for you will certainly be convinced, as others have been, after seeing it in our houses.

Carnation Dorothy Gordon

possesses all the points that you, a progressive grower, desire in the flowers you supply your trade. Large size (3 inches or more in diameter), fine, uniform color (a shade darker than Pink Enchantress), long, stiff stems, strong constitution and excellent keeping qualities, profusion of bloom—all these are big, important qualities in favor of our new Carnation—and best of all is the fact that its buds command a price 50 per cent. higher than those of the ordinary commercial sorts.

If you want any Dorothy Gordon this year, though, you'll need to get in your reservation at once, as our stock of rooted cuttings is being taken rapidly. Orders will be filled in strict rotation at these popular prices: \$10 per 100; \$75 per 1000.

Give us a chance to show what Dorothy Gordon will do. Come to Wyncote if you can; if not, write for further particulars we'll gladly answer questions.

JOSEPH HEACOCK COMPANY, Disseminators, Wyncote, Pennsylvania.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

COTTAGE GARDENS CO., Inc.
Queens, Long Island, N. Y.

During Recess

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The Roof Conservatory of the Hotel Astor presented a richly brilliant scene on Wednesday evening, February 2. Seventy-five happy souls, released for the time being from all thought of business or care, were there to enjoy themselves and they succeeded. The decorations were on a scale appropriate for the occasion, the music was fine and the menu was on the Astor order, which fully tells the story of the first half.

Then came the speaking. Julius Roehrs, Jr., president of the association, set a good example for brevity in his introductory remarks, welcoming the members and guests and presenting F. L. Atkins as toastmaster. Mr. Atkins called attention to the death during the past year of three useful members of the association—John Scott, Herman Dreyer and E. V. Hallock.

The first speaker called upon was Anton Schultheis who spoke hopefully of the plant market prospects and in advocating closer co-operative relations with the florists' clubs suggested to President Miller of the New York Florists' Club that he should at once get busy on that proposition. President Roehrs and A. L. Miller followed with brief remarks and then President F. R. Pierson of the S. A. F. was called upon. Mr. Pierson's talk was earnest in its advocacy of the social and business advantages of organization. He complimented the gathering on the hearty friendship so evident on this august occasion and the benefits which all must derive from such intercourse.

Treasurer H. C. Steinhoff came next and made a merry speech with stories well applied. John G. Esler was then called upon to locate the hail belt which he did to everybody's satisfaction and was followed by W. J. Elliott who pleaded that he had been "caught with his mits on" and was let off with a good story.

W. J. Stewart responded for Boston, called attention to some of her products, explained the uses of her crooked streets and urged all to plan to be present at the great National Flower Show next year, if not before. Messrs. Drury and Reichhaber and J. G. Whildin of Philadelphia, spoke briefly and to the point. Louis Dupuy complimented the committee of arrangements and wanted the dinner repeated in the near future. J. H. Pepper spoke for the Press and its good influence. Louis Schmutz next made some characteristic remarks. Alex Guttman spoke in congratulatory vein and W. Siebrecht, Jr., was interesting and witty as ever. W. Siebrecht, Jr., reported for the co-operative association and then came J. Austin Shaw, who did ample justice to the toast of the Ladies.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Thursday night, January 27, was a glorious occasion for the members of this prosperous organization old and young, their wives, daughters, sweethearts and friends. It was the annual dinner and dance and the big lecture hall in Horticultural building never

Dame Boston Begins to Get Ready for 1911.

presented a more beautiful and inspiring appearance. The long white tables were simply resplendent with flowers and plants donated by members. Likewise the stage and walls. We didn't count them but there must have been close to three hundred seated at the tables, gentlemen mostly in evening dress and ladies elegantly gowned, and the dinner itself was the best thus far.

During the dinner there was orchestral music, after the dinner there was an hour and a half of speeches and song alternately and then followed the dance which lasted until midnight, after which flowers and plants became the property of the ladies.

The after-dinner exercises were opened by Vice-President Peter M. Miller in the absence of President J. W. Duncan on account of sickness. Wm. J. Stewart was introduced as toastmaster. Responses were made by Ex-President Wm. Downs on behalf of the dinner committee, J. K. M. L. Farquhar to the toast of "Boston," E. H. Wilson for "China," E. O. Orpet for "The Ladies." All the speeches were of a high order and full of wit. The news from Pittsburgh was communicated by the toast-master and the following telegram was sent amid much enthusiasm to the American Carnation Society banqueting at the same hour in Pittsburgh:

"The Gardeners' and Florists' Club at annual banquet congratulate you on successful convention. appreciate the double honor conferred and have set the beans to soak, and look forward with pleasure to 1911."

A message of sympathy to the club's beloved treasurer, Edward Hatch, in his sickness and best wishes for his speedy recovery was passed by a rising vote.

The evening's enjoyment was materially heightened by Miss Marguerite Chaffee in recitations, Miss Nellie Ferguson in fancy dancing, George Collins in comic songs and Miss Jeannie Rifford, accompanist.

The banquet committee consisted of Wm. Downs, J. K. M. L. Farquhar, Robt. Cameron, Peter Fisher and Peter

M. Miller. The reception committee was J. P. A. Guérineau, P. J. Turley, Jas. Wheeler, G. W. Butterworth, Thos. Peglar and Duncan Finlayson. For the dancing Peter M. Miller was floor director, assisted by Joseph Lawson, and J. L. Miller, Kenneth Finlayson, Frank Murray and Edward Rose as aids.

PACIFIC COAST HORTICULTURAL SOCIETY.

Sixty-five members of the Pacific Coast Horticultural Society sat down to their first annual banquet in the banquet room of the Palace, San Francisco, on the evening of January 22. V. Matrala, president of the society, acted as toastmaster. H. Plath, past president, gave a brief history of the society since its inception about eight years ago. As a member of the Society of American Florists, he said he would endeavor to have that body hold its annual convention here in 1915 at the time of the exposition. His remarks were greeted with cheers. Other speakers were: D. MacRorie, who spoke on "Orchids"; John R. Atkinson, on "Plant Life"; C. Shellgrain, on "The Retail Dealer"; A. Roosi, on "Carnations"; E. W. McLellan, on "American Beauties."

DUTCHESS COUNTY HORTICUL- TURAL SOCIETY.

The annual banquet of the Dutchess County Horticultural Society was held at the Nelson House, Poughkeepsie, N. Y., Wednesday evening, January 26. It was largely attended and was one of the most successful dinners in the history of the society, although an impromptu affair, with no set toasts.

Chicago Bowlers.

The Bowling Club of the Chicago florists is as enthusiastic as ever. The score at the last meeting was as follows:

Carnations	700	771	728
Roses	737	759	695
Violets	636	776	725
Orchids	721	734	754

NEW YORK

Seed Trade

Seed trade notes have been rather neglected for the past two or three weeks owing to press of other matters, but more attention will be given them in the future.

The Cannerns.

The Cannerns' Convention, as has been previously announced in HORTICULTURE, will be held at Atlantic City, N. J., February 7th to 11th, with The Rudolf as headquarters. It was stated in these columns last spring that there would be no exhibits this year by the Machinery & Supplies Association, and though several members of the organization have worked strenuously to have the Association reverse itself, they have not been successful. It is barely possible that a few of the supply men may have samples in their rooms, but anything approaching a public exhibit will not be seen this year. The few men who are now in control of the Cannerns' organization will probably learn that the Machinery & Supplies Association, which as these men have said, would be tolerated only during good behavior, will not be supplicants for their favor any longer, but will assert the right of an independent self-respecting body, and unless the Cannerns recede from their foolish and untenable position of seeking to issue orders to the Machinery & Supplies Association the latter will undoubtedly break away and hold their own convention and invite the Cannerns to attend. It would be unfortunate to have a break where honest co-operation could effect so much more, but up to the present time there hasn't been any co-operation, as the word implies voluntary action between two independent bodies. The machinery and supply men have had little or nothing to say about the conduct and management of their affairs, but have received their orders from the Cannerns, which orders have been in the main very meekly obeyed. Let us hope that a spirit of friendly co-operation may be the keynote of the next year; each organization recognizing the absolute independence of the other regarding its own management.

The Postal Deficit.

The agitation over the proposed increase in the rates on certain classes of mail matter has directed attention once again to the abuse of the franking privilege by congressmen. A recent estimate in one of the magazines, placed the cost of the franking privilege at over \$1,000,000, which, of course, is to all intents and purposes a dead loss to the post office department. When it is considered that the cost of handling the free seed distribution amounts to nearly \$300,000 alone, the estimated total of \$1,000,000 does not seem so far out of line. It is quite refreshing to note the attitude of the leading agricultural journals of the country towards the free distribution, and the following from "The Indiana Farmer" is both pertinent and interesting:

It would be well if the farmers could be heard from on the question of sending out free seeds from congressmen to the voters in their districts. Among the objections to the system is the great expense to the government for purchase of seeds, putting up, mailing, etc. There are about eight million

packages sent out annually, or some twenty thousand packages by each representative. Another objection is that the seeds are rarely of any account, and they are nothing rare or new, but such as can be bought at any grocery store. It was the intent when the law was first passed to use the amount appropriated in buying new and valuable seeds in foreign countries, which were not to be had otherwise. It was a wise and worthy purpose in that early day when our seed establishments were few and small, but is entirely unnecessary now, when anything new and good abroad is quickly picked up and propagated by our enterprising "seedsmen" and put on the market.

As to common varieties it seems much the better plan to patronize well-known and reliable firms, and thus be sure of getting the genuine, well-grown article desired, or hold the seller responsible if a mistake is made or the plant does not prove true to name and description. Do the farmers desire to have the free seed distribution system continued, is the question.

Pea and Bean Prices.

Notwithstanding the advance in contracting prices of peas and beans, growers report an exceptionally active and heavy business. Many are already finding it necessary to restrict the quantities of certain varieties which their customers would like to order, simply because they have not sufficient seed stocks to properly care for all the business offered them. This is very gratifying to the growers and shows that the advance which they have been compelled to ask is considered justifiable by both seedsmen and cannerns. It is well that they have taken this view of the situation as it obviates a good deal of unpleasantness and friction between the growers and themselves.

Notes.

Fredonia, N. Y.—A decision against Herman J. Westwood has been returned by Justice Marcus. The man sued Harlow L. Crissy and Elton A. Cole for a share in the profits in a federal seed contract. The case has been in the courts for some time.

Shenandoah, Ia.—Field and Ratekin are feeling very jubilant over having the time extended for using their old seed packets to a time when they expect to get rid of the supply on hand. When the trouble arose between them and postmaster Deater as to the legality of their packets, such as they have always used, they at once appealed to the department at Washington. Congressman Jamieson took their case in hand and succeeded in getting the time extended for the use of these packets until July 1.

Judge McHenry of the law division of the district court on Jan. 20 directed a verdict favoring the Iowa Seed Company of Des Moines, Ia., and dismissed the case brought against it by A. A. Geil, who charged he had been injured to the extent of \$1,175 by the failure of the seed company to give him the kind of seed he ordered, as noted in these columns last week. Geil purchased one kind of clover seed and the company gave him another. He alleged that by reason of the mistake he lost the value of the entire crop, the use of ten acres of land and his time in plowing and tilling the field.

FRENCH BULB PRICES.

Reports from France indicate that prices on French bulbs will undoubtedly be much higher this year. Mar-

Aster

SEED for Sale of our Unique Chrysanthemum Type Variety, bred up the past eight years to a high standard capable of producing its entire bloom perfect, that is to say, free from yellow centers, and also ward off all the diseases so prevalent in all the eastern states, viz., stem, foot, rot, yellows, blight, etc., and produce its bloom stems of a stiff wiry nature from 38 to 44 inches in length, with flowers 4% to 5% inches in diameter, thus enabling the grower to market the cut flowers in cities 2000 miles distant with out deterioration. Seed of this Aster, Lady Roosevelt, by name, is only obtainable from me direct. Write for price of seed and further information. Address—

Peas and Beans

If you want our growing prices for Crop 1910 please let us know.

Alfred J. Brown Seed Co.
Grand Rapids, Mich.

tial Bremond writes under date of Jan. 24th, that the crop is very bad and the farmers expect high prices for their products. Of course, no definite prices have been quoted yet, but there is no doubt that Roman hyacinths especially will be higher and Paper Whites also. Recent reports from other growers all indicate the same conditions.

Of Interest to Retail Florists

The long-contested protest of H. Bayersdorfer & Co. against the assessment of duty by the collector at the port of Philadelphia on certain imported goods for florists' use has been finally decided after appeals by the importer and by the Government. As it will no doubt serve as a precedent for many future cases of a similar nature, we give a synopsis of the decision as recorded by the Secretary of the Treasury:

(T. D. 30277.)

Ornamental leaves.

United States v. Bayersdorfer.
Bayersdorfer v. United States.

U. S. Circuit Court of Appeals, Third Circuit. November 23, 1909. Nos. 17-8 (suit 1974).

1. Ornamental Leaves—Dyed Grasses—Bleached Grasses.

Grasses bleached or dyed, that are intended for ornamental or decorative purposes, are classifiable as "ornamental leaves" not specially provided for," under paragraph 425, tariff act of 1897, rather than under paragraph 566 ("grasses" not

dressed or manufactured"), or under paragraph 449 as "manufacturers' of grass.

2. Same—Prepared Palm Leaves—Palms Preserved.

Palm leaves that have been subjected to a process of painting, etc., to give them their natural appearance and to prevent decomposition, are dutiable as "ornamental leaves" not specially provided for," under paragraph 425, tariff act of 1897, rather than as "palms, preserved" suitable for decorative purposes."

3. Same—Wreaths and Crosses Mounted on Wire—Articles in Part of Metal.

Wreaths and crosses mounted on wire frames are dutiable as "ornamental leaves" not specially provided for," under paragraph 425, tariff act of 1897, rather than as articles in part of metal under paragraph 193.

Paragraph 425 provides for a duty of 50 per centum ad valorem.

Wilmington, Del.—The florist business of the late John J. Kuratle is to be continued by Mrs. Kuratle.

PERSONAL.

T. Mellstrom, representing F. Sander & Son, sailed from New York on the Oceanic, Saturday, January 29.

E. B. Jennings, florist, Southport, Conn., has been stricken with hemorrhages. At last accounts he was improving.

C. W. Scott, manager of Vaughan's Seed Store, New York, was called to Grand Rapids, Wis., last Saturday by the death of his father.

Visitors in New York: Carl C. Cropp, Chicago, Ill.; W. L. Rock, Kansas City, Mo.; Mr. and Mrs. Pettie of the J. M. Gasser Co., Cleveland, Ohio.

Julius Roehrs, Sr., sailed from New York on Monday, January 24, for Trinidad. He will spend the rest of the winter in Caracas, Venezuela, in company of Mr. Sades, the orchid collector. As Caracas has a swell German club, Mr. Roehrs will not be lonesome.

Chas. Loechner, in his sixth week at the Norwegian Hospital in Brooklyn, N. Y., with a broken leg, is getting along nicely and his ever cheerful temperament is no doubt a potent factor towards his rapid recovery. A host of friends will be glad to see him out again in the near future.

MCKINLEY DAY IN BUFFALO.

Never in Buffalo has there been such a general wearing of carnations as on Saturday, January 29th. Men in all walks of life have pinned the spicy flowers to their coats and worn them in commemoration of the President who was murdered in this city. In every street car, in all of the hotels, on street corners, and in the gathering places of men, generally, the favorite flower of the martyred President was worn on that day with a tender recollection. Thousands of flowers were sold and by thousands of men the name of William McKinley was spoken with reverence and solemnity.

BUSINESS CHANGES.

Niles Centre, Ill.—Heinz & Houpt succeed Albert Furmana here. They have six rose houses.

South Bend, Ind.—The downtown store and the greenhouses of the South Bend Floral Company have been purchased by Adelbert and Charles Kinyon, florists. They have taken over the entire business, making the deal through C. E. Campbell, receiver of the South Bend Floral Company. The purchase price is \$10,000. They have secured about an acre of ground on which the houses stand, but the receiver still has 15 building lots to dispose of as a part of the company's property.

NEWS NOTES.

Springfield, Ill.—Thomas Cale, a nurseryman, has been arrested for violation of the law prohibiting sale of diseased nursery stock.

Muncy, Pa.—John P. Ring, formerly with Evenden Bros. at Williamsport, Pa., has bought the property recently owned by A. B. Herbst & Son and will conduct a general florist and seed business.

Flower Market Reports

BOSTON The tendency is toward larger supplies in most lines with a weaker demand for about everything except white carnations, which are moving freely at advanced prices, and small roses suited for general work. The gilt-edged roses are not selling as they should, date considered. There are some Beauties of good quality coming in now, but no sensational call has been noted. Violets are plentiful, but demand is slow. Lilacs are disposed to accumulate and lily of the valley is not selling as well as it did hitherto. La Reine tulips are fairly good as to flower, but deficient in foliage. Narcissi double and single are in full supply. Gardenia demand has flattened out.

Trade has been quite active the past week, though stock on most lines is in short supply. This applies to roses of the short and medium grades used for floral work, etc., while long-stemmed stock is more plentiful. There has been a better call for Beauties and the medium grade sold best, prices holding firm. The demand is a little weak on lily of the valley, violets and lillies. Peas, mignonette, daffodils, tulips, narcissi and other spring flowers were in good demand. The first part of the week found carnations a little scarce, but plenty were to be had on Friday and Saturday, and McKinley day falling on Saturday took a good portion of the heavy shipments that had been held for a day or so. In the carnation line White Perfection is the leader in white and excellent quality stock is being reserved; Enchantress is holding its own, Beacon is very fine and White Lawson good; Melody and Ideal in heavy demand. Lawson and Red Lawson are grown extensively in this section, but seem to remain the longest with the wholesaler. Southern Smilax and other greens have had a good demand, save smilax which has been a little too plentiful.

The condition of the Chicago market cannot be said to have undergone any change during the past week. The buyers who have been in the habit of picking up an armful of flowers for a dollar gave up the attempt some time ago. Only those who have orders waiting to be filled, or who know their trade will pay the price, visit the wholesalers these days. The man who is just looking round and thinks he will buy if he finds something cheap is conspicuously absent. Some of the wholesale houses are taking this opportunity to brush up a little and put things in shape for the business coming with the sunshine. The growers report quantities of buds ready to burst and any day the conditions may change. Tuesday, February 1st, not a white carnation could be bought for less than four cents, but one man with years of experience predicts that before the end of the week the counters will all be filled. The great amount of funeral work continues and the demand for white flowers is not lessened. Rooted cuttings of roses and carnations are also coming on slowly and that the amount will be considerably diminished this season, is the prediction.

(Reports continued on page 205)

Luxury and Exclusiveness In Florists' Ribbons

ARE demonstrated in our new color combinations for VIOLETS, ORCHIDS and ROSES. Some of the loveliest and most changeable shades ever created.

In effective originality these ribbons have no equal for corsage work. One of the most popular patterns is "SUPREME" remarkable for its chameleon like shadings, producing a very rich and beautiful effect.

We offer the following colors:—

- | | | |
|----------------------------------|-------|-----|
| 1. Violet shaded with green..... | No. 7 | 65c |
| 2. Green shaded with violet..... | | |
| 3. Light Cattleya shaded..... | No. 9 | 85c |
| 4. Dark Cattleya shaded..... | | |

PATTERN KILLARNEY has been and is still one of our best sellers, almost every florist in the United States and Canada having bought from us, ordering again and again.

No. 16 width.....\$1.15
No. 22 width..... 1.35

Flower Market Reports.

(Continued from page 203)

Business is moving along briskly. Bulbous stock is coming in freely and disposed of in like manner. Roses are very scarce at present; several growers being off crop and an increased demand for school commencements are the principal causes. Prices for this article have consequently advanced very much. Violets, on the other hand, have declined. The automobile show was no money maker for the florist, still we do not complain, because many a banquet during the year as well as liberal buying by their officers and stockholders, fully covers this apparent deficiency.

Last week saw some good seasonal business in the wholesale flower section, but at present writing conditions are not so lively. Even last week's activity was due more to light supply of flowers than to augmented demand, and it is quite evident that the florist trade as a whole for the winter season of 1909-10 will not measure up to the proportions predicted by sanguine operators early in the season. As to quality, nothing but praise is due most of the stock being received. Roses are and will be for some time at their best. Daffodils, double and single, and tulips in various colors are very plentiful and improving in quality from day to day. Single violets are more in evidence than ever before in this market and are rapidly gaining on the doubles in popularity, as they should. Orchids are in very light supply.

There was very little change in the conditions of this market last week. On the whole the improved situation was maintained, and prices generally remained firm. Towards end of week there was considerable doing in carnations—the McKinley Day celebration helping out quite some. Roses

are a little more plentiful and generally good. Some extra fine Killarneys have been coming in. American Beauties are a trifle more plentiful but are still scarce and high in price. white roses are where they are. Lily ply. White tulips are now plentiful and these help to see the retailers through in their design work while white roses are what they are. Lily of the valley has been a little sluggish. Violets are more plentiful and showing marked activity as compared with early part of the season. Gardenia prices are still low but the stock cleans up well. Both local and out of town demand for orchids above par

Acacia, freesia, daisies, daffodils, mignonette and other spring flowers selling well. Sweet peas much improved.

McKinley day beat the record this year. There has never before been such a demand for carnations. But not only Carnation day, but the whole week was a very good one for wholesalers as well as retailers. Roses are still mighty scarce. Violets are coming in a little better, but still not enough to supply the demand. Daffodil and tulips are just beginning to come in, but so far are rather below grade

APPLE GROWING IN NEW ENGLAND.

The great revival of interest in apple growing which is in progress all over the New England states was amply evident in the large audience and the enthusiasm manifested at Massachusetts Horticultural Hall, Boston, on Saturday, January 29, when E. Cyrus Miller, a successful apple grower of Haydenville, Mass., delivered an address on this topic. Mr. Miller used stereopticon views as practical object lessons in the practice of apple growing, showing every stage of the business from the clearing of the forest, preparation of land and setting out of young trees, to the picking, packing and marketing of the luscious product. He showed conclusively that the industry is a profitable one, that it has an assured successful future and that the hillsides of New England are unexcelled in their adaptability for apple raising by any other district on the continent. After the close of the lecture the speaker was besieged for nearly an hour by a large crowd of intensely interested auditors who propounded questions innumerable which Mr. Miller was all ready to answer convincingly.

PHILADELPHIA NOTES.

Chas. Zimmer of West Collingswood, who underwent a serious operation at the hospital recently, is reported to be all right again and able to attend to business as usual.

Chas. E. Meehan of the Pennock-Meehan Co., is now running a 40th range at his Churchville place in Bucks county in addition to the 11th range in Germantown. He thinks he now has enough for a year or two to keep him busy.

There appears to be a scarcity of tree roses this year both here and abroad. Any one with a surplus to offer will find a generous response from a card in HORTICULTURE. We know of several parties who wish to buy them by the thousand.

That new Rambler rose of Farquhar's must be a wonder. Does it really bloom all summer from June until frost and is it as good in other ways as—say the Philadelphia Rambler? We would like to hear some more about this "Flower of Fairfield."

An excellent four pp. pamphlet by Edwin Lonsdale, on "The Growing of House Plants" is being sent out by W. Atlee Burpee & Co. free. It did not take Burpee long to set his new California manager to work on congenial and telling literature—in addition to strenuous seed-growing preparations at Lompoc.

Where can we get some of those wonderful new things that your splendid oriental correspondent, E. H. Wilson, has been telling us about in recent numbers of HORTICULTURE?, is the question heard here frequently. They do not seem to be advertised anywhere. (R. & J. Farquhar & Co., Boston, have control of the American introduction of these novelties. Ed.)

Our ingenious and original friend, Thos. J. Oberlin up in the "Hog Back" district at Sinking Spring, Pa., grows and recommends for cut flower purposes "the best five" in gladioli: America, Florida, 1900, Augusta, and Madam Monneret. Brother Oberlin is doing a fine work in making these bare spots in the Pennsylvania mountains blossom—and is making it pay at the same time.

The Heller Bros. Co. says that the twentieth century idea in rose plants is quality not cuttings. Cuttings have the merit of cheapness and easy mailing. But good plants of age and well developed are the thing. In other words America is outgrowing her first crude notions in the rose matter and is now educated up to paying the price. Good. Nevertheless don't forget that the rooted cutting was the pioneer and blazed the way for better things.

Acacia pubescens is the much sought for item at present in the spring flower list. Niessen's claim to have the largest daily supply coming to town—also the most superior as to quality and cut from the largest trees in the country grown under glass. This crop we understand is from the Evans' greenhouses at Rowlandville.

The Pennock-Meehan Co. also claim to have the largest and best daily supply of acacia pubescens—"not for publication but as a guarantee of good

faith!" Kind regards to both claimants.

If our esteemed editor wants to get some more ammunition for his just and holy protests over Uncle Sam's post office methods, let him look into the Canadian postmasters' report. They carry printed stuff there for half a cent instead of one cent a pound—and show a profit at that. If a cent a ton, say, were charged against the Congressional Record, maybe that would go a good way towards wiping out the twenty-eight million deficit. The American people are certainly the most easy going and tolerant nation on the face of the earth.

The president's address at the Pittsburgh convention is interesting reading. Is it possible at this stage that carnation growers do not know how much each square foot of their space produces in dollars and cents? I fear the A. C. S. tag idea would meet its Waterloo the minute it reached the retailer. These astute gentlemen want it all for themselves when it comes to advertising. They will not advertise any grower if they can help it. If the growers want that they'll have to open a shop of their own.

Visitors this week: Carl C. Cropp, Chicago; Louis J. Reuter, Westerly, R. I.; J. A. Brown, Coatesville, Pa.

PUBLICATIONS RECEIVED.

"One Year's Business" is the title of a very impressive business proposition being sent out by the McFarland Publicity Company. The name of the publisher is a guarantee as to the typography and general layout of this document. It is a very creditable demonstration of the best standard of horticultural printing and publicity art.

Sweet Peas Up-to-Date. Published, 1910, by W. Atlee Burpee & Co., Philadelphia, Pa.—This book is a commendable endeavor to give both amateur and professional the benefit of more than twenty years' experience in growing this favorite flower at Fordhook Farm. It contains lists and descriptions of varieties and synonyms, full cultural notes and other interesting matter compiled by G. W. Kerr.

Annual Proceedings and Bulletin of the American Rose Society for 1909. Secretary Hammond has given the members of the Rose Society a very neat, tasteful and also useful book—the best yet published under the auspices of the Society. It has some very instructive articles on rose growing and is copiously illustrated. A full list of members is included.

The Horticultural Directory and Year Book for 1910 has been received from the publishers, the "Journal of Horticulture" and "Poultry," office Fleet street, London, England. This annual, now in its 51st year, comprises 624 pages of closely printed information, lists of gardens and trade firms, etc.; indispensable to anyone who seeks to do business in any horticultural requisites or products, in the British Isles or on the Continent.

Richmond, Ky.—John Christman, Jr., has purchased the Richmond Greenhouse from the widow of the former owner, Albert Richfar.

One 9 section Furman, two years old, number 209, \$125; also one large 8 section Lord & Burnham, excellent condition, \$125. One small upright Spencer boiler to heat about 2000 ft. of glass, price \$55. This boiler was bought new last March. Also have one 10 h. p. upright steam boiler and 4½ x 2¾ x 4 steam pump. price for both \$80. Guaranteed O. K. and in good working order. M. Tomback & Co., Sparkill, N. Y.

of incorporation we published last week, intend to do a gardening and specialty business and will cultivate about 75 acres. Benjamin Derby of Concord Junction is president; Albert Haynes, vice-president; H. Harding Hale, secretary, and Howard Wilson of Maynard, Mass., treasurer.

The estate of Frederick Goldring, president of the Albany Florist Club, is the largest floral establishment in Albany county, New York, having about 70,000 feet, located at Slingerlands. The chief products are roses, Easter lilies and carnations. Carnations are this season probably the finest ever produced at Fort Grove, not so many splits as in previous years. Sweet peas are a little late. Any of the craft visiting Albany should not fail to call on President Goldring, who also has charge of the late Col. Hendrick's estate which covers about 300 acres of farm land.

CHICAGO NOTES.

Easter Outlook.

The Easter outlook is a little doubtful. The fact that Easter comes so early this year, does not lessen the difficulty, particularly with the plant growers. Azaleas are assured, as they can get along better than some other plants with dark weather, but there is a good, fair chance that unless the weather changes very soon, the stock of blooming rose plants will be small. Lilies, too, will be hard to coax into bloom unless sunshine comes to help out soon. The growers are too wise to borrow trouble, but they are bending all their energies to put their stock into as good condition as possible, hoping that the all important sunshine will come in time to help them out.

The Mastin Spraying Machine.

This useful device is a Chicago invention. It has been tested in three of Chicago's largest parks with satisfactory results, and is now used in the conservatories at Jackson, Lincoln and Garfield Parks. It is made of galvanized iron in three and eight-gallon sizes, can be carried on the shoulder, and is simple and strong in construction. It is invaluable to the grower under glass for the perfect distribution of liquid fertilizer as well as to the grower of out-door plants. A special attachment is provided for spraying whitewash. A booklet issued by J. G. Mastin & Co., tells how to use the machine for insecticides of various kinds. Send for this booklet. It is free and full of valuable hints. See their advertisement in another part of the paper and do not forget to mention HORTICULTURE when you write.

Personal.

Frederick Sperry is again at his place of business after a week's illness.

Sol. Garland, of Des Plaines, is not in good health this winter, being a sufferer from rheumatism.

Mrs. Paul Kruger, a daughter of Geo. Reinberg, is temporarily acting as bookkeeper for her father.

Report of meeting of Florists' Club and the Bowling Club will be found under their respective headings on other pages.

Fred G. Klinger, for two years bookkeeper at Geo. Reinberg's wholesale store is now filling the same position with John Kruchten.

On Feb. 2, at Seattle, Wash., will occur the marriage of Miss Elizabeth Schneider and John Lydig. Miss Schneider was formerly a retail florist at 105 Dearborn street. Seattle will be their home.

R. Ralston has bought the 43rd street store formerly owned by A. W. Morgan, deceased. This store was formerly owned by Mr. Iralson and at that time Mr. Ralston was an employee and later with J. H. Kidwell & Bros. Mr. Ralston's experience has fitted him for handling a store of his own and the trade wish him success.

Mrs. Percy Jones, who Jan. 1st, took charge of the stand so long occupied

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.
The pump is of brass throughout, simple and powerful.
The mixing device keeps the contents of the tank well stirred up from start to finish.
When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.
Just the thing for distributing liquid fertilizer in greenhouses.
Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street
CHICAGO, ILL.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{1}{4}$ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

E. H. Hunt, 76-78th Wabash Ave.,
Chicago, Ill.

by her late husband in the Flower Growers' Market, is now well established. Though during Mr. Jones' life she was never actively engaged in the work, she has since his death developed an aptitude for it, which is not remarkable when it is recalled that she comes of a family of florists, the Garlands.

Visitors—Christ. Mund, Warsaw, Wis.; will rebuild houses in the spring. C. G. Gilbert, Oregon, Ill. Paul Berkowitz, of H. Bayersdorfer & Co., Phila.

Mr. Ebel of the Aphine Manufacturing Co., has completed arrangements for a public test to be held at Michell's new store in Philadelphia, a place suitably adapted for this purpose, on Lincoln's Birthday, February 12th, between the hours of two and five p. m.

SPRAYED

Insure Yourself Maximum Crops of Excellent
Quality by Feeding and Nourishing
Your Plants with

Evergreen Brand Fertilizer

Specially manufactured for growing Flowers, Ferns, Palms, etc.

Its recommendation is based upon careful, extended and disinterested experiments, showing that this material is a nourishing, easily, available food for crops.

It consists of about half Animal matter and half Minerals, treated and refined, thus it is free from all deleterious substances and will not burn or injure the most delicate plant root, unless an extraordinary amount is applied at the same time.

It is immediately available, and its effect upon most crops may be noticed within six days after its application.

It prevents the onslaughts of plant diseases or insect pests.

It will greatly benefit all greenhouse crops; notwithstanding the richness of the prepared soil, since it furnishes all the Plant Food elements in available forms and sufficient quantities to meet the needs of the plants,

It should receive careful attention, because its right use, permits not only an economical utilization by the plant but a control of its growth; it may be used in such a way as to change the natural tendency, and thus improve it for specific uses; thus, in addition to the increase in yield which it produces, it enhances its market value.

Its uniform action seems to be to stimulate the capacity of the plant for absorbing water and developing foliage and stem growth, and to bring out numbers of new shoots, hence roses and other flowering plants, the best results are secured when this fertilizer is applied during the early growing period, as the energies of the plant are immediately concentrated upon developing its growth.

Can be used at any time during the growing season, Dry or in Solution.

Put up in 12 pound cans, Price \$2.00.

THE GLASS MARKET.

There has been a marked change in conditions regarding the manufacture and distribution of window glass and greenhouse glass within the past few weeks. For several years past this industry has been in a demoralized condition, and the glass has been sold by manufacturers in numerous instances at less than the cost of manufacture. Recently, however, the manufacturers making glass in the old process—that is, hand blown—have put the sale of their glass in the hands of a distributing company, selling, with a very few exceptions, the entire product of all of the factories. This has been followed by considerably increased prices, putting the industry back to a profitable basis. Further increasing the cost to the consumer, there has been a decided increase in the wages of the skilled labor. There seems to be no reason in sight why present values, or higher, will not prevail for some little time to come.

GREENHOUSES BUILDING OR CONTEMPLATED.

Cohoes, N. Y.—F. Fennell, house, 22x100.

Pittsburgh, Kans.—J. C. Steinhouser, three houses.

Hibbing, Minn.—Harry Maker, 60 ft. addition.

Kalamazoo, Mich.—William Thomas, house, 27x100.

Philadelphia, Pa.—Victor Groshen, house, 29x100.

Newton, Mass.—H. A. Wheeler & Co., one house.

West Wareham, Mass.—Everett Benson, one house.

Kankakee, Ill.—Raasch Bros., carnation house, 47x200.

Stratford, Conn.—Mrs. L. G. Mills, addition, in spring.

Louisville, Ky.—F. Walker & Co., addition 5,000 feet in spring.

Rhinebeck, N. Y.—J. Vonder Linden, four violet houses, 18x200.

North Bridgton, Me.—Chas. H. Chadbourne, addition to potting shed and one house, 20x50 feet.

Louisville, Ky.—F. Walker & Co. will add 5,000 feet of glass the coming spring. They have 14 greenhouses with an area of 30,000 feet of glass and cultivate 15 acres of land.

Fredericksburg, Va.—F. T. & S. E. Covey have added four greenhouses, 25x100 feet. This addition will employ from five to ten extra hands and plants for Christmas and Easter will be specialties. With the new greenhouses the plant of eight houses has an area of 25,000 feet of glass.

Compare Them

The cost of the wooden house with our Iron Frame House; bear in mind that the Iron Frame costs less to erect, less to keep in repair, and gives you greater returns in quantity and quality of flowers, than the best cypress house made. This construction pays for itself many times over.

The next best proposition is our Half Iron Frame House. Send for circulars.

The Advance Co.
RICHMOND, IND.

This is what happens to an open mortise joint—it lets in the weather, causing it to quickly rot.

Here is another effect of open mortise joint. Such a sash, made such a way, is short lived, soon becomes twisty, loosening the putty and breaking the glass.

Buy our **Sash That Last**, then your **Sash Will Last**.

THESE SASH ARE NOT OUR SASH

You never saw any of our **Sash That Last** rotted and loosened at the joints this way.

Here's a case of wrong construction and inferior wood, slapped together any old way, just as most sash are made.

A good sash costs good money. A cheap sash isn't cheap at any price.

OUR ANNUAL SASH OFFER

gives you a good chance to try our sash and prove to your own satisfaction that there is not another sash made as good or that will last as long.

Here's the offer for unglazed—

One Sash, One Dollar—you pay freight.

Five Sash, Five Dollars—and we make freight allowance.

If sash are not entirely satisfactory, send them back, at our expense, and back will come your money. The offer holds good for month of February only.

Order at once; February will roll by before you know it.

Rice's Grand New Catalogue

You are treating yourself unfairly if you do not study this grand new book of up-to-date florists' requisites. Every progressive florist can obtain helpful ideas and

Without Cost

to himself by sending for it. Sent free to all in the trade. Whether you buy or not, we shall be glad to have you get acquainted with us. Write today. The edition is limited. Enclose business card.

Special Notice

We beg to advise our customers that during the erection of the additional floor to our new six story building at 1220 Race St., there will be no interruption to business. Same will go on as usual. The generous patronage of the florists of America has compelled this expansion of facilities in about two years; whereas we thought when building before that we had ample for all possible expansion in twenty years. You will be gratified to hear of this evidence of the prosperity of your "Favorite Supply House."

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of Elegantissima has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, **Pieroni**, **Whitmani**, **Scottii**—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pots, \$12.00 per dozen.

DAHLIAS Every Day in the Year

Plant Novelties From China

"New Roses of merit are made, not discovered," is a trite expression. How true this is is readily seen on comparing our garden Roses with their wild progenitors. Nevertheless the wild species have undeniable beauty and many are worth growing for their own sake to say nothing of the potentialities they may possess. This being so Rosarians in particular welcome the advent of a new species or variety of wild rose since they always open up wide possibilities. China is not only the home of the parents of our tea and rambler roses but of many other species of merit. Altogether some 30 species of Roses are known from China and rose-bushes are extraordinarily abundant. In central and western China two of the commonest roses are the Banksian and Musk roses. The first-named frequently covers trees 30 ft. high and in May festoons them with masses of white.

Wild roses are extremely variable and really distinct species are rarely met with in these days. The wilds of the Chino-Thibetan borderland have, however, yielded several and two of the best of these are *Rosa Moyesii* and *R. Willmottiae*. The first-named is a strong growing species, forming a bush 8 to 10 ft. high and as much through with large and ample foliage. The flowers are flat, 3 inches across, borne singly on short spurs, with petals of great substance. The color

ROSA SOULIANA

is very taking being a rich, deep red. *R. Willmottiae* forms a bush 6 to 8 ft. tall with arching, glaucous stems, rather small, glaucescent leaves and numerous, straight, straw-colored prickles. The flowers are small, solitary, of a delicate and very pleasing shade of rosy-pink. The whole aspect of this rose is exceedingly charming and pretty and the specific name is in appropriate compliment to one of the most famous garden-lovers of our time and an enthusiastic devotee of the Rose—Miss Ellen Willmott.

Rosa Moyesii is native of the upland thickets and *R. Willmottiae* of the dry, arid river valleys of the Chino-Thibetan borderland.

R. sericea var. *pteracantha* is an extraordinary rose, very beautiful in flower and fruit with large, decurrent, crimson, translucent prickles which extend down the stem from node to node.

In addition to the above the Arnold Arboretum has in cultivation several other new species and many distinct varieties of *R. moschata*, *R. sericea*, *R. multiflora*, *R. macrophylla*, *R. pimpinellifolia* and others about which it is too early to express opinion as to their merit as garden plants. Introduced quite recently through the agency of Roman Catholic priests from these same regions of China are two distinct species of *Rosa* which deserve to be better known. One is *R. Hugonis*; the other *R. Souliana*. The first-named is an erect growing, yellow-flowered Rose allied to *R. xanthina*; *R. Souliana* is allied to *R. moschata*—forms a large subscandent bush, 15 ft. tall and as much through. The flowers at first pale yellow quickly change to pure white.

Thanks to the introduction from China of several new

ROSA MOYESII

species of *Deutzia*, and to *D. discolor*, var. *purpurascens* in particular, Emil Lemoine has in recent years given us a new race of extremely beautiful hybrids. At the present moment there are in cultivation species superior to those the famous French hybridist had to work with and in the near future we shall probably have *Deutzias* as much superior to the present hybrids as these are to the original forms. *Deutzia discolor* var. *major* and *D. Wilsoni* are two new species having large, corymbs of pure white flowers. The last named is the largest flowered *Deutzia* known, the individual flowers being more than an inch across. Both are vigorous growing species, 3 to 5 ft. tall. *Deutzia globosa* is another new species with erect branches and large, thyrsoid panicles of rather small, white flowers. The best and most striking *Deutzia* of the whole family is, however, *D. Veitchii*. This is a truly remarkable plant with erect branches, 3 to 5 ft. tall, and large trusses of deep, rose-lilac colored flowers, each flower being upwards of three-quarters of an inch across. This plant will shortly be in commerce and the writer ventures to predict that it will create a sensation when made known.

These new *Deutzias* are all native of the thickets of central and western China between 3,000 to 6,000 ft. altitude, are hardier than most of the family and in every sense are useful and desirable acquisitions.

Hydrangea is a genus rich in ornamental and free-flowering species. This family abounds in the thickets of central and western China, the individuals forming bushes 6 to 20 ft. tall. The flat corymbs of flowers, usually white, more rarely pink or purple, are often more than a foot across. The genus is in a chaotic state and until some competent botanist takes it in hand the writer prefers not to indicate any by specific names.

Philadelphus is represented in China by several closely allied species, all beautiful but none with distinctive merits over the older and well-known species and varieties.

Dipelta is a genus allied to *Abelia* and entirely new to cultivation of which the writer has been privileged to introduce two species, *D. floribunda* and *D. ventricosa*. These form bushes 5 to 10 ft. high, with bright, rose-pink flowers in size and shape resembling those of *Diervilla*. The plants are remarkably free-flowering and once seen not readily forgotten.

Lonicera finds its headquarters in China, the writer on his last journey having collected material of forty species. Many of these are shrubby and welcome additions to the family. One of the very best of all is *Lonicera hispida*, var. *chaetocarpa*, a bush 2 to 4 ft. tall, with ovate, hairy leaves and tubular, pale yellow flowers, as large as those of *Diervilla*, borne in the axils of the leaves. The plant is very hardy and free-flowering and the flowers are followed by attractive orange-red fruits. *L. prostata* is a new species adapted for rock-work with neat, ovate leaves and axillary, pale yellow flowers. *L. Maackii*, var. *podocarpa*, forms a large bush 8 to 12 ft. tall, with straight, spreading branches and white flowers arising from the axils of the leaves. *L. tangutica*, *L. saccata*, *L. deflexicalyx*, *L. szechuanica* and several of the species are in cultivation but have not yet had time to prove themselves.

S. W. Wilson.

Trans-Atlantic Notes

NOVELTIES IN DWARF SHOW, AND GROUPING DAHLIAS

The following remarks on Dahlias in Germany may be of interest to cultivators in the United States seeing that the cult of the Dahlia, owing to the introduction of new forms in the flowers, the size of the plants, and novel arrangement of the coloring have created an increase of interest among the general public. The results of cross-breeding in the genus are most strikingly apparent in the dwarf varieties so suitable for garden decorations and pot culture, and are sure of a future. Some of these still possess certain imperfections, but these will soon be driven out of cultivation by more perfect varieties. At the same time the cross-breeders must do everything possible to obtain a rich display of color and dwarfness of habit. In Germany the raising of dwarf Dahlias adapted for cultivation as pot plants for market is now extensively carried on. The crosses between tall and dwarf varieties of show Dahlias which unite the good points of each form an ideal class for planting in beds and groups. The following varieties, some in commerce, others not, may be briefly alluded to, viz., *Gruppenkonigin*—flowers of medium size, bright red; *Kolibri* (Humming Bird), bears flowers in prodigious numbers—color described as "Aurora"; *Matador*, bright red; *Erica*, light salmon pink; *Goldperle* is an introduction of last year, canary yellow, petals ray-like, a good plant for pot culture; *Blauer Zwerg* is likewise a novelty of 1909, flowers small purple violet with a dash of blue. Cultivators of these dwarf varieties should not afford the plants much manure; and when the soil is rich in humus and well cultivated it is advisable to omit doing so for several years running.

DWARF CHRYSANTHEMUMS

To insure the flowering of dwarf plants of chrysanthemums at the end of the month of October the cuttings must be taken at the end of August. Naturally the shoots chosen as cuttings should be well set with flower buds, and inserted in pots of a diameter of $2\frac{1}{2}$ inches, and till rooted be kept on a lukewarm manure bed. In order to maintain a dwarf habit in the plants cool air must be admitted to the frame which is best assured by shading during the bright hours, syringing and ventilation at frequent intervals. When the plants begin to make roots through the soil place them in the open air, covering them with the lights in rainy weather. No repotting should be done, but weak manure may be afforded occasionally. The best cuttings are obtained for this purpose from strong plants of the previous year once repotted. Good varieties are *Madame Gustave Henry*, and *Souvenir de Petite Amie*.

NATIONAL CHRYSANTHEMUM SOCIETY

At the meeting of the executive committee of the Society held on January 17 it was resolved to hold an exhibition in September, one on November 8th and 10th and another on December 14th. The chairman announced that it was the president's wish that the Society should make arrangements for an exhibition to be held at the close of the Brussels International Exhibition in the month of October; and the president appealed to members to contribute a representative exhibit, as at the Paris exhibition of 1900. Mr. Harman Payne was nominated as the Society's delegate to the Horticultural Congress to be held at Brussels in April next.

A BORDER OF AMARYLLIS BELLADONNA VAR. GIGANTEA

Last year at the Botanic Garden at Kew, visitors enjoyed a rare treat in a border planted with uncommon

things, which is worthy of mention. In June an efficiently drained border was planted with the *Amaryllis* bulbs, with an edging of *Zephyranthes candida*, a plant which has white flowers and dark green foliage, and it had a pretty effect. As *Amaryllis Belladonna* flowers in its leafless state, the soil between the bulbs was planted with *sedum*. The conditions for successful growth and flowering are first, a sunny position, a porous soil and firm planting; water being afforded in hot weather.

A HYBRID BETWEEN ALBINO ORCHIDS

At the meeting of the scientific committee of the Royal Horticultural Society on January 11 a flowering plant was shown by Mr. Thwaites, of Streatham Hill, London, of which *Cattleya Mendelii* alba was the male parent, crossed with *Cattleya Gaskelliana* alba, the female one. The flowers were not of a clear white as are the parents, but had a faint pearly tinge. Up to the present two plants have borne flowers with the same characteristics and others are in bud; in which stage they appear to be white.

FIGUS RADICANS FOL. ALBA VAR.

We have in this *Ficus*, a rare and pretty variegated basket and climbing plant. Although not quite a novelty, it is still infrequently seen in gardens, notwithstanding it being a plant of easy propagation and culture, like the green leaved type, *F. radicans*. Owing to its white variegation and climbing habit, there are many purposes to which the plant may be put; not only as a basket or vase plant, but likewise to form ornamental globes and pyramids, which present very charming effects; and it affords, when there is a lack of white flowers, welcome material for the finer kinds of florists' work, in particular for wreaths and garlands.

ORNAMENTAL LEAVED BEGONIAS

During recent years a new type of ornamental foliaged begonias has come to the front in Germany, the fore-runners of which were varieties of *B. Rex*. Aware of the facts that the earlier *Rex* begonias possessed beautiful leaf coloring and that they were, as regards the leaves and leaf stalks, very brittle and easily injured, therefore not suitable for market purposes, and because of their entailing much difficulty in packing and carriage, the efforts of the hybridists have been directed towards crosses of the large-leaved species with those which are tall growers. One of these cross-breeders, Herrn Fobe of Ohorn, whose novelties of this class possess pleasing coloring, erect, spreading growth, and flexible leaves, properties very essential in market plants, and as decorative objects in winter gardens and conservatories, is now offering some of them. The following are recommended for potting purposes, and as good salable plants for the florist. The variety *Flora* possesses dark green leaves with silvery white tips; in Germania the middle area is brownish green with silvery markings on the outer half; *Lusatia* has silvery white leaves with a reddish suffusion and veins of dark green; *Saxonia* has silvery white blotches on a ground color of green, the edge and mid-area being of a brownish green tinge; and *Perle von Ohorn* has a silvery white leaf suffused with carmine—a fine plant for cutting purposes. These varieties are of proved value and may be highly recommended for the purposes named. A *Begonia* hybrid named *Chicago*, of another race, has leaves of silvery white and the entire plant is very effective. It has great powers of resistance and reaches a height of two feet.—*Otto Maedicke, in Die Gartenvelt.*

Fredrick Moore

Vitis Thunbergii

Several years ago a very handsome large-leaved vine was introduced to England from Japan and received the specific name of *Thunbergii*, but as another small-leaved *Vitis* of no particular merit from a horticultural standpoint had been known for many years under this name—and also a native of China and Japan—this naturally led to some confusion. The vine to which I wish to draw attention was distributed by the Messrs. Veitch of Chelsea, England, and is consequently known as *Veitch's Vitis Thunbergii*, but it is considered by many eminent botanists, Mr. E. H. Wilson among them, to be a variety of the well-known *Vitis Coignetiae* which is highly valued for its extreme hardiness and ornamental character. Considering that the true *V. Thunbergii* is of little value and only seen in botanic gardens it may be well to retain so honored a name as *Thunbergii* for this very superior form of *V. Coignetiae* and much disappointment and confusion would be avoided if it were listed by botanic gardens and nursery establishments as *Vitis Coignetiae* var. *Thunbergii*. However, be the name what it may, this is, undoubtedly, the handsomest and most imposing of all cultivated vines and would supersede *V. Coignetiae* if it were better known in this country. For any position where climbing plants can be utilized it is a magnificent plant but it will be seen to the best advantage if planted on a pergola or pole in a situation fully exposed to the sun as the wonderful autumnal tints are then most brilliant.

It is not advisable to plant this vine in a rich soil or one that contains any manure as this conduces to very rapid growth which does not become fully ripened. An ordinary loam with moderately good drainage is the best rooting medium and then it will easily make fifteen to twenty feet of growth in one season after becoming established, which a very robust constitution soon enables it to do. Copious supplies of water during extremely dry weather are, of course, beneficial.

Although in general appearance it resembles *V. Coignetiae*, this vine has much larger foliage, the individual leaves, which are dark green on the upper surface and clothed with a dense soft down on the under side measuring one foot to fifteen inches in diameter. No one can fail to be impressed with this gorgeous vine in the fall when it puts on the most brilliant coloring composed of scarlet, crimson and gold, and in this country it would be more effective than in England owing to the brighter and more persistent sunshine. As with all ornamental vines for outside culture it is advisable to cut this variety hard back the first season after planting, as the growth is then much more satisfactory.

Arthur E. Thatcher

Dendrobium formosum giganteum

One of the finest dendrobiums in cultivation. Its handsome white flowers are invaluable to the florist, being very largely used for bridal bouquets and other work requiring choice white flowers. A native of Burmah, it enjoys a hot moist temperature when making its growth. The flowers are produced in clusters. Well-grown plants will bear clusters of from 5 to 10 flowers each and when one considers the market value of the flowers one wonders why not more are grown. One thing to be remembered if anyone wishes to grow this species successfully is to buy only strong plants. They can be had for about \$1.50 each freshly imported.

In the nature
 of an experiment

We have heard, thus far, no unfavorable comment on the decision of the American Carnation Society to suspend its time-honored custom and hold its meeting next year jointly with the Rose Society at the National Flower Show in March.

Friends of all three organizations generally seem much gratified. Of course, it is a special occasion and the Carnation Society's move must be regarded largely as an experiment; nevertheless it may be reasonably accepted as an evidence of a changing sentiment among the rank and file of the Carnation Society towards the S. A. F. and the beginning of a closer relationship between these organizations in their work. Time will gradually work out the problem as to the best form which the cooperative movement should take so as not to hazard the best interests of all concerned. The outcome of next year's trial at Boston will have a decided bearing on the policies and future relationships of both national and local organizations.

The agitation and enactments in various states of so-called pure-seed inspection laws must, of necessity, hasten the time when a national law for seed

inspection will be inevitable. The wisest course for the seed grower and seed dealer under the circumstances, it seems to us, is now to take advantage of every means of disseminating a better knowledge of the truth as to seed admixtures and impurities, that the public may have a proper conception of the situation, its causes and its remedies as the seedsman knows it, to the end that when a national seed inspection law is framed it may be a just one, and the expression not of a blind prejudice but of an enlightened public sentiment. Much of the present inconsiderate clamor may be laid to ignorance of facts and conditions, and it is likely to go on continuously as long as these misconceptions exist. The average man who sows down a piece of lawn and discovers eventually that it is full of quack grass, dandelions or other noxious weeds, will invariably be found ready to join the hue and cry against the seedsman. A campaign of education through the newspapers might do a world of good. Is not this in line with the aim and scope of the "Council of Horticulture"?

The Pittsburgh Sun, in an editorial, while giving due credit to the generous and almost reverent sentiment which

was and is so strong a factor in the establishment and the nurture of the McKinley Day carnation custom, has some things to say about the movement which, although based on some measure of truth yet seem harshly severe and will, we doubt not, awaken a resentful protest in the hearts of many who, otherwise might take little notice of McKinley Day. The remarks of the "Sun" are brought out by the proposition looking to make the scarlet carnation the State flower of Ohio "as a token of love and reverence for the memory of William McKinley," and it is disposed to criticize the movement as a "purely partisan" affair. It is too bad to bring to the surface even a suggestion of such motives and from our distant viewpoint it looks as though the journal quoted was itself the first transgressor. Still we question whether the custom of carnation wearing on McKinley Day has any strong element of permanency in it and we see no reason to change our views, as expressed in these columns several years ago, that the less fuss, from a business standpoint that the florists make about it the longer they will have the benefit of McKinley Day demand, such as it is. Above all else the quickest way to kill the custom is to advance the price of carnations on that day.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Begonias.

We have now quite a number of varieties of *Begonia semperflorens*. Very few other bedders are so satisfactory for certain outdoor decorative effects as these begonias. They are exceedingly good for the florist who deals in bedding and pot plants, for marking sharply cut lines, and also for massing purposes. Seeds of *Begonias semperflorens* and *Vernon* and its varieties should be started now. Use light soil. Sow the seeds very thinly over the freshly watered surface. Press them firmly into the soil with a piece of smooth brick or board. The seeds are so very minute that they need no covering. These begonias can be propagated from cuttings also.

Cinerarias.

From now on the plants intended for Easter will likely need a little more heat, unless they are very far advanced. They should have a very light bench, plenty of room, an abundance of air and must never be allowed to become dry. They should have mild but frequent fumigation. They can also stand sprinkling with tobacco water now and then, which should easily keep them free of aphids. When the flower trusses begin to show and all along before they show color, they should be fed with liquid manure of any kind, say twice a week, but not too strong. They will be improved both in substance and color of the flowers by it.

Ferns.

This is a good time to look over your ferns. It is possible that some of your stock has not been overhauled for some time and some will need potting. If any have got too large for your use, divide them up and repot in sizes big enough to allow an inch of soil around the clumps. Where the plants only need a shift, merely remove the crocks from the bottom of the plants and any loose soil before they are repotted. A good compost for ferns consists of equal parts of loam and leaf-mold with some sand; if manure is used it should be thoroughly decomposed. See that your ferns for filling fern dishes, have good attention. While they don't like syringing, the atmosphere that surrounds them should be kept moist. When ferns have filled their pots with roots liquid manure stimulant may be given at short intervals all through their growing season. By its use the plants are kept in a vigorous, thriving condition, with much less pot room than would otherwise be necessary. Seedling ferns will require all the care possible. Seed spores should be pricked off when large enough to handle, into flats, and all that are of sufficient size should be potted at once. *Adiantums* are always in demand, and various *Nephrolepis*, such as *Bostoniensis*, *Whitmani*, *Scottii* and *Elegantissima*; also *Pteris cretica* Mayii, *P. serrulata* cristata, *P. Wimsetti* and *Cyrtomium falcatum*.

Gardenias.

These plants can be retarded or advanced with ease. To have good success with gardenias the young stock should be raised by the grower himself in preference to southern grown stock. The cuttings that were taken from the parent plants in January and

AZALEA MADAME PETRICK.

This is one of the newer varieties of *Azalea indica* and in the three or four years in which it has been available to the trade in this country it has acquired a reputation as one of the most desirable ever introduced and has enjoyed a demand far beyond the present supply. Its popularity with the florist trade is due largely to its early forcing character. It can be easily brought into bloom in November and will be widely used for that reason. The flower is a very fine bright pink, something like *Van der Cruyssen* but smaller. *Azalea Madame Petrick* was introduced to the trade by C. Petrick of Ghent, Belgium, who named it after his wife, now deceased.

put in sand should be potted up as they become ready and grown on in a temperature of about 60 degrees. The young plants should be repotted as they require it. Give them plenty of moisture and see that they are kept free of insects. Don't fail to syringe them on all favorable occasions. If you have plants in the benches at this time with a full promise of a good crop, be sure and maintain a temperature of 65 degrees at night with little or no deviation either way. This means everything in the perfect development of gardenia blooms.

Outdoor Frames and Hotbeds.

It will be well for the florist to look over his cold frames. The exposure to the weather soon puts them in need of repairs. Now is a good time to make any repairs necessary so as to have them ready when wanted to relieve over-crowded houses. Frames protected with some covering or mats will not be a risk for plants of a half-hardy nature. To make a hotbed put in some fresh horse manure about eighteen inches deep and tramp well; when the weather gets warmer less will do. Allow about a week or so

The late W. K. Harris is credited by Robert Craig as having been the first to import this variety to this country. With characteristic prudence Mr. Harris would not divulge the name of the variety or where he bought it, but, nevertheless, Mr. Craig managed to get a good consignment himself the following year.

There are other azalea novelties to be put on the market in the near future which have been tested by sample only as yet, but which give promise of great superiority to the old standard sorts. *Mme. August Haerens* is one of these. It has a very large flower of bright crimson red and fine foliage.

after making for the intense heat to abate. When the temperature is down to a steady point of 80 degrees, spread a layer of fine soil of five inches for seeds; if for plants, roots or bulbs, more soil should be used. Be sure and see to ventilation on all bright days.

Primula obconica.

The stock that is in four-inch pots, if they are well filled with roots, can now be shifted into five or six-inch pots. They like a rich soil—a mixture of good loam, well-decayed manure and leaf mold. Thus handled they will produce a great wealth of bloom for two months that will pay well for the trouble. Be sure and make up some pans for Easter by using three or four plants from four-inch pots to a pan. They are sure to be as popular and useful as ever. Seedlings sown in January, when large enough to handle, should be pricked out into pans or shallow flats. As soon as they have made leaves an inch long, they should be potted in two-and-a-half-inch pots. Give them plenty of air and keep them as near the glass as possible to prevent them from drawing up.

J. J. M. FARRELL.

NEWS OF THE CLUBS AND SOCIETIES

NATIONAL COUNCIL OF HORTICULTURE.

The National Council of Horticulture held a meeting at the Auditorium Annex, Chicago, Jan. 17, 1910. There were present C. E. Kendel and C. Cropp from the American Seed Trade Association, E. D. Smith and W. E. Rudd from the Society of American Florists, J. H. Burdett of the Press Bureau Service, J. C. Vaughan, Chairman, and H. C. Irish, Secretary. Letters or telegrams were read from J. Horace McFarland, J. Otto Thilow, F. R. Pierson and C. L. Watrous.

The term as delegates at large of Professors W. B. Alwood, S. A. Beach and S. B. Green having expired, Professors Alwood and Beach were elected to succeed themselves and Professor J. C. Blair of Urbana, Ill., was elected to succeed Professor Green. It was announced that C. Cropp and C. E. Kendel were the authorized representatives in the Council from the American Seed Trade Association, J. Otto Thilow, E. D. Smith and W. N. Rudd from the Society of American Florists, C. L. Watrous and Guy A. Bryant from the American Association of Nurserymen, H. S. Watson and J. F. Wilson from the National Nut Growers' Association.

The Secretary reported \$183.22 on hand and \$200.00 available from the American Seed Trade Association or a total of \$383.22 for the current year's work.

Mr. J. H. Burdett made an interesting report on the press bureau work.

The possibility of instituting a paid service was suggested, but after a full discussion it was thought inadvisable to do so at this time. After further discussion the Secretary was instructed to ask the assistance of experts in the preparation of articles and to arrange a schedule for their distribution as soon as practicable. Some sixty subjects were suggested, one-half of which, the members present pledged to prepare. It was arranged to send out at least ten installments this spring, beginning the latter part of February.

H. C. IRISH, Sec.

FLORISTS' CLUB OF PHILADELPHIA.

Friday evening, February 4th, was Ladies' Night and a very enjoyable evening was spent by all who attended. President Heacock held a reception from 8 to 8.30 p. m. The games of bowling and shuffleboard were then started, ladies only being allowed to participate. The bowling prizes were won by Miss Koehler and Mrs. Dorp, the shuffleboard prizes by Mrs. Schwartz, Miss Shellem and Miss Glosster. At 9.30 p. m., refreshments were served, the men present having to wait upon the ladies before partaking of anything themselves. During the evening songs were sung by H. G. Crosby, Edward Dooner and A. G. Campbell. Miss Koehler gave a recitation which was very well rendered. The ladies kept up bowling until 11.30 p. m., and all hoped the club would have another Ladies' Night before long. The club room was decorated for the occasion by the house committee.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The February Show.

The following additional classes have been added to the list already published for the exhibition to be held in Horticultural Hall, Boston, on February 26, 27 and 28. The major portion of these classes should specially attract competition from commercial growers. The February show will take the place of the regular spring exhibition which it promises to equal in nearly every respect. Exhibits are already promised from New York, New Jersey and New Hampshire, in addition to Massachusetts:

Carnations.

50 white	\$6	\$4	\$3
50 flesh pink (Enchantress shade)	6	4	3
50 light pink (Winsor shade)	6	4	3
50 deep pink (Lawson shade)	6	4	3
50 scarlet	6	4	3
50 crimson	6	4	3
50 white variegated	6	4	3
50 yellow variegated	6	4	3
50 mixed (private gardeners only)	6	4	3
100 any one variety with foliage	12	8	6

Roses.

25 Killarney	12	8	6
25 any other pink variety	12	8	6
25 White Killarney	12	8	6
25 Richmond	12	8	6
25 American Beauty	15	10	
25 any other variety	12	8	6

Violets.

100 (bunch) Princess of Wales	4	3	2
100 any other single variety	4	3	2
100 Lady Hume (Campbell)	4	3	2
100 any other variety	4	3	2

Miscellaneous.

Mignonette 25 spikes	5	3	2
Antirrhinum 25 spikes	5	3	2
Lily of the valley 50 sprays	5	3	2
Basket of flowers (for retail florists)	15	10	5
Group of flowering and foliage plants covering 100 square feet	40	20	10
3 Palms, distinct varieties, not less than 8 feet high	15	10	5
12 Hard wooded plants (Azaleas, Acacias, Ericas, etc.)	20	12	8

The preliminary schedule of prizes previously issued provides for primulas, orchids, cyclamens, spring bulbous plants, roses, carnations, sweet peas, fruits and vegetables, prizes amounting to \$400 in addition to sundry medals. Printed copies may be had on application to secretary W. P. Rich.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of the club will be held at Horticultural Hall on February 15. S. J. Goddard will speak on Carnations. This being carnation night there will be an unusually large and interesting lot of exhibits comprising many of the newest varieties. Those unable to attend the Pittsburgh convention will here have an opportunity of looking over the candidates for popular favor.

A cordial invitation is extended to any who are not members of the Club to be present on this occasion. We will be very glad to welcome everyone interested in the divine flower and are planning for the largest regular meeting in the Club's history.

W. N. CRAIG, Sec.

NEWPORT HORTICULTURAL SOCIETY.

An unusually well-attended meeting of this Society was held Tuesday, Feb. 8, and as we previously stated that arrangements were made for five papers to be read by five members at this meeting it proved to be one of the most interesting and instructive meetings the society has ever held. The subject of the paper was horticultural exhibitions, each paper treating on a separate part of the exhibition under the following headings: The Utility and Mission, Preparing Exhibits, Arranging, Judging, and How to Secure Attendance, each of the papers taking from ten to fifteen minutes to read. James Robertson took the first part, covering it in so clear a way that it was said there was no room for criticising it. The second part was handled by John P. Hammond whom we have lately discovered to be a wit and an orator of the first water. He covered his subject very thoroughly and in a way that caused much laughter. Bruce Butterton was the next with the arranging part, going into all the details and showing us where improvements could be made in ways that most of us had never thought of, and many of his suggestions are likely to enter into our system at our next exhibition. The judging part was filled by Richard Gardiner, who from long experience was probably the best qualified for that task. How to secure attendance was ably handled by John Forbes who suggested many novel and good schemes to draw the crowd. A lively discussion was indulged in after all papers were read and good speakers were numerous.

FLORISTS' CLUB OF WASHINGTON.

The regular monthly meeting of the Florists' Club of Washington was held at Eagles' Hall on the night of February 1st. It was known as ladies' night and there was a good attendance in consequence. Nomination of officers resulted as follows: For president, George H. Cooke, John Robertson, F. H. Kramer and E. C. Mayberry; for vice-president, E. C. Mayberry; for secretary, O. A. C. Oehmler, W. A. Bollinger and Jas. L. Carberry; treasurer, William F. Gude, to succeed himself. There were two vacancies on board of directors to succeed W. S. Clarke and Geo. H. Cooke for a three-year term; nominees, W. W. Kimmel, O. A. C. Oehmler, David Grillbotzer, C. A. Shaffer and Jas. L. Carberry. The members then retired to the main hall where refreshments were served and quite an array of professional and amateur talent entertained them with song and dancing. Prof. Victor gave a darkey sketch, Miss Wolf a song and dance, Prof. Charlemagne Koehler, the inimitable, gave several recitations. Judge Robert Lee Montague in a very flowery speech drew a parallel between ladies and flowers. Music was furnished by Prof. Pistoria's orchestra. Dancing continued until a late hour.

BANQUET OF NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

CONNECTICUT HORTICULTURAL SOCIETY.

The first business meeting of the year was held at the County Building, in Hartford, on the 28th ult. Charles H. Plump, of West Redding, Conn., who is the secretary and treasurer of the Agricultural Experts' Association, whose headquarters are in New York city, was welcomed to membership in the Society, making the 150th member. J. A. Weber, gardener for Walter L. Goodwin, exhibited at this meeting six very handsome specimens of cineraria plants, all in 12-inch pots. C. H. Sierman and H. A. Pinney were appointed judges and awarded a certificate of merit to Mr. Weber.

The secretary read communications from various Connecticut congressmen, and from the postmaster general, acknowledging receipt of the recent resolutions in favor of the parcel post, and nearly all expressing their sympathy with the movement.

President John F. Huss delivered an able address on the subject of hardy ferns, and received a vote of thanks. He gave a resume of his thirty-five years' acquaintance with ferns, beginning with his employment, in early life, in the noted Clapton nursery of Hugh Low, in London, England, where he had charge of the tender greenhouse ferns, and ending with his recent experience in propagating hardy ferns for the beautiful estate of James J. Goodwin, in Hartford. To illustrate the method of propagation, mostly from spores, Mr. Huss brought pots from the greenhouse, showing the miniature plants in several stages of development; some being just visible above ground, and others having been pricked out for the first time. The lecture showed great familiarity with the minute particulars of successful fern culture, and was the first of a series of addresses that President Huss hopes to obtain, from other members, at future meetings.

C. O. Purinton briefly told of his

efforts to resuscitate old apple trees infested with the San Jose scale, by the use of judicious pruning, and spraying with Scalecide. He mentioned a tree of the Peck (formerly Peck's Pleasant) variety on his grounds. It is now 57 years old, and was thought, four years ago, to be irredeemably lost to the scale. As a practical illustration of how he had been able to save the tree by the means above mentioned, he passed around perfect samples of the fruit, left from the three barrels that the tree bore last season. This is an old Connecticut apple of first quality, not now much employed as a commercial variety, but highly esteemed for home use.

GEORGE W. SMITH,
Secretary.

A NEW HORTICULTURAL SOCIETY.

A very interesting event took place in Yonkers, N. Y., on the evening of Jan. 28—the inauguration of a horticultural society. It has long been felt that the time was ripe for such a move, and it only needed some one to make the initial start; and the first meeting was a very enthusiastic one. That the efforts of the promoters was a decided success is shown by the fact that nearly sixty members were enrolled. The following officers were elected: President, E. Bennett; secretary, W. H. Waite; vice-president, R. Cochrane; corresponding secretary, Lee Whitman; treasurer, P. Macdonald. Executive committee: H. Scott, J. Goff, T. Mahoney, R. Cummings, L. Taylor, A. Macdonald.

President Bennett and Secretary Waite both had large experience in such societies, and all the other officers and the executive committee are good, live men and hustlers.

LEE WHITMAN, Cor. Sec.

ROYAL HORTICULTURAL SOCIETY

At the second meeting of the various committees of the society on January 25, the exhibits were far less numerous than usual and those of most importance were orchids, of which only one received a first-class certificate and three were distinguished by awards of merit. Messrs. Sander & Sons, St. Albans, were exhibitors of several varieties of *Laelia anceps*, including L. A. Ballantinei, L. A. Sanderiana and L. A. Hollidayana, all of which are comparatively new introductions. A very finely colored cattleya *Triana Magali* Sander received an award of merit. Charlesworth & Co. showed *Angulca Cliftoni*, a new introduction from Columbia. The flower is of the same size as *A. Clowesii*, but is different in color and form from that and all others. A first class certificate. Mrs. Norman Cookson, showed *Odontodia Bradshawia*, a variety certificated by the R. H. S. in March of last year. The plant had a spike of ten flowers.

CHICAGO FLORISTS' CLUB.

The regular meeting of this club was held Thursday, February 2, at the Union Restaurant, and the installation of officers was the chief business. President Asmus appointed the following committees: Transportation—E. F. Winterson, M. Barker, F. Lautenslager. Sports and Pastimes—T. C. Yarnall, Allie Zeck, F. Ayers. Good of the Club—Herman Schiller, F. Pasternick, J. Degnan.

The 9.40 a. m. train, Illinois Central Railroad, February 15th, was chosen as the official train to carry the florists to the meeting of the State Florists' Association at Urbana. The secretary was instructed to extend the thanks of the Chicago Florists' Club to the Pittsburgh Club for their courtesies during the recent convention.

TARRYTOWN HORTICULTURAL SOCIETY.

The Fall Show.

At the regular monthly meeting of the above society held in their rooms on January 28th, after routine business had been transacted the matter of the fall show was taken up and the dates fixed for November 1st, 2nd and 3rd. The committee appointed at a former meeting to make inquiries regarding a suitable place for the show reported that the Tarrytown Hall could not be had but that very suitable arrangements could be made for the Irvington Town Hall. They reported this as being equally as large as the Tarrytown Hall and even better suited for the purpose of a flower show. On their recommendation it was decided to hold the show there. John Brunger, gardener for Mr. I. N. Seligman, Irvington, N. Y., was appointed manager of the show.

Some Very Fine Cyclamen.

The monthly prize, for two plants of Cyclamen, was won by James Stuart, gardener for Mrs. F. A. Constable, Mamaroneck, N. Y., with splendidly grown specimens. So highly did they appeal to the judges that they recommended the awarding of a cultural certificate in addition to the regular prize. On a vote of the members present being taken the certificate was unanimously awarded.

The subject of the evening being Cyclamen, Mr. Stuart gave a very instructive account of the method by which he obtained such good results.

At the next meeting of the society the subject is to be Roses, the monthly prize being offered for a vase of twelve other than American Beauties. Mr. M'Hendry, gardener to Mr. W. A. Read, Purchase, N. Y., will give a talk on rose culture.

For the March meeting the prize is offered for three varieties of forced vegetables.

WILLIAM SCOTT, Cor. Sec.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

At the Club meeting on the 1st, all were anxious to hear the reports of the committees handling the entertainment of the Carnation Society and when the reports of the finance and exhibition committee showed between three and four hundred dollars unexpended surplus, hearty congratulations and praise were given those whose efforts had brought about such a successful ending to the labors of the last few weeks. The memories of the banquet with its good fellowship, will abide with us for long, and if our guests can only carry away equally as pleasant memories of the convention as the members of the Pittsburgh Florists' Club will retain, the convention, indeed, will have been a grand success. The thanks of the Club were extended to the committees.

Election of officers for 1910 resulted as follows: F. Burki, president; P. S. Randolph, vice-president; H. L. Blind, treasurer; H. P. Joslin, secretary; C. S. Crall, assistant secretary; Jno. Bader, E. C. Reineman and J. L. Wyland, executive committee.

The secretary was instructed to tender the thanks of the club to the H. J. Heinz Co. for courtesies and luncheon extended the club and guests

on the 26th, and to write a letter of sympathy to John Reimels of Woodhaven, L. I., who was taken sick while attending the convention.

Mr. Muller representing Julius Roehrs Co., of Rutherford, N. J. was present at the meeting with four varieties of Cypripedium. They were Cypripedium x Olivia, C. x Leeannum Clinkaberryannum, C. x Leeannum Josephianum, C. x Minos Youngii.

Prizes were awarded in the private gardeners' competition; for cyclamens, David Fraser, first; Frank Crook, second; for carnations, Carl Becherer, second. The judges were Harry A. Bunyard and J. W. Jones. Cultural certificates were awarded Carl Becherer for Saintpaulia Ionantha grandiflora atrovioleacea, Primula sinensis and cultural commendation for Primula Kewensis. Cultural certificate to Frank Crook for Cypripedium Leeannum and honorable mention for Cineraria Matador.

For the March meeting special prizes of \$6.00 and \$4.00 are offered to the private gardeners' by H. Waterer of Philadelphia for three 7-in. pans hyacinths in 3 varieties, three 7-in pans tulips in 3 varieties.

Subject for next meeting, Easter Plants and Flowers.

H. P. JOSLIN, Sec'y.

APHINE ON FERNS

Two Millions of Ferns J. F. ANDERSON Five Hundred Varieties
Grown Annually. FERN SPECIALIST of Ferns in All Sizes.

Short Hills, N. J., Jan 31, 1910

Aphine Mfg. Co.,

Madison, N. J.

Gentlemen:—Kindly ship me at once, by U. S. Ex., two gallons of Aphine. The last gallon received from you has been thoroughly tested, and proved to be a most effective exterminator of all such insects to which ferns are subjected. If your preparations are of uniform strength, a solution of one to fifteen will be safe on the most delicate ferns.

Yours respectfully

J. F. ANDERSON.

The manufacturers of Aphine guarantee a uniform product at all times, and, if directions are carefully followed, that it will do all we claim for it

A PUBLIC APHINE TEST

will be held in Philadelphia on Saturday, February 12th, 1910 (Lincoln's Birthday), from two to five p.m., at the new seed store of

HENRY F. MICHELL COMPANY, 1018 Market Street

You are cordially invited to be present and to submit any plants, shrubs, or stock that may be infested with insects or disease, so that we may demonstrate to you the wonderful merits of this new insecticide discovery—APHINE.

APHINE MANUFACTURING COMPANY
MADISON, NEW JERSEY

AMERICAN CARNATION SOCIETY. Notice of Registration.

E. G. Hill Co., Richmond, Ind., register carnation Niagara—The Belle X Unknown. Pure white. Size, 3 to 3½ inches. A free grower, strong and healthy.

A. F. J. BAUR.
Secretary.

CLUB AND SOCIETY NOTES.

A meeting is to be called at Topeka within a short time for the purpose of organizing and incorporating a Kansas State Florists' Association.

The Pennsylvania Nurserymen's Association elected Samuel C. Moon, Morrisville, president and Wilmer W. Hoopes of West Chester, vice-president of the association.

The annual dinner of the New York Florists' Club will be held at the Fifth Avenue Building Restaurant, Twenty-fourth street, west of Broadway, Thursday evening, March 17th, St. Patrick's Day.

The officers of the newly formed Nebraska State Florists' Society are as follows: President Irwin Fry, Lincoln; vice-president, Lewis Henderson, Omaha; secretary, Edw. Williams, Grand Island; treasurer, M. Atkinson, David City. The organization will act as an auxiliary to the State Horticultural Society.

PRESENTATION OF H. J. VEITCH'S PORTRAITS.

No one in the horticultural world of Great Britain is held in higher esteem than Mr. Harry J. Veitch. The presentation of the portraits took place at a complimentary dinner on January 25, in the hall of the Royal Horticultural Society. Mr. Veitch's practical assistance in all charitable work connected with gardening and gardeners is known to all; and it is not surprising that the response of the public was so spontaneous and liberal. The enthusiasm shown by those who took part in the formal presentation on Tuesday, great though it was, inadequately represents the esteem and affection in which Mr. Veitch is held by the horticultural fraternity. How thorough are the good wishes which he received may be gathered from the speeches made at the presentation dinner, on account of which is given in "The Gardeners' Chronicle," of January 29. One of the portraits was presented to the R. H. S., and the other to Mrs. Veitch. Among the company of 150, which included several ladies, were Sir Trevor Lawrence, president of the society, and many well-known and influential gentlemen. After the loyal toasts had been proposed, the chairman read a telegram from Baron Schroder, conveying heartiest congratulations "to our dear friend Mr. Veitch whose services to horticulture, not only to Great Britain, but to the whole world, deserved recognition." The chairman also read a letter from Col. Holford, regretting that, owing to an operation, he could not be present to take part in a gathering to do honor "to one of the most distinguished and popular horticulturists that ever lived."

FREDERICK MOORE.

HARRY JAMES VEITCH.

The name of Veitch is a household name in horticultural spheres the world over, and in this country, equally with the old country, do we honor the present head of this famous house. The Veitch establishment was founded at Killerton, Devonshire, about 1808, by John Veitch, grandfather of the present Mr. Harry J. Veitch. About 1832 it was established at Exeter, with James Veitch, son of the founder, at the head, and in 1853 moved to Chelsea, London.

It is no disparagement to other great horticultural firms to proclaim that the house of Veitch has done more for horticulture generally than any other single establishment. Pioneers in hybridization and selection, to them we owe the commencement of our orchid hybrids, tuberous begonias, winter-flowering begonias, hippeastrums, streptocarpus, nepenthes, etc., etc.

As early as 1840 the firm despatched their first collector, William Lobb, and his work has been continued almost interruptedly down to the present day. Veitch's travellers, twenty-five in all, have ransacked the world in quest of new plants, and to the enterprise of this firm we owe a large percentage of the plants of our gardens and greenhouses of today.

In 1865 the subject of our note, having previously assisted his father,

joined the firm as partner. Since then, with one brief interim, he has been actively engaged in its management, and for several decades has borne its destinies on his shoulders. A keen business man to his finger tips, large and open-hearted, his firm's employes worship him and one and all strive their utmost in hearty co-operation. No employer could be idolized by his employes more than is "Mr. Harry," as he is fondly termed. But Mr. Harry J. Veitch has done more than consolidate and extend a huge

HARRY JAMES VEITCH

business; his work for the advancement of horticulture in its manifold branches has been enormous. For more than half a century Mr. Veitch has been a prominent mover in all and every matter associated with horticulture across the water. With brain and purse he has (and still continues so to do) assisted every movement which has for its object the advancement of horticulture. The gardener never had a truer and warmer friend than Mr. Veitch, nor one who has labored more in the interest of indigent and aged gardeners and orphans of gardeners. Deeply religious and philanthropic, his assistance to multitudinous charities is constant and unostentatious, for his right hand never knoweth what his left doeth in these matters.

Orchids and nepenthes are among his favorite plants, and we owe to him some valuable papers on these subjects. He is a member of several scientific societies and his private hobbies are farming and pictures, and his collection of the latter contains many fine examples.

We congratulate our friends across the water on the possession of a worthy portrait of a worthy man, and

Beautiful! Novel! Valuable!

The Newest Lilacs

Double and Single

Extraordinary Offering

The improvement in the Lilac, especially in the double sorts, is marvelous, and all lovers of this flower will be delighted with these novelties. In size, form and color they far surpass the old favorites and we confidently recommend them to our patrons. Nothing that has been introduced recently is likely to prove so popular as the new Lilacs.

A beautiful illustrated booklet on Lilacs will be mailed on request, also our Illustrated General Catalogue, which contains accurate and trustworthy descriptions of the best

FRUIT AND ORNAMENTAL TREES, SHRUBS, ROSES and HARDY PLANTS

Ellwanger & Barry, Mount Hope Nurseries, Rochester, N.Y.

the council chamber of the Royal Horticultural Society, in company with portraits of Sir Joseph Banks and others, is a fitting place for the portrait of Harry J. Veitch. Beloved and honored by all sorts and conditions of men in many lands, long may he yet be spared to adorn the science he has done so much to advance.

E. H. WILSON.

THE CARNATION SHOW.

(Verses by Arthur G. Burgoyne, in Pittsburgh Chronicle-Telegraph.)

Where the sign "Fort Pitt," suspended
From a palace vast and splendid,
Offers standing invitation to the traveler
to step in,

If today you chance to enter,
Guided by some knowing Mentor,
You will find a bow'r of loveliness to
Paradise akin.

There in friendly contest meeting
And for honors high competing
Are the kings of horticulture, with ambitious
pride aglow,
Each his best endeavor making
To achieve a record-breaking
And astounding grade of merit at the
Prize Carnation Show.

Oh, the gems that they're displaying,
By their wizardry essaying
To excel the work of nature, as apparently
they do,

Since their art today discloses
Blossoms as fine as Beauty roses
And with nuances of color which Dame
Nature never knew.

There's the glorious Perfection
With its snowy-white complexion
And the Mrs. Thomas Lawson with its
rosy tint and, oh,

There in all its gay bravado
Is the golden El Dorado,
And the scarlet Craig illuminates the
Prize Carnation Show.

There's the pink Enchantress beaming
And the Daheim darkly gleaming;
There's the Victory, the Manley and the
dainty Queen Louise,
And a host of new ones render,
By their tinged and penciled splendor,
Joy unbounded to the connoisseur who
raves o'er blooms like these.

And our town is in the running.
Hands that never lose their cunning
Vindicate the fame of Pittsburgh and let
all our neighbors know

That we're up in floral science,
Hence with joyous self-reliance
We bid welcome to all comers at the
Prize Carnation Show.

Little Rock, Ark.—The State Horticultural Society elected officers Jan. 19, as follows: President, D. E. Elcher, Johnson county; second vice-president, H. H. Childers, Morrilton; secretary, Prof. Ernest Walker, Fayetteville; treasurer, J. W. Vestal, Little Rock. The retiring president, W. H. H. Shibley of Van Buren, becomes the first vice-president by virtue of his office as president for the preceding year. Executive committee: J. A. Bauer, chairman, Judsonia; A. W. Poole, Ozark; O. W. Patterson, Gentry; Lafayette Marks, Springdale; M. F. H. Smeltzer, Van Buren.

THE ROSE SOCIETY, ITS AIMS AND OBJECTS.

Why the Small Rose Grower Should Join the American Rose Society.

(Adolph Fahrenwald before the Florists' Club of Philadelphia.)

I have often wondered why so many small rose growers give the Rose Society the cold shoulder. The large rose growers all seem to be members. Why should this be so? Has the small grower no benefit to expect as a member of the American Rose Society, or is he prejudiced against it? Surely there is no cause for either of these reasons. The most of them have not come near enough to see and understand. It is time then that they make an earnest effort to see and understand, and by doing so they will soon recognize the value of this organization in the many tasks which it endeavors to fulfill; every one being of vital interest to every rose grower.

As I said before, the large growers are all members. Now, did you ever stop to think why they are? Surely not for the fun of it. They are all too shrewd business men. The money they invest this way must bring them some interest. "Light your pipe," as they say, and think this over—it is worth while. It is high time that we, as rose growers, took notice that the carnation is pushing the rose into second place in the favor of the public.

It is impossible for me, in this short paper, to go into all the different points of usefulness of the American Rose Society—to pluck them apart and hold them up to the searchlight. I will merely confine myself to the yearly exhibition and convention—their value as an education and inspiration.

On March 16, 1910, the yearly exhibition and convention will be held in New York city. Now, fellow members, this gives you a fine opportunity to realize the value of such an exhibition as an education and inspiration. Most of us think we grow better roses than the other fellow. An exhibition will open our eyes. Roses that at home we thought wonderful often diminish decidedly in our estimation when placed in competition with others. Here is the education if we want to see it. We are in this business for money. If roses are not up to standard, we will not realize on them as we should. This may be a bitter pill to swallow, but it should be the inspiration for a greater and continued effort, which will easily pay in the future for the little time and money it took.

At the exhibition, we also have an opportunity to see alongside of the old standards, the new varieties. The originators of these new varieties are sure to be at hand, each man eager to explain the strong points of his particular favorite—his rival only too eager to point out the flaws. There too, you will see many of the brightest lights in the rose-growing profession, from whom you can get valuable pointers. You have the great pleasure of meeting old friends. Besides, the social side of these gatherings has a charm which no one who has ever attended can forget.

While we can read in our trade papers the essays read at the convention meetings, yet we miss the after discussions and criticisms, which are a most important and essential part of

NEW CARNATIONS

The Two Prize Winning Introductions of the Cottage Gardens

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seeding, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Price, Rooted Cuttings

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, 25 at the 100 rate, 250 at the 1000 rate.

Delivery Feb. 20th.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter on strong, erect stems 36 to 42 inches in length.

AWARDS

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Price, Rooted Cuttings

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery March 1st.

These varieties bring from \$2.00 to \$4.00 per 100 more than any other carnation sold in the New York market.

COTTAGE GARDENS CO., Inc.

QUEENS, LONG ISLAND, N. Y.

such meetings. Then, too, the enthusiastic arguments of some members, the hair-splitting arguments of others, the sound advice of those who confine themselves strictly to business so that one fairly sees the dollars sticking out, all combine to make these meetings serve as food for thought for many a day thereafter.

To make this Rose Society a success, it needs the interest and enthusiastic support of all rose growers, large and small, over the entire country. Everyone who grows roses for a living should feel it a sacred duty to belong to this Society; in fact, everyone interested in roses should belong and help bear out the motto of the Society, "A rose for every home, a bush for every garden." Then, anyone growing roses for a living, who cannot or will not be interested in the work of this Society will be the one who continuously kicks about bad times and prices and howls about the "good old times." He is a dead one—"Peace be to his ashes."

CLUB AND SOCIETY NOTES.

Austin, Minn.—The Southern Minnesota Horticultural Society has elected as officers: President, O. H. Peterson, Albert Lea; vice-presidents, J. C. Hawkins, of Austin; O. W. Moore, of

Spring Valley; P. Clausen, of Albert Lea; treasurer, Chris Berthelson, Albert Lea; secretary, L. W. Prosser, Le Roy.

At the annual meeting of the Wisconsin State Horticultural Society, the following officers were elected: President, William Toole, Baraboo; vice-president, A. J. Smith, Lake Geneva; secretary, Frederick L. Crane; treasurer, L. G. Kellogg Ripon. The treasurer reported total receipts of \$8,075.68, of which \$8,000 is the state appropriation. The entire sum was expended.

At the annual meeting of the Rhode Island Horticultural Society at Providence, officers were elected as follows: President, Edwin H. Burlingame; vice-presidents, Col. R. H. I. Goddard, Hon. George Peabody Wetmore, Thomas Hope, Prof. H. J. Wheeler of Kingston College, Rev. George Kent, Jacob Swarts and William Appleton. Charles W. Smith was re-elected secretary; Richard M. Bowen, treasurer; Addie F. Holland, librarian; W. Whitman Bailey, botanist. The treasurer's report showed total receipts for the year of \$1,437.46, of which \$1,396.37 was paid for premiums and bills, leaving a balance at the end of the year of \$41.19. The permanent funds of the society amount to \$2,666.

Carnation Dorothy Gordon at Pittsburg

You must have seen and admired our Carnation Dorothy Gordon at the Pittsburg meeting, if you were there; our exhibits of this superb new variety attracted a vast amount of attention and caused much favorable comment from the hundreds of visitors who saw it. If you missed the show, just notice the very flattering mention that "Dorothy Gordon" received in the reports appearing in your trade publications of last week.

Our exhibit of 100 "Dorothy Gordon" in Section "A" won Second Prize; but more than any award we value the opportunity that many more of our friends had at that meeting for seeing this worthy new variety and passing on its merits at first hand.

We have already sold more than 100,000 rooted cuttings this season and the limit of our growing capacity has nearly been reached. If planning to feature "Dorothy Gordon" this year, you should get in your order at once. Not much time is left, anyway—so write us NOW if you want any stock this spring. Don't delay! Prices remain as previously quoted

C. W. BROWNELL & COMPANY, WALDEN, N. Y.

CHICAGO NOTES.

The State Florists' Association.

Last week, the coming meeting of Ill. State Florists' Association at Champaign-Urbana, brought the officers of that society, including Pres. C. E. Gullett of Lincoln; Sec'y J. F. Ammann, Edwardsville, and F. L. Washburn, Bloomington, to the city to join local members of the advisory board for the State Experiment Station.

The preparations are now complete for the fourth annual meeting, Feb. 15th and 16th, to be held at the University Twin Cities where the 4000 students and 400 members of the faculty will join with the florists from all over the prairie state in an enthusiastic meeting. The floral display and small devices for florists' work will be exhibited in the foyer of the new Auditorium on the campus and exhibits may be sent or taken to Geo. B. Franks, Champaign, who will stage them properly.

No small part of the interest in this meeting centers in the fact that here is located the Ill. State Experiment Station and the opportunity for the florists to get in touch with its work to their future benefit. The program includes many good things among which we may mention genial Phil J. Foley, who is the big man of the state in more ways than one.

The program is as follows:

Tuesday, February 15, 2.00 o'clock.
Address of Welcome, Dr. Edmund J. James, President of the University of Illinois, Urbana.

Response, Phil J. Foley, Chicago.
Report of the Secretary, J. F. Ammann, Edwardsville.

Report of the Treasurer, Frank L. Washburn, Bloomington.

Report of the Secretary of Advisory Committee for the Illinois Florists' Experiment Station, Willis N. Rudd, Morgan Park.

Address—"The Value of the Experiment Station to the Florists, and the Duty of the Florists to the Station," Prof. J. C. Blair, Chief of Department of Horticulture, University of Illinois.

The Annual Banquet will be served at the Beardsley Hotel, Champaign, at 7.45 p. m., Tuesday, February 15th.

Wednesday, February 16, 9.00 o'clock.
Address on Behalf of the Illinois Outdoor Improvement Association, Dr. J. W. Garner, Professor of Political Science, University of Illinois, Urbana.

Address, "Our Work," H. B. Dornier, Associate in Floriculture, University of Illinois, Urbana.

Report of Auditing Committee; Unfinished Business; New Business; Question Box; Election of Officers; Adjournment.

The Exhibition of Cut Flowers and Novelties will be open to the citizens of

ORCHIDS ROEHRS, Rutherford, N. J.

Champaign-Urbana, to the students and faculty of the University, and to all who will accept our invitation to come, from 7.00 p. m. to 10.00 p. m., Tuesday, February 15, and from 9.00 a. m. to 12.00 noon, Wednesday, February 16.

Executive Committee Meeting.

The executive committee of the Horticultural Society of Chicago met at the Art Institute, Feb. 4th, W. N. Rudd in the chair. Geo. Asmus submitted a proposed premium list covering an outlay of \$4500 with \$200 additional for specials and \$1000 for running expenses. The whole was voted to be brought up for action at the next meeting. J. C. Vaughan was elected chairman of the executive committee for the present year. The reports show the expenses of the flower show at the Coliseum, in 1909, to have been \$10,193.00 and the receipts in round numbers to be \$12,000.00, which brings the balance on the right side and a smile to the faces of the managers of the big event.

Business and General News.

Notwithstanding the scarcity of flowers, florists are not lacking in nerve to enlarge their business. Daniel Branch who has a retail store at 315 E. 51st street, has bought out F. Radke, at 539 E. 43rd street, and will operate both stores. A new store has also been opened at 59th and Halsted streets.

The corner in the Atlas Block, so long occupied by the Benthey Coatsworth Co., was vacated last week and the buyers of flowers will hereafter find that familiar place filled with furniture.

D. D. Johnson has just returned from Grand Rapids, Mich., where he has been arranging for experiments by the Grand Rapids Greenhouse Co., with his Evergreen Brand Fertilizer, both for flowers and for vegetables. The Agricultural College at Cornell is also testing it.

Wietor Bros. will begin the work of rebuilding a range of their greenhouses as soon as the weather warms up a little.

A Lange captured a \$500 wedding decoration at Ottawa, Ill., on the 8th.

STUART LOW & CO., late of Hugh Low & Co. dissolved, are now receiving large importations of **BURMESE DENDROBIUMS**, such as **Wardianum**, **Crassinode**, **Fimbriatum**, **Devonianum**, **Nobile Brymerianum**, **Thyrsiflorum**, etc., and will give excellent value.

Also hold very large stock of **WARDIANUMS**, **CRASSINODES**, etc., to flower **THIS SPRING**.

Also **LAELIO-CATTLEYAS**, **BRASSO-CATTLEYAS**, **ODONTOGLOSSUMS** in spike, all for Spring and early Summer flowering.

OUR QUARTERLY WHOLESALE PRICE LIST, issued January 1st, offers a full line of seasonable Plants, Seeds and Bulbs.

HENRY A. DREER, Philadelphia, Pa.

ROEHRS, RUTHERFORD N. J.

PALMS, All Sorts and Sizes

for the asking. It is as usual a fine product.

At the J. B. Deamud Co.'s, there is on exhibition a handsome 9 inch loving cup with stag handles. It has this inscription: Individual Bowling Trophy for Highest Average Man, Season 1909-10. Chicago Florists League.

Mrs. Percy Jones informs us that the statement in these columns that she had taken active charge of her late husband's wholesale flower business is not correct; but that Henry Van Gelder is in charge.

Personal.

Wm. J. Smyth is happy to lay aside his crutch and cane and call himself a well man again.

Conrad Frauenfelder who was seriously ill at the time of his wife's death is now able to be about.

Roy Wilcox of Council Bluffs, Ia., was in Chicago with his bride last week. Mr. Wilcox was graduated from the Agricultural College at Cornell last year and immediately went into business with his father.

Fred Liebermann is receiving the

congratulations of his friends. He was married Feb. 3rd to Miss Clara Dick and has just returned after enjoying a short trip. Mr. Liebermann has charge of the shipping department at Vaughan & Sperry's.

Visitors—C. E. Gullett, Lincoln, Ill.; J. F. Ammann, Edwardsville, Ill.; F. L. Washburn, Bloomington, Ill.; Prof. J. C. Blair, Urbana; A. C. Brown, Springfield. C. G. Anderson, Kenosha, Wis.; F. V. Craig, representing Wm. Hagemann & Co., N. Y.; E. Amerpohl, Janesville, Wis.

See obituary column for notice of death of John Orsesky.

Shade trees grown as they should be grown, with straight stems and properly formed heads are often hard to find. There is a big demand for such from buyers who know their value, and at Bobbink & Atkins nurseries in Rutherford, N. J., particular effort is being put out in this direction, with the result that they have a remarkably handsome stock of oaks, elms, maples, lindens, etc., ready for the coming spring sales.

MARTIAL BREMOND

Martial Bremond of Olloulou, France, is the largest grower of strictly first class French bulbs in existence. His clientele is composed of the most critical buyers all over the world. They are men who have bought Bremond products for many years, and know the value of his bulbs. Horse-shoe Brand Products in French bulbs are "Bremonds" and which means that they are the best the market affords, in the various sizes offered.

"IMPURE" FRUIT TREES.

A tree, as it grows in the nursery, can hardly be called manufactured goods. It is a product of nature and therefore unadulterated. But hold a bit! Under the laws of Illinois a nurseryman has been arrested for selling impure fruit trees—that is to say, trees infested with scale. That is a good law. Buyers ought to be protected from the serious menace of that costly insect. Because a commodity is a product of nature is no more justification for its sale, if infected with disease, than a tubercular cow, or doctored milk or any other disease-germ carrier. —Burlington, Ia., Hawkeye.

Seed Trade

Holyoke, Mass.—John F. Murphy, of 388 Appleton street, left New York Saturday for another orchid collecting trip to South America.

Augusta, Ga.—The N. L. Willet Seed Co., of 309 Jackson street, will move to 849 Broad street May 1st. The new store will give this company about 12,000 square feet.

San Francisco, Cal.—C. C. Morse & Co. have started a seed farm at Mt. Eden, near Haywards, and are planting it largely to onions, radishes and sweet peas, principally in the latter.

Killarney, Man.—The fifth annual seed fair and poultry show, held on Jan. 27, brought out a good show and a large attendance of farmers. Out of 37 entries only four were rejected on account of noxious seed admixture.

Augusta, Ga.—The N. L. Willet Seed Co. will remove about May 1 from 309 Jackson street to 849 Broad street. The new store will be 225 feet in length. They will have 2½ stories, with all modern facilities for business.

Carthage, Mo.—The seed and poultry supply business of the Carthage Seed Co. of 203 Main street has been sold to the Tucker Seed House of 114 Main street. The Carthage Seed Co. will continue in business with agricultural and garden implements.

Bound Brook, N. J.—A. C. Zvolanek, the sweet pea specialist, has just returned from the Pacific coast and Old Mexico. He has started sweet pea growing on a large scale, having already 168 acres in different parts of California seeded down to sweet peas, 58 acres alone in his special strain of winter flowering varieties. He will also grow mignonette, asters, cosmos and other flowers for florists' seed trade.

Toledo grain and seed interests will fight to the last ditch the two bills recently introduced in the Ohio legislature to place a penalty on the marketing of seeds containing impurities or foreign matter. Such a measure was introduced in the previous legislature, but after it had reached a point where it was near to becoming a law Toledo and other seed dealers convinced the lawmakers that the legislation was impracticable.

Richmond, Va.—A bill has been introduced in the Virginia House providing for the examination of seeds sold in the state by experts of the State Department of Agriculture. Any consumer or any dealer may send samples for inspection. All packages which do not conform to a certain standard are to be marked as to the amount and nature of impurities, and for packages improperly marked a fine is provided. This bill is indorsed by the State Board of Agriculture.

INCORPORATED.

St. Louis, Mo. The Schisler Seed Co., capital stock \$20,000. Arthur W. and Jacob Schisler, Ed. Kaercher and W. S. Essmuller.

Beverly, Mass.—The North Shore Ferneries Co., capital \$5000. F. S. White president, L. N. Pickman treasurer and James Whitman secretary.

Petersburg, Va.—The Grossman Seed and Supply Co. C. F. Grossman president, G. C. Burgess vice-president, U. S. Ivey secretary and treasurer. Capital, maximum \$50,000, minimum \$10,000.

BUSINESS CHANGES.

Clinton, Ind.—J. H. Ricketts has purchased the Sunnyside Floral Company's place.

Wheeling, W. Va.—Frank Seibert has rented the place formerly run by Edward O'Neil.

Jacksonville, Ill.—The Harry Hoffman Floral Co. will remove up to town to the Routt Building.

Montvale, Mass.—John Flood of Dedham has bought the greenhouse establishment of the David Fisher estate and will take possession in the early summer.

San Diego, Cal.—Miss Kate O. Sessions has purchased of E. F. Langford property in Grossmount Park, including many thousand carnation plants, a half acre of violets, several acres of sweet peas, etc.

Of Interest to Retail Florists

"The Flower Shop," Pittsfield, Mass.,
opened for business on February 1.
The affair was very successful and
there was a large attendance of well-
wishers.

At the funeral of General Draper,
Hopedale, Mass., Gude Bros. of Wash-
ington, supplied some very fine floral
work. Large quantities of orchids, lily
of the valley and violets were taste-
fully used in tributes from the family
and from the employees of the estate.
Mr. Gude sent a representative from
Washington to Hopedale with these
flowers to insure their arrival in good
condition and to see that they were
properly placed.

PERSONAL.

G. W. Mason, who has been fore-
man at the greenhouses of the Dole
Floral Co., Beatrice, Neb., for the past
seven years has resigned owing to ill
health.

We learn with feelings of deep sym-
pathy of the serious accident which
befell our friend Frank D. Hunter,
bookkeeper at J. H. Small & Sons'
florist store, New York, on the night
of February 3. Mr. Hunter was run
down by a recklessly driven automo-
bile when alighting from a trolley car
near his home in Harlem and sus-
tained severe internal injuries. Mr.
Hunter was for many years identified
with the wholesale cut flower trade of
New York and is well-known to the
trade of the Metropolis, among whom
he has always enjoyed a well-merited
personal popularity, and much regret
is expressed on all sides over this un-
fortunate occurrence.

Visitors in Indianapolis: William
Dykes of Jansen's, New York; Sidney
Wertheimer, New York; Jos. E. Rol-
ker, of A. Rolker & Sons, New York;
Eugene Dailledouze, Brooklyn, N. Y.;

He will cultivate 25 acres of land.

OBITUARY.

John Orsesky.

Wietor Bros.' wholesale house, Chicago, lost one of its faithful employes, February 3. John Orsesky, when only fifteen years of age, began his work in the store seven years ago and won the respect and good-will of all by his cheerful and courteous ways. The young man was stricken with appendicitis and died before an operation could be performed. He leaves a mother, brother and two sisters. He was a member of the Florists' Bowling Club and played with the "Roses." The death occurred just before the meeting and before the members were aware of his illness. The funeral took place on Monday, February 7, at 3203 Fox street.

San Francisco, Cal.—A burglar whose passion for crime has apparently not stifled his love for flowers broke into the store of John Obertelli, a florist, at 116 Porter avenue, and stole ferns valued at \$16.

Flower Market Reports

Business has dropped off very noticeably this week and it is evident that for a time at least Lent is going to make itself felt in the flower trade. At the same time the receipts are increasing on most lines. Carnations feel the cut in demand perhaps as much as any other item. Roses hold out fairly well thus far. American Beauties of the higher grades are seldom seen of late, but they are not specially called for and are not greatly missed. Violets and bulb flowers are increasing in quantity and dwindling in value.

Ash Wednesday is not likely to bring any great change in the market conditions. The amount of sales is still regulated more by the quantity of flowers than by the demand, with some few exceptions. Beauties are off crop and the few long-stemmed ones are not moving very readily. Growers state that there are indications of a good supply of Beauties in the near future, when all will share alike in a possible over-production. Other roses are about equal to the demand with a preponderance of pink, of which Killarney leads in demand. As the quantity of white roses grown is much less this year, the supply is less accordingly and many are wishing they had planned differently. Carnations are getting more plentiful and last week moved off satisfactorily, but this week sales started more slowly. Violets also are more plentiful, though there is no surplus. Tulips, jonquils and daffodils are all coming in plentifully and stocks are to be seen in a number of places. Lilies are coming along faster and all kinds of greens are in sufficient supply and of good quality.

Dull weather has prevailed throughout the last two weeks and stock along some lines continues to be scarce with an excellent demand. The supply of roses has not been nearly enough. Carnations are to be had in better quantity. All kinds of bulbous stock is to be had and finds lively sale. Lilies of both kinds are in sufficient supply to meet all demands. Beauties have been on the scarce side for the past ten days. Sweet peas, lily of the valley and orchids are much used for corsage work. The demand for potted plants has been quite heavy. Azaleas, cyclamens, primroses, and bulbous stock in pans are the popular selling varieties. There is steady call for pot ferns and table fernery stock. Greens of some kinds are scarce and frequently it is difficult to get enough to go around. Business throughout the month of January has been most satisfactory. There has not been an over-supply of anything, consequently nothing has gone to the ash-barrel.

(Reports continued on page 241)

Flower Market Reports.

(Continued from page 239)

NEW YORK This week finds the market in bad shape.

A very considerable falling off in demand has depressed prices—where sales are possible—to the vanishing point, particularly on carnations. Individual shipments of roses are not greater than last week excepting in the case of Beauties, the supply of which is larger, so that with a small demand price averages for the grower are bound to be low. The cut of carnations has increased considerably and it would seem as if buyers were passing them by—so slowly do they move. The large surplus can be unloaded only through the street people and as usual they take full advantage of the situation to squeeze the price down to the lowest figure. There is a big supply of all kinds of bulbous stock which is also hard to move. Our tabulated quotations do not reflect the actual condition of the market as there is no stability to prices.

Flower trade here **PHILADELPHIA** moving along on an even keel, fair winds, a good clean course, and very little change in prices. The only marked exception is in the carnation market. Largely increased receipts of these materialized towards end of week and prices eased up considerably. Roses were very steady—the best seller being probably Killarney. White roses also in good demand and cleaning up well. The production of white varieties has not increased in the same ratio as other colors during the past few years which accounts for their good position at present when the demand for white is mostly in design work. American Beauties are a little sluggish for some reason. They are not abnormally high, and there are a good many pre-lenten social affairs—so that Beauty ought to be selling better. Plenty of good orchids and gardenias around and selling all right at normal prices. The violet market has improved so much that prices hold

Cattleyas	35.00	to 50.00	34.00	to 50.00
Lilies	6.00	to 8.00	6.00	to 8.00
Lily of the Valley	1.00	to 3.00	1.00	to 3.00
Narcis, Paper White	1.00	to 2.00	1.00	to 2.00
Trumpet Narcis	1.50	to 3.00	1.50	to 3.00
Tulips	1.50	to 3.00	1.50	to 3.00
Violets75	to .50	.25	to .50
Mignonette	2.00	to 5.00	2.00	to 5.00
Sweet Peas (per 100 bchs)	5.00	to 12.00	5.00	to 12.00
Gardenias				
Adiantum	1.00	to 1.25	1.00	to 1.25
Samlex	10.00	to 15.00	10.00	to 15.00
Asparagus Plumosus, strings	25.00	to 35.00	25.00	to 35.00
" " & Spreu. (100 bchs)				

up well in spite of the largely increased supply. Lily of the valley has eased up slightly but is still in fair shape. There is a good demand for Roman hyacinths, paper whites, daffodils, tulips, daisies, sweet peas, mignonette and similar seasonable stock for St. Valentine's Day. Acacia is scarce. Myosotis and snap dragon are also on the scarce list at present. The following standard articles not enumerated in regular market quotations are selling in the wholesale markets as quoted: Adiantum Farleyense, \$15; Cyripediums, \$15; Dendrobiums, \$50; Callas, \$15@20; Daisies, \$2@3; Freesia, \$3@4; Snapdragon, \$12@17; Perle and Sunrise roses, \$8@10, per 100.

Several growers are already busy starting stock for the coming fall show of the Detroit Florist Club. Prizes are moderate, the total amounting to about \$800. Preliminary discussion of the style and decorations to be carried out promises something entirely new and unique.

NEWS NOTES.

At the annual meeting of the North Dakota Horticultural Society held at Fargo, the following officers were elected: President, Prof. C. B. Waldron; secretary-treasurer, Prof. O. O. Churchill. The reports of officers were read and were very encouraging, showing a good increase in membership during the past year.

James Wheeler, ex-president of the Gardeners' and Florists' Club of Boston, who has been the efficient superintendent and gardener at the J. H. White estate, Brookline, Mass., for the past twenty-two-and-a-half years, has purchased thirty-two acres of land in Natick and will establish himself there as a commercial florist. He will build as a starter one carnation house, 60x300. Mr. Wheeler is the kind of stuff from which the best florists are made and we look to see him quickly take a leading position among the commercial growers of the Hub.

CATALOGUES RECEIVED.

George S. Woodruff, Independence, Ia.—"The Gladiolus, Including Groff's Hybrids and Other Best Sorts."

Wagner Park Conservatories, Sidney, Ohio—Special Bargain Offers in Palms, Ferns, Roses and Hardy Plants.

Henry A. Dreer, Philadelphia, Pa.—Market Gardeners' Wholesale Price List. "Reliable" vegetable and flower seeds, garden requisites, implements, fertilizers, insecticides in full variety are listed and well illustrated.

Champion City Greenhouses, Good & Reese Co., Springfield, Ohio—Spring Trade List for 1910. This catalogue, issued for florists, nurserymen and dealers only, covers the field of roses and young greenhouse stock quite fully. It holds good till April.

J. L. Moore, Northboro, Mass.—Catalogue and Price List of Dahlias and Gladioli for 1910. A reproduction of a vase of dahlias in many colors makes a sparkling cover picture. The list is a good one and the planting directions are concise and practical.

Schlegel & Fottler Co., Boston.—Seed Catalogue for 1910. 7x9 size, covers in soft grey tints, showing sweet peas on one and Full Measure bean on the other. A well-arranged, well-painted and readable catalogue of carefully selected varieties in flower and vegetable seeds, bulbs and perennial garden material.

E. G. Hill Co., Richmond, Ind.—The well-known name of the house and a superb cover page portrait of the Lyon Rose on this 1910 spring list will be sufficient inducement to turn over the pages and peruse the contents. There are some roses portrayed on the inside pages in half-tones of rare finish. New roses, carnations, chrysanthemums and geraniums are fully listed.

Welch Brothers, Boston, Mass.—Wholesale Price List of Florists' Supplies. This well-known firm has in this publication, placed before the florist trade a production that will compare favorably with any similar catalogue published. It is printed on heavy coated paper, freely illustrated, and furnishes a very complete list of the thousand and one daily requisites of the modern florist.

Stumpp & Walter Co., New York City.—Seed Catalogue for 1910. This is one of the standard lists of the country and it is fully up to expectations. Hohenzollern asters have the place of honor on the title page, in modified tints and beautiful of outline. Printing and arrangement of the contents are "all to the good" and no extraneous or superfluous matter encumbers the reading pages.

Henry F. Michell Co., Philadelphia, Pa.—Michell's Wholesale Price List for Florists and Market Gardeners—The name of the concern back of this catalogue gives it a standing which we can hardly enlarge upon. As a wholesale catalogue on live goods it is imitable and nobody doing business as a florist or gardener should lose any time before sending for a copy and then giving it a careful reading.

H. E. Fiske Seed Company, Boston.—1910 Catalogue and Price List of Seeds, Bulbs, Plants and Poultry Supplies. An admirable production—especially so for a young firm. But this

young firm is rapidly growing in strength and lustre and a host of friends, including HORTICULTURE, are glad to see it move up into the front rank. The catalogue in question bears evidence of careful industry backed by that indispensable qualification—"knowing how."

D. Landreth Seed Co., Bloomsdale Seed Farms, Bristol, Pa.—The 1910 catalogue of this well-known firm reminds us on its cover page that it is in its 126th year. The make-up of the book shows that the time since 1784 has not been wasted by the Landreth people, but that they are well in touch with a goodly section of the people who want to buy seeds. We hope before long to help them still further on this commendable course by introducing them through our advertising columns to a few more whom they do not yet reach.

Heller Brothers Co., New Castle, Ind.—"The Roses of the Garden." A seductive title which it would be difficult to improve upon as a selling phrase for the goods which this firm offers. The covers are handsomely adorned with rose portraits in natural colors, inside as well as outside, the subjects being American Beauty, Robert Hiller, Climbing Killarney and Jeannette Hiller. The pages are profusely illustrated and the text matter is bubbling over with the sentiment and expression which inspires the reader and makes him an enthusiastic purchaser.

DURING RECESS.**Twin City Bowlers.**

On Jan. 27th the first tournament of the season was played in Minneapolis. Scores were as follows:

MINNEAPOLIS.			
Th. Wirth.....	127	165	155
L. Boeglin.....	150	116	119
E. Meyer.....	150	169	123
K. E. Carlson.....	140	150	146
C. N. Ruedlinger.....	144	176	192
H. Will.....	134	137	146
C. A. Bossen.....	90	121	146
	935	1034	1027
ST. PAUL.			
S. J. Dysinger.....	158	111	138
Ch. Hangan.....	107	138	164
Will. Swanson.....	154	134	152
Leo Hermes.....	115	126	150
Henry Puvogel.....	153	153	142
O. J. Olson.....	145	189	227
Christ. Hansen.....	92	174	119
	924	1025	1092

Minneapolis won 2 out of the 3 games. O. J. Olson from St. Paul made the highest score of the evening, 227.

The St. Paul brethren felt so badly after the first bowling tournament that they sent a challenge to Minneapolis the very next day. The games were rolled on Feb. 2 at the Court House alleys in St. Paul. The scores are as follows:

ST. PAUL.			
Dysinger.....	175	175	119
Hangan.....	132	157	142
Puvogel.....	132	107	122
Hermes.....	154	118	125
Swanson.....	183	153	150
Olson.....	177	157	137
	953	867	796
MINNEAPOLIS.			
Wirth.....	141	95	134
Meyer.....	122	138	150
Will.....	153	126	141
Boeglin.....	139	87	130
Carlson.....	186	139	135
Ruedlinger.....	148	115	186
	869	700	876

St. Paul won 2 out of the 3 games, so the two clubs are even again. From latest reports we understand that the pulses and tempers of St. Paul bowlers is about normal again.

HELP WANTED

WANTED—An assistant in greenhouses on private estate. Apply by letter to Thos. J. Grey Co., 32 South Market St., Boston.

SITUATIONS WANTED

SITUATION WANTED

As manager for gentlemen's place, public institution, park, cemetery, etc.; practical experience in all branches; reference, first-class. Address with particulars, C. L., care Joseph Linfoot, 1015 E. McMillan St., Cincinnati, O.

WANTED—A position under a good gardener in a private establishment by a respectable young man, aged 23 years, five years' first class experience. Address T. A. H., 17 Everett St., Wellesley, Mass.

WANTED—Situation as grower in private or commercial place, or as salesman for wholesale plant or flower growing establishment. Have had many years' experience in all the above lines and can furnish satisfactory references. Address P. B., care Horticulture Pub. Co., Boston.

SITUATION WANTED by German experienced in roses, carnations, chrysanthemums, orchids, stove and bedding plants; also vegetables under glass and all out door work. Familiar with handling help. Wishes position on large private place March 1st, 1910, or before. First class references. Please state full particulars. Address O. S., care HORTICULTURE.

SITUATION WANTED—By rose and carnation grower; 13 years' practical experience; capable of taking full charge. Address W. H. Clump, General Delivery, Jamestown, N. Y.

FOR SALE

GREENHOUSE FOR SALE—In Bridgewater, built in 1907, size 30x100, with head house attached. Kroeschell hot-water heater. One-half acre land and adjoining land can be bought. Would sell house for removal. A. H. Hobart, Bridgewater, Mass.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

FOR SALE—One 10 section Furman boiler used three seasons, good as new, \$150. One 9 section Furman, two years old, number 209, \$125; also one large 8 section Lord & Burnham, excellent condition, \$125. One small upright Spencer boiler to heat about 2000 ft. of glass, price \$55. This boiler was bought new last March. Also have one 10 h. p. upright steam boiler and 4½ x 2½ x 4 steam pump price for both \$80. Guaranteed O. K. and in good working order. M. Tomback & Co., Sparkill, N. Y.

bright pleasing pink, fine size and grand stems—also a good keeper. Orders have been coming in to Mr. Ford very liberally from all over the United States and also some from abroad.

Visitors this week: Mr. and Mrs. W. C. Langbridge, Albany, N. Y., on way to and from the Cannery Convention at Atlantic City; William Bester, Hagerstown, Md.; M. C. Ebel, of Aphine Mfg. Co., Madison, N. J.; W. J. Stewart, Boston; Chas. Schoenhut, Buffalo, N. Y.

PHILADELPHIA NOTES.

The new carnation Sangamo was exhibited here recently by A. C. Brown, Springfield, Ill. S. S. Penock says it has all the earmarks of a good commercial sort.

M. Rice & Co. are erecting a new story on their six-story warehouse at 1220 Race street. More progress. No one is more astonished than Mr. Rice at the rapid increase of the business.

Wm. H. McKissick & Bros. point with pride to their Jardine roses and defy any other concern to show the same good quality. These are grown by Stephenson who made such a big hit with this variety last season.

A variegated Dracaena indivisa "Prince Albert" is a feature at Pepper's and is highly spoken of by Wm. Robertson, the gardener. Well done specimens of variegated Asparagus Sprengeri are also to be seen here.

The Frost & Bartlett Co., of Arlington, Mass., tree sprayers, pruners and doctors, have established an agency in this city under the management of C. L. Flint. The latter gentleman is highly recommended by Jno. A. Pettigrew, Boston's Park Superintendent, and others.

Wm. Kleinheinz, superintendent of the Widener estate, recommends among the newer sweet peas for forcing, Governor Fort, a lovely shell pink self, and Mrs. Haman, pink edged with bright ruby. A scarlet seedling carnation of great promise raised by Mr. Kleinheinz, is in fine shape here at present, as is also Craig's new white "Norwood."

The crested cyclamens to be seen on the Newbold place at present are the best of this type we have noted as yet. The flowers are of the grandiflora rather than the giganteum type, round and symmetrical, standing straight up, quite unlike the usual straggly habit of other crested forms. Messrs Logan and Batchelor have a good thing in this.

C. S. Ford had on exhibition at the Pennock-Meehan Co.'s on Monday a fine lot of the new carnation Constant, raised by William Bester of Hagerstown, Md. It is a lovely color—a

VINES, PEACHES, NECTARINES, GLOXINIAS.

Editor HORTICULTURE:

Can you please give me a little information on the following subjects? I have a $\frac{3}{4}$ span house running east and west, large span to the south. This house is 150 feet long. I want to section it off into three houses of 50 feet each. My intention is to grow Colman and Black Barbarossa grapes in one section, Muscat of Alexandria grapes in another and have the third for a general fruit house. Can I grow peaches, nectarines and figs in this third house? Also give a little information in regards to making borders for the grapes, etc.; how deep should they be? This house is 20 feet wide. Could I have grapes on the back of the first two houses, also what mixture of compost should I use?

What size gloxinia bulbs would you advise me to buy so that I could have nice flowering plants in 6-inch pots?

Any information on the above will be highly appreciated.

"SUBSCRIBER."

In reply to the inquiry of a subscriber who has a $\frac{3}{4}$ span fruit house 150 feet long, 20 feet wide, facing the south and divided into three equal lengths, two of those sections being intended for the growing of grapes, the border for this should be prepared as follows. Remove all inside soil to the depth of three feet, also from a strip two feet wide all along the immediate front outside, being careful to slope the bottom so that water will be carried off; then fill in the bottom with a layer of lime rubbish, broken up bricks, or anything of a porous nature that will provide good drainage. This layer should be 6 to 9 in. deep. Then fill in the space to the level of the ground with the following compost. For six cords of fibry loam roughly chopped up, add one cord of well rotted cow manure, $\frac{1}{2}$ cord lime rubbish, 150 lbs. bone meal and 150 lbs. half-in. bone. Mix all together thoroughly. The outside border should be extended yearly with a richer material as the roots require. The vines should be planted so that the upper part of the roots will be about 2 in. under the surface. You could not have first-class grapes from vines planted in the back of this house, as they would be too much shaded with the front ones. Nectarines or peaches of early varieties would be more suitable for the reason that the fruit of these would be in a more advanced stage before sun is shut out. The writer has grown nectarines under similar conditions the last eight years and with good results.

The third section of this house would be suitable for growing peaches and nectarines together, planted in both front and back borders, and the compost recommended for the grape border will be suitable, leaving out all the manure and half the bone.

Figs require a higher temperature than peaches or nectarines for best results, but as they are not at all fastidious and adapt themselves well to pot culture, we would advise trying them in this way with the above.

Gloxinia bulbs of one-and-a-half-inches in diameter will, if properly treated, make good plants of a size suitable for 6-inch pots same season.

J. R.

POTASH

Profit, not Necessity, is the Test

Why did you buy fine farm machinery, improved live stock and seed, and the best varieties of fruit? Because the man who sold them to you convinced you that they would **pay**. Proceed on the same basis when you buy fertilizer. Get the improved fertilizer—the kind with enough **Potash** in it to make a balanced plant ration. Your dealer would get it for you if he knew that you wanted it. For grain, use 6% for corn, 8% and for roots, fruit and truck, 10 percent of **Potash** in the fertilizer. If your dealer has not such brands, get him to buy some **Potash** salt for you and put it in the goods yourself.

To increase the **Potash** one per cent, add two pounds of muriate or sulfate of **Potash**, or eight pounds of Kainit to every 100 pounds of fertilizer.

Potash Pays Urge your fertilizer dealer to carry Potash Salts in stock. He will have no trouble in buying them if he will write to us about it.

GERMAN KALI WORKS

Continental Building

Baltimore, Md.

DON'T SPRAY IN TOO COLD WEATHER.

As the effect of climatic conditions on spraying in general is so little understood, and as a great many fruit growers try to spray in the winter months when work is slack, a word of caution just now will not be out of place.

Spraying for scale may be done any time after the leaves drop in the fall until they begin to open in the spring, providing the weather is not too cold and the material can dry on the trees before freezing. Many people, however, suppose this can be done when water on the ground does not freeze. This is a mistake, for rapid radiation on a clear day may force the temperature of the woolly fruit-bud down six or eight degrees below freezing point; so it is really unsafe to spray fruit trees, especially the peach, when the temperature is below 40 degrees Fahrenheit, no matter what the material used may be. I believe that in every instance where I have investigated fruit-bud injury, it has been found that the spraying was done in very cold weather.

The following clipping was taken from Green's Fruit Grower, April, 1909:—

"The freezing of the leaves and buds on clear spring nights when the air temperature is above freezing point has been superstitiously looked upon as an effect of the moon's light. An English experimenter finds that, while all objects have the temperature of the surrounding air on cloudy nights, rapid radiation may produce a difference on clear nights, and a piece of cotton proved to be at times six and even eight degrees colder than the air. Plants may be similarly chilled below freezing, with the air above.

"A few years ago the writer was on a fishing trip in Vermont and two nights in succession his bathing suit was frozen stiff on the line, while vegetation was uninjured. They were bright moonlight nights. Had the weather been cloudy, it is doubtful if this would have happened. It is ad-

visable, therefore, for fruit growers, who spray in the winter time, to watch their thermometers."

B. G. PRATT.

ARKANSAS STATE HORTICULTURAL SOCIETY.

That the work of the State Horticultural Society is of state-wide value, both in building up the fruit-growing and allied interests and in conserving these important resources in Arkansas, and that as such it deserves some assistance from the state is set forth in a comprehensive resolution before that body by Col. Leroy Palmer, of Fayetteville. The resolution calls for an appropriation of at least \$5,000, to be used in assisting the society in its work, and asks that the president and executive board see that the needs of the society along this line are properly placed before members of the legislature at the forthcoming session.

The D. D. Johnson Company, of 64-66 Wabash avenue, Chicago, whose advertisement of Evergreen Brand Fertilizers has, no doubt, attracted the attention of our readers, are making rapid progress in arranging for the sale of their product through the jobbers and dealers throughout the country. They assure us that it is their aim to distribute the fertilizers through these trade channels exclusively, and that all orders which they receive direct will be turned over to the dealers in their respective territory. This promise of protective co-operation with the local dealers should inspire a reciprocal interest on the part of the jobbers, seedsmen and others and, we doubt not, will go far towards increasing the demand for and sale of Evergreen Brand Fertilizers.

PRATT'S "SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by timely adding water. Send for Booklet, "Orchard Insurance." B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street
CHICAGO, ILL.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4 1/2 inches wide, nozzle 6 1/2 inches long; 3/4 inch pipe connections. These sprayers will never wear out and are sold by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

FIRE RECORD.

Canton, O.—L. S. Sanborn's store was completely gutted by fire recently.

Colorado Springs, Colo.—Fire destroyed the barn of Frank Crump, florist, recently; loss \$1,000. Four valuable horses were rescued.

Greenspring, O.—Fire damaged the Unser greenhouse and stock January 27th; loss covered by insurance. Buildings will be repaired at once.

Orange, N. J.—Fire damaged the greenhouses of Frederick C. Read, 18 Chapel street, to the extent of \$1,000, on the night of Jan. 30. There was no insurance on the property.

Greenwich, Conn.—Greenhouse, barn and other buildings on the estate of H. Durant Cheever, were destroyed by fire on February 7. The fire department had a strenuous two-hour fight to save the villa.

Santa Rosa, Cal.—An explosion in the heating plant of the greenhouses owned by Rudolph Spreckles at his country home near Glen Ellen, caused a fire which resulted in the damaged amounting to \$5,000. The greenhouses and the keeper's room were entirely destroyed.

NEWS NOTES.

Kennebunk, Me.—J. O. Elwell is having his greenhouses wired for electric lighting.

Newtonville, Mass.—Frank Y. Orcutt has purchased of Frank Amidon his greenhouses at 41 Brooks avenue and will continue the business.

Grand Rapids, Mich.—The new greenhouse of Wencel S. Cukerski, West Fulton street and Valley avenue, is completed and being stocked. Shrub shipments from France have been ordered, to start his nursery in Walker Township next April.

The University of Wisconsin is now building four greenhouses, each 20x100, at Madison, Wis. The greenhouses are for the Horticultural Department and will be in connection with a small laboratory building. It will be occupied by the schools of Applied Plant Physiology and Pathology, as well as Horticulture. It is intended later to build a laboratory of good size for the Horticultural Department in the immediate vicinity of this building. The greenhouses are for practical use and not for show purposes.

GREENHOUSES BUILDING OR CONTEMPLATED.

Salina, Kans.—Ed. Tatro, four houses.

Chicago, Ill.—Wietor Bros., range of houses.

El Paso, Tex.—Potter Floral Co., two houses.

Champaign, Ill.—Thomas Franks & Son, additions.

Indianapolis, Ind.—Albert Kempe, carnation house.

De Kalb, Ill.—J. Leonard Johnson, one house, 21x120.

Columbus, Ohio.—J. H. Williams, one house, in spring.

Westboro, Mass.—William Gardner, one large house, in spring.

Kalamazoo, Mich.—Insane Asylum, one house, to cost \$3,500.

Wellston, St. Louis, Mo.—Martin Hecht, house, 32x100 ft., in spring.

Worcester, Mass.—John Coulson, Main street, greenhouse, 20x50.

Waban, Mass.—Wheeler & Co., Beacon street, one large house, in spring.

St. Louis, Mo.—Wensel & Hecht, Anglum, three houses, each 27x100 ft., in spring.

Alliance, Ohio.—Lamborn Floral Co., enlargement of their plant and other extensive improvements.

Cohoes, N. Y.—The new house, 22x100 ft., to be built here by F. Fennell in the spring and which was reported in our last issue, makes a total of four houses devoted to bedding plants and carnations.

Roslyn, Pa.—Victor Groshens has received the building material for a new house, 42x500 ft. This addition makes four houses, covering an area of 53,000 square ft., all of which will be devoted to rose growing.

Marysville, Calif.—J. W. Evans, Jr., has leased the Karr property and greenhouses for a term of years. Mr. Evans intends to raise cut flowers, seeds and plants and proposes to erect a large greenhouse at an early date.

Rhinebeck, N. Y.—J. Vonder Linden, four violet houses, each 16x200. Mr. Vonder Linden now has the largest violet growing establishment in the Rhinebeck section and probably the biggest in this country, nine large houses altogether.

Elwood, Ind.—F. W. Blubaugh has just completed a new iron frame house, 25x125, this being his third, and two more of this type are contemplated for the near future. Vegetables are the main crop, but the establishment will be merged into cut flower growing as quickly as possible. One quarter of the new house is devoted to sweet peas, which are now beginning to bloom finely.

Spokane, Wash.—The Spokane Canal Company has been made defendant in a suit by the Van Holderbeke Nursery Company, which sues for damages of \$28,360 for loss of nursery stock by reason of the company failing to furnish water according to contract.

LIGHTNESS

If greenhouse lightness be obtained at the expense of structural strength, then your house is a danger trap; if your house is so heavy it shuts out the light, your crop is inferior. You must have a "happy medium," combining sufficient strength, and securing the necessary lightness. The construction that more than meets these requirements is our Iron Frame One. Send for information.

Another Greenhouse and Garage

This time it is one of our every way practical, Curved Eave houses, about 33 feet long and 15 feet wide. Small, but just what the owner wanted for his practical needs and location.

The work room is entered through the garage. The entire combination is heated by the one boiler. It is an up-to-date greenhouse, up-to-dately located.

Although this greenhouse might be classed in the "runabout" size—we have turned out some "big six cylinder, 100 horse power" ones, like J. B. Duke's Curved Eave range for instance, with its twenty-five compartments.

Now that we are talking about Curved Eave houses, what do you know about our way of building them?

If you think of building, it is rather important that you should know. Write us.

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of Elegantissima has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$1.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Pieroni, Whitmanii, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pots, \$12.00 per dozen.

Plant Novelties From China

If there is one plant more generally planted than another in this neighborhood it is *Berberis Thunbergii*, a native of Japan, and for all round general usefulness a plant hard to beat. Whether any of the new Chinese Barberries will excel this favorite is difficult to say, but in any case there is room for a little more variety. This family is very rich in species in eastern Asia and in China alone some 40 species occur. A goodly number of these are now in cultivation and the near future should see several added to the list of useful, ornamental shrubs. Among the deciduous species one of the very best in the whole family is undoubtedly *B. Wilsonae*. This novelty is an elegant, dwarf-growing shrub 2 to 3 ft. tall, with decumbent, very spiny branches and narrow, wedge-shaped leaves, $\frac{1}{2}$ to $\frac{3}{4}$ inch long. The flowers are golden-yellow produced in dense, axillary clusters in late July and early August and are speedily followed by masses of bright coral-red, globose berries. The autumnal tints in this plant are very fine excelling in brilliance those of any other Chinese Barberry known to the writer. *B. Wilsonae* is very free-growing and fruits freely in a small state. It is eminently suitable for rockeries, edges of borders, etc., etc., and is fond of sun.

As a flowering shrub in particular the most remarkable of all the Chinese Barberries is *B. polyantha*, a new species not yet in commerce. This plant grows 5 to 10 ft. tall, erect and much branched in habit; the leaves are about an inch long, stout, obovate with cuneate base, the flowers are rich, clear yellow, freely produced in pendulous, lax panicles 6 to 9 inches long; the fruits are oblong, dull salmon-red with pale glaucous bloom. With its large panicles of golden flowers this plant is wonderfully attractive and very unlike in appearance any other known species.

Both the above Barberries are native of the uplands of the Chino-Thibetan borderland at elevations between 6,000 and 10,000 ft. and there is scarcely a question of their complete hardiness in and around Boston or indeed any other place where *B. Thunbergii* can be grown.

One of the most strikingly ornamental plants in central China above 4,000 ft. altitude is *Staphylea holocarpa*. This species forms a sparsely branched bush 10

SCHIZOPHRAGMA INTEGRIFOLIUM

to 20 ft. tall or more rarely a small tree 20 ft. or more high. The flowers are white or pale rose-pink, delicately fragrant, borne in large, pendulous, cymose panicles which are produced in profusion in May before the leaves. The leaves are large, glaucous-green, usually 3, very rarely 5, foliolate. This plant frequents the margins of moist woods and thickets and from a distance when in flower suggests a cherry bush. In size and color of flowers and in its ornamental character generally this new species is very superior to the other members of its family and from its behavior under cultivation to date bids fair to be quite as hardy as our native *S. trifolia*. The writer regards *S. holocarpa* as one of the very finest plants he has been privileged to introduce into cultivation.

In *Celastrus latifolius* we have a plant very different in habit and general appearance to the well-known *C. articulatus*. This new-comer is a strong growing plant, forming bushes 10 to 15 ft. tall and as much through with arching branches and large, more or less ovate leaves; the fruits are produced in pyramidal panicles, 6 to 9 inches long, at the ends of the branches of the current season's growth. The fruits are larger than those of *C. articulatus* with deep, golden-yellow valves and a rich, orange-red aril enclosing the seeds. Like other members of this family the plants are of one sex only and care must be taken in planting to secure both sexes.

Schizophragma hydrangeoides, though an old plant, is rarely seen in cultivation the plant usually grown under this name being *Hydrangea petiolaris*. In growth these two plants are almost identical, hence the confusion, but in flower *Schizophragma* is readily distinguished

BERBERIS WILSONAE

in having flat, ovate, white bracts, instead of sterile flowers surrounding the inflorescence. It is to these bracts that the plant owes its ornamental value which is much greater than that of the climbing *Hydrangea*. In China several species of *Schizophragma* occur, all of them dwarfer in habit than the Japanese *S. hydrangeoides*. One of the finest of all, and the only Chinese species at present named, is *S. integrifolium*. In manner of growth this plant and its relatives behave in a similar way to the common ivy. After creeping over rocks for a year or so it grows up into an erect branching bush 5 to 8 ft. tall and then flowers. The flowers are borne in flat corymbs, a foot or more across, and partially surrounded by numerous, ovate, more or less pointed, white or creamy-white bracts, each $1\frac{1}{2}$ to $2\frac{1}{2}$ inches long and $\frac{3}{4}$ to 1 inch across. These bracts persist till late in the season, becoming pinkish and ultimately brown with age. The Chinese members of the family are all sun-loving plants and one and all are extremely ornamental and easily grown.

The *Ribes* family is, generally speaking, more useful than ornamental and the new *Ribes longeracemosum* is scarcely an exception. This plant is simply a black-currant with simple, pendulous racemes of flowers 15 to 18 inches long! The fruits are jet black, about the size of an ordinary black-currant and of good flavor. The fruits are scattered thinly down the raceme, but if this plant was crossed with some of the better varieties of garden black-currants great things might result. Hybridizing amongst hardy shrubs, save in a few families, is only in its infancy and the near future will see vast expansion and improvement in this work. When one thinks of the wonderful work accomplished in a few families by Mons. Lemoine alone, one marvels that others do not launch out on new lines in this field instead of devoting themselves to following in the footsteps of others.

S. W. Wilson.

Dieffenbachia

In a recent number of *HORTICULTURE* Mr. Farrell in his notes mentioned this genus as worthy of propagation by the florist. It might be well to enter a little more into the usefulness and requirements of these noble looking, evergreen, tropical plants. They are natives of tropical America; and it is said there are only about half-a-dozen species of this genus, but there are quite a number of fine varieties which are very ornamental when blended with other foliage decorations and, for this purpose, the trade ought to grow them largely. To use an everyday expression, "they stand the racket." Their handsome well-formed leaves have curious blotchy markings, and I have heard people ask if they were real or if paint had been dropped on them. The broad leaved varieties make fine single-stemmed plants for jardinières, and they keep in good condition for a long time if watered with care and kept in a temperature around sixty degrees.

When *Dieffenbachias* are grown for exhibition they are generally grown in large pans or shallow tubs, several plants being placed about three inches apart in each receptacle. The narrow leaved varieties, especial-

ly, should be used in this manner, as they have a rather leggy appearance when grown singly in pots, and when grouped in this manner they make a handsome specimen. These plants may be also used for subtropical bedding in summer. If a bed of this kind is desired in a shady corner, they look well among ferns and other shade-loving plants, care being taken to have them well hardened off before being planted out. Pot grown plants come in handy for filling up dark corners of piazzas during summer and, if one has a vase to fill in a rather shady corner of the lawn, one of the broad-leaved varieties makes a good centre plant for it.

Dieffenbachias are propagated by top cuttings and suckers; the stems also may be cut into two-inch lengths and planted in a cutting bed, with a good bottom heat. In a short time the buds at the joints will start into growth and throw out roots when they may be potted into small pots and shifted along into the size required or grouped in the manner described above. In cutting up the cane great care should be exercised on the part of the operator as it is said that if the sappy juice is conveyed to the mouth it causes intense pain and dumbness.

These plants are not at all fastidious about what they are grown in, provided the material is good and open. A good compost is, equal parts of good rough fibry loam, rather flaky leaves, and dried cow manure, with sand enough to make it feel gritty. A little charcoal may be also added to keep the soil sweet. The pans or pots they are grown in should be well crocked, as these plants though they like a moist atmosphere do not like wet feet. Frequent syringings are necessary to keep red spider in check. The "Stott Nozzle" is an ideal implement for this object and cannot be too highly commended for syringing purposes.

A few good varieties to grow are *Dieffenbachia amoena*, *D. Carderi*, *D. Chelsoni*, *D. Jenmani*, *D. Leopoldi*, *D. magnifica*, *D. majestica*, *D. nobilis*, *D. regina*, *D. rex*.

George F. Stewart.

British Horticulture

IN THE POLITICAL ARENA

The even tenor of business has been upset during the last few weeks by the excitement and turmoil of a general election. There were several leading actors in the stirring scenes well known in the horticultural world. Prominent, of course, was Mr. Joseph Chamberlain, a veteran statesman and Tariff Reform leader, who for many years has had one of the finest collections of orchids in the country. Ill health has prevented Mr. Chamberlain from taking an active part in the fray; it was a sportsmanlike act, under the circumstances to allow him to be returned a member of Parliament without opposition. Not so fortunate was Sir Albert Rollit, the versatile president of the National Chrysanthemum Society, who contested the Epsom division. Sir Albert had changed his political views, and this may have had some effect in a hostile direction. A similar disaster befell the candidature of Mr. A. Cross, who is a member of a well known firm of Glasgow seedsmen. During the closing months of the last session he changed over from one side of the House of Commons to another, but this alteration has not been endorsed by his constituents. The distributive side of the market growing industry

had a champion at the polls in the person of Mr. Geo. Jackson, a vice-president of the National Federation of Fruit and Vegetable Trade Associations. There are certain railway grievances which the trade desire to see adjusted. Mr. Jackson, although making a good fight was at the bottom of the poll. Although these electoral fights create scenes of animation and put money in the printer's pocket the horticultural trade generally is depressed by the upsetting of the normal routine of business.

A NEW SWEET PEA SOCIETY

In recent years the cult of sweet peas has made great strides in Scotland, owing to the enthusiastic work of such growers as Messrs. Malcolm and others. The results obtained at the various shows indicate that a very high cultural standard has been reached north of the Tweed. A movement is now on foot to start a Scottish Sweet Pea Society, and the project is receiving the support of several of the principal growers. This is not intended to be in any way hostile to the existing society, but it is felt that an organization in Scotland would be more effectual in fostering an interest in this particular flower than an association in London—some 400 miles away. Should the proposal meet with sufficient support it is intended to hold an annual show in Edinburgh—a very favorable centre for an enterprise of this character. There are several important seed houses in Edinburgh which will be likely to give their hearty co-operation to

the new Society. After all, it is in the interests of the trade to give the fullest support to a Society of this character, for the greater popularity given to the growth of sweet peas the better it will be for the trade generally. This has been one of the results of the very successful National Society, whose shows and publications have given an immense impetus to the culture of the flower with a resultant benefit to the trade. Judging from the number of catalogues which are being sent out by firms who make a specialty of sweet peas there is no diminution in the popularity of this fragrant annual.

ITEMS OF INTEREST

Steps are being taken for the amalgamation of the Scottish Horticultural and the Royal Caledonian Horticultural Associations.—The Royal Horticultural Society will hold a special bulb show on March 8 and 9.—The death has taken place of Mr. John Watkins, a well known Herefordshire fruit grower.—A new company has been formed to carry on the wholesale seed business of Messrs. Watkins and Simpson, of Tavistock St., Covent Garden, London.—Although we are supplied very thoroughly with gardening papers there is a rumor of a London publishing house contemplating an addition to the existing number.

London.

W. H. Adsett.

Nemesia strumosa Suttoni

This handsome summer annual was introduced to the trade at large by Sutton & Sons, Reading, England, in 1888. In the United States it is only in recent years that it has become known here and there. The original form, of freely branching habit of growth, reaches a height of from 14 to 18 inches. The small opposite leaves, lanceolate, remotely serrated, thinly covering the branches, pass the fleeting glance almost unnoticed. Not so, however, the great profusion of terminal racemes of flowers appearing in colors from deep crimson to pure white, and in yellow, from the palest sulphur to the richest orange. The diameter of the fully developed singular blossom measures from one-half to three-quarters of an inch. As cut flowers nemesias show very good lasting qualities and are used to good effects as material for filling low vases.

Nemesia strumosa Suttoni is generally raised from seed started under glass in March. Seedlings, transplanted in due time, are usually ready for the open ground by the middle of May. Placed in an open, sunny position, flowering time begins early in July and continues until the frost stops vegetation.

Shorter in stem, but more effective in an ornamental sense as a garden flower is the dwarfy form—*nana compacta*. Our illustration shows the densely grown little bush fairly covered with its wealth of blossoms. It is

a striking floral debutante, in my opinion well deserving a fair trial as a bordering plant. I have not seen seed of this low-growing compact form catalogued in separate colors anywhere. The prevailing tendency toward maintaining color harmony in floral garden effects, in many cases bars mixed colors. *Nemesia strumosa nana compacta* is without doubt very pretty as we have it now—that is, mixed. Equally certain is it, however, that it would be far more in demand if obtainable in separate colors.

Rochester primed and ready

Note in our reading columns the excellent start already made by the Rochester Florists' Association in anticipation of the S. A. F. Convention which is to meet in their city next August. Rochester has had plenty of experience in handling gatherings of this kind and no better manifestation of this could be given than is seen in the list of committees as pub-

lished elsewhere in this paper. With systematic business management conventions are by no means so formidable as some regard them. We have had opportunity in the past to see how Rochester does these things and it looks very, very simple in the hands of these well-seasoned experts. If you want to see a model convention, in every particular and detail which goes to make such an affair a business and social success, plan to go to Rochester next August.

Our editorial note in issue of January 22 Righting a wrong protesting with some vehemence against the enormous shipment of free seeds from Washington to an Indiana congressman has drawn forth the following letter from the gentleman referred to.

The 61 bags of seed, my allotment, came to me by virtue of an appropriation made before I took office. My predecessor, the Hon. Jesse Overstreet, then chairman of the Post Office Committee, expected to distribute these seed. He is not recorded as opposing the appropriation.

I took my seat March 15, 1909. In April, 1909, I was informed by the Indianapolis Municipal Improvement Association of Indianapolis that 10,000 packages of seed promised by Overstreet, for use by the Association through the public schools, had not arrived, and I was asked to hurry them along.

Investigation developed the fact that Overstreet in a fit of pique had not ordered the seed for the schools.

The Indianapolis papers deprecated my inability to get a few seed for the school children and praised Overstreet who was "always powerful enough to get 20,000 extra packages for the school children."

At that time I told the people of the Indianapolis district that I was opposed to the distribution of seed by the government, but that I would do my best to recover the seed promised by Overstreet—and that in future I would see that seed intended for the district would get to the district.

The Municipal Improvement Association thanked me for the seed I got for them at that time and asked me for 10,000 packages this year. I promised them.

This association is promoted by the Commercial Club of Indianapolis and works to beautify the city. The seeds were used for that purpose.

The sixty-one sacks constitute my 20,000 packages; my entire allotment. I would not undertake to distribute these seeds—I have not time—so I sent them in bulk for distribution through the schools.

The same papers which denounced me last year because I could not get seed, denounced me this year because I did get them; and started the newspapers of the country against me.

I am impliedly accused of grafting, although I do not approve of seed distribution, do not want it, and won't be bothered with it.

I am not in favor of increasing postal rates on magazines—and the whole case is a gratuitous insult.

C. A. KORBLY.

Mr. Korbly has not even suggested, much less demanded, that anybody should retract the criticisms of his course with which the newspapers and magazines were flooded from one end of the country to the other. We all the more cheerfully and earnestly, on this account, hasten to do him the justice which his letter above quoted would seem to indicate to be his due. The light which his communication throws on the system and its workings will, no doubt, interest many of our readers. On our part we are satisfied that Mr. Korbly was a victim of circumstances for which he was in no way responsible and while we are sorry to have been among those who participated in the attack upon him we are especially pleased to be enabled to do our share towards placing him right before the horticultural industries of the country. Apparently Indianapolis is the centre of good missionary ground for those who wish to abolish the free seed distribution.

SEASONABLE NOTES ON CULTURE
OF FLORISTS' STOCK.*Ardisia crenulata.*

There are few plants that give more general satisfaction to the Christmas buyer than the *ardisia*. They will 'pay you well. They germinate readily in a mixture of fine soil and peat in equal parts, with the addition of some sand. Plunge in bottom heat and keep the soil moderately moist. They can be increased by cutting and by "topping," cutting the stem about half way through with a sharp knife and covering the incision with clean moss tied with raffia or soft string. The moss must be kept continually moist. Place the plants in a warm house and roots will be emitted in about five or six weeks, when the tops can be removed from the old plants and potted, only requiring to be kept a little close for a few days in order to become established plants.

Mignonette.

The mignonette bench should not be neglected. After the crop has been cut and the spikes have begun to form, liquid manure about once every ten days will be found very beneficial. See that they don't become dry at the root. Don't allow the spikes to fall about on the bench and become crooked. Keep the temperature from 45 to 50 degrees at night with plenty of air on all favorable occasions. With proper attention to tying, disbudding and feeding, good cutting will continue up to June. The spikes will be greatly improved if cut twenty-four hours and placed in a cool place before using.

Petunias.

Petunias are particularly valuable for the retail grower who has bedding, window boxes or vases to fill. The double sorts make nice blooming plants in four or five-inch pots. Seed should be sown now of both single and double kinds in a light, sandy soil in heat. Cover the seed only slightly. The seedlings should be pricked out or potted off as soon as large enough to handle. Good strains of seeds supply plants suitable for bedding; but as they do not reproduce themselves exactly, any sorts particularly required must be propagated, like the double ones, from cuttings. Strong cuttings taken from cut back plants which have been kept in a fairly warm house, will root freely now and will grow good from now onward. When ready to pot off use 2½-inch pots, with a light mixture of soil, with some leaf-mould and sand added. A light sunny position is desirable with a temperature of 50 to 55 degrees at night.

Plants for Memorial Day.

It is a little less than three months until Memorial Day. Lilies should now be just making their appearance through the ground to be in season for this holiday. Give them a night temperature of about 50 to 55 degrees and don't water too freely until they are well pot-bound. Every florist should have a nice lot of Japan lilies for this date. They are just suited for this occasion. Easter lilies which are not very far advanced can be held back by removing them to a cool house and they will come in for Memorial Day without very much forcing. *Spiraea Japonica* and its various forms should be potted and placed under the bench of any cool house where they can be

NEW CARNATION LADY ALGIE.

In a recent issue we gave a brief notice of this new carnation. We now have the pleasure of presenting a portrait of the flower. The raiser, A. H. Wingett, of Lenox, Mass., writes us as follows about Lady Algie:

"Lady Algie promises to be a real good thing. I have had it for three years and it shows no variation whatever. The color is a most attractive

salmon pink and it has the vigor of its parent, Beacon, which we all concede as the best scarlet flowering carnation extant. Flowers are borne on stems from 2½ to 3 feet and will average 3½ in. across. This variety was named for Lady Algernon Gordon Lennox, at her especial request, she having admired it, as she saw it growing here last October."

making roots slowly. Hydrangeas should be started right away to have them right. Such plants as zonal geraniums, show pelargoniums, fuchsias, begonias, candytuft, and stocks, all come in good for this occasion.

Salvia.

There is hardly a bedding plant more popular than the *salvia*. It pays the retail grower as good as most plants. The stock plants that have been carried over and are producing an abundance of cuttings can be placed in sand now where they will have a little bottom heat and kept shaded for a short time they will root. The propagation of *salvia* by cutting is necessary where they are wanted true to name, especially the dwarf sorts. Seed that is sown now in a little bottom heat and transferred to flats or pots as soon as they develop a second pair of leaves will generally produce excellent plants with some bloom on by the middle of May.

Stocks and Candytuft.

Sow stocks now in shallow flats in some light, sandy soil, covering the seeds lightly, and do not allow the seedlings to dry out. They should be

transplanted from the seed flats while they are quite small, as their slender root soon extends to such a distance in the soil that they cannot be taken up without loss of some of the fine rootlets. It is better to sow several times for succession. Candytuft is also one of the most useful plants for flowers. In a remarkably short time the plants will become covered with flowers. They both love a cool house and require about the same culture.

Vincas.

If you have some large clumps of *vincas*, say in 5 or 6-inch pots, you can increase your stock by dividing them in half and planting in 4 or 5-inch pots, using good rich soil. They will make fine plants by planting time. Now is a good time also to work up a supply of strong plants for another year by putting in cuttings. Take them off with a heel from the base of the plants, and put in sand; they will soon root. Don't top them as tops do not root so well. When ready pot them off and plant out in the spring in open ground and they will make fine stock for another year.

JOHN J. M. FARRELL.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting last Tuesday evening was one of the best attended of the season. The hall was well filled and there was plenty of interest and enthusiasm. After the secretary's very complete records of the last meeting had been read the banquet committee reported a surplus of \$15.05, which was turned over to the treasurer. An invitation to visit the W. W. Edgar greenhouses in a body on March 19 was enthusiastically received.

Mr. E. H. Wilson, characterized by the committee as the greatest plant collector the world has known, was unanimously elected an honorary member. There are now at the Arnold Arboretum upwards of 1,000 new species of trees and shrubs in process of development, all collected by this indefatigable explorer.

A resolution in approval of the adoption of a Parcels Post system such as European countries are enjoying was adopted; also a resolution recommending the discontinuance of free seed distribution by Congress, as no longer useful or wise. Both of these resolutions will be sent to representatives in Washington with a request that they act in accordance therewith. There was a lot of oratory, serious and witty, over these enactments.

Mr. Farquhar announced that a good friend of the club stands ready to make a donation of \$100 for the use of the Landscape Class, should same be needed. He then brought up the matter of the arrangement of the elm trees in Commonwealth avenue and after a lively discussion in which the plans of the park commission for four rows of trees were unanimously condemned, a strong resolution endorsing the original Olmsted-Sargent plan of two rows was adopted and a copy ordered sent to the park commission. Mrs. E. M. Gill of Medford, the oldest member of the club, was recommended for honorary membership. Fifteen new members were admitted.

S. J. Goddard of Framingham then read a thoughtful paper on "The Culture of Carnations," which was followed by an instructive discussion and Mr. Goddard received a hearty vote of thanks.

The judges reported on the exhibits of the evening as follows: Carnations, Hattie Starrett and May Day, from Patten & Co.; Wm. Penn and Seedling 1019, from A. Roper; Mrs. C. W. Ward, from Cottage Gardens Co.; Pink Delight, from S. J. Goddard; Seedling, from Robert Train; report of merit for each. Alma Ward, from Cottage Gardens Co.; report of superior merit. Enchantress, from Littlefield & Wyman; report of cultural merit. May Day, from Peter Fisher; report of superior merit. Vase of mixed novelties from S. J. Goddard; report of cultural merit. Rose Killarney, deep pink sport, from Montrose Greenhouses; report of merit. A vote of thanks was accorded to the following: Carnations Shasta and Sarah Nicholson, from Patten & Co.; Winsor, from Littlefield & Wyman; seedlings from A. Roper, seedling of Boston Market. Genevieve

Lord, from Robert May, Gloversville, N. Y.; Bon Ami and seedlings, from G. E. Buxton.

The most sensational exhibit of the evening was a group of three new azaleas, one plant of each, seedlings from The Haerens Co., Somergem, Belgium, unnamed as yet; shown by A. Leuthy. One was a double early white, one a pink similar to Vander Cruysen and the other a small red semi-double, on order of Firefly. All the above made a good impression and are expected to take high rank with the trade as soon as disseminated.

CONNECTICUT HORTICULTURAL SOCIETY.

On the 11th instant, our society held its first February gathering. Many activities for the future were planned; and Prof. C. D. Jarvis, horticulturist of the Storrs Agricultural Experiment Station, was received into membership. "Raising Mushrooms in the Cellar," an article by State Botanist Peck of New York, and reprinted from "The Country Gentleman," was read and discussed by the members present. The general opinion was that considerable technical skill is required to raise regular and abundant crops of this fungus product, and more such skill than is ordinarily attainable.

President Huss outlined a series of events for future meetings. February 25th will be cineraria night; March 11th, carnation night; March 25th, Chinese primrose night; April 8th, rose night; May 13th, pansy night. It was voted to make March 11th ladies' night, also with a special request that all ladies interested in horticulture shall be present; and the lady members of the society will be asked in advance to each propound questions from the question box, which is always open on the president's desk. Addresses by members are also promised, as follows: March 25th, by Alex. Cumming, Jr., on "The Horticulture of the Pacific Coast," Mr. Cumming having just returned after a year's residence there; April 22nd, by Secretary George W. Smith, on "The Value of the Pear to the Fruit Lover," and May 13th, by John Gerard, of New Britain, on "The Latest Acquisitions in the Pansy World."

In a discussion on climbing plants, Ampelopsis Veitchii came in for the greatest share of praise. President Huss said that he had seen it grow to the roof of stone church edifices in New York City in three years from planting time. Referring to hardy flowering shrubs, suitable for hedge use if desired, Berberis Thunbergii seemed to be favored, and as being much more suited to the rigors of our New England climate than the California privet. Treasurer W. W. Hunt recommended Spirea opulifolia as a much more rapid grower, however, and hence more suitable when strong and high growth is desired.

Our society starts on the new season with great hopes for the accomplishment of many horticultural successes, and (thanks to the action of the last legislature) with the largest sum in the treasury that it has possessed in a number of years.

GEORGE W. SMITH, Sec'y.
Melrose, Conn.

MORRIS COUNTY (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

February 9th, stormy as it was, brought out a strong membership of this society. Harold B. Vyse read an essay on "The Pot Culture of Poinsettia pulcherima." We are all familiar with the dazzling display of this plant, which Mr. Vyse has every year around the holidays. Five and 6-inch pot plants with bracts 17 to 19 in. across, are worth looking at. His paper was full of practical directions and, as he says himself, "If one wants to get them good, he must be eternally vigilant." A rising vote of thanks was accorded him for his able effort. Percy Herbert, a former presiding officer of ours, came down from Newburgh.

Proofs of the preliminary schedule of the Flower Show to be held in Morristown next November were discussed. The prizes total over \$2,000 and we expect the final issue in July to list \$3,000 or more. This amount is pledged in full and so the executive committee's work will be in the line of securing a show worthy of the name. A letter read at the January meeting from Elmer D. Smith, president C. S. A., announcing that the C. S. A. would hold their show at Morristown in conjunction with this society, gave us a boost. The C. S. A. special prizes will be added features. The Flower Show committee is made up of the best men in the club, and every one is working energetically to forward the enterprise.

Next meeting, March 9th, will be Carnation Night. For several years this has been a great event, and we hope the growers generally will come on and show again this year. Many new carnations are candidates for public favor, and the place to put them is where people can see them. There is no better place to do this than in Madison.

J. A. Peterson, Cincinnati, Ohio, showed his new Begonia Glory of Cincinnati. A certificate of merit was awarded to it. C. H. Totty had a collection of sweet peas—stems from 17 to 19 inches long. His Governor Fort was awarded a certificate of merit and the other is a cultural certificate.

Preliminary schedules can be had from Edward Reagan, Box 334, Morristown, N. J.

E. R.

NEW YORK FLORISTS' CLUB.

The regular meeting of this club on Tuesday evening, February 14, had been designated Ladies' Night and the large and interesting audience which assembled in response to this announcement showed unmistakably that members and ladies alike had pleasant memories of former similar occasions and knew what to expect. There were not far from 150 persons present when President Miller called to order. Business was despatched with alacrity. Secretary Young's minutes, report of essay committee by Mr. Pepper, appointment of a committee on the death of C. W. Scott's father, report of joint committee on annual dinner and entertainment of American Rose Society, by Mr. Sheridan, were severally adopted and Wm. H. Taplin of Brooklyn, read an interesting paper on "Carnations Past and Present," which brought out some discussion as

to the cause of calyx splitting with the usual result that no two talkers thought alike on this perplexing problem.

Exhibits comprising some twelve or fifteen hundred carnations of high quality were ranged on tables down the centre of the club room making a very brilliant effect. Among them were the following: Bright Spot from Nic Zweifel, Milwaukee, Wis.; it emerged from its 1000-mile journey in excellent condition; Dorothy Gordon from Jos. Heacock, Wyncote, Pa., a winner in every feature; Mrs. C. W. Ward and Alma Ward from Cottage Gardens, Queens, N. Y., superb, the last named especially; Princess Charming from H. Eichholz, an exquisite light pink of great promise; Juanita and five seedlings from Fillow Flower Company, Westport, Conn.; Enchantress and White Perfection from John F. Marsden, Far Rockaway; Lawson, Lady Bountiful, Variegated Lawson, Crimson Beauty, Beacon, Kingston Pet and White Enchantress from Wood Bros., Fishkill, N. Y.; Pink Delight from A. N. Pierson, Cromwell, Conn.; Sangamo from S. J. Reuter & Son, Westerly, R. I.; White Enchantress from A. Demusy; White Bros. Gasport, Pink Delight and Winsor. A valentine bouquet device from Young & Nugent; Striped seedling from Saltford Flower Shop, Poughkeepsie; Brooklyn, a handsome large deep pink seedling with fringed petals from Weber, Lynbrook, and Wilson, Brooklyn.

The judges reported awards as follows: Cottage Gardens Company, Reed & Keller prize, for best exhibit, also Vaughan prize for best fifty, Alma Ward; Jos. Heacock Company, Stumpp & Walter prize, for best novelty sent out in 1909-10, Dorothy Gordon; Nic Zweifel, honorable mention for Bright Spot; John Marsden, cultural certificate; Henry Eichholz, 86 points for Princess Charming.

Following the business session, John Nugent, on behalf of the entertainment committee, took charge of the proceedings. A couple of songs beautifully sung by Miss Becky Moltz, were the first on the program and aroused much enthusiasm. Then came, in succession, Russell Kelly, solos on 'cello and piano, and a song; Miss Barnett, in recitations; Miss Sabery Dorsell, in songs, and Fred Blythe, songs; every one of which was uproariously enjoyed. Then followed an enjoyable repast and social time. The annual outing of the club is scheduled for July 1, and will take place at Wetzels Point Grove.

MASSACHUSETTS HORTICULTURAL SOCIETY.

By direction of the Committee on Prizes and Exhibitions of the Massachusetts Horticultural Society the February Flower Show will be held at Horticultural Hall on Friday, Saturday and Sunday, February 25, 26, and 27, and not as announced in the preliminary schedule. An additional list of prizes to be offered at this exhibition has been issued and will be sent on request. This exhibition will take the place of the usual spring show and it is expected will equal it in extent and interest. It will be a pay show and music will be furnished every afternoon and evening.

AMERICAN ROSE SOCIETY.

The executive committee and other members have held two conferences in New York in regard to the details of the coming Rose Show at the American Museum of National History. The total amount of prizes offered in the schedule reaches some \$1,500. In conjunction with the Rose Show the Horticultural Society of New York has a preliminary prize schedule, the total of which comes to \$700. S. S. Pennock-Meehan Co., of Philadelphia, offer a special prize of \$25 to be awarded in the discretion of the committee. Moore, Hentz & Nash, New York, offer a solid silver cup, valued at \$50, for the best

in for \$15 prizes each, A. H. Langjahr and L. B. Coddington, \$10 prizes each, and the Society of American Florists' silver and bronze medals are also at the disposal of the American Rose Society.

A valuable paper is being prepared by Mr. W. S. Sibson upon "Northern Pacific Coast Roses." Mr. James Wood, president of the Horticultural Society of New York, will deliver an address upon "Ideals of Horticulture;" Mr. Geo. V. Nash, "The Rose and its History," and illustrated lecture with colored lantern slides; and Mr. Adolph Farenwald, of Roslyn, Pa., on "Roses, the Brightest of Flowers."

The Horticultural Society of New York offers on its own behalf the following prizes:

MISCELLANEOUS FLOWERING PLANTS.

	1st.	2nd.
Acacia pubescens, specimen.....	\$6.00	\$4.00

six roses, two white and four red, pink or yellow, American Beauties excepted. Wm. F. Kasting Co. offer a prize of \$25 wherever it can be best used. The Toronto Horticultural Society offer one silver and one bronze medal. Arthur T. Boddington offers a cash prize of \$25. Stumpp & Walter Co. offer a special prize, for private gardeners only, for 25 Richmond Roses, \$10 and \$5.

The following named parties have contributed prizes of \$25 each, for purposes to be specified later: John I. Raynor, Henshaw & Fenrich, H. E. Froment, W. S. Allen, Traendly & Schenck, A. J. Guttman, King Construction Co., J. A. Budlong, Son & Co., John N. May and F. R. Pierson. W. G. Badgley and W. F. Sheridan are

The Horticultural Society of New York will issue jointly with the American Rose Society the preliminary prize list and rules within a few days. Joseph A. Manda has been appointed Superintendent of Exhibits. President Poehlmann is urging the Chicago people to make a fine exhibit in New York. The New England people will be present with the best that they can produce. This exhibition is regarded by some of the strong people in New York as one of public education, at which it is expected thousands will be present. Vice-President Pierson, ex-President Simpson and Treasurer May are at work like beavers to insure the practical success of the undertaking.

BENJ. HAMMOND, Sec'y.

1129 Arch Street,

Philadelphia, Pa.

NEW JERSEY FLORICULTURAL SOCIETY.

Jersey abounds in societies devoted to the interests of the horticultural craft and the particular one to which these lines refer is one of the best known and best appreciated in the en-

MALCOLM MACRORIE
Retiring President

tire list, located as it is in the heart of "the Oranges" and drawing support from many private and commercial establishments in the Oranges, Short Hills, Summit, Madison, Chatham, and neighboring communities.

Once a year comes the ceremonial of installing the new officers and this is always made an interesting, although unpretentious, social event for the members and their friends. The affair came off this year on Friday evening, February 11, and despite the fact that a very lively snow storm was busy outside, a goodly attendance was present to enjoy this unique combination of oratory, smoker and conviviality.

The report of the retiring secretary, J. B. Davis, showed that the 15th year of the society's career had been a prosperous one. It had held ten meetings; 157 certificates had been awarded for meritorious floral exhibits; the membership is 84 and there has been one death during the year, Mr. J. Crosby Brown. The treasurer, Wm. Reid, reported a balance of \$313.51 in the treasury.

There were a few attractive exhibits upon which the judges, Messrs. Wm. Duckham, C. H. Totty and W. J. Stewart, reported as follows: Lager & Hurrell, display of orchid blooms including *Laelia anceps alba*, *L. a. rosea*, *Phalaenopses*, etc., cultural commendation; Wm. Reid, vase of unusually fine carnations, cultural certificate; Frank Drew, roses, cultural commendation; Max Schneider, honorable mention for display and cultural commendation for carnations; C. H. Totty, hybrid hippeastrum seedling, vote of thanks.

Installation of the new officers was performed with due dignity by the retiring president, Malcolm MacRorie, in the following order: Albert F. Larson, president; Dietrich Kindsgrab, vice-president; Wm. Reid, secretary; Walter M. Gray, treasurer. The secretary then read the list of special prizes provided by friends of the society for

competition during the coming year, as follows: Winner of highest number of points on roses, commercial exhibitor, silver cup; private gardeners' competition, silver cup. Two cups, commercial and private, respectively, as above, for orchids, carnations, foliage plants, flowering plants other than

ALBERT F. LARSON
President.

above mentioned, fruit and vegetables, and one cup for best seedling carnation, grown by the exhibitor; 13 cups in all.

George Smith, the silver-tongued orator, here took the floor and ad-

Beautiful! Novel! Valuable!

The Newest Lilacs

Double and Single
Extraordinary Offering

The improvement in the Lilac, especially in the double sorts, is marvelous, and all lovers of this flower will be delighted with these novelties. In size, form and color they far surpass the old favorites and we confidently recommend them to our patrons. Nothing that has been introduced recently is likely to prove so popular as the new Lilacs.

A beautiful illustrated booklet on Lilacs will be mailed on request, also our Illustrated General Catalogue, which contains accurate and trustworthy descriptions of the best

dressing the retiring president, presented him with a beautiful silver loving cup on behalf of the members in token of their love and esteem for their old friend and long-time devoted official. Mr. MacRorie was taken completely by surprise, but managed to voice in a few words his grateful appreciation of the gift.

Speeches were then in order, as refreshments were passed around. Rev. L. H. Lightipe spoke eloquent words of welcome to the visitors. Wm. Duckham responded warmly for the Madison visitors and asked for support and co-operation in the great exhibition to be held at Morristown next fall, for which already premiums to the amount of \$2,500 have been subscribed. C. H. Totty told stories, J. Austin Shaw dispensed compliments and epigrams in blank verse, W. J. Stewart spoke for the orchid show to be held next May and the national show in March of the next year at Boston, and said that New Jersey would be indispensable to the success of any orchid show, wherever held in this country. A. F. Faulkner made a concise and most appropriate little speech. Ed. Reagan spoke for the Morris County Florists' and Gardeners' Society, and proved to be a most interesting talker. A. H. Secker sang a song, and George Smith, on request, contributed "The Tinkler's Wedding O." Interspersed were songs and monologues by clever entertainers. And the snow snowed on but nobody cared.

ROCHESTER FLORISTS' ASSOCIATION.

Standing committees in this Association for 1910 are as follows:

Entertainment and Essays—H. B. Stringer, chairman; John Dunbar, C. H. Vick, R. G. Salter.

Exhibition—C. H. Vick, chairman; George B. Hart, F. J. Keller, A. H. Salter, J. M. Keller, E. P. Wilson.

Membership—C. H. Ogsten, chairman; F. R. Schlegel, W. L. Keller, Charles Suhr.

Auditing—E. S. Osborne, chairman; W. H. Dildine, Geo. T. Boucher.

Bowling and Sports—A. F. Vick, chairman; H. B. Weller, George J. Keller, Walter Salmon.

Special Committee for the Banquet—charge of all the arrangements for the

Annual Convention of the S. of A. F. and O. H. next August. F. W. Vick is chairman and H. B. Stringer, secretary.

Chairmen of the various Sub-Committees of the Executive Committee are the following:

Entertainment—F. W. Vick. All the members of the Rochester Florists' Association are members of this Committee.

Ladies—C. H. Ogsten.

Finance—W. T. Fonda.

Souvenir Album—C. H. Vick.

President's Reception—George B. Hart.

Bowling—A. F. Vick.

Decorations—F. J. Keller.

Music—E. P. Wilson.

Shooting—R. G. Salter.

Ball Game—J. M. Keller.

Transportation—E. S. Osborne.

Printing Programmes and Press—E. F. Rowe.

Nominations for Superintendent of Trade

Exhibit—Charles H. Vick.

The position at Florham Farms, Madison, N. J., so long filled by Arthur Herrington, will be vacant on April 1st. Mr. Herrington will go into the landscaping business with office in New York City.

Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

ALMA WARD

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

Prices Rooted Cuttings

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000; 25 at the 100 rate, 250 at the 1000 rate.

Delivery February 20th

ALMA WARD

This beautiful Carnation is pure white except during the dark weather when it shows delicate splashings of pink similar to the Cattleya Orchid, increasing its popularity.

ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

Prices Rooted Cuttings

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery March 1st

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

Cottage Gardens Co., Inc. Queens, Long Island, NEW YORK

CHICAGO NOTES.

Park Jottings.

At this writing Lincoln Park Conservatories are particularly attractive because of the magnificent display of orchids. Rudolph Schiele is in charge of the exhibit. The white varieties of which there are 200, are a special feature. There are also about 700 varieties of the more common.—An important step was taken last week by the Lincoln Park Commissioners when they voted to begin suit to obtain possession of the four bathing beaches on the shores of Lake Michigan. These beaches are now owned by private individuals and estates and the cases will be complicated. The ground in question is 1,531 feet long and will average 200 feet wide.—The island at the north end of Lincoln Park will soon be completed and will be one of the beauty spots of the city.—Edward Tilden was unanimously elected a member of the South Park Commission to succeed State Senator Edward J. Rainey.

Ladies' Night at the Club.

Ladies' Night is always a happy event and the Chicago Florists' Club are anticipating this one to surpass all others. An enthusiastic committee, headed by Duncan Robertson, are at work on the program, and the event will come off Thursday, March 3rd, at Union Hotel Banquet Room. A light banquet will be served first and will be followed by a select musical entertainment. Appropriate decorations of flowers and palms will be used as befits a florists' entertainment. Schiller, Pasternick and Degan will have the opportunity to show

their skill here, while John Kohlbrand will handle the tickets.

General Notes.

John Kruchten, who is known as a very successful grower of sweet peas, is showing fine large blooms now of the finest early varieties. When questioned as to his methods, Mr. Kruchten said he kept his sweet pea houses at a temperature of from 35 to 40 degrees, and thinks the only way to successfully grow sweet peas is to maintain a low temperature.

A happy and enthusiastic party, though not extremely large, left on the 9.40 train for Champaign—Urbana. The various clubs and societies were well represented, and at this writing it looks as if the Illinois State Florists' Association will have a good meeting.

Personal.

Duncan Robertson will leave next week for a week's visit to Toronto relatives and friends. When Mr. Robertson left Scotland, many years ago, other members of his family left also and settled in Toronto.

D. D. Johnson will take a trip this week through Wisconsin and north to Minneapolis in the interest of the Evergreen Fertilizer.

Frank Coswick is now in the employ of Wieter Bros., taking the place of John Orsesky, whose death was reported last week. Frank has frequently served here as extra help in busy seasons and has a large acquaintance with the trade.

Visitors:—Geo. Kuhl, Perkins, Ill.; Ed. Roehrs and J. Muller, Rutherford, N. J.; R. R. Davis, Morrison, Ill.; F. H. Henry, of Henry & Lee, N. Y.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on the 15th inst., Henry F. Michell, vice-president, in the chair. The cyclamen prize was won by Samuel Batchelor with four splendidly grown plants, among which was an excellent specimen of the crested type; showing fine symmetry in form; pink shaded; very free flowering, and large-sized flowers of the grandiflorum section. A discussion on cyclamen culture took place and some excellent pointers were given by S. Batchelor, Frank O. Canning, Jno. Hobson, and Xavier Schmitt. Mr. Batchelor stated that he used one-half leaf mould in his compost—not well rotted, but only half-rotted being best—and was very careful to water three times a day. Matters pertaining to the spring show, March 15, 16, and 17, were discussed and the secretary reported that all arrangements are about completed. The regular monthly meeting for March, coming on the first day of the spring show will be omitted, and instead a lecture by a prominent horticulturist will be given on the evening of the second day. The National Gardeners, who are to have their convention and exhibition at same time, will have their banquet at Dooner's on the evening of the 15th. An association of society ladies calling themselves the "Gardening Club" have announced their intention of offering some prizes for the November show, to be competed for by amateurs only.

Almost Sold Out

Have you sent us an order for YOUR stock of Carnation Dorothy Gordon? Easy to put it off—but our supply is limited, orders are piling in every day, and some of you who are planning to grow this splendid Carnation for your trade this year are going to be disappointed!

This magnificent flower made a big "hit" at the Pittsburg meeting, but that didn't surprise us any, for a great many of our friends in the trade long ago learned that for REAL, substantial profits

Carnation Dorothy Gordon

stood away up at the top of the list. We know we "harp" a lot about its merits, but when you know this grand new variety as we do, you'll be enthusiastic, too. Flowers fragrant and uniform in color—a little darker than Pink Enchantress; very large—size 3 inches or more in diameter—buds of good substance and very lasting. All these features spell profits for growers of Carnation Dorothy Gordon—DOUBLE profits,

for the plants bear more flowers which sell for a higher price, bringing your gains up to nearly twice what you can get from other commercial sorts.

Come to Wyncote and see Dorothy Gordon growing; if you cannot do that, write or wire us NOW and we will reserve stock for you. But do it QUICKLY if you want any rooted cuttings this spring. Interesting literature free.

SAMPLES AND PRICES UPON REQUEST

C. W. BROWNELL & COMPANY, WALDEN, N. Y.

BY WIRELESS FROM ROBERT CRAIG'S.

The Fiddle Leaved Rubber.

Ficus pandurata, always a special product with Mr. Craig since its introduction, is enjoying an uninterrupted and constantly increasing demand, for it fills a place of its own in decorative grouping and few other plants will stand so much knocking around without showing it. There are five houses filled with *pandurata* for stock purposes alone and an effort will be made to keep up with the demand henceforth, something which has been impossible thus far.

Lorraines.

Begonia Gloire de Lorraine leaves are rooting well this year. Messrs. Craig have no less than 70,000 leaves in the propagating benches and that have already been potted up into 2-in. pots. These will have another shift into 2½-in. pots and will make sturdy plants by May, when shipping to the trade will commence. Shipping is done with 2½-in. stock only. They cost a little more on that account, but are worth it to any buyer and will be a better bargain in the long run. The light pink *Lonsdale* variety is most largely grown here because it seems to be a better keeper in the dwelling house. Mr. Craig looks upon Peterson's *Glory of Cincinnati* as a sterling novelty which every Lorraine grower will have to make room for as soon as it is sent out.

One of the great successes of the last Christmas trade was the *Edwin Lonsdale* croton. It is a free grower—a quality that means much to the man who grows it. Under proper temperature handling it is of the rich red color so appropriate for the holiday time, and will rapidly become a popular Christmas favorite.

Easter Outlook.

Just at present all nerves are tuned up to Easter pitch and the short season intervening makes unremitting vigilance imperative. The promises on all lines of flowering plants was never more encouraging.

Azaleas are unusually well set with buds this year. When received from abroad the buds appeared somewhat small, but they are coming along very satisfactorily and will be all right for Easter. The houses which the Christmas azaleas vacated are now filled with *Scottii* ferns. *Schoelzeli*, which is in

and Hybridists in the World

Sander, St. Albans, England
and 235 Broadway, Room 1
NEW YORK CITY

effect a crested *Scottii*, is a very practical fern. It is compact and stands up well under the hose and the fronds can't be knocked down as is the case with some other varieties of *Nephrolepis*.

Daisy Queen Alexandra is not of much use for cut flowers, but makes a nice Easter plant when well flowered. It sets buds better when the roots are cramped, and for this reason it is a good plan to keep the plants in 4-inch pots until the buds are well set. Mr. Craig has them in the house where the Christmas poinsettias were, at a temperature of about 55 degrees, which is warm enough for a daisy.

Rhododendrons and Hydrangeas.

Rhododendrons should now be in a temperature of 65 degrees at night. The early Easter makes it necessary to give them a proportionately early start. Different sorts vary a little as to the length of time needed. As soon as any begin to show color they can be set away in a cool place. Hydrangeas will be soft this year on account of the forcing they must be subjected to in order to get them in, and rhodo-

STUART LOW & CO., late of Hugh Low & Co. dissolved, are now receiving large importations of **BURMESE DENDROBIUMS**, such as *Wardianum*, *Crassinode*, *Fimbriatum*, *Devonianum*, *Nobile Brymerianum*, *Thyrsiflorum*, etc., and will give excellent value.

Also hold very large stock of **WARDIANUMS, CRASSINODES**, etc., to flower THIS SPRING.

Also **LAFLIO-CATTLEYAS, BRASSO-CATTLEYAS, ODONTOGLOSSUMS** in spike, all for Spring and early Summer flowering.

and Madison, N. J.

dendrons are sure to sell better on this account. The finest of all forcing rhododendrons is *Pink Pearl*. Its higher price is the only drawback to its being bloomed in enormous quantities. As it gets more plentiful and price goes down the demand will increase. Hydrangeas will require a night temperature of 100 to 75 degrees, with no let up, to get them in.

Dracaenas.

In raising dracaenas from canes, the young sprouts should be cut off about an inch from the joint and not close down to the cane. If cut close it would be a long time before any new growth would be developed, but when a space of an inch or so is left two more sprouts will be produced right away. Mr. Craig has some of the finer new ones now growing in the Isle of Pines for canes to be used in future propagation. Slow-growing kinds, such as *Mandalana*, take about two years to produce canes of the requisite length—about 5 feet. In that island *D. terminalis* is used around the negroes' cottage for chicken fences. *Dracaena Massangeana* in

Dreer's Tuberous Rooted Begonias

Fancy Leaved Caladiums, Gloxinias and Tuberoses.

The Begonias and Gloxinias which we offer are grown for us by an expert who has made a specialty of this class of plants for many years. You can secure cheaper but not better stock.

WE ARE NOW BOOKING ORDERS FOR BEGONIA LORRAINE BEGONIA LORRAINE LONSDALE BEGONIA AGATHA June Delivery

Our stock will be of the very highest quality, and we wish to impress upon our customers that all our Begonias will be twice shifted. Orders filled in rotation, 2½-in. pots, \$15.00 per 100; \$140.00 per 1000.

Special price on lots of 5000 or 10,000 plants.

ROBERT CRAIG CO., 4900 Market Street, Philadelphia, Pa.

ROEHRS, RUTHERFORD N. J. LORRAINE BEGONIAS

specimens four to five feet high is one of the best hotel plants. Its variegation being confined to the middle of the leaf, the margin being always solid green, makes the edges less liable to decay. The contents of a 200 ft. house of this *Dracaena* were all sold for Christmas.

Bougainvilleas.

A plant that stands well for weeks is *Bougainvillea Sanderiana*. Well flowered, it is a beautiful and very desirable thing; partially flowered it is of no account. The great key to success is in properly ripening the wood in the fall. A house of specimens 2½ to 3 ft. across in 10 and 12-in. pots will make a glorious show for Easter. These plants are three years old, home grown. They have now been for over three weeks in a night temperature of 60 degrees, and with bright weather there will be no

need to increase this. It is desirable to get the *Bougainvillea* well ahead, as then the color of the bracts will be more brilliant.

We shall have another "Wireless" next week about lilies and other Easter specialties.

ILLINOIS STATE FLORISTS' ASSOCIATION.

As we go to press this useful and influential Association is closing its labors at Champaign-Urbana, Ill., and we hope to give a detailed account of their proceedings in our next issue. Officers were elected for the coming year as follows: President, C. L. Washburn; vice-president, C. L. Lov-eridge; treasurer, F. L. Washburn; secretary, J. F. Ammann. The constitution was amended so that the executive board decides hereafter the time and place of meeting.

Ten points of excellence of the

New Seedling Begonia "GLORY of CINCINNATI"

1. It lasts longer in the dwelling than any other Begonia.
2. It is a most beautiful shade of soft, satiny pink.
3. The individual flowers are much larger than those of *Gloire de Lorraine*.
4. Easily propagated.
5. Easy of cultivation.
6. Strong, robust grower.
7. It can be grown in a 4-inch pot to look like a plant.
8. It flowers from October to April.
9. Not surpassed by any other Begonia.
10. The best plant for the Christmas Trade.

**\$1.00 each, \$9.00 per dozen,

HINODE FLORIST CO.
WHITESTONE, N. Y.

Seed Trade

An Interesting Test.

An interesting bulletin on tests for purity of type of Jersey Wakefield Cabbage has been issued by the Pennsylvania State College, Center County, Pa. Strains from twenty-five seedsmen are represented in the test. The results noted are quite creditable to the houses mentioned except in four or five instances, the leading houses being notably on top as to purity of type, earliness, and yield. This bulletin is well worthy of perusal by all in the seed trade. C. E. Myers, Horticulturist of the Experiment Station, is the author.

We quote a sentence as showing the fairness and common sense of the experimenter:

"In order to make uniform sowing possible, the seed should be reasonably free from foreign matter, although in most instances impurities cause no serious trouble." Compare this with the Washington official attitude: "When inferior seed is present in considerable quantity it is naturally presumable that adulteration has been practiced." Every seedsman is familiar with the fact that some of the finest strains produce a very inferior looking sample of seed. It is gratifying to note that the Pennsylvania State College has too much sense to shout "adulteration" in cases of this kind.

Advancing In the Wrong Direction.

Furthermore, we are all the time insisting on heavier and heavier and more highly machined seed which may be a good thing in some ways, but it is open to question whether it is always desirable. Take *Agrostis vulgaris*, for instance. We have run this up from 15 to 30 pounds, but have we improved the strain by the process? Is not this grass now approaching in character a cereal instead of a grass? Ask anyone who has had experience with the chaffy 15-pound European *Agrostis*. More grass, less stalk, more permanent. The same thing happened thirty years ago with Ryegrass in Europe, when they ran it up from 18 to 28 and lost some of its best features by so doing.

The Best Criterion.

The State College people have the right idea. The strain is the important thing and the chaff or other foreign matter that may be in a sample is of very minor importance. Even germination sinks into insignificance beside the important consideration of strain—purity of type and all the good qualities that the word covers. Of course, every good seedsman is well aware of this, but one would think that the world of officialdom had not an inkling of it from the hue and cry they make about chaff and impurities and adulteration.

Notes.

Mr. McTaggart, long familiar to the trade as a salesman in Thorburn's seed store, New York, has resigned his position to go into other business.

Sturgeon Bay, Wis.—It was reported in our last issue that the Northwestern Seed Co. had been incorporated here. This should have read, Northern Wisconsin Seed Co. This concern is

capitalized at \$25,000. C. E. Dreutzer is president, R. W. Craig secretary. They will cultivate about 1,200 acres this year.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

Monday, Feb. 14, was "Carnation Night," at Florists' Exchange Hall. It was the largest attendance held for some time, and the flower attraction was worth the visit. Before the meeting many ladies were among the throng admiring the splendid specimens of carnations, etc. Among the exhibits were several fine lots from outside the state. Henry Eichholz showed fine bunches of Princess Charming, a delicate Daybreak pink, and Washington, a rich cerise, the latter a sport from Enchantress. Judges awarded a certificate of merit on both of above named carnations. The Chicago Carnation Co. sent some specimens of a new carnation, but they arrived in such a condition that it was quite impossible to pass on merit. The flower was Conquest, variegated in color, good stems, and apparently a "good" flower in size. Another variety was Mary Tolman, Daybreak pink, and specimens also of Sangamo, a dark pink. The general exhibit was made by local florists among whom were Isaac H. Moss, F. Bauer, James Hamilton, who also had a magnificent lot of Ivory, Bridesmaid and Golden Gate roses; Lehr Bros., John Nuth, Henry Fischer, J. Rider, Ruxton Floral Nursery Co., Jno. F. King, M. Thau & Co. (crimson seedling), Geo. Morrison, F. D. Kline, Philip B. Welsh (new "Albina"), Henry Cairns, W. C. Erdman and Richard Vincent, Jr., & Sons Co. (also dahlias).

In answer to question "What makes stems of carnations weak and the buds to split?" Mr. Eichholtz said his experience was that having the temperature of the houses too warm at night was one of the causes, and overfeeding another. Said he aimed to have the temperature in his houses between 42 and 45 degrees at night. He remarked by his method he might not have as free bloomers, but knew he secured more perfect blooms.

The next meeting of the club will be the annual election which will be followed by a banquet. The past year shows a most gratifying increase in the attendance and interest at the meetings. Robt. L. Graham gave a very interesting talk of a recent visit to California, and James Hamilton also entertained the club with his experiences in early days in the extreme northwest. Other experiences of a like nature will follow. Many florists have joined the club the past year.

G. O. B.

HORTICULTURAL INSPECTION BILL WITHDRAWN.

We have just received a telegram announcing that Bill No. 15,656 introduced by Congressman Simmons and referred to the Committee on Agriculture, has been withdrawn. It was a very objectionable bill in some of its provisions, enforcing dock inspection of plants, etc., and the opposition among the horticultural importers and others was very strong. We congratulate them on this very pleasant news.

Alfred J. Brown Seed Co.
Grand Rapids, Mich.

ST. LOUIS FLORIST CLUB.

The monthly meeting, Feb. 10, was fairly well attended. J. A. Peterson of Cincinnati, staged a plant of Begonia Glory of Cincinnati, which attracted a great deal of attention and was awarded a certificate of merit. The committee on advertising reported through C. Deloever and a big discussion followed. Three new members were added to the committee, viz., W. C. Young, E. W. Guy and W. C. Smith.

J. F. Ammann and E. W. Guy of the Illinois State Florists' Association, invited the members to attend the convention of their society at Champaign, Feb. 15 and 16, and the invitation was accepted with thanks. W. C. Smith then gave a talk on "The Troubles of a Wholesaler." Considerable time was taken up in discussions from the question box, some of them very interesting to the growers present. The secretary announced that the next meeting would take place Thurs., March 10.

A MODEL RETAIL FLORIST'S PLACE.

The photograph shows the establishment of H. V. Lawrence, at Falmouth, Mass., consisting of office and store and a display house which was added the past season. The front of the house having 48 x 60 glass makes rather an attractive feature, and it has received some very favorable comment from visitors. The other greenhouses are connected in the rear. The place is not large, containing only about 8000 feet of glass, but is well arranged for growing first class stock for a rather critical local trade. The land at the rear contains about four acres devoted to nursery stock, herbaceous plants and summer flowering things for cut

flowers. A line of seeds and other garden requisites are also carried, and a modest catalogue is issued annually.

Eighteen years ago Mr. Lawrence took up the study and practice of landscape gardening which business has grown until it requires the major portion of his personal time and effort, and he can count among his clients many noted summer residents at the South Shore.

Geo. A. Black, formerly of Brighton, is foreman in the greenhouses. Two assistants are employed under glass, and about twenty-five men in the landscape department during the working season.

Flower Market Reports

BOSTON Fluctuations are the order of the day in the flower market, with a gradual tendency downward on most lines. Colored carnations are in over-supply but white ones and, in some degree, Enchantress are selling fairly well. On roses there is a decline on the average of from ten to fifteen per cent. on the entire list. Lillies are very abundant and inclined to accumulate. The same is true of bulbous material, as a class; yellow narcissi being perhaps the worst sufferers. Lily of the valley is distinctly weak, although the quality is good. The entire market throughout shows a slackening up of activity, but those who have good memories do not regard the conditions as materially different from those prevailing in other years at the same period.

BUFFALO Trade has been good for the past two weeks and a good supply of stock, especially carnations has been coming in. Too much of the ordinary brand of carnations has blocked the market, but fancy stock has had a good outlet, especially in white and the light colors. Spring material has had a good demand, although coming in heavier than can be disposed of. In this line single and double daffodils and tulips have been plentiful. Peas have sold well, also Roman hyacinths, lily of the valley, mignonette and daisies. There are plenty of violets, but the severe cold snap has had a tendency to reduce the sales. In the rose line there is a shortage of the short grades, but enough select stock can be had. Beauties are in fair supply, with demand only normal.

CHICAGO The first week in Lent was not different from the preceeding ones. So long as the supply of good flowers will barely suffice to go around, there will be no change. A sunny day will cause extra blooms to appear and a little ripple in the market is the result, but a cloudy day follows and the old conditions prevail. Long Beauties are still noted for their absence. Carnations in red and pink sold quickly to fill valentine orders. Violets also were in good demand Sunday to fill boxes, but the flurry soon died down and on Monday, the 14th, there were more violets than the market could use. The price Monday was much less than on the previous day. Pussy willows are shown in both the wholesale and retail stores and possibly do something toward making the keen wind feel springlike. Stocks are rather straggling, bulbous stock being rather near to getting too plentiful, and callas are beginning to come in. Eastern ferns are arriving in various stages, some good and others poor. Boxwood has taken a spurt this week.

The volume of green-house product disposed of last week is fully up to the mark and no deteriorating Lenten effect has been felt as yet. An increasing supply of spring flowers, especially the better quality of hyacinths and tulips coming in now helps a great deal to stimulate trade. Wholesalers in general find this season a satisfactorily paying one. An excessively long period of dark days

has prevented any over-supply in January. If crops were short the good prices obtained fully has recompensed the grower. St. Valentine's Day seemed

to bring about the usual increase of orders, with an old-time revival in the popularity of violets.

Flower Market Reports.

(Continued from page 239)

We do not make a NEW YORK practice of continually showing up the bad side of the flower market in these weekly reports. It is possible, if one is so disposed, to find on practically every day in the year, features that might be and ought to be better, and on which it is not easy to make other than unfavorable report from the viewpoint of one or the other interests. But it does happen, once in a while, that anything other than a tale of dispiriting market tendencies would be a misrepresentation; this is one of those periods. Trouble has not struck in very severely at present writing, but that it is on the way and only requires a couple of days of sunny aspect to develop to full proportions is evident to all good judges. Bulbous material has begun to accumulate; carnations are in the same predicament, and the buyers can practically set his own price; as usual, Valentine's Day gave the violets a boost, but "now comes the deluge." Roses, although of an average quality rarely attained, are showing the sluggishness which precedes a blockade and buyers—street as well as legitimate—are assuming that attitude of indifference which the experienced operator in the wholesale district so well knows how to interpret. The early date on which Easter comes is the brightest spot in the local outlook, as it insures a substantial post-Lent period of social activity before the annual spring exodus of society people. For the present all hope for the best, and should our deductions as to the prospects for the next few weeks prove to have been mistaken, nobody will be better pleased than the writer.

Business for the PHILADELPHIA first week in Lent was as good as could be expected. Improvement may reasonably be looked for from now on. St. Valentine's Day business was han-

25.00 to 35.00	25.00 to 35.00

dicapped for two reasons: coming in Lent and coming on a Monday. Still, there was quite an appreciable difference in demand the three days preceding. Violets sold about as well as any one thing. Gardenias also sold well, and so did sweet peas. Roses were rather sluggish—the best seller being Richmond. American Beauty has been scarce and below grade as to quality, and the retailers have not been pushing it. Carnations are more plentiful than ever and of tip-top quality. The supply of orchids has fallen off a little and they remain good stock as far as demand is concerned. A fairly good trade was done in such minor items as freesia, daffodils, myosotis. Roman hyacinths and mignonette.

Although Lent is upon us, there is not an appreciable change in the market. St. Valentine's Day kept things lively, particularly in the bulbous line. Gardenias took quite a tumble last week; flowers that had been bringing as much as \$1.50 each at retail, dropping to half that price. Carnations have been in unusual demand; Light-pink Enchantress leads in favor.

Wellesley, Hills, Mass.—A. G. Lake, florist, has failed. Liabilities \$7,000. Assets mild.

NEWS NOTES.

Springfield, Ill.—H. F. Janssen will open a seed and flower store at 408-410 E. Adams street.

Cheshire, Conn.—The North Western Forestry Co. has completed negotiations for the purchase of 100 acres of land in Cheshire to be used as a forestry nursery.

Paterson, N. J.—Robert Smith, the well known Market street florist, has been forced to give up business on account of his inability to meet his obligations.—Paterson (N. J.) Press.

Kennewick, Wash.—The Van Holderbeke Nursery Co. is preparing to open a nursery here. The company has 83 acres, half of which was used for a nursery last year. A. Von Holderbeke is manager.

Owosso, Mich.—Herman Thieman has purchased the interest of Mr. Ede in the Owosso Floral Co., and will continue business with Stuart Beebe. They have purchased additional land on Hickory street. Mr. Thieman will dispose of his property in Munson, Mass., and take up his business duties here early in March.

TUXEDO HORTICULTURAL SOCIETY.

The Tuxedo Horticultural Society, after a prolonged period of inactivity has at last resumed operations and is taking to itself new life and vigor. A meeting was held in the Parish House, Tuesday evening, February 8. In the absence of President Thomas Murray, Carl D. Schaeffer occupied the chair. James MacMachan and David McIntosh were elected vice-president and secretary, respectively, to fill vacancies. Eight new members were elected and the applications of several other candidates will be acted upon at the next meeting, March 8. The question of exhibition was left over until a good working committee can be elected from the augmented list of members at the next meeting. It was voted to hold a social session on March 2nd.

DAVID MCINTOSH, Sec'y.

Wilkesbarre, Pa.—Gottlieb Bauman, a florist, who has hothouses at 358 South Grant Street, has brought suit for damages to his greenhouse caused by the crashing of a slate roof from the house of Margaret Lynch, which was not securely built. Miss Margaret Lynch is the defendant.

Lockland, Ohio.—The Bloomhurst Floral Co., the incorporation of which was reported in our last issue, is pushing the work on the W. K. Partridge greenhouse, which is now the property of this new company.

PHILADELPHIA NOTES.

The Henry A. Dreer Co. have been awarded a gold medal and diploma for their lawn grass at the Alaska Yukon exposition, Seattle 1909.

C. W. Weaver of Ronk, Lancaster Co. has been making quite a name for himself recently as a grower of sweet peas and mignonette. His crops are being marketed by the Pennock-Meehan Co.

Mrs. J. Willis Martin, Mrs. J. Stuart Patterson, Mrs. James M. Rhoades, are leaders among the thirty society ladies who have associated themselves as "The Gardening Club." We welcome these able and influential coadjutors in the good cause. Can't have too many.

The sympathy of the trade is extended to C. E. Meehan of the Pennock-Meehan Co. on the loss of his father-in-law, Martin Hetzel, who passed away February 9th, at 102 Philadelphia street, Germantown, Philadelphia, aged 71. Mr. Hetzel was not connected with the florist business.

The jokers of the world are not all dead. We read of a lad from Georgia with a black rose. The Washington jokers are writing reams of "fill-up" in the most serious vein. The Georgia gentleman, it appears, just takes an ordinary "rose bush bulb" and by mixing three inexpensive chemicals gets a black rose. We would suggest the coal mines as a lucrative field for this find. It might be popular there. The miners are nearer purgatory than we of the upper air. The discoverer, it is stated, has received several offers of \$500,000 for his secret, but he is going slow on accepting such inadequate rewards.

C. M. Keegan has given up the old Graham store at 104 South 13th street. Mr. Keegan is reported to be now at Palm Beach, Fla. The removal took place on Sunday and Monday, February 13th and 14th. We trust some enterprising florist will take up this stand in the interest of the growers. It is always a bad thing to have an outlet discontinued. We want more outlets, not fewer. If more attention was given to this important topic it would be good business. It can be

"Say, what makes you so happy this morning?"
"Just made some good new business by following the advice on the bill board."

done, too. For instance, encourage the giving of carnations instead of creme de mints as was done at a recent convention at Atlantic City!

A very fine course in landscape gardening is in operation this season at State College. The 600 acres of this institution are being very ably managed and all departments of agriculture and horticulture receive the most advanced and enthusiastic treatment. J. Otto Thilow was a recent lecturer. His subject was "Landscape Gardening," from the practical viewpoint of a business man as distinguished from the academical, and was well illustrated with stereopticon views. Four hundred and eighty of the young and eager students attended the lecture.

Quite a number of the leading florists and representatives of various sections of the craft assembled at the Michell store at 518 Market street on Saturday afternoon to witness a demonstration of the effectiveness of the new insecticide, "Aphine." Some fierce entomological monsters were put in the ring by Robert Schultz of Madison, N. J. After a few rounds with "Aphine"-groomed and directed by M. C. Ebel, the able sponsor of this sudden death—the giants had a pain and curled up and went to sleep very promptly. Robert Craig brought some mealy bugs. They stood their ground a short time and then went the journey like all the rest. A cage of wild ones was sent from the Widener Conservatories under special guard, but they must have got wind of what was in store for them. At all events, they never turned up. It is supposed that they escaped into the shady woods around Olney and Oak Lane. Jno. Kuhn and Jno. Stephenson had better be on the qui vive. At the final round "Aphine" was voted the winner and many good orders were placed not only direct, but through the seedsmen. We congratulate the company on this formula and welcome them as heaven-sent messengers in our fight with the hordes of pests that are all the time doing their best to eat the industrious horticulturist out of house and home.

Movements of Gardeners.

William Morton succeeds Mr. Coley at the Craige Lippincott place. Mr.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

Wanted—Assistant Gardener

for greenhouse work on private place. Wages \$35.00 per month, board and room. State full particulars to

C. SIMPKINS

Oak Hill, Peabody, Mass.

WANTED—Foreman: Thoroughly experienced in the growing of the highest class of decorative plants, Palms, Ferns, Fuchsias, Gloxinias, etc.; also bedding plants and the propagation of Nursery stock. Permanent position to an energetic and industrious man, with advancement. Care HORTICULTURE.

WANTED—Foreman for greenhouses, experienced in bedding plants and to have some knowledge about nursery stock propagation. State wages wanted, etc. Address Rhode Island Nurseries, Newport, R. I.

WANTED—An assistant in greenhouses on private estate. Apply by letter to Thos. J. Grey Co., 32 South Market St., Boston.

SITUATIONS WANTED

SITUATION WANTED

As manager for gentlemen's place, public institution, park, cemetery, etc.; practical experience in all branches; reference, first-class. Address with particulars, C. L., care Joseph Linfoot, 1015 E. McMillan St., Cincinnati, O.

SITUATION WANTED—By rose and carnation grower; 13 years' practical experience; capable of taking full charge. Address W. H. Clump, General Delivery, Jamestown, N. Y.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

700 ft. Hitchings ventilating apparatus at 11c. per foot, every 100 ft. 2 gears; also one 9 section Furman Boiler, like new, \$110. M. Tomback & Co., Sparkill, N. Y.

Morton occupied the same position some years ago, so that he is quite familiar with the duties.

Louis Salingre, late with Sen. Cameron, Harrisburg, is now gardener for Mrs. J. Howard Gibson, Jenkintown.

Walter Scott, of the Newbold place, goes as head gardener to the W. W. Frazier estate, at Ogontz, Pa., March 1st.

Joseph W. Coley leaves the Craige Lippincott place and returns to his old stand at Bethayres (Pitcairn's) March 1st.

Salina, Kan.—The report that Edward Tatro, the florist, who bought out Mrs. John Buchi four years ago, intends to build a new range of greenhouses, is incorrect. Mr. Tatro does not propose to make any additions this year.

For San Jose Scale, and to Improve Health of Tree and Shrub.

BOWKER'S

Concentrated

Lime-Sulphur

Made in New England. FRESH from Factory to User.

NOW IS THE TIME TO ORDER Lime-Sulphur, which should be used while the trees are dormant. It destroys San Jose and all other Scale Insects and fungous spores wintering on the bark. It improves the health of the tree by destroying the mosses and lichens. As J. H. Hale says: "It smoothes up the trees."

All ready to use by adding cold water. No boiling, no special mixing plant required; no guesswork as to formula. Just add **cold** water, and spray.

Before spraying your orchard, post yourself about Bowker's sprays.—Write today for prices.

BOWKER INSECTICIDE COMPANY,
43 Chatham St., Boston, Mass.

Manufacturers of Bowker's PYROX for fruits and vegetables.

CATALOGUES RECEIVED.

Daniel Iliffe, Boston, Mass.—Folder concerning greenhouse construction, heating, repairs, etc.

E. Neubert, Wandsbeck, Hamburg.—Illustrated folder with wholesale prices on ferns, begonias, etc.

George Purdue, Orange, N. J.—Illustrated sheet of plantation baskets and other unique florists' accessories.

American Wooden Ware Mfg. Co., Toledo, Ohio—Catalogue of Wooden Ware, such as tree tubs, etc., with wholesale quotations.

L. E. Williams, Exeter, N. H.—Price List of Collected Native Trees, Shrubs and Plants. This is a very well-compiled list of native material, with wholesale prices.

Johnson Seed Co., Philadelphia, Pa.—Garden and Farm Manual for 1910. Particularly strong on farm and vegetable seeds; well illustrated. Covers highly decorated.

Daniel A. Clarke, Red Oak Nurser-

ies, Fiskeville, R. I.—Clarke's Hardy Flowers, Spring, 1910. A neat little list with a bed of hardy phloxes as cover adornment.

Burbank's Experiment Farms, Santa Rosa, Cal.—Burbank Giant Amaryllis. A good many of the items in this issue are already marked "Sold;" but there are still some left.

Watkins & Simpson, London, England—A finely illustrated series of views in the new series of this house and portraits of the members of the firm, managers, etc.

Connors Floral Co., Hamilton, Ont.—Wholesale Price List of Bedding and House Plants, Shrubs and Perennials. This is a very neat little catalogue and should bring business from the trade.

Ross Bros.' Seed House, Wichita, Kans., Seed Book for 1910. Neat cover illustrations of corn on cob, and cluster of nasturtiums. Text printed in sepia. The arrangements of illustrations numbered to correspond with

descriptive notes on opposite page is quite novel and has some good points in its favor.

Wm. Toole & Sons, Baraboo, Wis.—Guide to Pansy Culture and Catalogue of Seeds and Plants. This house is widely known for the excellence of its pansies. The list includes 135 separate kinds.

Vick & Hill Company, Rochester, N. Y.—High-Grade Aster Seed. Special for Spring 1910. The different types of improved asters are well illustrated in this 8-page pamphlet and wholesale rates quoted.

J. B. Wagner, Pasadena, Cal.—Valuable New Berry Introductions. Wagner's Giant Black Walnut. Rhubarb for Profit; a Treatise on Rhubarb Culture. These three interesting pamphlets are well worth reading.

F. H. Ebeling, Syracuse, N. Y.—Catalogue of Seeds, Garden and Farm Supplies.—This is the 42nd year of the existence of this house. The catalogue for 1910 appears in covers taste-

ly adorned with flowers and vegetables in colors. The wholesale price list of this firm is also received.

W. W. Barnard Co., Chicago, Ill.—Seeds, Bulbs, Shrubs, 1910. A fine plate of asters in colors adorns cover page. This is the 21st annual catalogue of this house. There are four pages of novelties and specialties.

Central Seed and Bulb Co., Benton Harbor, Mich. Illustrated album of specialties in gladioli, dahlias, lilies, irises, etc., showing some beautiful portraits of seedling gladioli and dahlias raised by E. S. Thompson.

C. S. Harrison's Select Nursery Co., York, Neb.—Price List for Spring of 1910. An inspiring little catalogue in the interest of more beautiful home surroundings. Tells the people of Nebraska what, when, and how to plant.

Tonkin-Munson Seed Co., Buffalo, N. Y.—"Seeds of Quality." Seems to us we have heard that phrase before. A new name in our esteemed exchange list, but the book looks good and we do not hesitate to commend it to the discriminating eye of the reader of

Gurney Seed and Nursery Co., Yankton, S. D.—"Seeds that Grow and Satisfy." Spring 1910. Gaily decorated covers in colors. Colored illustrations of Sunbeam Raspberry, Compass Cherry-Plum and Beta Grapes, with a full descriptive list of good things for the So. Dakota people are the salient points of this catalogue.

J. M. Philips' Sons, Pittsburgh, Pa.—Catalogue of Flower, Vegetable and Lawn Seeds—Bulbs for Spring and Autumn Planting.—The covers of this very creditable catalogue are in colors and we are glad to see the recognition given one of the sweetest, but often neglected florists' flowers, in making it the subject of the front cover page. We refer to the lantana. It is a flower well worthy of the honor.

Frederick W. Eberle, Albany, N. Y.—Seed Catalogue Spring 1910. A very neat and attractive issue throughout. Verbenas form the cover adornment and on the back a pretty lawn view in grey tint. Heavy paper, excellent printing and well done half tones mark this catalogue as superior to the ordinary and the absence of overcrowding or minute type in any of its pages make the reading a pleasure.

See our Philadelphia notes for the news as how Aphine acquitted itself in the bug-killing test at that city last Saturday. We commend to our readers generally and to dealers in horticultural specialties in particular, the frank, consistent, and thoroughly up-to-date business methods pursued by the manufacturers of this material in giving publicity to their goods. It is what you must all come to, gentlemen. If you want business you must seek it through modern methods. When you get ready HORTICULTURE will be glad to help you.

PRATT'S
"SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance."

B. S. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

Evergreen Brand Flower Fertilizer

Is fine plant food, immediately available.

It permanently enriches the soil. It prevents the onslaught of plant disease or insect pests.

Can be used at any time during the growing season.

Put up in 12 pound cans, price \$2.00

For sale by leading jobbers. Address

D. D. Johnson, 64-66 Wabash Ave., Chicago.

Write for further information

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street
CHICAGO, ILL.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{1}{4}$ inch pipe connections. These sprayers will never wear out and are sold by users to be the finest on the market.

Send to us for testimonials from growers using them.

OBITUARY.

Patrick Sutton.

Patrick Sutton, an old employe of the Landreth Seed Co., and a well known figure in Bristol, Pa., died, in his 75th year, on February 13th.

David Walters.

David Walters, a retail florist in a small way at Catasauqua, Pa., died February 12th, aged about 65. Deceased also conducted a general store under the title of Walters Bros. He was highly esteemed in his community.

Mrs. Elizabeth V. Schmid.

We note with deep regret the death of Mrs. Elizabeth V. Schmid, Washington, D. C., on the 9th inst. at the advanced age of 82 years. Mrs. Schmid was the mother of one of our most highly respected and public-spirited men, Edward S. Schmid, who has for years been closely affiliated with the florists of Washington.

Mrs. Schmid was born in Switzerland in 1828, and after her marriage to Louis Schmid came to America. They settled in Washington and established a paper box factory; they also inaugurated the woven wire funeral designs. Mrs. Schmid has made her home for the past sixteen years with her son, Edward S., and to him, as well as the rest of her family, we tender our heartfelt sympathies.

S. M. Owen.

S. M. Owen, editor of Farmstock and Home, is dead. What a shock the announcement gives me! He was an honest man. He defended his readers by never allowing a doubtful ad. in his columns. He was a progressive man with encyclopedia information along all the lines of agriculture. He was intensely interested in horticulture and forestry. You always knew where to find him. We did not agree in politics, but there was a broad world of common interest which gave him and his friends plenty of room. He died of heart trouble, February 2, at his Minneapolis home. Minnesota sustained a great loss when her beloved Governor passed away, and now another loss falls heavily upon her. But the grand state has an array of strong, good men to take their places and carry on their work.

C. S. HARRISON.

York, Nebr.

Danvers, Mass.—Porter Bros. have added three new greenhouses to their plant to supply the demand for early garden products. Their specialty is cucumbers.

GREENHOUSES BUILDING OR
CONTEMPLATED.

Lompoc, Cal.—W. Atlee Burpee & Co., one house.

Wenona, Ill.—Wm. Metzger; addition to the Wenona greenhouses, 6 x 80 feet.

Bismarck, N. D.—Hopkins Floral Co., another house during the coming summer.

Westboro, Mass.—A. O. Tufts, Belmont street; addition 31 x 100 ft. for carnations.

FIRE RECORD.

Newark, N. J.—The greenhouses of James Brown, 57 Briggs place, were damaged to the extent of \$100, on February 6.

Somerville, Mass.—The Reynolds Flower Store in the Central building, Davis Square, was damaged by fire, Saturday evening, February 5. The stock was an entire loss, only being partly covered by insurance.

Grand Rapids, Mich.—The Jones Seed Co., 9-11 N. Ionia street, was damaged by a fire February 3rd to the extent of about \$1,000. The property was fully covered by insurance and will be repaired immediately. It is thought that no interruption of business will occur.

New York City.—Young & Nugent, florists, 42 W. 28th street, had a narrow escape from being burned out completely on Tuesday night, Feb. 10. It originated in the cellar under the store and burned up through the floor. It did about \$200 damage before being extinguished by the fire department.

INCORPORATED.

Pittsburg, Kans.—Steinhuser Floral Co.; capital \$25,000.

St. Louis, Mo.—National Seed Co.; capital stock, \$20,000.

Lockport, N. Y.—D. T. McCarthy & Sons, general nursery, horticultural and agricultural business; capital \$33,000. D. T., T. J. and L. M. McCarthy, incorporators.

Winnipeg, Manitoba.—The Globe Co. for the purpose of carrying on the business of florists and market gardeners. Frederick Sparling, Harry Chislett, Percy J. Proctor, A. Sproule and J. Monger, incorporators.

Grand Rapids, Mich.—The new greenhouse plant of Wencel L. Cukerski, mentioned in our last issue, comprises about 18,000 feet of glass recently put up. He intends to carry on a general florist, nursery and landscape business. He has 70 acres near the city limit which he intends to devote to nursery purposes, and a shipment of 60,000 shrubs and trees suitable for this country has been ordered from France.

The Advance Ventilating Machine

After five years of continual use, our first machine are working as satisfactorily as they worked when put up. Isn't this proof enough to convince any one that our machine is of the best construction throughout, and will give better service than any machine on the market?

Same price to all. Ask for our circular and price list. We know that we can please you.

The Advance Co.
RICHMOND, IND.

Right Designing

Many a well constructed house has been spoiled by poor design; it's the combination of a well thought out design and an enduring, light Iron Frame Construction that makes the perfect house.

Such a one is this erected for W. G. Mather, Cleveland, Ohio.

Sectional Iron Frame Construction

FIRST, there was but the two compartment portion at the right—then a few years ago we added that charming octagon palm house and another two compartment wing. It now flanks two sides of the choice little formal flower garden.

What we have particularly in mind is to tell you not to be discouraged because you want more houses and cannot seem to plan out an addition to your satisfaction.

Call us in, we have fifty years of greenhouse building experience to draw upon. Our salesmen you will find are particularly resourceful, and know thoroughly the kinks of the business. You will find a satisfaction in doing business with them.

Write to us and we will write to you.

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of Elegantissima has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$1.00 per dozen; 6-in., \$5.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Pieroni, Whitman, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pots, \$12.00 per dozen.

DAHLIAS Every Day In the Year

Plant Novelties From China

"Broad-leaved evergreens thrive badly in New England," is the accepted phrase and unfortunately the truth of it is only too plainly demonstrated by the fact that the constituent members of the whole collection cultivated can be counted on the fingers. It is not so much the severe frosts as the strong sun in late February and March that is so fatal to these plants. This strong sun causes an excessive loss of water from the leaves when the ground around the roots is firmly frozen. The roots in consequence are unable to make good the loss and death ensues from exhaustion. Broad-leaved evergreens as a class affect moist woodlands when the surrounding trees break the direct rays of the sun and prevent in a marked degree excessive loss of water from the leaves. If these evergreens were more generally planted in thin mixed woods and given a protection of pine branches better success would probably attend their culture. No class of plants give greater pleasure in the garden or park, being so restful to the eye in summer and cheerful-looking in winter, and they are worth considerable more attention and care than is at present bestowed upon them.

Among the recent Novelties from China are many fine plants belonging to this class and though one hesitates to claim for them complete hardiness under the peculiarly severe climatic conditions which obtain here yet they are well worthy of an attempt at acclimatization. Surely an odd one here and there will succeed all right and if two or three can be added to our scant list something really great will have been accomplished.

Among the Chinese Barberries are many evergreen species and two in particular are worthy of trial, namely, *B. Gagnepaini* and *B. verruculosa*. The first-named

ILEX PERNYI

As Cultivated by Messrs. Veitch

VIBURNUM RHYTIDOPHYLLUM

forms a dense bush, 4 to 6 ft. tall, with narrowly lanceolate, prickly leaves, $1\frac{1}{2}$ to $2\frac{1}{2}$ inches long and about $\frac{1}{2}$ inch broad; the flowers are bright-yellow borne in dense, racemose clusters and are followed by black fruits. With its masses of yellow flowers and fine foliage this is one of the handsomest of all Barberries. *B. verruculosa* is a dwarf growing plant, 1 to 2 ft. high, semi-prostrate in habit, with ovate, prickly leaves shining above, glaucous below and axillary, golden-yellow flowers followed by violet-black fruits. For rockeries and other positions suitable for dwarf shrubs *B. verruculosa* is eminently adapted.

No class of evergreens are more generally appreciated than the Hollies and it is much to be regretted that only a couple of native species are hardy here. In *Ilex Pernyi* we have a remarkably neat and charming species, very dense and symmetrical in habit with dark green, very prickly leaves, 1 to $1\frac{1}{2}$ inches long, densely crowded on the shoots and resembling in miniature those of *Ilex cornuta*. The fruits are scarlet with very short stalks and are crowded amongst the leaves. *Ilex Pernyi* is native of thickets and woodlands in Central and Western China above 4,000 ft. when it forms a sym-

metrical, pyramidal bush, 5 to 10 ft. tall. Neither man nor beast could face a hedge made of this species!

Cotoneaster rugosa and its variety *Henryi* are both very ornamental shrubs 6 to 15 ft. tall, free-growing with arching, semi-pendulous branches and flat corymbs of pure white flowers followed in autumn by branches of pure white flowers followed in autumn in bunches late, about 2½ to 3 inches long, wrinkled, shining green above and covered on the underside with a heavy white felt.

Closely allied to *Cotoneaster* is the small genus *Stranvaesia* of which one species, *S. undulata*, is of more than passing interest. This plant forms a bush 6 to 12 ft. tall with spreading branches and ovate, smooth leaves which in autumn assume very brilliant tints. The flowers are pure white, borne in flat corymbs 4 to 6 inches across and are followed by masses of coral-red fruits. With its masses of ornamental flowers and

VIBURNUM HENRYI

fruits and fine autumnal tints *S. undulata* is a more than ordinarily attractive and useful shrub.

Among the large family of Chinese *Viburnums* are several very fine evergreen species of which *V. rhytidophyllum* and *V. Henryi* may be selected as examples. The first-named is a very striking plant in appearance unlike the ordinary conception of a *Viburnum*. A native of margins of moist woods *V. rhytidophyllum* forms a much-branched shrub 5 to 10 ft. tall with leaves of great substance, lanceolate-ovate, 6 to 10 inches long and 2 to 3 inches broad, dark green and deeply channelled above with strong prominent veins on the underside. The stems and undersides of the leaves are densely clothed with a pale, dun-colored indumentum. The flowers are small, creamy-white borne in flat, terminal

corymbs 6 to 10 inches across; the fruits at first dark red change to jet black as they ripen and are retained late into the winter. Apart from the beauty of its flowers and fruits the noble and strikingly handsome foliage of this plant is sufficient to award it a place in any and every collection of shrubs.

Viburnum Henryi is a very different plant in general appearance to *V. rhytidophyllum* but not one whit less desirable; indeed, in flower and fruit is second to none in the whole family. A native of the upland thickets, above 5000 ft. in Central and Western China *V. Henryi* is nowhere common. It forms an erect, much-branched bush 6 to 10 ft. high and nearly as much through, with narrowly-ovate, pointed leaves 6 to 8 inches long, coriaceous, glabrous and shining. The flowers are pure white, fragrant, borne in erect, pyramidal panicles 5 to 8 inches high; the fruits are bright-scarlet changing with age to blackish-crimson. A more highly decorative shrub would be hard to find.

Another remarkable *Viburnum* is *V. Davidii* which only grows 1½ to 2 ft. high with broadly-ovate, prominently three-nerved leaves, terminal, flat corymbs of pure white flowers followed by small, indigo-blue fruits. This distinct species is native of thickets and margins of woods of the Chino-Thibetan border-land but is very rare.

Daphne retusa is a welcome addition to the small family to which it belongs and one which thrives under cultivation. This new plant is a small, branching shrub, seldom more than a foot high with thick, ovate leaves about an inch long. The flowers, which are freely produced, are pink, very fragrant and similar to the well-known greenhouse plant *D. indica*. A native of the uplands of the Thibetan border, above 10,000 ft. there can be no question of the complete hardiness of *D. retusa*.

S. W. Wilson.

Trans-Atlantic Notes

VARIETIES OF HYACINTHS FOR EARLY FORCING

When hyacinths are wanted in full bloom at Christmastide the Dutch grown bulbs should be avoided, and those grown in Southern France employed instead, it being seldom that the former mature so thoroughly as to be fit for forcing in the early winter months. Experience proves that the Dutch bulbs when grown for one year in the open in Southern France are much better for early forcing than those grown in Holland. As this is a new method, the number of bulbs at the present time and the varieties are but few and it may be of interest to mention some. Moreover not all hyacinths are

similarly improved by after-cultivation in Southern France. Among the improved varieties are Grand Maitre, Moreno, Gertrude and L'Innocence.

A GOOD BUSINESS!

The trapping of the mole appears to be a paying occupation in the Swiss canton of Neuenburg, according to the mole catcher of the commune of Corcelles-Cormondreche. He caught last autumn, in eighteen days, about 4,000 moles, which brought in a sum of 800 frs. This averages 44 frs. per day, or more than the highest paid Swiss official; and nearly as much as the President of the Confederation draws as salary.

NEPHROLEPIS SCHOELZELI

This distinct variety put into commerce this year was shown at the Berlin International Exhibition and is a valuable addition to this species of fern, and is the greatest improvement noted in Nephrolepis in recent years. The plant grows with rapidity, is not particular as to soil, and is at every stage of growth a fine fern, destined to become much in request in the future.

CAMPANULA HENDERSONII

This supposed cross between *C. turbinata* and *C. alliarifolia*, growing to about 1 foot in height is a very suitable plant for the rockery, or the front row in a border of herbaceous perennials in which situations it is an

attractive plant—especially on vertical parts of a rockery. The plant has a pyramidal habit, and large, light blue flowers of a saucer shape. Like other plants dependent largely on roots growing near the surface it needs every two or three years to be surface dressed with sifted loam and leafmold, otherwise it may die out.

GUERNSEY CARNATIONS

In H. Burnett's nursery, Guernsey, a pure white named Snow Queen, Fortuna and Mrs. J. H. Clode have been added to his list of fine new varieties. Fortuna is a close approach to deep yellow, with a tinge of orange in the centre, and Mrs. J. H. Clode is one of the largest scarlets yet raised. It has a powerful clove aroma, and is a strong grower. New varieties of the present year include a yellow, and lemon colored variety, the latter a fancy. Resembling slightly Aurora but brighter is Vulcan, scarlet, with a tinge of terra cotta and crimson. Among dark ones is Pluto, crimson maroon, which promises to make a reputation. Bridesmaid is slightly paler than Mrs. H. Burnett and much larger than Enchantress. The flowers are well filled with waved petals. A faint pink flowered variety named Mrs. Tatton is excellent.

Fredrick Moore

A GREAT COMBINATION

Easter, Rose and Spring Trade Special

The combination of important horticultural dates makes it possible to combine all the above named special interests in one issue this year.

March 12, 1910

is the date selected for our Easter Number. Program, schedules and interesting matter concerning the Rose Convention to take place in New York, March 16-17-18, will be given a prominent place. The date will be particularly favorable for giving publicity in our advertising columns to all lines of spring trade—Nursery, Seed, Florists' Supplies, Building and Heating Equipment, as well as Easter Plants and Flowers, and all specialties of timely interest to any and all branches of the horticultural industries. Make your advertising copy liberal in size and comprehensive in scope. Send it EARLY so that our best service as to location, set up, etc., may be yours. Several thousand extra copies of this special issue will be printed and given circulation where they will do

Arrangement
 of Commonwealth
 Ave. trees
 and Florists' Club of Boston interesting itself in the
 movement to discourage the carrying out of the short-

sighted and altogether unwise plans of a park commis-
 sion whose knowledge of arboriculture would certainly
 stand a little brushing up. Now comes a similar vote
 of a Saturday lecture audience in Horticultural Hall—
 than which no more horticulturally intelligent popular
 audience can be found—and we understand that, in the
 few weeks remaining between now and the time when
 tree removal must begin, other influential circles will be
 heard from. Prof. C. S. Sargent, J. A. Pettigrew, John
 K. M. L. Farquhar, Samuel Parsons and others who
 have made a life study of the subject are entitled to be
 heard and their advice should be heeded. We believe
 that the publicity now tardily started will, if persisted
 in, induce an effective public awakening.

The people's turn next

The advocates of a higher rate of post-
 age on magazines and technical papers
 have heard something drop and some
 of them, undoubtedly, wish they had
 let it alone. The agitation over the postal deficit is
 likely now to continue, however, until it is settled and
 settled right, the storm centre shifting from the
 minor issue of the postage on magazines to the larger
 question of the alleged prevalent inaccuracies and un-
 businesslike methods in contracting and accounting in
 the Post Office Department. The claim of the Post-
 master General that the second-class mail was responsi-
 ble for a big deficit, based upon figuring which seems to
 have been astoundingly loose and fallacious, has been
 refuted in a most convincing manner. The press of the
 country has been aroused and will now proceed to show
 up the antiquated methods, extravagant railroad con-
 tracts and other wasteful procedures which they claim
 are largely responsible for present intolerable conditions.
 We hope every reader of HORTICULTURE will lose no op-
 portunity to declare himself for a business post office,
 managed on business principles, and absolutely inde-
 pendent of politics. When we get that we shall have a
 parcels post, the abominable burden of express extortion
 will be removed and every individual in the land will
 be a direct participant in the "consummation so devout-
 ly to be wished."

Horticulture or Pomology

Proud in the conviction that their
 state is better adapted to fruit growing
 than any other in the East and perhaps
 anywhere else on the continent the
 Virginia Horticultural Society is after the legislature of
 that state for an appropriation of \$5,000 annually to
 advance the industry of fruit growing. That their
 claim is well worthy of recognition cannot be ques-
 tioned. Public money could be devoted to no more use-
 ful object and we of the eastern part of our great coun-
 try should be duly grateful to the wideawake enterpris-
 ing fruit growers and farmers of the far west for the
 example they have set before us and the stimulation they
 have furnished for their drowsy eastern brethren to be
 up and doing. The horticulturists of Virginia who
 don't happen to be either farmers or orchardists should
 see to it, however, that their State Horticultural Society
 represents fairly all the interests which its name privi-
 leges it to stand for, and if public money is to be ob-
 tained for the avowed purpose of aiding horticulture,
 insist that it be used accordingly, giving encourage-
 ment to every branch in proportion to its importance
 and needs. And there are other states than the one
 here mentioned in which a little display of backbone on
 the lines suggested might also be used to good purpose.
 Set it down for a fact that these due rights and privi-
 leges will never be bestowed but must be demanded and
 demanded.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Cattleyas and Cypripediums.

If you have any Cattleyas that have done flowering, now or just before they begin to grow, is the best time for potting or top dressing. The material should consist of fibrous peat and live sphagnum moss, with charcoal and broken pots for drainage. The plants should be firmly potted and staked until they have become established. I think pots or hanging pans better than baskets. With pots there is not so much danger from fungus; and it is a much easier matter to remove the plants from pots than baskets, and they also last much longer. Be sure and let the plants rest upon the top of the soil, elevated above the rim so as to carry the water away quickly. Cattleyas like a moist atmosphere during their growing season. It is necessary to maintain a genial growing temperature at all times.

Cypripedium insigne and its varieties will likewise now need overhauling. In potting cypripediums, an important point is drainage, for as they have no pseudo-bulbs to support them, you cannot dry them off as other orchids, so if the drainage is not good the roots are sure to decay. A good compost is fibrous loam from which all the fine particles have been screened, some chopped sphagnum, lumpy charcoal and a portion of sharp silver sand. The pots should be half-filled with clean crocks, and when potting, slightly elevate the plants above the rims. After orchids have been potted they should be frequently syringed and have abundance of moisture about the house and benches, but it must be borne in mind that over-watering at the root is very injurious to nearly all species of orchids under cultivation.

Bouvardias.

If you grow or intend to grow bouvardias, now is the most favorable time to start propagation. Old plants can be shaken out and the thicker roots cut into pieces half an inch in length. Placed in sand with the bed about 70 degrees, will do very well. In about four weeks the little plants will be starting through the sand. When about an inch high lift out and pot off into small pots. They should be kept in a warm house until well established. They can also be increased by cuttings of soft wood; these make faster-growing plants than those obtained by root cuttings.

Dahlias.

The old roots can be started any time from now up to April. The roots should be started on a bench or in boxes, planting them quite close together in rich loam. Give them a light situation near the glass and a temperature of from 55 to 60 degrees. When they put forth sturdy and thick-stemmed growth of about 2 or 3 inches long they are fit for the cutting bed. Place them in well firmed sand with very little bottom heat. With good care as to shading, spraying and ventilating, in about 2 or 3 weeks the cuttings will be ready for potting. When once well established in small pots, they should be transferred to a

A MODERN DELIVERY VEHICLE.

This is an automobile for business uses and it belongs to the Pennock-Meehan Company of Philadelphia, but we do not illustrate it because of either one of these facts alone. Our object is to direct the attention of our readers to something in the line of advancement—an equipment which will soon

be looked upon as an indispensable adjunct in any branch of the business requiring improved facilities for the transportation and delivery of goods. The picture will tell its own story to the man who is out to attain and maintain a position among the leaders in the ceaseless struggle for business pre-eminence.

cool, light and well ventilated house and grown on, giving plenty of room between the plants as they require it.

Lorraine Begonias.

The leaf cuttings that were put in sand some six weeks ago will now be showing young growth and should be nicely rooted by this time. In potting use a light sandy compost and be sure to keep a little on the dry side until the roots are running well through the soil. The cut back plants which have been brought into heat and syringed well will give some fine cuttings. Put them in clean, sharp sand, where there is a bottom heat of 70 to 75 degrees, and if managed well they are bound to root. After they are established they will want a good deal of attention such as pinching off all the flowers and by stopping the original cutting, which will strengthen the root and will encourage the vigorous growth which is necessary to good plants for next Christmas. Keep in about 50 to 55 degrees at night.

Genistas.

Those that are intended for Easter should have the flower buds quite prominent by this time, in which case they will be all right. If they are pot-bound some manure water will do them good about once a week. Put in a batch of cuttings now in a cool house and they will root well. By potting and growing them along they will make nice plants for next Easter. Do not allow them to become stunted during their growing season.

Verbenas.

Propagation for bedding should go on until you think you have enough. It may be done at any time from now until April. The advantage of cuttings over seedlings is that named varieties can be maintained pure beyond a doubt

from year to year. It is not yet too late to sow seed; they will come along fast and make nice plants by planting-out time. Grow them along in a cool house, say about 45 to 50 degrees at night.

Smilax.

Be sure not to let your smilax bed go without strings. It is negligence that will show itself very soon. Keep on the dry side until growth starts anew. When the crop is cut and the new crop well started, a good mulch of manure will help the bed. Give daily admission of air to harden the foliage, so it will stand after cutting. Syringe daily except on unfavorable days. Keep near 60 degrees at night. For stringing smilax no material is equal to Meyer's green silkline.

JOHN J. M. FARRELL.

STRAWS.

Merely straws—but they "show the way the wind blows." For the three months ending February 19, 1910—the dearest period in the year for any building operations—we have received news of greenhouses building or contemplated in New England territory as follows: Conn. 7, Maine 6, Mass. 36, N. H. 2, R. I. 3, Vt. 1; 55 in all. Worth noting, is it not?

New subscribers for HORTICULTURE coming in ordinary run of business in past 15 days, 42; distributed as follows: 1 each for Ala., Belgium, Canada, Ga., Ia., Ky., La., Md., Mich., N. J., Okla.; 2 each for Ill., O., Pa., R. I., Wash.; 3 for Conn.; 8 for N. Y.; 10 for Mass.

Wm. Elliott and Sons, New York, are in receipt of their first consignment of roses and conifers for auction. Their first sale will take place on March 15th.

NEWS OF THE CLUBS AND SOCIETIES

NEW ORLEANS HORTICULTURAL SOCIETY.

There was a bare quorum at the regular monthly meeting held on the 17th inst. A regular hurricane blowing from the northwest with freezing temperature kept most of the members at home attending to the fires. Vice-President Doescher presided, but only some routine business was transacted. Committee reports were held over for a month. Exhibition of flowers from U. J. Virgin and the Metairie Ridge Nursery Co. were on the table. H. Doescher had also on the table splendid specimens of eight varieties of forcing cucumbers, the price of which he explained, was getting better as spring approached.

ILLINOIS STATE FLORISTS' ASSOCIATION.

The fourth annual convention of the Illinois State Florists' Association was held at Urbana, Ill., February 15-16, 1910. The address of welcome was given by Dr. Edmund James, president of the University of Illinois, and was responded to by Phil J. Foley in a few well chosen words. Then followed an address on "The Value of the Experiment Station to the Florists and the Duty of the Florists to the Station," by Prof. J. C. Blair, chief of the Department of Horticulture of the University.

Wednesday morning the meeting was opened by an address on behalf of the Illinois Outdoor Improvement Association, by Dr. J. W. Garner, professor of Political Science of the University of Illinois. Next on the program was a paper on "The Cut Flower Industry," by C. L. Washburn of Chicago. This was followed by an address on "Our Work," by H. B. Dörner, associate in floriculture, who has charge of the experiment work of the University of Illinois. The result of the election of officers was given in our issue of last week.

This association was organized at Peoria, Ill., March, 1906. Its objects are to promote in every way possible the art of floriculture, ornamental horticulture and gardening under glass, including educational and civic improvement benefits arising therefrom; and for making researches into diseases of ornamental plants and greenhouse vegetables, suggesting remedies, etc.

The judges made the following awards:

Seedling Carnations. Chicago Carnation Co.—Mary Tolman, 85; Conquest, 85; Sangamo, 85. F. Dörner & Sons Co.—White Wonder, 85; Hoosier Lad, 88; Scarlet Glow, 85; No. 42-06-Light Pink, 85. R. Witterstaetter—President J. A. Valentine, 85; No. 1407-0, 80. Walter W. Coles—Mrs. Walter Coles, 85. A. C. Brown—Superba, 80; Optimo, 75; Clara Mae, 65. W. N. Rudd—Greenwood, 86. N. Zweifel—Bright Spot, 86. E. G. Hill Co.—Annie May, 86; Mrs. Beckwith, 81; James Whitcomb Riley, 81. A. C. Canfield—Red Nelson Fisher, 80. Anton Then—No. 291 Scarlet, 74; No. 41 White, 83. Bauer & Smith—Shasta, 85.

Among the exhibits especially notable for quality or extent were the roses from Wendland & Keimel, Bassett & Washburn. Poehlmann Bros. Co., J.

F. Ammann, A. T. Hey, W. H. Gullett & Son and E. W. Guy; carnations from Chicago Carnation Co., J. F. Ammann, C. Loveridge, Wirth & Gaup, W. C. Hill Floral Co., H. Johann & Son, Henry Baer, Mrs. A. C. Canfield, A. Washburn & Sons, besides the firms mentioned in the above list of seedlings; J. A. Peterson, Begonia Glory of Cincinnati and specimen foliage plants; F. B. Smith & Son, flowering plants; A. Jurgens, narcissi, and D. D. Johnson Co., Evergreen Brand fertilizer.

Chas. L. Washburn.

Chas. L. Washburn, newly-elected president of the Illinois State Florists' Association, is just completing his fifty-second year, but he is as full of vigor and as keen in business as he was twenty years ago. Like many another successful business man he

CHARLES L. WASHBURN

began his career in the lumber woods where he remained till 1893, when he entered into partnership with O. P. Bassett, whose daughter Kate he had married in 1884. Mr. Washburn bought out Mr. Bassett's share of the business four years ago, but the business is still done under the old firm name. Mrs. Washburn died in 1902, and Edgar B. Washburn, the only son, is associated with his father in the cut flower business.

There is not a more popular man in the wholesale flower business in Chicago than Mr. Washburn, and his business character is above reproach. The State Florists' Association will have an able head the coming year.

AMERICAN CARNATION SOCIETY.

Registration of new carnation by Frank E. Whitney, Fishkill on Hudson, N. Y. Gardener to Winthrop Sargent. Wodenethe—Prosperity × Enchantress. Pure white. 3½ to 4 in. Strong erect grower. Runs to flowers quick. Beautifully formed, full flowers, with the old clove scent. Strong calyx, seldom splits. Scored 90 points for preliminary certificate at A. C. S. convention in Pittsburgh.

A. F. J. BAUR, Sec.

LENOX HORTICULTURAL SOCIETY.

One of the most interesting and instructive meetings held by this society for some time was presided over by President G. Foulsham on Saturday, February 5th, and was largely attended. An exhibit which called for our special praise was a vase of new white carnation Wodenethe by Frank E. Whitney, of Fishkill, N. Y., which was awarded a first-class certificate. The flowers measured 3½ to 4 in. across.

Mr. E. Jenkins gave an interesting lecture upon the growth and pruning of trees under the title of "Tree Surgery." He showed in a practical manner how trees are increased in value and live longer under judicious pruning. Mr. Wingett showed how the market value of timber could be increased by thinning, etc. Mr. Jenkins answered many questions in a very able manner and was accorded a hearty vote of thanks. No date has been decided for the society's annual dinner as yet. The committee in charge are Messrs. E. Jenkins, A. H. Wingett, A. J. Loveless, A. J. Jenkins and A. McConnachie.

The annual ball was held on January 24th and was a decided success, both financial and otherwise. The committee of which Mr. F. Butler was chairman are to be congratulated upon the success attending their efforts. Rose and Carnation Night will be held Saturday, April 2nd.

G. H. INSTONE, Secretary.

ELBERON HORTICULTURAL SOCIETY.

This society held a meeting on the 4th of February, President Peter Murray in the chair. There were present three directors of the Monmouth County Fair Association, and they asked the members of this society to co-operate with them to make a good show in the horticultural department.

The awards for competition were as follows: Wm. Seymour, for callas, 98 points; A. Bauer, carnations, 85 points; P. Ewen, sweet peas, 80 points; C. Duncan, azalea, 75 points; James Dowlen, a preliminary certificate for a variegated seedling carnation, also a certificate of culture for a vase of Anthurium Ferrierense. Mr. Dowlen also staged a fine collection of roses.

ALEX. FLEMING, Rec. Sec.

NEW BEDFORD HORTICULTURAL SOCIETY.

At the regular meeting of the New Bedford Horticultural Society the following officers were elected for the ensuing year, being a complete change in the official staff: President, Frank C. Barrows; vice-president, John P. Rooney; secretary, Wm. H. Richardson; treasurer, Walter A. Luce; executive committee, Jas. McVicker, A. H. Jahn, Edw. E. Pierce, Richard Parkinson, Geo. H. Salters, W. D. Hathaway, Albert Peters and John P. Rooney. The committee has near completion the schedule for the fall show, which will introduce many new features and will without doubt be the best show by far that the society has ever held, surpassing in some respects, it is hoped, any flower show ever held in this state.

NEWPORT HORTICULTURAL SOCIETY.

A regular meeting of this society was held on the evening of Feb. 22nd, and although the attendance was small on account of stormy weather a considerable amount of important business was discussed. A report from the executive committee was received and favorably commented on. This report recommended the holding of two exhibitions for the year, as usual, one in June mainly for roses, and the other in September for general exhibits. The report included a premium list with governing rules for the June show, which is similar to those of other years with a few changes that past experience has shown need for, and these recommendations will probably be adopted at the next regular meeting when a more representative meeting is expected. A. J. Richards, of Richards Bros., New York, was present at the meeting and made an offer of a valuable silver cup as a first prize in any suitable class which the society may arrange for, also a second prize of \$10 for same class, and needless to say the offer was gratefully accepted. Among other things considered was the recommendation made in a paper read at a recent meeting by Richard Gardner, that several sets of three judges be employed at exhibitions where many classes have to be judged, and this recommendation was strongly supported by all who spoke on the subject, so it is probable that this plan will be tried at our coming exhibitions. Eight members of this society attended the annual banquet of the R. I. State Horticultural Society in Providence, Feb. 16, and all report that they had a very enjoyable time.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular meeting was held in Pembroke Hall, Glen Cove, on Feb. 9, with over forty members present, and President Duthie in the chair. Six applications for membership were received, and Mr. C. H. Hyde, Roslyn, was elected honorary member. The schedule for our summer show was approved, date and place to be decided later. The dahlia show will be held Sept. 28 and schedule for same was accepted. Stumpp & Walker Co. offered a silver cup for the fall show, and at our last dinner Geo. Burnett offered \$25 as prizes for same. Next meeting will be Rose Day, and three prizes are offered for best 3 white, 3 pink and 3 any color respectively. Vice-President Reidenbach also offered prizes for best two vases of sweet peas, 1st \$3.00, 2nd \$2.00.

Geo. Wilson's essay on "Carnations" was a treat, and it certainly deserves a first place among writings on the same subject.

Messrs. MacKenzie, Marshall and Johnson acted as judges and their decision was as follows: Carnations—12 white, V. Cleres with White Enchantress; 12 pink, A. Robertson with Enchantress; 12 mixed, V. Cleres with Imperial, Winsor and Enchantress. Cultural certificates to W. Eccles for Winsor and for Mrs. Chas. Knopf; H. Gaut, for sweet peas; E. Reidenbach for cyclamens; A. Robertson for Enchantress. Honorable mention to

F. Petroccia for Primula Kewensis, and E. Reidenbach for freezias. At next meeting, Mr. Johnson will give us an account of his travels across the sea during his last vacation.

OSCAR E. ADDOR.

DETROIT FLORIST CLUB.

Members were well repaid for attending their last meeting because the paper on cyclamens, read by Mr. Winterick, of Defiance, Ohio, was so interesting, clear and plain that everybody became enthusiastic over it. Solicit points of the paper were:

Sow your seeds in flats, the rows to be $1\frac{1}{2}$ inches and seeds in the rows $\frac{3}{4}$ inch apart. Cover flats with sphagnum to avoid the formation of green moss, which is very injurious to the bulbs later on. Work the soil frequently. Provide bottom heat to facilitate root formation, but provide cool air for the top of plants. Hot beds, not too warm of course, with sash well shaded and placed so that

E. C. BRUCKER

Retired Financial Secretary of Buffalo Florists' Club, Who Has Held Office for Ten Consecutive Years.

light winds pass over the leaves. Summer dews, especially in August and September, are very beneficial to the forming of buds. Give the plants plenty of room to develop good foliage and when moving the plants always press the foliage apart. Leaf mould, sandy loam, plenty of drainage, some charcoal and very fine siftings of bone shavings. Do not cut broken leaves or blooms as this will cause the balance of the stem to decay down and into the bulb; always pull them off with a quick jerk. Select your seed plants early in the season. Spotted flowers are the result of poor seeds, caused by insects interfering with fertilization.

After a lengthy discussion of this paper the flower show question was again brought up, and ended with a decided vote in favor of a show at Wayne Pavillons and a guarantee fund of over \$1,000. The meeting then adjourned till Wednesday night to hear more reports of the finance committee.

FRANK DANZER.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Begonia.

Publication notice is hereby given that J. A. Peterson of Westwood, Cincinnati, Ohio, offers for registration the Begonia described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's description. — Parentage, Socotrana \times , a sport of Lorraine type. Foliage large round, resembling foliage of Begonia Socotrana, but smaller. Height, 1 to $1\frac{1}{2}$ ft. Color, deep soft satiny pink. The individual flowers are about 2 inches across.

Flowering period, from October to April, being at its best during latter part of December. Propagation by leaf-cuttings, or by splitting up the foliage, as with the Rex varieties. Soil, a light sandy loam and leaf-mold, with a little well-rotted cow manure. Its lasting quality is especially recommended.

Name, "Glory of Cincinnati."

Corrections.

The name, "Alice of Ingleside," was omitted from the registration on January 12, 1910, of the rose offered by Mr. Southwick Cary Briggs of Washington, D. C.

In the change of registration on January 20, 1910, by S. Cockburn & Sons of Woodlawn, New York, the name of the Chrysanthemum should have been "Mrs. Jane Cockburn" instead of "Mrs. Jane Cochran."

H. B. DORNER, Secretary.

February 17, 1910.

MINNESOTA STATE FLORISTS' ASSOCIATION.

The monthly meeting of this association was held at Merriam Park, Feb. 15. Louis Boeglin from the Minneapolis Park greenhouses, exhibited Cineraria stellata, which scored 80 points, and C. hybrida, 85 points. The flower show committee from St. Paul, reported a guarantee fund of \$5000, against \$15,000 subscribed in Minneapolis. The first flower show will be held at Minneapolis, the latter furnishing the largest guarantee fund. The president will appoint a committee of three growers and three retailers to draw up a premium list and prepare rules for judging, said committee to report at next meeting. J. Jorgensen, superintendent of L. S. Donaldson's greenhouses, read a very valuable paper on rose grafting, a copy of which will be sent to all the trade papers.

The second annual dance, held at Minneapolis, was a very successful affair. About 250 persons were in attendance. Minneapolis invited St. Paul to another bowling match to be held at Minneapolis on Feb. 24th. Professor Clemens, of the Minnesota State University, will read a paper on landscape gardening at the March meeting of the association.

C. N. Ruedlinger will leave the employ of the park board as forester, to engage in landscape work. His resignation will take effect March 15th.

Frey's New Single and Anemone Chrysanthemums

My originations were the sensation at the National Flower Show, 1908. They are the winners of the \$50.00 Silver Cup, 2 first and 1 second Prize, Certificate of Merit of the Chrysanthemum Society of America and Minnesota State Florists' Association, 2 First Prizes at Milwaukee, 1909.

These are all exceptionally fine for commercial purposes, either for cutting or as pot plants, it being my aim to send out only such varieties as have stood a severe test in this market. The constant gain in favor of these two types has been so rapid and their value for all sorts of decorative purposes so great, that every grower will want to invest in them. It has been stated by authorities that these varieties are a great improvement over those now in commerce.

1910 NOVELTIES

Mrs. Theodore Wirth. Anemone, a most beautiful, soft pink, with light yellow center, preceding Mrs. John Pesther, a money maker.

Alpine Glow. Anemone, large white flower, with a glow of pink, very beautiful.

Christina Scull. Single, medium-sized flower, like a golden Marguerite, very profuse.

Grace Clementina Burki. Single, pure white, large, round flower, very substantial, following Lady Lu.

Mrs. John Pesther. Single of medium

size, Enchantress pink, long, slender, wiry stems, comes for Thanksgiving, extra fine.

25c each; \$2.00 per 10; \$15.00 per 100.

1909 INTRODUCTIONS

ANEMONES

Lida Thomas. Delicate cream, late.
Gertrude Wilson. Deep yellow, very fine.

Beatrice Asmus. Pure white, one of the best.

Mrs. Edw. F. Swift. Delicate pale lavender, one of the first to bloom.

Mrs. Augusta Knab. Creamy white, with yellow center

Miss Ida Kroeschell. Light yellow, with quilled petals.

SINGLES.

Miss Dorothy Deneen. Silvery pink.
Bishop Henninghaus. Brown red, quilled part bronze, very odd.

Lady Lu. Beautiful white Shasta Daisy effect, extra.

Minnesota. Very striking, blood red.

Mrs. T. Edw. Wilder. Beautiful Enchantress pink, extra fine.

John Gossweiler. Bronze, resembling Gaillardia Aristata.

Rooted cuttings or 2½-inch pots, 10c each; 80c per 10; \$6.00 per 100.

Delivery will commence 2nd week in March. All orders will be filled strictly in rotation. Mention HORTICULTURE in writing.

ALOIS FREY, - Crown Point, Ind.

YONKERS HORTICULTURAL SOCIETY.

A very interesting meeting of this society was held on the evening of Feb. 16th. In response to the prize offered at our last meeting by Peter Macdonald a very fine exhibit of carnations was shown. The judges, Nichol A. Macdonald and W. Wright, awarded 1st prize to W. H. Waite; 2nd to J. Goff; honorable mention to R. Cummings and Mr. Cochrane. H. Scott also received honorable mention for a fine exhibit of Callas.

President Bennet read a very able paper on "American Beauty Roses," after which a general discussion was had.

Our next meeting will be on Wednesday evening, March 2. Secretary Waite will read a paper on "Gardeners and the Gardening Profession." The society will hold a dinner at Park Hill Inn on March 10.

LEE WHITMAN, Cor. Sec.

A CUP FOR SIX ROSES.

Among the prizes at the spring show in New York of the American Rose Society is a \$50 silver cup in Class G for the best display of six roses, American Beauty excepted, offered by Moore, Hentz & Nash of New York. The intent of the offer of so large a premium for an exhibit so small is that a grower with the smallest establishment may have his chance to compete. No doubt the competition will be extensive and the entertainment is for the visitor and not for the judges. The donors seek to add variety and interest to the show as a whole, by introducing a new department devoted to assemblages of various kinds and various colors in each six; and, because of the assured diversity of colors and of the freedom allowed as to sorts, there is every reason to expect a display affording entertaining contrasts, both in the exhibits and between them. Here will be a medley of specimens in contrast to the uniformity which is the feature of the rest of the show. It is intended to excite comment, to afford pleasure and instruction, and to produce a small "War of the Roses." The exact specification for this exhibit will be found in the official Prize Schedule of the American Rose Society for 1910.

OBITUARY.

Joseph E. Fuller.

In the death of Mr. Joseph B. Fuller on February 16, the seed business has lost one of its oldest and most esteemed representatives.

Mr. Fuller was born in Brooklyn, N. Y., Oct. 31, 1827. When he was three years old his family moved to Rochester, coming by the Erie Canal and stopping on their arrival at the old Rochester House, corner of Exchange and Spring street. At the age of four-

JOSEPH E. FULLER

teen he was apprenticed to the late Henry O'Reilly to learn the printers' trade. Later he was with the Genesee Farmer, published by the late James Vick and edited by the late Patrick Barry. Being for years in close relationship with Mr. Vick in the printing office, and the two being drawn together by a mutual love of flowers, he was easily persuaded to engage in the seed business. In 1863 he entered the employ of Mr. Vick, and continued almost uninterruptedly with the Vick firm from that time until failing health about a year ago necessitated his giving up active work.

Mr. Fuller's influence in the development of the business was scarcely second to that of Mr. Vick. His whole life was bound up in the work and his whole energy devoted to it. For years he had pursued the study of botany and his extensive knowledge of plants was of great advantage. His knowledge of stocks was extensive and thorough; his judgment and accuracy were without equal; and his honesty unimpeachable. To his perfect integrity and absolute reliability the success of the Vick seed business was in no small degree due. He was a thorough seedsman, far-seeing, conscientious and accurate.

During a trip to Europe, in 1888, Mr. Fuller was invited by Messrs. Carter, Dunnett & Beale to inspect their trials of peas. Of one particular variety, his opinion was asked as to its quality. His reply was: "It's a daisy." This bit of American slang evidently impressed the famous English seedsmen, for a few years later this variety was introduced as "Carter's Daisy," and fully justified Mr. Fuller's opinion of its good qualities. His genial manner made him hosts of friends in the trade. Many a long chat, over cigars, did he and the veteran seedsman William Meggatt have in the old Vick Seed House, on East avenue, in the eighties.

Mr. Fuller's geniality was one of his most prominent characteristics. He had a good story apropos to every occasion. His reminiscences of the early days of Rochester, and of the volunteer fire department of which he was a member, were particularly enjoyable. He was a member of the Rochester Academy of Science, giving devoted attention to the work of the Botanical Section. In 1896, when the Academy published a list of the plants of Monroe County, it was difficult to find a compositor sufficiently familiar with botanical terms to set up the list in a satisfactory manner. Mr. Fuller came to the rescue, and though it was years since he had stood at the case, he set all the type for this work of more than 150 pages, a remarkable achievement for a man of his years, as well as from a typographical standpoint.

With his fellow workers in the seed business he was always pleasant, kind, patient and forbearing, with the old-time courtesy of manner so seldom

WISDOM IN LENT

The really wise man shows his wisdom by looking ahead and getting prepared for the future.

You Can Make

no better use of these quiet days in Lent than by laying in a stock of necessary and salable goods for the rush that is sure to follow.

Bear In Mind

that **Bayersdorfer & Co.** can supply you with **everything** requisite for a successful and profitable Easter and Spring trade except fresh plants, flowers and business sand. These you must find elsewhere. The first evidence that you have the sand and the wisdom will be to send for our magnificently illustrated Wholesale Catalogue.

We have the best line of novelties ever offered in America.

H. BAYERSDORFER & CO.

1129 Arch Street,

Philadelphia, Pa.

seen now-a-days. In his death they feel that "a good man has fallen."

Mrs. Elizabeth Fanning Brooks.

Worcester, Mass.—Mrs. Elizabeth Fanning Brooks, wife of Chas. E. Brooks, formerly treasurer of the Worcester County Horticultural Society for many years, and sister of David H. Fanning, died Feb. 16, age 76 years.

Mrs. N. A. Benson.

Denver, Colo.—Mrs. Benson, wife of N. A. Benson, died Feb. 7th at the family residence, 1306 South Sherman St. The funeral was held Feb. 9th, with interment at Fairmount Cemetery. Nearly all the local trade were in attendance.

George W. Schroyer.

A brief telegram on the 23rd inst., announced the passing away on the 22nd, of George W. Schroyer, of Lancaster, Pa. Mr. Schroyer was nearly 90 years of age and was active in the florist business in Lancaster up to about a year ago. His son, Harry A. Schroyer, has been associated with his father in the business for many years and will continue same.

A splendid opportunity to possess the most beautiful of the newest and most popular forms of fancy single and anemone chrysanthemums is offered in the advertisement of Alois Frey, in this issue. Mr. Frey's productions are recognized as unexcelled in this country or abroad, and have been the sensational feature of the Chicago chrysanthemum shows for several years.

PERSONAL.

Newark, N. J.—John Watson has been elected secretary of the Jackson & Perkins Co. as a reward for faithful service.

Pittsburgh, Pa.—Ben. L. Elliott and Miss Mary Bader, daughter of John Bader were married Tuesday morning, Feb. 8, and left on the noon train for a honeymoon trip.

Hartford, Conn.—Vincent H. Olmsted of 10 Pliny St., foreman for John Coombs, was the unfortunate victim of a fall from a ladder while decorating a building two weeks ago.

Chicago, Ill.—E. B. Washburn and wife will start for California Feb. 25th, and locate near Riverside. The trip is taken to benefit Mr. Washburn who has been in poor health for some time.

Waterbury, Conn.—John Saxe of Saxe & Floto, 205 So. Main St., has been in the hospital for the past 12 weeks. He is now recovering and expects soon to be at his business again.

The Engelmann Botanical Club of St. Louis met on February 14th. E. G. Arzberger of the Shaw School of Botany read a paper on "Root-tubercles of a few plants and some facts regarding the fungus which cause them." This was one of the best papers read before the club for a long time and was much enjoyed by the members. This club is about to publish a "Preliminary Check List" of our local flora. H. P. Chandler is president; L. P. Jensen, gardener to Adolphus Busch, is secretary and treasurer. The next meeting of the club will be March 14th.

Horticulture Pub. Co.:

Dear Sir:—We have read your journal from the first number and want to keep on. It is getting better and better.

Yours truly,
S. & S.

WHAT

APHINE

Will Do at Public Tests

It Will Do for YOU

At these demonstrations we proved conclusively that within a very short time it will destroy Black, Green and White Fly, Mealy Bug and Scale.

It is equally effective against Red Spider and Thrips.

Its comparative cost with other insecticides makes APHINE one of the most economical remedies now on the market for greenhouse and outdoor work.

Send for name of nearest selling agent.

Aphine Manufacturing Co.,
MADISON, N. J.

OSMUNDA FIBRE

We can also supply at once Rotted or Azalea Peat, Leaf Mold, Live or Baled Sphagnum Moss.

SAMPLES AND PRICES UPON REQUEST

C. W. BROWNELL & COMPANY, WALDEN, N. Y.

CHICAGO NOTES.

The Visit to Urbana.

A creditable number of florists left Chicago, Tuesday, Feb. 15, for the two days' session of the Illinois State Florists' Association, at the State University, Champaign, where also includes the Agricultural Experiment Station. Among the number from Chicago were P. J. Foley, C. M. Dickinson, A. T. Hey, W. L. Palinsky, John Then, August and Adolph Poehlmann, C. L. Washburn, H. B. Howard, Mrs. M. Flint, C. W. Johnson, J. C. Vaughan, W. N. Rudd, R. S. Woodyard, Anton Then, A. T. Pyfer, T. Prodie, N. P. Miller, F. Kidwell, Geo. Asmus and M. Barker. A gracious hospitality was shown the two hundred or more in attendance, by the president of the Illinois State University, President Edmund J. James, who gave them an address of welcome that left no doubt as to his sincerity. P. J. Foley was the man to respond and as usual did it in a very acceptable manner. An account of the meetings is given elsewhere. Election of officers was recorded last week. Mr. C. L. Washburn, president-elect, says that if growers generally, only realized the help the Experiment Station can be to them they would not consider the cost of a trip there of any account. Much that the individual grower must learn by experience, can be learned here for the asking. Four varieties of carnations, Enchantress, Beacon, Winsor and White Perfection, are being tested with five different plant foods. So far Enchantress has been found to be the heaviest feeder and Beacon the lightest. The effects of over-feeding are also noted. At the close of the season a bulletin containing the results of these tests will be mailed to each member of the state society of florists.

A Problem for the Floral Artists.

Now that Lincoln Day, St. Valentine's Day and the day of the Father of Our Country are all in the past, Chicago florists will have a few days in which to think of a suitable window for the 17th of March. It will take plenty of real ingenuity to get up a window display that will properly do honor to the patron saint of Ireland, and the President of the United States at the same time. A big stick covered with shamrock would have been so easy had it been the former president. But no doubt our florists will be equal to the occasion and get

up something that will do themselves credit.

An Educational Venture.

Chicago has a proposition for using its 240-acre Gage farm. A. W. Beilfuss, chairman of the small parks commission, plans to make a sort of horticultural college of this farm, where anyone can go and learn what kind of trees and shrubs to plant and how to care for them. He further plans to make it possible for the city to sell plants, trees and shrubs for a little more than cost, to every lover of the same. (Better cut out that part of it.—Ed.) This farm has been leased for one-fourth the amount of taxes, but this year the city has refused to again rent it.

The Excursion to Joliet.

About twenty-five took advantage of the excursion to Joliet and were entertained by the Chicago Carnation Company in good style. Everything in the way of stock is fine and the visitors were much pleased with the new varieties as well as the old.

City News.

The cement exhibit at the Coliseum is of interest to the florists, that com-

STUART LOW & CO., late of Hugh Low & Co. dissolved, are now receiving large importations of **BURMESE DENDROBIUMS**, such as **Wardianum**, **Crassinode**, **Fimbriatum**, **Devonianum**, **Nobile Brymerianum**, **Thyrsiflorum**, etc., and will give excellent value.

Also hold very large stock of **WARDIANUMS**, **CRASSINODES**, etc., to flower **THIS SPRING**.

Also **LAELIO-CATTLEYAS**, **BRASSO-CATTLEYAS**, **ODONTOGLOSSUMS** in spike, all for Spring and early Summer flowering.

position having rapidly gained in favor as a greenhouse construction material.

In the death of Mrs. H. W. Magee, last week, Chicago lost a woman who has been active in the civic betterment of the city. She was especially noted for her work in the interest of the small parks.

P. N. Obertin of Kenosha, Wis., says he never saw more flowers used than at a recent funeral there. He furnished 1200 dollars' worth himself and those supplied by Milwaukee florists filled an entire express car.

There will be an International Forest, Fish and Game Exposition at the International Live Stock pavilion, March 19 to April 2. A contract has been let for the construction of an artificial lake to cover an area of 28,125 square feet.

The trade responded liberally with flowers to be sold at the benefit play for the Anti-Cruelty Society, at the Grand Opera House, Feb. 21st. Florists in Chicago, as elsewhere, have big enough hearts to lend a helping hand in a good cause.

LILIES
PLANTS
BAMBOO STAKES

Chicago florists generally, did not honor the Father of their country by any great window demonstration. Perhaps the cold, stormy weather, causing a dropping off in business which had seemed a week ago to be brightening up, was too depressing. At any rate, the cherry trees and hatchets were not plentiful.

Visitors—J. Karins, representing H. A. Dreer, Phila.; Mr. Creighton, representing A. T. Boddington, N. Y.; P. N. Obertin, Kenosha, Wis.; Robt. Fulton, with Henry & Lee, N. Y., on his way home from Japan. Mr. Fulton spends all but two or three months of the year in Japan and China.

A CUBAN EXPEDITION.

A party consisting of Dr. N. L. Britton of the N. Y. Botanical Garden, Mrs. Britton and Perry Williams from New York, to be joined by Prof. F. S. Earle at Cienfuegos, started on February 17 for southern Cuba to botanically explore the Trinidad Mountains in the province of Santa Clara. The party will not return until end of March or possibly later.

MARTIAL BREMOND

Martial Bremond of Ollioules, France, is the largest grower of strictly first class French bulbs in existence. His clientele is composed of the most critical buyers all over the world. They are men who have bought Bremond products for many years, and know the value of his bulbs. Horseshoe Brand Products in French bulbs are "Bremonds" and which means that they are the best the market affords, in the various sizes offered.

Seed Trade

The Cannery Convention.

The Cannery Convention at Atlantic City, proved, as predicted in these columns some weeks ago, very much of a frost in so far as the attendance of the cannery themselves is concerned. Not over a third of the number which attended the two last conventions were present, and while much business of importance was transacted, it was very evident to all that the absence of a machinery exhibit was largely responsible for the slim attendance. About the usual number of supply men were on hand, but not nearly as many machinery men. The heads of the different concerns were there, with possibly one or two leading representatives, but the large army of workers who usually accompany the machinery to install and operate same, were of course, absent.

A Prospect for Harmony.

One result of this rather slim attendance of cannery has been a change in their attitude towards the Machinery and Supplies Association, and it looks now as if the two organizations would work together on a basis of real co-operation. A committee of four from the Cannery Association, three from the Brokers' Association and three from the Machinery and Supplies Association are to meet in Chicago early in March, to decide on the place for the next convention and also to thresh out whatever differences may exist between the different organizations. The personnel of the various committees promises an amicable and harmonious session, and it is generally believed that much of the friction which has heretofore existed will be eliminated from future conventions. The cannery committee is composed of advanced thinkers and men who are very much disposed to concede to others the rights which they ask for themselves, and it certainly is to be hoped that the different organizations will get together in a spirit of real harmony and co-operation.

Possibly Milwaukee for Next Year.

The full number of seedsmen and their representatives were on the job, but according to all reports it was a very poor convention for business. More than one was heard to say that they did not do business enough to pay expenses. These are the fortunes of war, however, and such conditions have to be accepted, as well as those that are profitable to the supply men. While it may be a little previous to name the place for the next convention, it looks as if Milwaukee will be the place, though of course it depends on the action of the committees which are to meet, and as a matter of course the cannery will have the principal say and the predominating influence.

Government Seed Contracts.

Just at present, the Department of Agriculture is wrestling with its annual seed contracts. Bids were opened on the 15th and the clerks are now busy tabulating same and it will be several days before the committee will be able to award the contracts to the various bidders. Three classes of bids

were invited this year, one permitting the bidder to offer such items as he felt best able to handle and on the pro rata basis of delivery in the event of short crops; another invited bidders to bid on the entire contract, on the same basis of delivery in the event of short crops; while a third asked for guaranteed delivery, regardless of crop conditions. It is generally assumed that one or two bids covering the entire requirements will be made, but in view of the extremely bad outlook for many seed crops, especially European productions, it looks as if any one who will guarantee deliveries, is taking a pretty long chance of getting the loser's end. Certainly, unless their prices were pitched in a pretty high key, and under such conditions a bidder stands very little chance of securing any business, as your Uncle Sam is a very close buyer in so far, at least, as the Department of Agriculture is concerned.

Seed Trade Activity.

Business in the seed trade seems to be very satisfactory as far as can be ascertained, and stocks generally are moving well, with the possible exception of onion seed. There is much complaint that this item is going very sluggishly, although there is yet time for an active trade and it is earnestly hoped it will come. Further and more detailed news will be given about seed matters in the succeeding issues of HORTICULTURE.

FREE SEED AND PARCELS POST.

Editor of HORTICULTURE:

At the February meeting of Gardeners' and Florists' Club of Boston, the questions of the abolition of free seed distribution by the Government and the adoption of a parcels post system were brought up and urged by several of the members present, and the club unanimously endorsed two resolutions to be sent to Washington in support of their views. I would like to suggest in addition to this that HORTICULTURE take the matter up and stimulate the movement by advising every reader of this paper, who is a voter, to write a personal letter to the congressman in his district, putting it squarely up to him that unless he supports all legislation for the abolition of the free seed distribution and for the adoption of a parcels post, the writer will not support him for re-election.

This movement has been agitated by some of the N. Y. State agricultural papers for some time, and I believe that if all the periodicals published in the interests of both horticulture and agriculture would take the matter up and advise their readers to make the subjects a personal issue, the results would be far more effective than any amount of resolutions adopted by the different societies. The voter has the power in his hands to demand his needs, but the lack of system in its application.

Yours Very Truly,

WM. R. THORNHILL.
Readville, Mass.

Boston, Mass.—H. Buck, formerly with a New York seed house is now employed by the W. W. Rawson Seed Co.

Established 1868. Syracuse, N. Y.

EARLY TOMATOES IN CONCRETE PLANT PROTECTORS

A tried and proven success. Keep out frost and draw heat. Equal for forcing to the famous bell jars used in France. Field trials show four times the yield, ripening a month ahead of season, and value increased 100 times. No blight or insects. Useful for lettuce, rhubarb, melons, etc. Hold water for irrigation. Patent just issued on protectors, and line wire opens or closes roof instantly. Illustrated treatise tells how to make them quickly at 2c each, how to make molds at 25c. Also, full information about this method. Each purchaser of book has privilege to make mold and protectors. Mention this paper and send \$1.00 for book. Money back if not satisfied.

J. H. HALEY, Seed Grower, Munith, Mich.

Of Interest to Retail Florists

DETROIT A steady demand for design work with liberal counter sales make us forget that Lent has arrived. Calls for spring opening decorations are becoming more frequent and a general distribution of them ought to bring us up to Easter without experiencing any dullness. Breitmeyers are showing very handsome dwarf apple trees in bloom, also wistaria, and both prove to be good sellers. Mr. Fetters' steadily increasing trade shows plainly that a persistently well decorated window, even if located on a side street, is bound to bring results.

WASHINGTON There is an abundance of all kinds of flowers except roses. The demand for bulbous stock is better than on the winter favorites, and in consequence carnations are piling up. The florists are paying their usual tribute to the "Father of their Country," and the windows look like a cherry orchard. Not only are there trees in bloom but in fruit, and there are hatchets galore.

Flower Market Reports

BOSTON Business in general is not bad, considering the inclement days that have come our way of late. Supplies are not as badly overstocked as at corresponding date in some previous years. The bulbous stock is the most troublesome aggressor and there is not much encouragement for the grower in the prices realized under the present congested conditions. Carnations are selling lower, violets also. Roses are holding their own very creditably. There is a large variety of other flowers in evidence in all the flower windows, outside of the staples—roses, carnations, violets and bulb stock—and they seem to strike the popular fancy. Lent is sliding along very satisfactorily to the retail trade, it appears.

CHICAGO Chicago market is weak today and the last week in February opens with more flowers than the demand calls for. When flowers are plentiful and there is no special occasion for using many, then the buyers are ready to take the good stock and the poorer quality of flowers are left. In spite of the stormy weather there are plenty of flowers and buyers are critical. All orders for Beauties can be filled now, and as the supply has increased the price has dropped one-third. With other roses, the demand seems to have increased with the supply and all kinds are selling well, with Killarney, as usual, in the lead. The bulb stock seems overdone and prices are weakening. This is especially true of tulips and daffodils. Carnations sell if the quality is good, but poor stock is unsalable. Demand is strongest for white. Violets are not very encouraging. Last week the supply was too large and this week will not bring a change. Sweet peas are another of the discouraging things and the present prices do not give the grower a living margin. Pussy willows are still serving as window attractions.

The Mardi Gras **NEW ORLEANS** Carnival of 1910 made a high water mark for business. The week before the advent of Lent had a whole month's business crowded into it. The opera, balls, receptions, etc., called for the most lavish use of flowers ever known in this section. Orchids and lily of the valley were the favorites with society, high grade roses, carnations, violets and single daffodils being next in demand. Fine table decorations were a feature of the week. Trade since Lent, while much slower, has kept up wonderfully. A large Jewish clientele keeps things from being sluggish even in Lent.

(Reports continued on page 313)

NEWS NOTES.

Rhinebeck, N. Y.—Robert Green has purchased property here and in a few weeks will start a violet house.

Reading, Mass.—C. F. Trevor & Co. have started a business on Federal street, under the name of the Reading Floral Co. They will grow sweet peas and other flowers for market.

Amherst, Mass.—Members of the short course in floriculture at the Agricultural College made a trip of inspection among some of the big

Flower Market Reports.

(Continued from page 311)

Growers and wholesale-
NEW YORK
salers are justified in feeling discontented with the present market situation here. On the other hand, the street hawkers and proprietors of corner stands are in high feather over the stagnation in the cut flower trade caused by the combination of over-production and light demand. The loss of the out-of-town call which formerly helped out the congestion in this market is severely felt at such a time as this. It seems impossible to drum up any country trade which is disposed to take chances at the low rates on large quantities and help unload the local burden. The street dealers and others who cater to the cheaper class of buyers are the only resort under the circumstances, and as to values—"they don't do a thing to them." Lilies, roses, carnations, violets and all the "bulbous" flowers are alike congested this week. Weather variations help out temporarily on some days, but the average is a dull and overloaded market in all the wholesale districts.

7,000 street car
PHILADELPHIA. men on strike, and all urban transportation tied up, is what faces Philadelphia this week. As a natural consequence there is "rough house" all over the city and the timid stay at home. No transient trade is being done and shipments are piling up all along the line. The florists' trade suffers as well as every other trade. There seems to be no limit to the long suffering of the American public. There is no such thing as "compulsory arbitration" in this land of the free. Last week trade was rather sluggish, and the looked-for improvement after the first week of Lent did not materialize. The weather was too cold for the street men, for one thing. The other reasons are too obscure to be easily diagnosed. A comparison with

the same week in 1909 shows a large falling off for 1910; but it was not Lent yet in 1909. American Beauty roses are no more plentiful and they are about the only things holding their own as to prices. Roses generally are more than the market can absorb with the exception of white. There seems to be room for another good white rose or two yet. White Killarney has its off spells notwithstanding all its good qualities. Bride does not pick up any. Kaiserin, of course, is only good for summer. Frau Karl bruises, and is out of the question commercially. So it would seem that there is still a field for our Cooks and Hills and Dicksons. We have enough of pink roses for the present. Carnations are plentiful, and the chances are that they will be even more so for some time to come. Violets are selling very well—especially first quality doubles. Orchids are in good demand—white varieties and cattleyas being the best sellers. Cypripediums hang fire, and have dropped in price. Gardenias are coming along nicely; but prices rule much lower than at this time last year, mainly on account of increased production. The mignonette and sweet pea market is in fairly good shape; but other minor items such as freesia, myosotis, candytuft and bulbous stock, is very unsatisfactory. Greens are scarce—good plumosus especially.

INCORPORATED.

Medford, Ore.—The Rogue Valley Nursery Co., capital stock \$20,000.

Grand Junction, Colo.—Grand Junction Seed Co.; Whit Roszelle, H. M. Cannon and L. M. White incorporators. Capital stock \$10,000.

Houston, Tex.—The La Porte Orchard Co., capital stock \$1,000. Incorporators, Daniel and J. H. Powell and W. A. Pitrat of Kansas City, Mo.

Grand Rapids, Mich.—The Michigan Sphagnum Co., capital \$3,000 preferred; \$7,500 subscribed stock. Albert Myers, Coopersville, Clifford R. Unhrich and Edward A. Bending of Grand Rapids.

Trenton, Mo.—Trenton Floral Co., capital stock \$3,000. L. A. Warden, president; H. N. Longfellow, secretary and treasurer. L. Derocher will continue as manager. Work on the new greenhouse has been started.

Springfield, Mass.—Frank J. Yetter, the Main Street florist, has secured a patent on a device for holding flowers in boxes and preventing their being bruised in shipment.

POTASH

is the
Salt of the Earth

It is also the most abundant in the plant. Unless it has enough Potash in *soluble form* at the right time it cannot use the other plant food you or your soil may supply. Take no chances. Tie to facts, not to theories. Many soils need only Potash to raise big crops. All soils need Potash sooner or later. Begin to use it before the crops starve. Do it now, for

POTASH PAYS

Urge your fertilizer dealer to carry Potash salts in stock. You and he will have no difficulty in buying them if you will write to us about it.

NEWS NOTES.

De Soto, Mo.—A. J. Blair is endeavoring to interest capital to the amount of 5,000 to establish a nursery here, incorporated with his present nursery business as a basis.

Reedley, Calif.—A. W. Clark of Clark & Kennedy, recently purchased a half interest in the 160 acre nursery of Frank Williams. The entire 80 acres will be planted in peaches.

MR. DUNCAN GOES WEST.

J. W. Duncan, who for many years has been assistant superintendent in the Boston Park System, started this week on his long journey across the continent to Spokane, Wash., where he has been appointed superintendent of the park system inaugurated in that city some three years ago and for

J. W. DUNCAN

which extensive plans for future development are being made.

Mr. Duncan was given a farewell dinner at the Parker House, Boston, last Saturday evening, by a gathering of about fifty of his associates in the profession, largely members of the Gardeners' and Florists' Club of Boston, of which he is president. John K. M. L. Farquhar made an excellent toastmaster for the occasion and many good wishes were voiced in speech and song. Among those present were Timothy McCarthy and R. W. Greene from Rhode Island.

HELP WANTED

Wanted, Assistant Gardener

Swede, particularly experienced in ordinary greenhouse work as well as in the culture of grapes and nectarines under glass.

Address—H. J. B., Horticulture

AN EXPERIENCED NURSERYMAN

For propagating shrubs, herbaceous and bedding plants. State references, age and wages wanted. Address

Rhode Island Nurseries, Newport, R. I.

WANTED—Foreman: Thoroughly experienced in the growing of the highest class of decorative plants, Palms, Ferns, Fuchsias, Gloxinias, etc.; also bedding plants and the propagation of Nursery stock. Permanent position to an energetic and industrious man, with advancement. Care HORTICULTURE.

WANTED—Second man in commercial plant growing establishment in middle West. Wages \$12.00 a week. M. W., care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED

As manager for gentlemen's place, public institution, park, cemetery, etc.; practical experience in all branches; reference, first-class. Address with particulars, C. L. care Joseph Linfoot, 1015 E. McMillan St., Cincinnati, O.

SITUATION WANTED—By a good grower and designer; retail place near Boston preferred; fair wages expected. M. M., care HORTICULTURE.

FOR SALE

FOR SALE—One 9 section Furman boiler, 22 in. grate, bought last year, practically new, price \$110.00; also 350 ft. ventilation at 11c. if taken this week; also 50 boxes 10 x 12 and 10 x 14, the first order takes the lot at \$1.25 per box, all double thick. Must be removed before the 1st. M. Tomback, Sparkill, N. Y.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 59 Montrose Ave., Brooklyn, N. Y.

everyone interested in chrysanthemums or who has visited a chrysanthemum show in any part of the world within recent years. In fact if the Wells Pocket productions were eliminated from the exhibitions of the present day there would be a big gap. In this edition, a whole chapter is devoted to the author's visit to America in the fall of 1909 and will be found very interesting to American readers as will also the introduction, in which Mr. Wells makes further reference to his experiences in America and to the excellent work for the chrysanthemum which Mr. Totty, of Madison, N. J., and others are doing. The book covers every cultural detail necessary for a grower to know and is indispensable to anyone aiming to be up-to-date in commercial or exhibition chrysanthemum growing.

Cheshire Conn.—The new forest nursery started here is the "North-Eastern," not the "North-Western," as stated in our press dispatch of last week. The company which was organized last year has now nurseries at Cheshire and East Haven, Conn., and Westport, N. Y. Their business is the collection and sale of tree seeds and production of stock for forest planting. R. C. Hawley is manager, secretary and treasurer.

PHILADELPHIA NOTES.

There seems to be a good demand for 2½ in. Asparagus Sprengeri; and a still more eager outlook for 4 in. Some 4 in. were offered the other day and were quickly grabbed up by an enterprising grower. On being asked the reason, he said: "Don't you see? I only paid six cents for them and I can cut six cents off them in a week or two, and still have my plant. It's like finding money." By the same token 2½ in. seem to be a good proposition at three.

Favorable comment is heard on all sides for the strong stand HORTICULTURE has taken on the artificial flower nuisance and the good work along that line it has done so consistently during the past five years. Commenting on this the other day, S. S. Pennock suggested that the trade generally, growers, wholesalers and retailers, get together and try the "Chicago plan" to abate this vulgar custom which seems rather on the increase of late. The details or authenticity of the "Chicago plan," so called, we do not know at this writing, but briefly as we understand it the wholesalers got together and hired a bevy of colored ladies and had them walk the fashionable promenades wearing gaudy artificial flowers during the hours when wealth and beauty paraded. The scheme is said to have worked successfully and after that no person with any pretensions to belong to the upper ten could be induced to appear with anything but the real thing in flowers. We would be glad to hear from your Chicago correspondents how much there is in this story.

Visitors: C. M. Weaver, Ronk, Lancaster Co., Pa.; Joseph W. Edmundson, representing the Braslan Seed Growers' Co., San Jose, Cal.; W. C. Langbridge, Cambridge, N. Y.

PUBLICATION RECEIVED.

"The Culture of the Chrysanthemum."—Fourth Edition enlarged and revised. By W. Wells, Merstham, Surrey, Eng. The fact that this book has reached its fiftieth thousand speaks for its value and popularity. The author's name is familiar to

For San Jose Scale, and to Improve Health of Tree and Shrub.

BOWKER'S

Concentrated

Lime-Sulphur

Made in New England. FRESH from Factory to User.

NOW IS THE TIME TO ORDER Lime-Sulphur, which should be used while the trees are dormant. It destroys San Jose and all other Scale Insects and fungous spores wintering on the bark. It improves the health of the tree by destroying the mosses and lichens. As J. H. Hale says: "It smoothes up the trees."

All ready to use by adding cold water. No boiling, no special mixing plant required; no guesswork as to formula. Just add **cold** water, and spray.

Before spraying your orchard, post yourself about Bowker's sprays.—Write today for prices.

BOWKER INSECTICIDE COMPANY,
43 Chatham St., Boston, Mass.

Manufacturers of Bowker's PYROX for fruits and vegetables.

BY "WIRELESS" FROM CRAIG'S.

Among the specialties which are given a large place in the Easter preparations at the Philadelphia establishment, roses are among the leaders this year, hardly second to any other class of flowering plants. The advent of the Ramblers of varied hue and the ever-blooming polyanthas, known as Baby Ramblers, has given a big impulse to rose plant growing for Easter. Mr. Craig was so well pleased with the new English variety, Mrs. Cutbush, last year, that he has largely increased his stock for this season. The flowers are semi-double and light pink. Phyllis, which is also semi-double and beautiful shell-pink, he characterizes as the finest of the Baby Ramblers. Lady Gay, Dorothy Perkins, Hiawatha and other popular Ramblers are, of course, well represented in a great variety of forms, bush, standard, pyramid and trained in balloon and fan shapes. The buds are well set on all of them, but it is necessary to push them right along and permit no check.

The idea is to get the flowers to begin to open ten days before Easter and then throw air on them freely so as to get them toughened up. This is the only condition in which they will give satisfaction. "But we want sunlight," Mr. Craig says, with much earnestness. "We'll get them all right if only we have that."

Among the lilies this year is a house of Giganteums from bulbs grown in Formosa. Unfortunately, they are badly mixed. Not more than 25 per cent. are true to type, but these are very fine—the strongest, most lusty plants imaginable and great things are promised as soon as straight goods of this strain can be had. Mr. Craig, in speaking of the cultural methods being followed just at present with lilies, quotes approvingly the reply of A. N. Pierson, who, on being asked what he was doing said, "We grow them on hand-barrows, moving and carrying them continuously, first to one house and then to another." Sure enough there's lots

of work with the lily crop in a season such as this is. For drawing up the stalks on short lilies, the bulbs of which were brought in from under the snow in January and are now showing buds well advanced, Mr. Craig has tented them over with tobacco cloth supported on a lath framework, and they are stretching their necks upward in encouraging fashion.

A new ficus, known for the present as "No. 49," is being groomed for presentation in quantity to the trade in the near future. It is somewhat on the order of altissimus, but the leaves are larger and more graceful in outline than altissimus.

Independence, Mo.—Eric Frandsen has purchased a florist establishment here. He was for a number of years employed in Lincoln, Neb.

Cedar Rapids, Iowa.—H. G. Williams and family have just moved from Williamsburg to this place. Mr. Williams has charge of the branch of the Williamsburg Nursery Co.

Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

The Pulverized Manure Company

31 Union Stock Yards

Chicago

Best for Garden Spraying

In vegetable or flower garden, on fruit trees and vines, for whitewashing, fire protection window and carriage washing; wherever you use it, the Denning "Perit-Success" saves time and trouble and does better work.

Deming Spray Pumps

Hand and power, nearly two dozen kinds, designed and tested by leading growers, approved by government and Experiment Station experts. Catalog and spraying Calendar free. We make pumps for all uses. Ask your dealer.

CHARLES J. JAGER CO.
281-285 Franklin Street. BOSTON

"SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallon spray by simply adding water. Send for Booklet, "Orchard Insurance."

B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

Evergreen Brand Flower Fertilizer

Is fine plant food, immediately available.

It permanently enriches the soil. It prevents the onslaught of plant disease or insect pests.

Can be used at any time during the growing season.

Put up in 12 pound cans, price \$2.00

For sale by leading jobbers. Address

D. D. Johnson, 64-66 Wabash Ave., Chicago.

Write for further information

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street
CHICAGO, ILL.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4½ inches wide, nozzle 6½ inches long; ¾ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

GREENHOUSES BUILDING OR CONTEMPLATED.

Davenport, Iowa.—Henry Pull, rebuilding.

Greensburg, Pa.—Jos. Thomas, two rose houses.

Redhook, N. Y.—Battenfeld Bros., violet house.

Waterbury, Conn.—Saxe & Floto, carnation house.

Lansdowne, Pa.—Wm. A. Leonard two houses 28 x 300 ft. each.

Dunbarton, Va.—F. J. McSweeney, R. R. D. No. 1, house, 28 x 206 ft.

Champaign, Ill.—Thomas Franks & Son, South Goodwin Ave., addition.

Montreal, Quebec.—Messrs. Hains & Hopton, chrysanthemum house and mushroom house.

Hastings, Mich.—Chase & Wilcox,

proprietors of the Hastings Greenhouse Co., one house.

Indianapolis, Ind.—The Park Board intends moving the propagating houses and adding considerable glass.

York, Nebr.—J. Lawson has purchased 10 acres here and will build one of the largest greenhouses in the state.

Lansdowne, Pa.—S. Doemling, two rose houses 21 x 200 ft. of semi-iron construction. This will complete the second range of houses on this place.

West Willington, Conn.—The new greenhouse of George Brooks is nearly completed and he is installing a hot water system. A large boiler from Holyoke has just been received.

Newport, R. I.—E. C. Knight, Jr. has purchased "Claradon Court" on Bellevue Ave. The lawn is to be extended and some of the present buildings removed to allow for the erection of a range of glass.

Beloit, Wis.—John Rindfleisch will erect a new greenhouse to cost \$6,000. It is to consist of four sections 25 x 100 ft. each, a potting room, office and boiler room will occupy a space of 20 x 100 ft. adjoining the greenhouse proper.

We have received from Mr. H. E. Bates, sales-manager of the King Construction Co., the following list of greenhouses and conservatories to be erected of King iron frame material:

Leonard Cousins, Jr., Concord Junction, Mass., 50 by 233 ft.; C. E. Holbrook, Brighton, Mass., two 31 by 225 ft.; Victor Groshens, Roslyn, Pa., 42 by 500 ft.; A. J. Boothman, Adams, Mass., three 33 by 59 ft.; Henkes Bros., Watervliet, N. Y., 50 ft. addition; Meerbott Floral Co., Secaucus, N. J., two 21 by 125 ft.; Orin S. Bacon, Canandaigua, N. Y., 21 by 33 ft.; A. C. Capparn, Canandaigua, N. Y., 50 by 190 ft.; Mrs. D. P. Rumsey, Buffalo, N. Y., (Conservatory semi-circular), radius of 11 ft.; Mrs. Annie L. Brooker, Richmond, Va., 28 by 206 ft.; Irving Dunford, North Olmstead, Ohio, two 21 by 100 ft.; J. R. Spafford, Barker, N. Y., two 21 by 100 ft.; John Reimels, Woodhaven, L. I., 28 by 100 ft.; A. L. Brewer, Berlin, Mass., 35 by 100 ft.

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Piersoni, Whitmani, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pots, \$12.00 per dozen.

Plant Novelties From China

LIBRARY
ROYAL YOUNG
BOTANICAL
GARDEN

Rhododendrons form a class by themselves and are universal garden favorites. The noble foliage of the majority and the handsome and brilliantly colored flowers of all place them in the front rank of ornamental shrubs. It is much to be regretted that the exigencies of our New England climate renders possible the cultivation out of doors of only a very meagre number of varieties and one wishes that somehow hardier races were obtainable.

The genus *Rhododendron* is thinly scattered throughout the northern hemispheres of both old and new worlds but finds its concentration in the Malayan Archipelago, Himalayas and the Chino-Thibetan borderland. The first-named group crosses the equator and is commonly found in the mountains of Borneo, Java, Sumatra, etc. The range of colors in this group is possibly greater than in any other and *R. jasminiflorum* and allied species have given us, thanks to Messrs. Veitch, a most remarkable race of hybrids suitable for warm greenhouse culture. The Himalayan species are all tender and unsuitable for outdoor cultivation here in New England. The Chino-Thibetan group, the richest of all, remains largely a new and untried proposition. One species, *R. racemosum*, is among the most charming and beautiful of the small flowered species, is as hard as a "nail" across the water, and there seems no reason why it should not thrive over here also. Two others, *R. intricatum* and *R. Souliei*, have stood the test the other side to the satisfaction of all concerned. These facts are encouraging and it seems highly probable that at least a few species of these *Rhododendrons* may be hardy here.

Rhododendron is the largest genus recorded from

RHODODENDRON MACULIFERUM AT HOME
Altitude 7500 ft.

RHODODENDRON INTRICATUM
As cultivated by Messrs. Veitch.

China, no fewer than 150 species being known and many new species yet remain undescribed. The writer himself has collected over eighty different species and introduced to Messrs. Veitch and the Arnold Arboretum some fifty odd species.

In China *Rhododendrons* commence at sea-level. In stony places and the pine woods of certain regions *R. (Azalea) sinense* abounds and with its large golden-yellow flowers makes a wonderfully fine show in June. *R. indicum* and its forms extend from sea-level up to 4500 feet altitude clothing miles and miles of the hill-sides; so abundant and floriferous is this plant that when in flower (May) the hill-sides are nothing but masses of flaming scarlet! At its altitudinal limit this plant is practically deciduous and there is reason to believe that this form will be as hardy here as *R. Kaempferi*, its near relative. In the woods, from 4000 feet upwards, several broad-leaved species occur but the genus does not get really rich in species until 8000 feet is reached. From this altitude they abound and extend to the limits of ligneous vegetation (15,000 feet circa). In the coniferous forests, from 9000 to 12,000 feet, they form usually the only undergrowth and with their gnarled stems form an absolutely impenetrable jungle. No wild animal appears to eat or destroy them, indeed, the Thibetans declare they are poisonous, and the wood though hard is little used even for fuel consequently these *Rhododendron* thickets remain unmolested by man or beast. There is nothing in the nature of ling or heather (*Calluna*, *Erica*) in these regions, their place being taken on the moorlands by dwarf-growing, tiny-leaved species of *Rhododendron*.

These *Rhododendrons* vary in size from trees 30 to 40 feet tall (*R. calophyton*) to tiny shrubs only 6 to 8

inches high (*R. nigropunctatum*). In color they range from pure white, clear yellow, pink and purple to scarlet and the deepest and richest shades of crimson. Rhododendrons grow gregariously and nearly every species has its own well-defined altitudinal zone. This, combined with their differently colored flowers, gives a bizarre appearance to the forests and mountain-sides when they are in bloom. Belts of white, pink, scarlet, etc., alternating one with another. June is the month when nearly all the species are in flower and it is impossible to exaggerate their beauty.—No finer sight can be imagined than miles and miles of woodland, forest and moorland covered with Rhododendron bushes in full flower. In the wild and little known regions of the Chino-Thibetan borderland, and more especially the neighborhood of Tachien-lu, the traveler for days together wends his way through forest and moorland ablaze with Rhododendron flowers.

A broad-leaved Rhododendron with trusses of large flowers having the yellow and gold color of the deciduous "mollis" and "sinense" forms has been the dream of all Rhododendron hybridizers and in spite of every effort it remains still a dream. Though many of the new Chinese species have yellow flowers it is doubtful if they will yield the long looked for "blood." The species have small or medium-sized flowers and it is uncertain if they will cross satisfactorily with the large flowered kinds. But there is a great possibility of an entirely new race with small but persistent evergreen leaves being raised from these new introductions. *R. flavidum* and *R. primulinum* both have these yellow flowers in size similar to the old *R. amoenum*. These two species are denizens of the uplands around Tachien-lu, between 10,000 and 12,000 feet altitude, where they form bushes 3 to 6 feet tall with small, ovate leaves about an inch long.

As before mentioned these Chinese Rhododendrons are as yet an unknown quantity over here and experience is necessary before much can be said of their merits as garden plants. On the other side two species, *R. intricatum* and *R. Souliei*, have been exhibited and have received first-class certificates of merit. The first-named is one of the moorland species, grows 2 to 3 feet tall with small, ovoid leaves an inch long and lavender-pink flowers about 1/2-inch across. It is a very floriferous and beautiful little species.

R. Souliei is a woodland species 3 to 6 feet tall with rounded, ovate leaves 4 to 5 inches long, glaucous when young, and large trusses of rose-pink, rather flattish flowers, 2 1/2 inches across. It is compact and bushy in habit and the color of its flowers is most pleasing.

S. W. Wilson.

A misplaced line in Mr. Wilson's contribution last week, near the top of first column on page 294, in the note referring to *Cotoneaster rugosa*, requires correction. The note should read as follows:

Cotoneaster rugosa and its variety *Henryi* are both very ornamental shrubs 6 to 15 ft. tall, free-growing with arching, semi-pendulous branches and flat corymbs of pure white flowers, followed in autumn by bunches of bright coral-red fruits. The leaves are ovate-lanceolate, about 2 1/2 to 3 inches long, wrinkled, shining green above and covered on the underside with a heavy white felt.—Ed.

Commercial Orchids for the South

This order of plants has now gained a position as to be indispensable to the commercial florist and the South is just waking up to the fact that a great many varieties can be grown here as well as and better than anywhere else. Some varieties cannot be successfully grown here, but the number of those that do succeed is plentiful enough and the small expense attached to their cultivation promises a rich harvest to those who embark in the business. That there is a ready local market for the flowers is demonstrated by the calls for them from the flower buying public. Some growers are alive to this fact and are making a move, but there is lots of room for more of them to follow and the market is sure. Probably the most popular genus is the *Cattleya*, and many of this species do better here than in the North. So little fire heat is required in the winter that a *Cattleya* will strengthen and increase for a great number of years, and the flowers especially in the late fall and winter will last longer. The moss that abounds on the oak and cypress trees, after it is thoroughly cured, makes an excellent potting material, and can be had for the picking. Some live sphagnum and charcoal lumps should be added. The pots must be well filled with broken crocks for drainage and the potting material firmly packed around the plant, which should be just raised a little above the rim of the pot. The main things to watch out for are the growing and resting periods. While growing, the plants require lots of water, but as soon as growth is completed they require a rest, when water is withheld and the plant is kept almost dry at the roots, but a moist atmosphere maintained in the house. A lath shed is an ideal place for them during the summer months, and they need not be brought into the house until the end of October or beginning of November. It is needless to say they require plenty of ventilation, which it is always possible to give them here, and even during the shortest days a light shade is necessary for most varieties. A night temperature between 50 and 60 degrees will suit them admirably. It is impossible in a general article like this to give a detailed cultural account of each species. The purpose of this article is more to stimulate the growing than to give cultural directions therefor. The following is a partial list of those species which do exceptionally well in the South and are of easy culture: *Cattleya Bowringiana*, small but early fall flowering and of a striking color; *C. labiata*—*C. Percivilliana*—not a particularly fine orchid, but a sure one for Christmas; *C. Trianae*, the best mid-winter sort; *C. Schroederæ*, flowers after above; *C. Skinneri*, *C. Mendelii* and *C. Mossiac*; these follow in succession and will give flowers till the end of May.

Oncidium varicosum, *O. v. Rogersii*; these are lively flowers and good keepers. *O. splendidum*; this is a beautiful variety with spikes 2 to 3 feet long and an easy doer. *Laelia anceps*; this does best on a

block, especially if the plants are small or medium sized. The flower is fine but rather soft. *Odontoglossum grande*, the baby orchid, easy to grow. These are all natives of this continent found from Mexico to Brazil and are eminently suited for culture here. The two varieties next mentioned, *Dendrobium formosum* and *C. Wardianum*, while stove orchids, are easily grown in the South. They make their growth in the summer and when completed will do well in an ordinary greenhouse temperature.

A sight never to be forgotten by the writer, was a ground bed 40 x 75 feet, the top of which contained about 2 inches of sphagnum and charcoal dust, planted thickly with *Cattleya Bowringiana* by a New Orleans grower. The effect when the plants were in bloom was simply dazzling. I have not mentioned any of the *Cypripediums* as they are rather an uncertain quantity here at best. The variety *Spicerianum* is probably the surest one of the lot to give satisfaction in this section.

Robert Lockhart

Louisiana.

Bauera

This small genus of evergreen greenhouse shrubs, deserves to be better known by the trade. They make excellent spring flowering plants; in fact, flowers may be seen on them the whole year round. They deserve a place along side the *Boronia*, which has been largely grown of late by florists for spring use. *Bauera rubioides* would be an excellent exhibition plant. The cultural treatment given to *Boronia*s suits these plants admirably. Select cuttings of half-ripened wood, and insert in silver sand, in a temperature from fifty to sixty degrees. They root more quickly if kept in a tight case, and when this is accomplished they may be potted singly in small pots, in equal parts of peat and loam, adding about a fifth of sharp sand and a little finely broken charcoal. I think it is a good plan to sift the whole compost rather fine, as hard-wooded plants do not like to have an air space about the roots; also pot them firmly, having the pots well drained.

As they are shifted along into larger pots, pinching must be attended to, keeping the plants evenly balanced by cutting the stronger shoots, allowing the weaker ones to grow out until they attain more vigor before stopping them. From June until September, they may be placed outdoors, plunging the pots in a bed of ashes. A cool greenhouse with a temperature from forty-five to fifty during the night, is the best place to winter them in. *Bauera humilis* has red flowers. *Bauera rubioides* has flowers pale red or pink. It grows twice as large as the former and the flower is also larger; this variety is also known as *B. rubiæfolia*. Both are from New South Wales.

George F. Stewart

West Medford, Mass.

Standard Lilacs

Lilacs have always been and always will be regarded as one of the most beautiful classes of flowering shrubs, and as improved new varieties continue to be added to the already extensive list they will grow in public estimation. It may not be necessary in this case, as with some flowers, to solve new sorts to retain admiration for them but anyone who has seen the wonderful collection in the Arnold Arboretum or in the Rochester Public Parks realizes that the newer varieties are greatly in advance of older ones and to many who have limited space it is important that the best be selected.

It is not often that one sees lilacs grown in any other way than as bushes but it is possible, as the accompanying picture illustrates, to grow them very successfully as standards, and for many positions in the garden where specimen shrubs are desirable they can be used with equal if not more pleasing results than standard *Roses*. Whether grafted plants or those on their own roots are employed, and of course, the later are to be preferred, it is easy to make standard plants of them by pinching out the lower buds till the desired height is reached and then by careful pruning very fine round headed specimens may be formed. It is advisable to have a clear stem of fully four feet.

A question of weather

The Easter plant grower has been put to the test this season as never before. He was, in a measure, prepared for a strenuous struggle, owing to the early date of the celebration, but he could not foresee the additional handicap which the weather man had in store for him. Take it all through it has been a hard winter and the lack of sunlight during February has been an especially perplexing factor in the plant growers' task. A large grower remarked the other day, "If we only get some sunlight and the coal mines hold out I'll get

my stuff in, all right." Fortunately, the weather conditions and prospects at the present moment are propitious and in the three weeks remaining wonders can be accomplished if only Old Sol will do his part to average up for his shortcomings of the past month.

Adulteration again

Another bulletin under date of Feb. 16th has been issued by the Department at Washington giving results of analyses of samples of alfalfa, red clover, orchard and Kentucky—bought in open market. The word adulteration, which of course implies intentional mixing by the seed trade, is put in first place as usual, showing that the unjust and seemingly vindictive animus of the Department against the seed trade has in no wise abated. If the Department would cut out the word "adulteration" we believe that they would find the seed trade of the country instantly in sympathy with them—as, almost to a man, they are and always have been striving to educate the public up to buying and paying for higher quality.

The Federal Inspection Bill

In our issue week before last we advised our readers that we had received a telegram informing us that the Simons Bill H. R. 15656 had been withdrawn. We now find that our correspondent was mistaken. We have seen a letter from Representative Chas. F. Scott, Chairman of Committee on Agriculture, who states that bill has not been withdrawn but is still pending before that Committee. The Simons Bill, as many of our readers know, calls for dock inspection at port of entry, for all imported nursery stock, etc. It is quite impractical and impossible of execution. No nurseryman or importer would care to import a single case under its provisions. The Department could not possibly inspect one-tenth of the cases arriving. Those that were inspected could not be repacked in the same cases and the contents would be practically worthless when released. We hope that every reader of HORTICULTURE will use his influence toward the killing of the Simons Bill and the substitution of the Bill endorsed by the American Association of Nurserymen.

Southern possibilities

A Georgia daily calls attention to the fact that the southern growers of tender plants are not realizing as they should the great business possibilities within their reach through the use of modern greenhouses for the forcing of cucumbers, tomatoes, lettuce and other fresh material for which there is at all times an eager and remunerative demand all over the country throughout the inclement season of the year. The south certainly has great advantages in this direction, and we can imagine the revolution which will surely come as soon as the southern growers awake to the possibilities within their reach. The revolution will come, however, not in disaster or discomfiture to northern growers who have already invested large fortunes in glass-forcing houses, but in an immeasurably increased consumption of hothouse products by the people in every part of the country. Business methods followed up on a broad scale, the use of labor-saving devices and other expense-reducing expedients will cut down the cost of production and eventually place fresh and health-giving foods of greenhouse production within the reach of all. Hotbeds have their sphere of usefulness, we all know, but in competition with properly constructed and heated glass houses they are of little account. Southern growers are only beginning to perceive the tempting opportunities that are open to them.

SEASONABLE NOTES ON CULTURE OF FLORISTS' STOCK.

Acacias.

These form a group of handsome free-flowering shrubs that are desirable for decorative work in spring and early summer. Of the several species of acacias grown, one most in evidence at Easter is *Acacia armata*. Those intended for Easter should be in a house where the temperature does not exceed 50 degrees and allowed to come along in their own natural way. They do not take kindly to forcing. After the flowers appear be sure not to syringe.

Cuttings may be struck at any time from now until June in sand. When rooted they should be potted into smallest size pots and, after they get established, gradually exposed to the full sun and air of a cool house. The young plants should be shifted on as they fill their pots and pinched back from time to time in order to have shapely specimens. As the plants go out of flower they should be cut back to within six inches of where they were cut back last year.

Cannas.

These may be started from now on; clumps of cannas can be divided and cut up into as many pieces as there are eyes. After dividing they can be placed on a bench where about one inch of sphagnum has been spread and where there is some bottom heat to accelerate root action. The tubers can be covered lightly with some sphagnum. They will soon start and when they have made a few inches of leaf growth they should be lifted and potted into 4-inch or 5-inch pots, or any size you intend to grow or sell them in. If short for bench room, they can be put in boxes or flats in about three inches of sand and placed on the pipes under the bench where they will soon start. Don't water too much or too often; care is necessary in this respect until new growth is well under way. They can also be started in a hot-bed.

Chrysanthemums.

Chrysanthemums for general stock can be propagated at any time during March and up to June, but for the production of high grade flowers and plants they should be propagated early, especially in the case of dwarf, slow-growing varieties. Only the best cuttings should be selected. Long and lanky growth should be discarded and only stout, straight cuttings, coming direct from the root of the clump should be taken. A temperature of from 45 to 50 degrees is about right to root in. When the cuttings have made roots half an inch long, pot them off. They are permanently weakened by being left too long in the sand. Be sure to use good soil so that the young plants will move right along. When well established they should be placed in a cool house and afforded plenty of light and air.

Easter Preparations.

Narcissi and tulips which are in flats can be placed in pans now. Select the short and stocky ones and do it just before the flowers open. Treat hyacinths the same way. If you have any pansies and double daisies that are coming into flower you can make up some pans or baskets of them and they will be sure to catch the eye of many a customer. Some callas, cycla-

mens, begonias, Brompton stocks, geraniums, mignonette, primulas and many others can now be worked up for Easter trade. The most shapely plants and those that are sure to be in bloom at that time should be set apart from the general stock and given a little extra care. Many buyers prefer these simple things to more showy plants. Such flowering shrubs as lilac, genistas, *Viburnum plicatum*, *Deutzia gracilis* and *Lemoinei*, acacias, azaleas, and double-flowering cherries, plums, and peaches should now be showing flower and would be better to be opened in a cooler house for the gradual hardening off of such stock. All flowering Easter stock will now be pot-bound and will need copious watering to keep them in good form, especially hydrangeas, spiraeas and Rambler roses.

Geraniums.

Now is a good time to select some 3-inch geraniums that have been stopped some weeks ago and have shown three or four breaks, and shift them into 5-inch pots. These are not intended for bedding plants, but for the demand that comes on Memorial Day, when such geraniums bring almost double the price of the regular bedding grade. A fairly rich soil should be used in potting and this should be made as firm as possible. The production of first-class plants calls for the allowance of sufficient room between the plants, and the lightest bench with ample moisture for the roots. The bedding plants can be shifted into the regular selling size—the 4-inch pot—after Easter. There will be more spare moments and much more available bench space after that date.

Solanums.

This is a good time to sow seeds of Christmas peppers and Jerusalem cherries. The former can easily be grown into well-fruited bushes in 5 or 6-inch pots by next Christmas. More effective, however, are finely grown plants of the Jerusalem cherry, which to grow into a nicely berried specimen requires the culture of two summers. Seeds of both should be sown now in flats and by pricking off into other boxes, potting, and later planting out in good soil, you will have good-sized plants that can be potted up the first week in September.

Tuberous-Rooted Begonias.

Plants from seed sown early in January will soon be ready to go into small pots. Use a compost of good soil and leaf mould in equal quantities and one-third sand. If seedlings can be given a warm place for the first three months little trouble will be experienced. Corms started by the middle of March will grow into salable, blooming plants by June. Use 3-inch flats. Put on the bottom of these boxes some moss, and make a light sandy porous mixture to fill the flats within one inch of the top. Plant the bulbs half their depth in it and then spread some moss over the bulbs. They can be set a few inches apart. When they have three or four leaves, they can be potted into 4-inch pots. As the weather gets hotter they will need a light shading.

Fancy-Leaved Caladiums.

Some of these caladiums should now be potted. Either peat or loam will an-

swer for them, and enriched with some old decomposed manure, leaf-mold, and sharp sand forms a good compost. Let it be as rough as possible. Add some charcoal if at hand, as the more open the soil the better. Thorough drainage must be insured, for these plants will require an abundance of water later on. Do not put the tubers too deeply in the soil, as they seldom do well when so treated. As soon as potted they should have a night temperature of from 65 to 70 degrees. When the young leaves appear, stand the plants well up to the glass. Shade is often necessary when the sun is the brightest, say for a few hours in the middle of the day. When the pots are well filled with roots, apply liquid manure once or twice a week.

Liquid Manure.

Liquid cow manure and sheep manure may be successfully used on carnations, roses, and in fact, on all growing crops. At this season of the year it can be used once a week, but care should be exercised not to make it too strong. Two ordinary pails full to a barrel of water should give the right proportions for cow manure, and about a peck of sheep manure. It should be allowed to stand for a day or two. When the sun gets higher later on and root action is more vigorous, it can be used oftener.

JOHN J. M. FARRELL.

CARNATION WISDOM.

Peter Fisher in approving of the use of a brick bottom in carnation propagating bench, states that he can hold cuttings longer after they are ready to be taken out, on brick than on wood bottom. When he used wood he puts in a couple of inches of cinders.

52 at night, 58 on cloudy days and 65 on sunny days is S. J. Goddard's rule as to temperature for growing fine carnations.

A SONG FOR MARCH.

Who sings of March must sing the mad,
Lone man-at-arms, the straggler clad
In motley white and brown—
Who in the wake of Winter's flight
Turns now to caper, now to fight—
Half Hector and half clown.
One moment from a cloud-capped hill
He blares his slogan, wild and shrill;
The next, with gusty laughter,
Outsteps the sunbeams as they dance,
And leers, and flouts with backward glance,
The maid who follows after.
O! sing the maid,
The light-heart maid,
Who follows, follows after.

He flees her down the lengthening days;
She follows him through woodland ways,
O'er hills and vales between,
And sets for mark of victory
On every bush and hedge and tree
Her flag of tender green;
And when her breath hath spiced the night
With promise of the warm delight
Of young June's love and laughter,
No other song may true hearts sing
But "Speed thy passing, March, and bring
The maid who follows after;
The light-heart maid,
The lily maid,
Who follows, follows after."

—T. A. Daly.

John Watson, who has recently been made secretary of the Jackson & Perkins Co., Newark, N. Y., has been associated with the company for several years, the last four as office manager. Mr. Watson has a very wide acquaintance among the nursery trade.

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

On February 25 our society held an interesting meeting at the County Building, Hartford. This was "Cineraria Night," and from the sumptuous greenhouses of James J. Goodwin, President Huss made a splendid display of natural and hybrid cinerarias in pots. These flowers, in full bloom, with their sturdy plants and great wealth of color, surrounding a central setting of the tall stellata type, with its bright, starry flowers, and embracing a few specimens of the Metador variety, made an exhibition of great beauty. Mr. Huss also showed blooms of *Cattleya Mendellii*, *Lycaste cruenta*, and *Laelia Schomburgkia superbians*. J. A. Weber also exhibited, from the greenhouses of Walter L. Goodwin, two fine plants of *Primula obconica*; and W. H. Shumway, of Berlin, brought, as a curiosity, a miniature geranium, quite floriferous, of an unidentified variety. The judges, Howard A. Pinney, T. B. Brown and John Gerard, awarded a diploma to Mr. Huss, a certificate of merit to Mr. Weber, and recommended a vote of thanks to Mr. Shumway.

A comprehensive paper by Mr. Huss on the culture of the cineraria was, at his instance, postponed to a future meeting, and in its place George F. Stewart's article in *HORTICULTURE* of February 5th, on "Cineraria hybrida," was read and discussed with interest. Mr. Stewart's method of combating green fly and white fly elicited many personal experiences by our members in growing not only cinerarias, but cyclamen and carnations. Mites give much trouble; and Mr. Pinney, Mr. Weber and Francis Roulier all spoke of the difficulty from this pest, especially in growing cyclamens. Mr. Weber recommended Nicotinic acid mixed with kerosene.

Mr. Pinney told an interesting story of the recent accident in the carnation house of John Coombs of Hartford, containing 148,000 cubic feet of space, and in which, in fumigating with hydrocyanic acid gas, 144 ounces of potassium cyanide, or approximately one ounce to 1,000 cubic feet of space, were inadvertently used on a night of heavy atmosphere, resulting in a burning of the foliage. The current newspaper report of a \$3,000 loss was, he said, exaggerated. The injured leaves were at once removed, and the beds heavily mulched with shredded cow manure, and a rapid and splendid recovery was ultimately made. Mr. Pinney strongly recommended keeping to the limit of a half-ounce of the cyanide to each 1,000 cubic feet of space.

Mr. Huss said that this fumigator is to be commended on account of its efficiency and cheapness. He has used it in his peach house. C. H. Sierman believes that it will supersede all other insecticides for indoor work. He advised great care in its use, and only in a dry atmosphere, it requiring even a dry soil, as in damp weather the cyanide is likely to settle on the plants and burn them.

Mr. Gerard and Mr. Shumway described the new lava fertilizers, or

volcanic ashes, now on the market. While not ready to unqualifiedly praise it, they thought it worthy of trial in a small way. Mr. Gerard grew tomato plants last season, by aid of it, nine feet high; while nearby plants fertilized with cow manure were not over four feet high.

Our next meeting, March 11th, will be "Carnation Night," and "Ladies' Night." An eventful gathering is anticipated.

GEORGE W. SMITH, Secretary.
Melrose, Conn.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Rose.

Public notice is hereby given that The Conard & Jones Company of West Grove, Pennsylvania, offers for registration the rose described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Raiser's Description.

Flowers are large, full and double and most exquisitely formed. The petals are so firm they look like wax, softly curled, colored cream with flesh tint tips, buff yellow base and the center a heart of pink. Perfect buds. The flowers are borne on long, strong stems, just right for making bouquets. Fragrance is delightful.

Name—Wm. R. Smith. Originator—Richard Bagg, Bridgeton, N. J. Introduced by John A. Shellem and E. G. Hill Company.

H. B. DORNER, Sec'y.

February 24, 1910.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting of the club will be held at Horticultural Hall, Boston, on Tuesday evening, March 22, at 8 o'clock, the halls being rented on March 15, the night of the regular meeting. The speaker of the evening will be Mr. A. E. Thatcher of the Arnold Arboretum, on the subject, "New and Desirable Hardy Herbaceous Perennials."

The club will hold its first field day of the year with the W. W. Edgar Co., Waverley, on April 19. A cordial invitation is extended to any who may not be club members to join on this outing.

W. N. CRAIG, Sec'y.

NEW YORK FLORISTS' CLUB.

The following named gentlemen have been appointed to serve on the reception committee on the occasion of the annual dinner on Thursday evening, March 17th, on which occasion the New York Florists' Club will entertain the visiting members of the American Rose Society:

P. O'Mara, chairman; F. H. Traendly, A. T. Boddington, Harry Turner, C. B. Weathered, W. A. Manda, F. L. Atkins, W. H. Siebrecht, Jr., A. S. Burns, John I. Raynor, J. Austin Shaw, E. Dailedouze, John Birnie, C. A. Small, Wm. J. Stewart, W. E. Marshall, H. O. May.

FLORISTS' CLUB OF PHILADELPHIA.

The meeting on Tuesday evening had a very large attendance, the attraction being the paper by Albert M. Herr on "Carnations." This paper brought out a very good discussion, the main contention in this discussion being that the retailer ought to know more definitely what he was buying, how long the flowers has been cut, that the flowers should be tagged, with date and growers name or number thereon. At the April meeting H. J. Faust, Merion, Pa., will read a paper on "Lilies."

The exhibition of carnations was one of the best ever seen at a club meeting, and all exhibitors were tendered the thanks of the club. The exhibits being so numerous, minute details cannot be given; they were as follows: Harvey & Son, Brandywine Summit, Pa., twelve vases of carnations; among the best were Wenonah, a fine pink, Pink Delight, May Day, Victory and Winsor, all well grown. Robert Craig Co., white seedling Norwood, a very fine and promising variety. Overbrook Gardens, Stock Princess Alexandra, and a vase of schizanthus. S. J. Reuter & Son, Westerly, R. I., Pink Delight, Sangamo, Ruby and May Day. Chas. B. Herr, Strasburg, Pa., Pink Delight, very well grown flowers. E. C. Marshall, Kennett Square, Pa., white seedling carnation, very fragrant, heavily fringed; also a vase each of Beacon and Winsor, both being very good. Millbrook Lea Greenhouses, Whitford, Pa., Carnation Georgia. Henry Eichholz, Waynesboro, Pa., Washington, a deep pink, sport from Enchantress; also Princess Charming, light pink. Wm. Swayne, Kennett Square, Pa., a seedling carnation, Enchantress x Dorothy, a heavily fringed light salmon pink of good size, excellent promise. Samuel Batchelor, Jenkintown, Pa., White Perfection, exceedingly well grown. Wm. Kleinheinz, Ogontz, Pa., Craig's new white Norwood, very well done. Joseph Heacock Co., Wyncote, Pa., Dorothy Gordon, splendid flowers which were the admiration of all present. John H. Dodds, Wyncote, Pa., gardener to Hon. John Wanamaker, carnations Harlowarden, Bay State, White Perfection, Imperial, Enchantress, Winsor and Rose Pink Enchantress, all well grown; the vase of Imperial was a surprise to all; perfect flowers with an extra long stem. Strafford Flower Farm, Strafford, Pa., well grown flowers of May Day, Pink Delight, and a vase of seedlings. Conard & Jones Co., West Grove, Pa., new blue Rambler Rose "Vielchen Blau," a decided novelty; also flowers of American Pillar Rose, and a self-watering flower box for porch and lawn.

DAVID RUST, Secretary.

ELBERON HORTICULTURAL SOCIETY.

At the meeting of this society on February 21st, the preliminary schedule for the Monmouth County Fair was read over and approved. A. Bauer will read a paper on "The Culture of Bulbs" at the first meeting in March. ALEX. FLEMING, Rec. Sec.

NATIONAL CHRYSANTHEMUM SOCIETY OF LONDON.

On February 7th the annual meeting of the above society took place at Carr's Restaurant, Strand, London, Sir A. K. Rollit, president of the society, in the chair. We learn from the report and financial statement, that good work has been done; and the one exhibition held during 1909 was a very successful one. The award for color that the society had decided to inaugurate was one that would meet with much appreciation. The financial condition of the society was very satisfactory. The report was unanimously adopted. Mr. C. Harman Payne was appointed honorary foreign correspondent, and Mr. R. A. Witty, general secretary.

The following gentlemen were elected corresponding members of the society: Messrs. C. H. Totty, U. S. A.; T. Pockett, Australia; and R. Mommeja, France.

ST. LOUIS HORTICULTURAL SOCIETY.

At a recent meeting of the Executive Board of the St. Louis Horticultural Society held at the Missouri Athletic Club, it was decided not to hold a spring flower show this year. The board though is making preparations for holding a fall flower show in the Coliseum Building on a much larger scale than last year.

CLUB AND SOCIETY NOTES.

The South Dakota State Horticultural Society has elected officers as follows: A. W. Kruger, Groatch, president; A. L. Van Osdel, Yankton, vice-president; M. J. DeWolf, Letcher, treasurer; N. E. Hansen, Brookings, secretary; E. D. Cowles, Vermillion, librarian. The program at the annual meeting was very interesting, especially the numbers relating to researches into hardy fruits for the state made by Prof. Hansen of Brookings.

The New England Cemetery Association held its annual meeting Feb. 14 at the Quincy House, Boston. At this meeting the chief business was the election of the following officers: President, Edward A. Mitchell of Medford; vice-president, Wm. Carr, supt. of the Malden Cemetery; secretary and treasurer, Horace A. Derry, supt. of the Everett Cemetery. A banquet was served at the close of the meeting. It was a very enjoyable occasion and drew a large attendance.

The State Horticultural Society and the Tennessee State Nurserymen's Association, held their fifth annual meeting in Nashville, January 26-27. A resolution was passed requesting the senators and representatives in Congress from this state to oppose any legislation that would effect the agricultural press of the country. The newly elected officers are: President J. D. Ellis, Dayton; vice-president Middle Tennessee, I. C. Murphy, Columbia; vice-president West Tennessee, C. Pennington, Rutherford; vice-president, East Tennessee, J. C. Easterly, Cleveland; secretary and treasurer, C. A. Keffer, Knoxville.

MIDWINTER SHOW IN BOSTON.

On account of the omission of the regular spring exhibition from this year's schedule, the midwinter show of the Massachusetts Horticultural Society on February 25-26-27 took on much importance and drew forth a display of goodly proportions and extraordinary excellence. Plant groups were unexpectedly large and varied, and the cut-flower prizes were eagerly competed for in many classes. Mentioning the most sensational entries first, we put the large group of seedling amaryllises, shown by W. C. Ritchie, gardener for Mrs. J. Montgomery Sears, as being far ahead of anything in that line ever seen here and among the most impressive examples of fine culture shown in many years. A gold medal was awarded. A gold medal was also awarded to a superb group of orchids from Langwater Gardens, gardener W. N. Craig. This contained a record number of varieties of *Laelia anceps*, including the beautiful *Amesiana* with dark lip. There were also many rare *cypridium*s and forms of *Dendrobium nobile*.

The primroses were unprecedentedly fine, including *Kewensis*, *obconica*, *sinensis* and *stellata*. The exhibitors, among whom the prizes were well distributed in the various classes, were Mrs. F. Ayer, gard. George Page; Wm. Whitman, gard. M. Sullivan; Mrs. J. L. Gardner, gard. Wm. Thatcher; Winthrop Ames, gard. Daniel Whyte, and Weld Gardens, gard. W. C. Rust. The cyclamens, always the glory of the Boston spring shows, were unprecedentedly grand, foliage like leather, and flowers such as can be seen in no other place in this country, if abroad. Weld Gardens, E. J. Mitton, gard. J. Lawson, and J. S. Bailey, gard. W. McGillivray, were the winners in the different classes.

The decorated groups of flowering and foliage plants were comprehensive and highly creditable. A special silver medal went to Thomas Roland for display of *Erica melanthera* and first class certificate to R. & J. Farquhar & Co. for group of palms, primulas and miscellaneous spring flowering material. First prize was awarded to A. Leuthy & Co. for group covering 100 sq. ft. Mr. Leuthy's cultural skill was well displayed in acacias and other choice specialties, and his group was appropriately located directly under the balcony where a young ladies' orchestra dispensed sweet music. Mr. Roland's group was rich in anthuriums, acacias, ericas and cyclamens. Ed. MacMulkin was represented by an enormous group of palms and Easter flowering plants, *Anthurium Scherzerianum*, etc.; Mrs. J. L. Gardner by a forest of *chorizemas*, ericas, gardenias and such, and W. W. Edgar Co. by azaleas and Easter flowering material in variety. Honorable mention was won by the following exhibitors: Weld Gardens, for seedling Indian azaleas of much promise; Montrose Greenhouses, for dark pink sport of Killarney rose, a decided commercial acquisition; Weld Gardens, for *Cattleya Schroederiae alba*, four flowers on one growth; Backer & Co., for carnation Red Princess, a good one; New Hampshire College, for seedling carnations; A. C. Zvolanek, for collection of sweet peas. Nothing finer could be imagined

A Fifty Dollar Silver

CUP

will be awarded to the grower
of the best

SIX ROSES

At the 1910 exhibition in
New York of the
American Rose Society

Let all good growers of roses examine their stock and send their best six specimens.

The prize is offered by

Moore, Hentz & Nash

For specification: see the "Prize Schedule" of the American Rose Society.

than Wm. Sim's display of twelve large vases of sweet peas, twelve varieties.

In the bulbous section there was the usual large and varied display of daffodils in many classes, tulips, hyacinths, etc., in all of which Wm. Whitman and Mrs. Gardner were prominent. Some well-grown pans of *lachenalias* from Weld Gardens elicited regretful comment that more of these showy flowers are not seen at our shows.

There were many elegant orchid groups, among the exhibitors being J. T. Butterworth, who was particularly strong on *Dendrobium Wardianum*; Thos. T. Watt, with *dendrobiums* and *laelias*; Mrs. Oliver Ames, Sr., gard. Henry Cole, with a group of lavishly bloomed *lycastes*; Julius Roehrs Company, who showed a beautiful specimen of *Miltonia Bleueana*; Lager & Hurrell, with a brilliant group of *cattelyas*, *laelias*, *dendrobiums*, *phalaenopsis*, etc.

The carnation growers were out in full force and the popular market sorts of old or new introduction were well presented. Competition was close on vase of 100 mixed varieties, S. J. Goddard capturing first and Patten & Co., second prize. A. Roper, C. S. Strout, Wilfrid Wheeler, Geo. E. Buxton, Cottage Gardens, Robt. Main and others were all on hand with displays of greater or less size. The prize for 100 blooms of one variety with foliage was won by Peter Fisher with *May Day*. For 50 blooms of best new named variety not yet in commerce, Winthrop Sargent won first with *Wodenethe White*.

There were plenty of violets shown,

the list including Dobbins & Shannon first, John H. Newman & Son second, Estey Bros. third on Princess of Wales; H. F. Woods first, E. Bingham second, and H. F. Calder third, on Campbell; Calder first and second, and Woods third, on any other variety. Wm. Sim made a large display, not in competition.

Wm. Nicholson, Nicholson's Prize mignonette; W. C. Rust Freesia Chapmani, bright yellow and orange, also new types of cineraria; L. E. Small, Dimorphotheca auriantica; Dan'l Whyte, Begonia incarnata; Bellevue Nurseries, hardy violet Pink Pearl; E. J. Ahern, yellow marguerites, and F. H. Houghton with miniature old-fashioned bouquets, were among the many exhibitors worthy of mention.

The prizes for baskets of cut flowers brought out quite a generous response from H. R. Comley, MacMulkin & Co., and Penn, who were awarded first, second and third respectively; S. Hoffman, who showed four large examples, and E. A. Richards.

MANCHESTER AND NORTH OF ENGLAND ORCHID SOCIETY.

Probably the mention of the plants obtaining first-class certificates of the above important society at the last meeting, will have a certain amount of interest to American orchidists. S. Gratrix of Whalley Range, Manchester, showed a cross between Cypripedium Lord Ossulton West Point variety and an unknown species or variety. The dorsal sepal, which is erect, has a faint red line running along the centre. The stalk carried two flowers. Mrs. S. Gratrix had a similar award for Cypripedium Mary Gratrix, a seedling from C. Leeannum. H. J. Bromilow of Rainhill, Liverpool, was awarded a F. C. C. for a seedling Cypripedium named Lord Wolmer = C. Leeannum var. Clinkaberryannum x C. x Euryades. The awards of merit and medals of gold, silver and bronze were quite freely bestowed on collections of plants, chiefly consisting of such species and varieties as Cypripediums, Vanda coerulea, Dendrobium bellatulum, Cattleyas, Laelias, Odontoglossums, etc.

F. M.

A LILY TALK.

On Saturday, March 12, at 11 A. M., E. S. Miller of Wading River, Long Island, N. Y., will talk at Horticultural Hall, Boston, on Lilies, a subject on which Mr. Miller is well qualified to speak. His lecture will be illustrated with beautiful lantern slides colored by Mrs. Van Brunt and the occasion will be a rare treat for all who love lilies—and who does not love them?

Charles Bond, who has been for several years past in charge of the G. B. Wilson orchid houses at Philadelphia, has resigned, to grow orchids commercially for himself in a location near Chicago. Mr. Bond is a son of T. W. Bond, famous in England as an orchid raiser, and has held positions in France and Germany with Rothschilds. Mr. Bond's successor in Philadelphia is George Hunt, who has been employed in the orchid department of the Julius Roehrs Company, Rutherford, N. J.

"NOT HOW CHEAP—
BUT HOW GOOD"

PREPARE FOR EASTER

Headquarters for Easter Plants

WELL GROWN, RIGHT FOR EASTER

AZALEA INDICA, one of our specialties.

In large sizes we have, all covered with buds, the following: **Bernard Andrea Alba** (white), **Niobe** (double white), **Dr. Moore** (pink), **Memory de Van Houtte** (large flowering pink), **Mme. Van der Cruysen** (light pink), **Empress of India** (double variegated), **Hellena Tellman** (light pink), **De Schreveriana** (double variegated), **Apollo** (red). Price: \$1.50, \$1.75, \$2.00, \$2.50 to \$3.00 each.

In smaller sizes we have a big house full of the well-known **Mme. Van der Cruysen** (the best of all the pink), all as round as an apple and covered with buds. Price: 60c., 75c., \$1.00, \$1.25, \$1.50, \$2.00 and \$2.50.

SIMON MARDNER (double pink), **Veraneana** (double variegated), **Niobe** (double white). Price: \$1.00, \$1.25, \$1.50. **DEUTSCHE PERLE** (white), **Apollo** (red), **Empress of India** (double variegated), **De Schreveriana**. Price: 60c., 75c., \$1.00, \$1.25.

CINERARIA Hybrida Grandiflora, best strains, very fine colors. 6-inch pots, 25c., 35c., 50c., 75c. to \$1.00.

SPIREA Gladstone, full of buds, 6-7-in. pots, 50c., 75c. to \$1.00.

PRIMULA Obconica, 5-in. pots, \$2.50 per dozen.

TOURNESOL TULIPS, best double variegated, 3 bulbs planted in a 4-in. pot, \$1.50 to \$1.75 per dozen pots. **Murillo Tulips**, best double pink, 3 bulbs in a 4-in. pot, \$2.00 per dozen pots.

Hyacinths. Raised from the best bulbs of Holland production; **King of the Blues**, **Grand Maitre** (light blue), **Gertrude** (best pink), **La Grandesse** (best white). Price: \$12.00 per 100 pots.

Von Sion DAFFODILS (best double Narcissii known), 3 double-nosed bulbs planted in a 6-in. pot. Price: \$2.50 to \$3.00 per dozen pots.

HYDRANGEA Otaksa, 6-7 in. pots, 35c., 50c., 75c., \$1.00, \$1.25 to \$1.50.

FERNS for dishes, 2½-in. pots, strong \$5.00 per 100.

KENTIA Forsteriana. Imported last spring (1909) from Ghent, Belgium, in fine condition, 6-7-in. pots, 35-40-50 inches high, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00; 4-in., 20c. **Belmoreana**, 6-in., \$1.25 to \$1.50 each; 4-in., 25c.; 3-in., 10c.

EASTER LILIES, **Multiflorum**, 10c. per bud, about five buds to the plant; under five buds, 12c.

50 to 75 per cent of other plants must be taken in addition to lilies.

Japanese Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. This year I can say we have the finest lot, free from disease, we have had for years past. The large demand for Lilies exceeds the supply every year; we, therefore, ask that you order early. Price, plants with five buds and upwards, 10c. per bud; plants with under five buds, 12c. per bud. We can satisfy all wants if ordered soon.

GODFREY ASCHMANN

Wholesale Grower and Importer of POT PLANTS

1012 W. ONTARIO ST., PHILADELPHIA, PA.

A BIG ENTERPRISE.

Dr. E. Bade, a well-known German botanist, has in connection with Frank Weinberg, of Woodside, N. Y., discovered a new process for securing about 40 per cent of rubber out of Euphorbia candelabrum. Extensive experiments by rubber world scientists has been going on in New York and Washington with the result that a new stock company among rubber concerns has been formed with a capital of \$1,000,000. Several large tracts of land—about 5,000 acres—have been given to the camp by the United States Government in the Yuma district of Arizona to start the rubber plantation. Mr. Weinberg will leave shortly for Africa and India to collect several thousand of these plants, and on his

return will go to Arizona to superintend the plantation.

ST. LOUIS NOTES.

Louis Gieger has taken a position with Grimm & Gorley in the cut-flower department.

The St. Louis Florists' Club will hold its regular monthly meeting on Thursday afternoon, March 10th. This will be one of the most important meetings of the year.

A meeting of retail florists was held at the Washington Hotel on Wednesday night, March 2nd, to protest against the sale of flowers at retail by the wholesale florists, one of whom had been accused of doing a big retail business of late, and the retailers are up in arms against the practice.

Horseshoe Brand Products

In Giganteum indicates the acme of quality. Large growers know they produce the largest percentage of cut flowers per thousand bulbs of any brand. The reason why is because they are produced by the choicest seed-bulbs in the world; are properly planted and cultivated. The actual profits indicated by your cash register when the final show-down time comes are greater from Horseshoe Brand Giganteum than from any other brand receiving the same treatment in forcing. Don't take our word for it, try them, count the cut.

RALPH M. WARD & CO.

12 West Broadway, - - - New York

Obituary.

Mary A. Hunt.

In the death of Mary Tolman Hunt, Feb. 26, a family of florists mourn a good wife and a devoted mother.

Mary Tolman was born in England 71 years ago last August and was married at the age of 20 years to Geo. Hunt, a florist in London. Twenty-one years ago, with their three sons, they came to this country, leaving three married daughters in London. For 20 years their home has been in Evanston, Ill., and there are few florists better known, all the sons following their father's profession. A. E. Hunt with his father comprise the firm of A. E. Hunt & Co. of Evanston, and the beautiful pink carnation, Mary Tolman, so prominently before the trade this year, was a seedling raised on this place. H. H. Hunt and F. G. Hunt, the other sons, are known as the Hunt Bros., florists of Park Ridge.

Mrs. Mary A. Hunt has been an invalid many years. At the funeral on March 1, the casket was covered with a mantle of Mary Tolman carnations.

Charles Reid Barnes.

Chicago University lost by death, Feb. 24th, Charles Reid Barnes, professor of plant physiology, one of the most eminent botanists of the world. He was stricken with apoplexy and died without regaining consciousness. Prof. Barnes was only 53 years of age and his death is a great loss to the world, as he was recognized as an authority in his line of research. He was general secretary of the American Association for the Advancement of Science in 1895-96, and vice-president in 1899. He was secretary of the Botanical Society of America from 1894-98 and president in 1903-04.

James J. H. Gregory.

James J. H. Gregory, seedsman, died at his home in Marblehead, Sunday, Feb. 20th, after an illness of but a few days. He was in the seed business for more than 50 years and retired in 1907. He started as a seedsman in 1856 and soon won a foremost place in the business, his name being especially familiar among the farmers of New England. Since his retirement in 1907 he has kept well in touch with the world, and has been especially interested in agricultural work and instruction in colleges and schools.

H. J. Parker.

H. J. Parker, ex-president of the Worcester County Horticultural Society, died Feb. 24th, of heart disease. Mr. Parker has not been in robust health for about three years but has been able to attend to business. He has always taken great interest in outdoor work, especially in the growing of plants and served as president of the Worcester County Horticultural Society from 1889 to 1896.

We claim that

APHINE

Is the most effective insecticide now on the market for the destruction of the MEALY BUG, BROWN and WHITE SCALE.

Others may claim their remedy to be "just as good"—but we claim ours to be better—and have publicly proven this beyond a doubt.

We also claim Aphine to be no less effective against Green, Black and White Fly, Red Spider and Thrips.

We are prepared to guarantee a uniform product at all times and one that will do all we claim for it.

For Green, Black and White Fly it is used at the strength of 1 part Aphine to 40 parts water.

For Red Spider, Thrips, Slugs and Ants, 1 part Aphine to 25 parts water.

For Mealy Bug, White and Brown Scale, 1 part Aphine to 15 parts water.

Price \$2.50 per gallon

Aphine is becoming universally recognized as the leading general insecticide for the greenhouse and garden.

Your spring order will not be complete if it does not include Aphine.

If your supply house does not yet handle Aphine, write us for names of our nearest selling agents.

Aphine Manufacturing Company
MADISON, NEW JERSEY

Bind Your Trees With Strokum Early This Spring

It will keep down the caterpillars and tussock moths. Don't wait until the leaves have come out, and the crawlers are in the trees eating up the tender leaves. The way to control the pests and save your trees, is to stop them before they start.

All banding substances like cotton, burlap, fly paper or tar do not do the work. Unwisely cotton is carried off by the birds. Fly paper does not fill in between rough spaces of bark, allowing caterpillars to crawl under it and the stickiness dries up, allowing them to crawl over it; burlap they also crawl over and under. Smeared on tar preparations dry up besides disfiguring the trees for all the year.

ONE BANDING OF STROKUM LASTS FOR ENTIRE SEASON—is not unsightly. Caterpillars, tussock moths or canker worms cannot crawl under, over or through it. We guarantee it perfectly harmless to the trees. Anybody can apply it.

Send \$3.00 at once for a sample package of 15 pounds, which is enough to band fifteen trees twelve feet around. Delivered free anywhere East of the Mississippi. West of the Mississippi, 50 cents extra.

Send for our illustrated booklet.

George Stratford Oakum Co.

164 Cornelison Avenue,

JERSEY CITY, N. J.

Mrs. Wm. Leiferman.

Mrs. Wm. Leiferman, mother of Mrs. Garland, died last week at the home of her daughter in Des Plaines. This is the fourth death that we have been called upon to record in this family during the past six months. The sympathy of the trade is expressed on all sides.

Roger Dildine.

News has reached us of the death of Roger Dildine, three-year-old son of W. H. Dildine, superintendent of James Vick's Sons, Rochester, N. Y. Mr. Dildine has our heartfelt sympathy.

When You Buy Your ASTER SEED Of James Vick's Sons

You are coming directly to Headquarters.

We believe it is beyond dispute that this concern which has introduced more new varieties than any other Seedhouse and grows each year an average of more than double that of any competitor, has done more for the development and dissemination of High Grade Asters than all other American Seedsmen.

Before You Place That ASTER SEED ORDER

Look over our "ASTER BOOK FOR FLORISTS." Just notice it doesn't give you the impression that each and every variety is exactly alike in its superiority over all other kinds, but it points out to discriminating Florists what characteristics each variety possesses under certain — not all — conditions. The problem of what to grow this summer will be made comparatively easy if you study carefully our "ASTER BOOK FOR FLORISTS." If you have mislaid your copy, or if you failed to get one, just drop us a line saying you are a Florist and we will mail a copy immediately. Don't delay. Look this matter up at once.

One of these fine days you will need those seeds, and of course you want the best seeds. Get that "ASTER BOOK FOR FLORISTS" at once and become acquainted with all the leading varieties, not only those introduced by us, but all the leading kinds from whatever sources. Attend to this matter today.

VICK'S ROSE KING (New)

Companion to Vick's Violet King

(Flower reduced to 1-3 natural size.)

Nearly every Aster grower is acquainted with Vick's Violet King. If you are not, just look over the catalogues of almost any up-to-date seedsman, or better still, purchase some seed and grow it.

VICK'S ROSE KING is similar to Vick's Violet King in every respect except color. **NOW MARK THIS:** VICK'S ROSE KING in our estimation will surpass in popular favor any other Aster Novelty offered this year either by us or by any other seedsmen anywhere. There is money in it for the growers who get it first.

Price 25 cents per packet.

See our ASTER BOOK FOR FLORISTS.

VICK'S MIKADO PINK — ROCHESTER

(Flower reduced to ½ natural size.)

The story of its new name is of more than passing interest. Members of the Rochester Chamber of Commerce, which has recently chosen the Aster as the representative flower of this city, were so pleased with the color, shape and size of Vick's Mikado Pink, that they have selected it as the official flower of Rochester, and have requested that we rename it "Rochester." Therefore, in addition to its former name it now bears the honored name of this city.

During the recent Industrial Exposition reproductions of this Aster have appeared in countless papers, programs and private advertising matter. Thousands of souvenir spoons, watch fobs, and hat pins, carrying a design of this Aster, have been sold by various concerns. The design and coloring of this beautiful flower are an important feature of the mural decorations of the Temple Theatre, just finished, which, by the richness of its appointments, in many respects, surpasses any other playhouse between New York and Chicago. It will also appear in the color schemes and figurative designs of the decorations and furnishings of the handsome new lake steamship, The Rochester.

Naturally we are proud of the various honors which have been bestowed upon this flower, especially in view of our prediction last year that it would spring into popularity surpassing that of any other variety in the last ten years.

Prices: 1-64 oz., 20 cts.; 1-32 oz., 35 cts.; 1-16 oz., 50 cts.; 1-8 oz., 85 cts.; 1-4 oz., \$1.50; 1-2 oz., \$2.75; 1 oz., \$5.00.

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

ALMA WARD

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.
A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

Prices Rooted Cuttings

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000; 25 at the 100 rate, 250 at the 1000 rate.

Delivery February 20th

ALMA WARD

This beautiful Carnation is pure white except during the dark weather when it shows delicate splashings of pink similar to the Cattleya Orchid, increasing its popularity.

ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

Prices Rooted Cuttings

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery March 1st

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

THOMAS ROLAND, NAHANT, MASS.

Seed Trade

The Army of Unemployed.

Much thought is being given by one or two of the leading seed houses to the problem of the large army of unemployed gardeners who block the wheels of trade from daylight to dark especially in the busy season. It is not always the good men that cause the trouble; but largely those who cannot keep a job more than three months—the majority of whom are neither more nor less than ordinary laborers—although they call themselves gardeners. The solution of the problem will no doubt be found in a registry charge and a stern sifting out of the incompetents and malcontents. Some one must take the bull by the horns.

CATALOGUES RECEIVED.

Scott Bros., Elmsford Nurseries, Elmsford, N. Y.—List of Chrysanthemums, Roses, Carnations, etc., for 1910. A neat and useful 8-page pamphlet.

Old Colony Nurseries, Plymouth, Mass.—Established 70 years, this pioneer institution goes on the even tenor of its way. The catalogue is unpretentious, without pictures of any kind, but gives a good list of desirable hardy tree, shrub and herbaceous material.

Griffith & Turner Co., Baltimore, Md.—Farm and Garden Supplies. Rich but unostentatious in external appearance. This is a very "meaty" catalogue. We see that this issue is No. 23. We sincerely hope that the popular superstition regarding No. 23 will prove unfounded so far as the G. & T. Co. are concerned. Our regular advertisers say that the most potent charm to secure immunity would be to advertise in HORTICULTURE. It also looks that way to us.

McGregor Bros. Co., Springfield, O.—Floral Gems for Spring of 1910. All flower are "gems," but McGregor Bros. are happy in their selection of the finest gems in the floral kingdom as exemplified in the selections and collections with which they undertake to corral the public eye and the public patronage in this publication. There are colored plates—some of them mighty pretty—and illustrations in abundance. The artist missed his proper tint in the portrait—otherwise excellent—of Marechal Niel rose which adorns the front cover.

INCORPORATED.

Oswego, N. Y.—The Campbell Flower & Seed Co., capital stock \$10,000.

North Yakima, Wash.—Selah Valley Nurseries, capital stock \$5,000. Chas. Wood, A. C. E. Brown, incorporators.

San Diego, Calif.—San Diego Flower Association. Alfred D. Robinson, L. A. Blochman, S. M. Daley, Kate O. Sessions, Liman J. Gage, Rodney Stockes and Mrs. F. P. White.

Hollister, Calif.—Pieters & Wheeler Seed Co., capital stock subscribed entirely by A. J. Pieters, president; H. M. Pieters, vice-president; L. W. Wheeler, secretary. Mr. Wheeler was formerly with Vaughan's Seed Store of New York.

THE GLADIOLUS.

Planting, Culture, Storing, etc.

The best soil for the gladiolus is a sandy loam with gravelly sub-soil, fairly well enriched with cow dressing spread on the land in the fall and plowed under in the spring.

The small sized bulbs and bulblets may be planted about the last of April and first of May and the larger bulbs from that time in succession to the 20th of June or later and they may be had in flower in the latitude of New England from the last part of July until freezing weather.

Plant in rows 18 to 20 inches apart, placing the bulbs not more than three times the size of the bulb apart in double rows alternating thus—

o o o o o o o o
o o o o o o o o

and the foliage will touch and support itself and stand up perfectly without staking or artificial support of any kind. Depth to plant varies with size of bulb, soil, culture, etc., in most cases two to four inches deep being customary.

The soil should be kept well cultivated from planting time until the flowers begin to come; especially stir the soil after every rain to break up the soil particles and prevent evaporation of moisture. Later in the season mulching between the rows with grass or straw dressing would be better than cultivation.

Pick the flower spike when two lower flowers are open, place in water in a cool room and they will keep nearly two weeks. This early picking of the flowers conserves the strength of the bulbs and they make a better growth and produce more bulblets.

As to varieties, America is one of the very best for florists' use. White Sandersonii, Shakespeare, May and other light colored varieties, may be used in design work and are in good demand. Princeps, Mrs. Francis King, Independence and other varieties of large sized flowers and spike, sell well for bouquets and general decorative work.

The bulbs should be dug when thoroughly ripened, usually after hard frosts; the tops should be cut off close to top of bulb. The bulbs may be stored in shallow trays with air spaces between in a cool cellar, a temperature of about 40 degrees being best.

The bulblets may be cleaned off and bulbs sized ready for planting, during the winter after they get dried enough so that the bulblets will clean off easily.

E. R. M.

ROSES FLOWER OF FAIRFIELD AND PRESIDENT TAFT.

Your issue of February 5th, page 210, contains a query as to Farquhar's advertised rose Flower of Fairfield, whether it is a continuous bloomer. You may state on my behalf, that I saw the rose in question last summer flowering in Orleans, France, with Levassieur & Sons, also in a German nursery of Thuringia. Both parties assured me that the Flower of Fairfield had thus far proved a continuous flow-

ering Crimson Rambler, only remaining shorter in the wood, since its strength to make new wood was partly absorbed in the plant's efforts to produce flowers; otherwise in color, foliage, etc., it is simply a Crimson Rambler. It is reported to be a sport of the Crimson Rambler, originating with a Mr. Ludorf, and put on the market since the season of 1908-1909. I was told that the rose thus far did not grow taller than about six feet. How it will act in our climate will soon be established.

Referring to the rose President Taft, placed on our market by a Holland firm, such is the German rose Leuchfeuer, originated with the German rose grower, H. Kiese, who sold it to said Dutch firm, with the privilege of renaming it. The foreign lists continue to offer this rose as "Leuchfeuer," which in German means Beacon-light; it is a Bengal cross of Cramoisi-Supérieur with Gruss an Teplitz.

WINFRIED ROELKER.

Larimore, N. D.—S. F. Mercer & J. H. Magoris have opened a new seed store under the firm name of M. & M. Seed Store. They do a catalogue trade, buying, selling and growing seeds, plants, etc.

Roses and Carnations Our Specialty!

Flower Market Reports

BOSTON Mid-lent finds this market in normal condition, with demand fairly good on some lines and weak on others. Roses are in good demand, everything considered, and Killarney, White Killarney, Richmond and Beauty are being unloaded with success. White carnations and Acacia pubescens may also be recorded among the good sellers. Among the slow sellers are colored carnations, gardenias, lily of the valley, freesias, tulips, yellow narcissi single and double, sweet peas, stocks and violets. Business in general is dull according to all accounts and lacks spirit.

BUFFALO Trade has been on the quiet side for past two weeks and the market is in bad condition at times. Flowers have been plentiful on most lines, especially carnations of ordinary quality, which have been carried along awaiting an outlet, and finally the bargain man is looked for. Some excellent Beacon, Ideal, Melody, White Lawson, Perfection and Enchantress are had and the select stock has been moved freely. The severe cold weather of late has checked the sale of corsage flowers, and violets, peas and lily of the valley are overplentiful at times and little or no outlet is found. Beauties and other roses have had a good call and are not in oversupply. Maryland has done well this winter, also Killarney and Richmond. White Killarney becoming more popular with the trade, although the Bride is preferred, especially when floral work is had. Spring flowers are in good supply, especially tulips, narcissi and daffodils, which have had only a fair demand. Callas are fine and have sold well, while Easter lilies are plentiful and only normal in demand. Smilax and other greens are in good supply. Asparagus plumosus bunches are rather scarce in this section.

CHICAGO Stock is coming in quite freely now, and the florist who has a good shipping trade will wear a smile of satisfaction. On the other hand, he who depends entirely upon local sales for his trade will tell you that he is looking for livelier business soon. It is certainly true that some florists found more flowers on their counters than they could dispose of to advantage. This was especially true the last week in February. The closing Monday of the month found most of the market quite lively and flowers were of fine quality. It is daily more evident that the quantity of bulb stock coming in is more than the trade can handle at a figure satisfactory to the grower. Each year the number of bulbs grown has been a little larger, and the excess is particularly evident in the unsold stock of daffodils and narcissi. Tulips, so far, have moved off more readily. All kinds of roses are good and moving satisfactorily, Killarney still in the lead. Pansies and forget-me-not are the latest additions to the regular winter flowers. Lilies are not plentiful, and the usual anxiety regarding the supply for Easter is felt with some additions this year.

(Reports continued on page 349)

Flower Market Reports.

(Continued from page 347)

Carnations badly accu-
DETROIT mulated, roses after a
period of short crop now
coming in in excess of the demand and
a tumble in values all along the line
on account of the condition of these
two staples is the present situation in
the wholesale markets as described by
our Detroit correspondent. Retailers
all report slow business, attributable
in part to the disagreeable weather
conditions.

Business has been

INDIANAPOLIS good in nearly all
lines. Good Beau-

ties have been on the scarce side
while tea roses are sufficient for all
demands. Violets, sweet peas and all
kinds of bulb stock are in abundance
and sell well. Well grown lilacs, aza-
leas, rhododendrons, cyclamens and
bulbous stock in pans are very much
in evidence in all the stores with de-
mand good. Easter stock promises to
be of the usual good quality and quan-
tity though some growers will be short
of lilies.

In the depth of Lent,

NEW YORK with a succession of
dreary days with fog
and downpour, there is really nothing
inspiring that can be said about the
flower market of the metropolis. The
wholesale dealer looks in despair at
the heaped-up crates of carnations of
every hue, lilies of every size from
"weenies" up to "whoppers," lily of
the valley, daffodils, tulips and poeti-
cus by the carload and wonders, first,
how the grower will feel when the re-
turns are made; and second, how far
the sales commissions on the whole
cargo will go towards paying the clerks
on Saturday night. Only one item is
on the scarce side—that is American
Beauty roses. The only impression
this makes, however, is that there is
no occasion to cut quoted prices. Cat-
tleyas are very inferior at present.
Not only are they small, but their
keeping quality is of the lowest, a
condition due, perhaps, to unfavorable
weather conditions. In fact, the same
deleterious influence is getting in its
work on the cut flower product gener-
ally, so that the majority of material
received is distinctly inferior to that
coming in two or three weeks back.
Not much is said about Easter yet.
In the light of the heavy shipments of
lilies coming in at the present time,
however, the great anxiety of the
growers to hasten their lily crop for the
the anticipated Easter demand would
seem lacking in basis for confidence
in the ultimate compensation for the

extra work and worry. Retailers' win-
dows are brilliant with a gay profusion
and unusual variety of flowers, and
well they may, as the astute buyer
can almost make his own price on
many things.

TWIN CITIES While the cut-flower
business during Lent
is generally a little
dull, this year it seems to be an excep-
tion, for everybody reports good sales
since Lent commenced. Roses are still
scarce, the supply of carnations about
equals the demand, while violets and
bulb stock are plentiful.

Philadelphia reports the same un-
precedented conditions existing as de-
scribed last week. Business has been
so unprofitable and things are in so
chaotic a state that there is nothing
of interest or value which can be re-
corded at this time.

PHILADELPHIA NOTES.

An automobile party for the conven-
tion in Rochester next August is the
latest proposition among the upper ten
among the Philadelphia florists. John
Burton, George Anderson, John Gracie,
Edward Reid and Liddon Pennock are
already among the entries. The fa-
vored few who can go along as guests
are putting on their sweetest smiles
so as to get an invitation. A hand-
some prize is to be awarded to the
first party reaching destination.

NEWS NOTES.

Reno, Nev.—Eddy Floral Co. has re-
moved to larger quarters, 17 West Sec-
ond St.

Vancouver, Wash.—L. Gillott has
purchased the business and green-
house of A. Hanson.

Vincennes, Ind.—Frisz Bros. met
with a loss of \$2,000 recently caused
by the snow piling up on the glass.

There are some mighty tempting
special offers in our Buyers' Directory
this week. Don't fail to read them
through.

Pittsfield, Mass.—The heavy snow
of Feb. 18th broke about 500 square
feet of glass in the greenhouse of R.
Engleman on Elm St. Loss about
\$250.

Madison, Wis.—The La Crosse
Floral Co. will increase its capital
stock from \$10,000 to \$25,000. This
concern has four greenhouses, 27 x 300
ft., and cultivates six acres of land.

Worcester, Mass.—The Aitken Co.,
it is rumored will leave Worcester be-
cause of their inability to find suitable
quarters. Carl Bavier who has been
manager of the Worcester store will
be associated with H. F. A. Lange.
henceforth.

SOUTHERN WILD SMILAX
Fully Guaranteed.

Roses, own root, 2½ inch. Our list comprises among others the following standard commercial sorts: Pink Killarney, Richmond, Bride, Bridesmaid, Perle, Kaiserin and Ivory. We can furnish nice, clean, healthy, well established plants, carefully grown from selected stock, at \$5.00 per 100; \$45.00 per 1000. Also Maryland at \$6.00 per 100; \$50.00 per 1000; and White Killarney at \$8.00 per 100; \$75.00 per 1000. American Beauty \$9.00 per 100; \$80.00 per 1000. S. S. Pennock-Meehan Co., the wholesale florists of Philadelphia, Pa., 1608-1620 Ludlow St., Philadelphia, and 1212 New York Ave., Washington, D. C.

Roses, grafted, 2½ inch; done as they ought to be done by expert workmen on genuine Dickson Manetti stocks—only the most vigorous Manettis being selected, and all of the hardiest constitution. Far superior to plants grown on French and other continental Manetti stocks. We offer Pink Killarney, Richmond, Bride, White Killarney, Maryland, Bridesmaid, Perle, Kaiserin and Ivory: \$15.00 per 100; \$120.00 per 1000. S. S. Pennock-Meehan Co., the wholesale florists of Philadelphia, Pa., 1608-1620 Ludlow St., Philadelphia, and 1212 New York Ave., Washington, D. C.

CERTAINLY!

Editor of HORTICULTURE:

Dear Sir:—I presume you do not object to receiving now and then an unsolicited tribute to the value of your publication, HORTICULTURE, as an advertising medium for those having anything in this line of business they desire to sell.

I recently advertised a greenhouse for sale, in three consecutive issues of your journal, and it brought me a customer within twenty-four hours of the publication of the last one. I later received inquiries from other buyers and have no doubt I could have sold another if I had it. I think your paper must be very widely read by florists generally.

Very truly yours,

A. H. HOBART.

Bridgewater, Mass., Mar. 1, 1910.

PERSONAL.

Lake Forest, Ill.—John Tipley is now gardener for A. B. Dick, succeeding J. W. Scharbenger.

Boston, Mass.—Chas. H. Carr formerly with Joseph Breck & Son, has taken a position with the Holmes Seed Co. of Harrisburg, Pa.

St. Paul, Minn.—Fred W. May has severed his connection with L. L. May & Co. and will engage in the nursery business at North Yakima, Wash.

James Rust, who has been on the M. F. Plant estate at Groton, Conn., has taken a position as foreman with Wm. Downs, on the Dumaesq estate, at Chestnut Hill, Mass.

Rufus J. Lackland has resigned as president of the board of trustees of the Henry Shaw estate, St. Louis, on which he has served the past 20 years. Mr. Lackland's reason for resigning is the infirmities of old age, he being now ninety years of age.

FRENCH GARDENER'S SOCIETY OF LONDON.

On the 29th of January, the 21st anniversary of this society was held at the Cafe Royal, London, Eng. Monsieur Philippe de Vilmorin was to have occupied the chair, but owing to the floods in Paris was prevented. Monsieur de Lalande, the Consul General of France, was therefore invited to occupy the post. After the usual loyal toasts, Sir Albert Rolit made a splendid speech in his finest form, congratulating the society on having attained its majority and pointing out how it had by its influence contributed to the good feeling existing between English and continental gardens.

The chairman proposed the toast of the evening, success to the "Société Française d'Horticulture de Londres." Mr. George Schneider responded, saying that for a large measure of their success they were indebted to those English nurserymen who had found places in their establishments for the young men who came across the Channel to learn English and perfect their knowledge of horticulture. He drank prosperity to English horticulture. Mr. Harry Veitch, of Chelsea, responded. Other toasts were "Officers of the Society," "Past Presidents," "The Press" and "The Chairman," the speakers being Mr. H. B. May, Edmonston, M. Guilloud, T. Bevan, etc.

It was resolved that a telegram of sympathy be forwarded to Mr. Ph. de Vilmorin. It was also resolved that a collection be made in aid of the fund opened by the Lord Mayor for the sufferers by the Paris floods. The sum of \$500 was the result.

Several letters were read from friends unable to be present, among them one from M. Louis Gentil of Brussels, the editor of "La Tribune Horticole" and a former secretary of the society. The dinner was well supported both by French and English amateur and professional gardeners. At the close of the proceedings a presentation of a handsome Sevres vase was made to Mr. George Schneider, the chairman of the society, in recognition of his services to the young Frenchmen resident in London.

C. HARMAN PAYNE.

HELP WANTED

Wanted, Assistant Gardener

Swede, particularly experienced in ordinary greenhouse work as well as in the culture of grapes and nectarines under glass.

Address—H. J. B., Horticulture

AN EXPERIENCED NURSERYMAN

For propagating shrubs, herbaceous and bedding plants. State references, age and wages wanted. Address

Rhode Island Nurseries, Newport, R. I.

WANTED—A foreman, well posted in trees, shrubs and perennials, to take charge of park plantings, street and park trees. Must be able to design and execute planting plans and know how to handle men. Promising position for right man, single man preferred; give references and state salary wanted. Address Theo. Wirth, Supt. Parks, Minneapolis, Minn.

WANTED—Second man in commercial plant growing establishment in middle West. Wages \$12.00 a week. M. W., care HORTICULTURE.

For San Jose Scale, and to Improve Health of Tree and Shrub.

BOWKER'S

Concentrated

Lime-Sulphur

Made in New England. FRESH from Factory to User.

NOW IS THE TIME TO ORDER Lime-Sulphur, which should be used while the trees are dormant. It destroys San Jose and all other Scale Insects and fungous spores wintering on the bark. It improves the health of the tree by destroying the mosses and lichens. As J. H. Hale says: "It smoothes up the trees."

All ready to use by adding cold water. No boiling, no special mixing plant required; no guesswork as to formula. Just add **cold** water, and spray.

Before spraying your orchard, post yourself about Bowker's sprays.—Write today for prices.

BOWKER INSECTICIDE COMPANY,
43 Chatham St., Boston, Mass.

Manufacturers of Bowker's PYROX for fruits and vegetables.

CHICAGO NOTES.

Joliet Jottings.

An additional range of houses is in contemplation to be erected the coming spring by the Thompson Carnation Co. This company has been handicapped by a suit which has been in the courts for a long time, but a termination is now expected. Chas. N. Fish, manager, is looking forward to extensive improvements as soon as litigation ceases.

The Chicago Carnation Co.'s excursion to Joliet, briefly mentioned in our notes last week, was much enjoyed. Manager Pyfer was very attentive and hospitable. The three new favorites, Mary Tolman, Sangamo and Conquest, were especial objects of interest. Each of a decidedly different order, seems sure to be a winner in its class. Under the supervision of Mr. Peterson, the six carnation varieties to which they confine their stock reach a stage very near perfection. They

also have young stock of violets and chrysanthemums ready for immediate delivery, and which are listed in another part of this paper.

Irish Soil for the President.

Twelve square feet of real Irish sod have been called for to make a miniature Emerald Isle upon which President Taft will stand to deliver his address to the Irish Fellowship Club in Chicago, March 17th, at the La Salle Hotel. It will be sent by express and is expected to reach here a week in advance of the day. It will be taken to a greenhouse till used, and after the eventful night it is planned to have it preserved for future transplanting in some one of Chicago's parks.

The Easter Lily Outlook.

The prospect of lilies for Easter is the all important topic among the growers. Considerable anxiety is expressed and various devices are resorted to to coax the plants into bloom. One Chicago firm has put in a small boiler on purpose to help out his lily

house, and by overhead pipes will keep the temperature high enough to bring out the blooms—providing it does not work some other way. Another firm has tried heavy feeding, and still another high temperature and no feeding. A few weeks of sunshine would do more good than anything else.

A Boulevard Scheme.

A good scheme proposed by a landscape gardener is the transforming of the old abandoned Illinois and Michigan canal bed into a great state road for automobiles and other vehicles and a path for pedestrians. It would reach far into the state of Illinois and at suitable points could be enlarged into small parks. The banks could be planted with trees and shrubs and a branch road extended to historic Starved Rock and into Deer Park. An unsightly object would be changed into something beautiful and extremely useful. O. C. Simonds has the credit for the practical suggestion. The Illi-

nois Manufacturers' Association is interested in the proposition.

A Chicago Lady Florist.

Under the title of a Successful Woman Florist, Miss Charlotte Megchelsen has been given a very flattering "write-up" in the Sunday Tribune. Miss Megchelsen has been in business ten years and has attained a very fair degree of success. She thinks her first mastering the principles of bookkeeping has had much to do with her ability to successfully conduct the business. Personally, the writer would add that the attractiveness of the store and never failing courtesy of the proprietor are also very strong factors in her success as a business woman.

Destroying the Sky Line.

Chicago club women are opposed to the ordinance now pending, allowing billboards to be placed upon buildings not more than eight stories high. They are thoroughly in earnest in their opposition and have sent resolutions condemning the proposed ordinance to each member of the council.

Around Town.

Some very severe weather was experienced last week when the thermometer dropped far below zero. Some growers report as low as 16 deg. in their vicinity.

Frank Oechslein was the pioneer shamrock grower of Chicago. This year has a still larger stock than last year. His advertisement appears in another part of this paper.

The Chicago Rose Co. will have the first floor in the Fairbanks building and occupy the basement as soon as the rooms are ready. An entrance from the sidewalk has been made.

Chicago florists are not feeling much anxiety over the threatened strike of the elevator men, as nearly or quite all, both wholesale and retail, have their places of business either on the first floor or in the basement.

Every florist in the down-town district, and many who are not, will be willing to admit that the amount of bulb stock grown this year is more than can be used to advantage. But the Holland salesmen will talk bulb sales just as fluently next year and quite probably just as persuasively.

Personal.

Richard Gloede of Evanston fell on the ice and very severely injured himself, breaking his collar bone and injuring his shoulder blade.

John Sinner, manager of the Flower Growers' Market, states that the rumor that the market is to move from its present quarters to make room for a cafe is false. They have their lease for their present quarters.

John Starrett, for several years in the wholesale store of Bentley & Coatsworth, is now holding the position of decorator at the La Salle Hotel. Friedman no longer has a stand in this hotel, the management placing all their work in charge of Mr. Starrett, who is well fitted for the place.

Visitors: G. L. Freeman, Holyoke, Mass.; James Bouten, Minneapolis, Minn.; Geo. F. Crabb, Grand Rapids, Mich.; Andrew Anderson, Batavia, Ill.

Immediately Available Plant Food

EVERGREEN BRAND FLOWER FERTILIZER

It permanently enriches the soil. It prevents the onslaught of plant disease or insect pests.

Can be used at any time during the growing season.

Put up in 12 pound cans, price \$2.00

For sale by leading jobbers. Address

D. D. Johnson, 64-66 Wabash Ave., Chicago.

Write for further information

The Mastin Automatic White-wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.

The pump is of brass throughout, simple and powerful.

The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Just the thing for distributing liquid fertilizer in greenhouses.

Ask your dealer about our EXTENSION HOSE, EXTENSION RODS, and the MASTIN WHITE-WASH NOZZLE for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. Mastin & Co.,

3124 West Lake Street
CHICAGO, ILL.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{3}{4}$ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send us for testimonials from growers using them.

Iron Rafter House

Here is an interior view of L. B. Coddington's rose house at Murray Hill, N. J. The photo was taken, looking toward the side, to show you how light—how extremely light—and still how thoroughly the roof is framed.

You can scarcely tell the eave plate from the angle iron purlins, it is so light.

This is a construction that you can absolutely depend on as being proof against high winds and heavy snows.

When you are ready to build, write us.

SELECT FERNS For Fine Store Trade

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Pieroni, Whitmani, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

Don't Get Left—Last Call on Rooted Cuttings, April Delivery

ited quantity of fine rooted cuttings for April delivery, which, from past experience, however, won't last long. Meanwhile our

Carnation Dorothy Gordon

has added to its laurels. At the Toronto show, just closed, a gold medal was awarded this splendid carnation when exhibited in competition with others. Carnation Dorothy Gordon is a winner—a winner of prizes and a winner of profits, so our customers are learning.

Some of its merits are: strong constitution—absolutely free from disease; wonderful productiveness—50 per cent. more flowers than Enchantress; good color—clear, uniform pink; splendid form and keeping qualities—flowers last four and six days after cutting; and enormous size—averaging three inches in diameter. We know of no other variety possessing all these strong qualities.

Order NOW some of the splendid stock we offer for April. Prices remain the same—\$10.00 PER 100, \$75.00 PER 1,000—and you'll find, long before the season is over, that it was the best investment you made this year. If you want to investigate first, come to see us, or write for particulars—but don't delay, for the stock won't last!

Burpee's "Re-Selected" Gigantic "Orchid Flowered" SWEET PEAS

OF THE

True "Spencer" Type

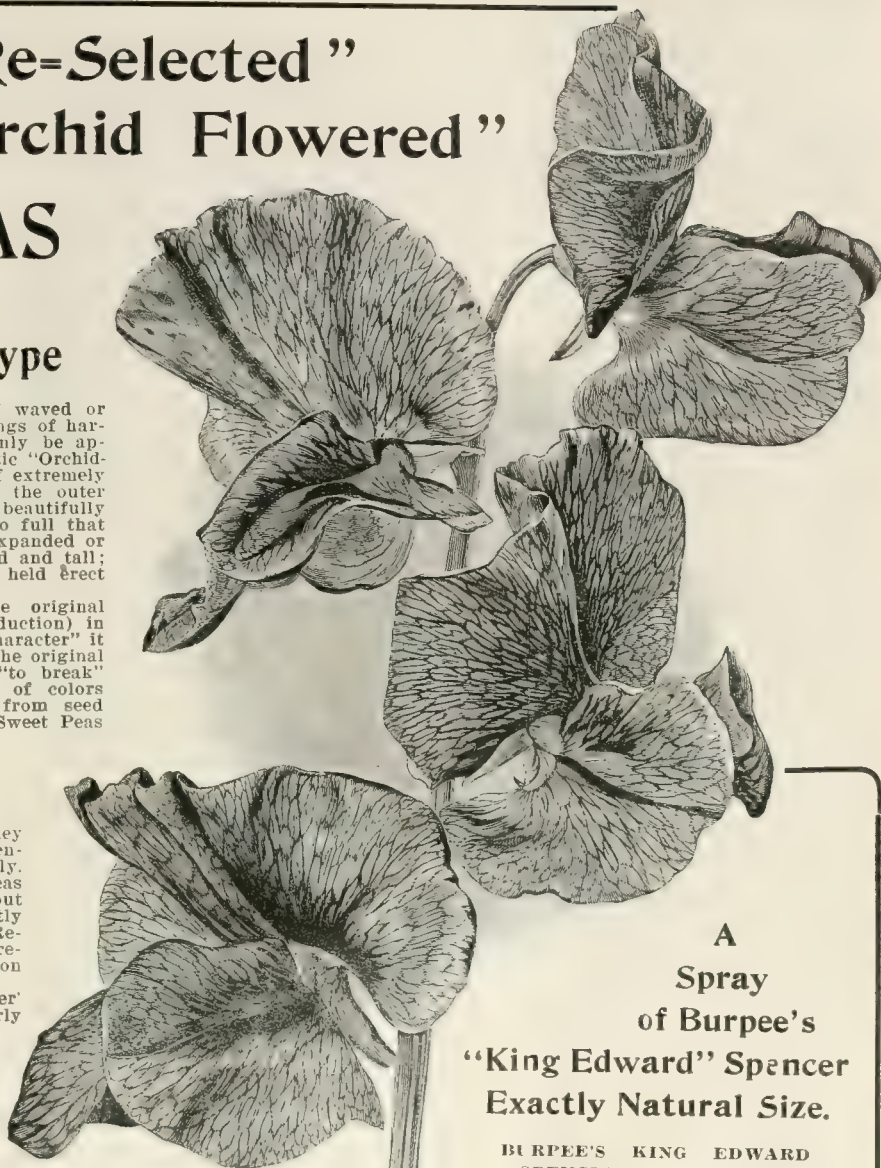

Because of such enormous size, of waved or fluted appearance and charming blendings of harmonious colors, this **New Type** can only be appropriately described as Truly Gigantic "Orchid-flowered." The flowers are not only of extremely large size, but are distinct in having the outer edges of the standard and wings beautifully crumpled or waved; the tissue being so full that there is not room for it to lie flatly expanded or smoothly rolled. The standard is broad and tall; the wings are broad, well spread and held erect by the keel.

We were the first to grow the original "Countess Spencer" (prior to its introduction) in America. By reason of its "sportive character" it has required years of labor to perfect the original "Countess,"—but this same tendency "to break" has resulted in giving us a number of colors which already come reasonably true from seed and which will delight every lover of Sweet Peas who can afford to buy them.

CAUTION

While most profuse in flowering, they are very shy seeders and the true "Spencer" type can never be produced cheaply. You can buy so-called Spencer Sweet Peas at one-half to one-fourth our prices, but such "cheap seed" can not be intelligently and carefully grown from the purest Re-selected Stocks such as ours and will result only in disappointment. See quotation below:

"It is well known that the 'Spencer' varieties of Sweet Peas do not seed nearly as freely as those of the old type. It would not be an exaggeration to say that some of the choicest 'Spencers' do not yield a tenth of what the old varieties did, and this in a favorable season."—From the Gardeners' Chronicle, London, England, September 11, 1909.

A
Spray
of Burpee's
"King Edward" Spencer
Exactly Natural Size.

	Pkt.	Oz.	¼ lb.
3133 Asta Ohn Spencer. A charming soft lavender	\$0.10	\$1.35	
3134 Apple Blossom Spencer. Of same coloring as the popular "Apple Blossom"	.10	.85	
3135 Aurora Spencer. An exact counterpart of "Burpee's Aurora Sweet Pea." Half-size packet (fifteen seeds) 15 cts.	.25		
3138 Beatrice Spencer. White ground, tinted with pink and buff.	.15	1.10	
3139 Countess Spencer. A soft rose-pink. (Per lb. \$2.50)	.10	.25	\$0.75

3176 Burpee's White Spencer. (Re-selected.) (Per lb. \$3.50)	.10	.30	1.00
3181 Surprisingly Superb New "Spencer" Seedlings. A grand mixture of varieties of the true "Spencer" type. (Per lb. \$4.00)	.15	.40	1.10

In ordering, please state whether you want also a copy of **BURPEE'S ANNUAL FOR 1910**, an elegant book of 178 pages and a trustworthy Guide, which has been long and favorably known as "The Leading American Seed Catalog."

Every Florist and Market Gardener who is willing to

pay a fair price for the Best Seeds it is possible to produce should consult **BURPEE'S BLUE LIST FOR 1910**, which will be mailed also—if you mention **Horticulture**. This **BLUE LIST** is never sent to private Planters, even if asked for.

Plant Novelties From China

Climbers are an important element in the Chinese flora, and many of them rank amongst the most desirable of their class for ornamental purposes—*Wistaria sinensis* and *Ampelopsis Veitchii*, for example. Climbing plants are useful in a great variety of ways and add beauty and charm wherever planted.

In a state of nature climbers affect woodlands and thickets, either scaling tall trees or rambling over shrubs. The plants they grow among and climb over serve not merely as supports, but also afford protection from draughts. In planting climbers it should always be borne in mind that the majority object strongly to exposure to draughts. Often one sees elaborate structures of wire fencing, etc., erected for training climbers upon, yet the plants do not thrive under such conditions nearly as well as when planted at the foot of an old wall, base of tree trunks, or with rough, bushy stakes to trail over. The explanation is to be found in the fact that the simpler methods afford better protection from cold draughts.

Of the flowering climbers undoubtedly one of the finest and

CLEMATIS MONTANA VAR. RUBENS

As Grown in Kew Gardens.

CLEMATIS MONTANA VAR. WILSONI

As Grown by Messrs. Veitch.

most popular class is *Clematis*. This genus is abundant in China, where no fewer than 65 species occur. Among them we have *Clematis florida* and its varieties, parents of the reputed hybrid *C. Jackmani*. One of the commonest and most widely distributed of all species is the old and well-known *C. montana*. This is an extremely variable plant and several of the forms are great improvements on the type; indeed, some of them are worthy of specific rank. Omitting the garden forms of clematis, we have in *C. montana* var. *rubens*, undoubtedly the most strikingly beautiful of all known clematis. This plant, native of the mountains of western Hupeh, is hardier than the type and very distinct in every way. The foliage is dark in appearance, somewhat fleshy, reddish below and occasionally with a light grey band down centre of leaf on upper surface. The flowers are each two to three inches across, bright rosy red, borne in clusters in the axils of the leaves on the old wood. Its culture is of the simplest, a sunny position and a liberal supply of water at the roots being the essentials. It flowers in a small state and the color, unique in the genus, compels attention by its attractive brilliancy. The

floriferousness of the plant is well shown in the accompanying illustration prepared from a photograph taken in the Royal Gardens, Kew., in early June of last year. By planting "rubens" and the old white flowered form side by side and letting them intermingle a wonderfully fine effect would be obtained.

Clematis montana var. *Wilsoni* is an August flowering form with large axillary clusters of pure white flowers, each two to three inches across. The foliage is bright green with leaflets larger than in the type, ovate-cordate, wrinkled above. *C. montana* var. *sericea* is an early (late May and June) flowering form with hairy leaves and pure white, solitary, axillary flowers, three or four inches across, borne on stout stalks six inches long. Both these varieties are na-

CLEMATIS ARMANDI

dives of the upland thickets of the Chino-Thibetan borderland, but are local in their distribution.

The above three forms are easily propagated from cuttings in the ordinary way and come true from seed, the latter fact proving that they are well fixed varieties if not distinct species.

Another fine *Clematis* is *C. Buchaniana*, a strong-growing species with pinnate leaves and erect, axillary panicles, eight or nine inches tall, of nodding, tubular, pale yellow flowers, which are borne in great profusion.

A hardy evergreen *Clematis* was a desideratum in gardens until the introduction of *C. Armandi*. Given the protection of a few pine branches, this species will in all probability succeed here in New England. Indeed, Messrs. Farquhar declare it to be seemingly quite hardy with them at their Roslindale Nurseries. In a general way this new clematis may be likened to the old greenhouse favorite, *C. indivisa*, a native of New Zealand. The leaves of *C. Armandi* are 3-foliolate and leathery; the leaflets are ovate, six inches long,

two and a half inches wide, acuminate, sometimes cordate at base, prominently veined and glabrous. The flowers are borne on the old wood in axillary clusters and vary from a dozen to thirty in a cluster. The individual flowers are about two and a half inches across, white, often rosy-pink on the back, and fragrant. This species is a rapid grower and flowers in April. On scrub-clad mountains in Central and Western China, between 2,000 and 4,000 feet, it is very common festooning bushes and rocks, and when in flower presents a picture not easily forgotten.

Lonicera tragophylla is a new climbing honeysuckle of much merit. In habit and general appearance it resembles the common *L. Caprifolium*. The leaves are ovate and glaucous, the flowers rich golden yellow and produced in terminal heads. Each head bears 10 to 20 flowers, each five or six inches long, tubular and slightly fragrant. A woodland species of rapid growth *L. tragophylla* is a distinct acquisition, but it objects very strongly to the knife. Planted in a partially shaded place and trained to a stout pole, or, better still, at the foot of a deciduous tree and allowed to ramble at will, this species presents a beautiful sight when in flower.

Actinidia is another beautiful class of climbers, but, unfortunately, with the exception of *A. arguta* of doubtful hardiness hereabouts. The finest of all, *A. chinensis*, is fairly hardy across the water, but annually gets cut to the ground in the Arnold Arboretum. If planted in woodlands or in a sheltered situation it might possibly come through in better shape and its ornamental character is so great that it deserves a thorough trial. In a wild state *A. chinensis* is a woodland plant, scaling to the tops of tall trees. The leaves are ovate to orbicular, six to nine inches long, and together with the young growths covered with masses of reddish hairs. The flowers are pure white, quickly changing to buff-yellow, one to two inches across, deliciously fragrant and produced in utmost profusion. These flowers are either all male or male and female, and it is plants having the latter flowers (which by-the-by, are twice the size of the male flowers) which are needed in order to secure a crop of fruits. These fruits are oval to roundish, $1\frac{1}{2}$ to $2\frac{1}{2}$ inches long, 1 to $1\frac{1}{4}$ inches across, with a thin brown, more or less hairy skin. The flesh is dark green, luscious, with small seeds imbedded therein. The flavor somewhat resembles that of a good gooseberry. This fruit is delicious as dessert and makes a fine preserve.

With its handsome foliage, fragrant and ornamental flowers and delicious fruit *A. chinensis* possesses all round qualities seldom combined in a single plant, and those who succeed in its culture will be amply repaid. Though discovered by Robert Fortune as long ago as 1849, the writer was the first to introduce it to the Occident. Further, he was privileged to be the first to introduce the fruit to foreign residents at Ichang and other parts of western China. These residents have dubbed it "Wilson's Gooseberry," and he will be pleasantly remembered in China by this fruit when his work is probably forgotten there.

S. W. Wilson.
